Name Needed for Street S. of Ave. D

People living South of Ave. ita Highway, have expressed a last Monday in January. desire that their street have a different name. The suggestion is a good one. Other streets are named, and have markers at each intersection for guidance of strangers.

The Lions Club bought street markers last year for all streets in town. The City erected them and many people were made Since then three other streets have been named by the club through the City Commissioners. A project of getting all houses in town numbered has been discussed by Lions. It is a worthy undertaking and deserves more active work.

If you have a suggestion for an appropriate name for the Burk-Wichita Highway street, send it to the Star office or to the Lions club. It will be presented to the City Commission for consideration.

Bulldogs Lose Bi-District Game to 12-Man Jackrabbits

The Fighting Bulldogs lost the bi-district game in Wichita Falls last Friday night to the Bowie Jackrabbits, as hundreds upon hundreds of Burkburnett fans yelled and cheered the crippled Bulldogs on.

Bowie scored first with the extra point making the score 7 to 0. The Bulldogs tied the score up soon after, when Johnny Crane got loose and raced 56 yards for a touchdown, with Bill Reasoner kicking the extra

Bowie scored again but failed to make the extra point. The game stood at 13-7. At this stage of the game, one of the rashest acts of unsportmanlike conduct ever witnessed by Burk fans was performed by a Bowie player. "Peanut" Boyd was on his way for a touchdown when Hall of Bowie dashed out on to the field and tackled Boyd to of the fans in both stands. The referees ruled that in their opinion Boyd would not have scored, so the Jackrabbits drew only a fifteen yard penalty. Just what would have happened had body. Burk tied the score at that time is anybody's guess. However, after such a slap in the face, the Bulldogs lost some of their fighting spirit and never scored again. Bowie scored once more, with the game ending 19-7. Charles Wayne Counter, one of the main-stays in the backfield, was sorely missed in the lineup. He has been suffering from a severely bruised leg and did not play any of this game. Other injuries on the Burk team slowed down the offense and weakened the team in other departments.

Bowie plays Garland at Garland Friday afternoon for the quarter-finals.

During Past Year

During the past eleven months Burkburnett has experienced its spree in many, many years. In most every part of the city new homes have gone up, with a great number of apartments added to homes already built.

According to D. C. McNeill, water superintendent, 117 new homes have been completed since 1949 started.

At present several other new homes are under construction. The Eastern and Southern parts of town have added the most new units. There is still a definite housing shortage in Burkburnett. There is no way of knowing how many people now living in Wichita Falls would rather live here if adequate housing could be found. Probably another hundred or two houses would be occupied immediately.

ARE WE ASKING FOR IT?

You can't have your cake and also eat it. This goes for a socialized state or free individualism. You ask for cake in government control of public utilities, natural resources and education, for free medical care, low cost houses, pensioned war veterans, increased farm subsidies, higher old age social security benefits, unemployment insurance, high minimum wages. But by eating it, we lose much of our valued individualism, highly prized free enterprise. We wouldn't have our country without certain necessary benefits. Conditions sometimes mean a relinquishing of some rights. But it has been proved that in many instances where government steps in and private operation out, government service is generally higher. The government isn't a give-away program, the taxpayers foot the bill. The trouble with many of us here in Burkburnett, is that we don't look at what is under the icing on the cake, before we eat it.

> Rickey Landrum Birthday Nov. 21

The home of Mrs. F. G. Jeffers on November 21 was the scene of a gay birthday party honoring her grandson, Ricky Landrum on his third birthday.

The little guests enjoyed the play hour during which time moving pictures and colored Kodak pictures were made of the group. Then the children were taken to the dining room where Ricky opened his gifts with the assistance of some of the little guests. He blew out the three candles on his lovely cake while every one sang: 'Happy Birthday".

Every International Truck in the line is all new. And every new International Truck from 4,200 to 90,000 pounds GVW is HEAVY-DUTY ENGINEERED!

That means the new International Trucks give you lower operating and maintenance costs. It means they'll last longer. Look at the record.

Joy Sessums

For 18 straight years International has been first in

the sale of heavy-duty trucks (16,001 pounds and over, GVW). Cost-conscious men who buy these trucks buy on a basis of performance proved by cost records.

The same management, the same engineers, the same production men, the same test experts who have kept International Trucks the outstanding value in the heavy-duty truck field, have developed every single new model in the new International Truck line.

Come in -find out what heavy-duty engineering means in terms of operating economy. See how heavy-duty engineered truck stamina is combined with new comfort and ease of handling. These Things Will Happen If The Anti-Trust Lawyers Have Their Way

When the anti-trust lawyers from Washington filed their suit against A&P, we told the American people, our customers, our suppliers and our employees how this attack would affect them.

We said that this attack, if successful, would mean the end of A&P as you know it.

We said that it would mean higher food prices for American consumers.

We said that if they succeed in destroying A&P the way would be cleared for the destruction of other efficient large-scale retailers.

We thought the American people were entitled to know about this threat to their welfare and standard of living. Since that time, however, the anti-trust lawyers have been making speeches, talking over the radio, writing letters and giving stories to the newspapers, in which they say we are all wrong.

They say that this suit will not close a single A&P store; and that instead of raising food prices it will lower them.

And they have tried to give the impression that nobody will be

hurt by this decision except the present owners of A&P.

We don't think that the American people want to be confused by these statements. We know that when they have the facts, they will understand that this case can affect the living standards and

the way of life of every American citizen.

Here are the facts:

It Will Destroy A&P

The anti-trust lawyers have repeatedly stated that "the suit will not result in the closing of a single A&P store", and that "the purpose of the suit is to enjoin A&P from continuing activity which has been held to violate the law."

The fact is that the suit is designed not only to "enjoin" A&P from alleged illegal activities, but actually to destroy the company.

Here is what they have asked the court to do:

Break up A&P's retail stores into seven groups, each of which must be sold to different owners, and operated under new management.

Order us to sell A&P's factories, which produce many of the fine foods you find in our stores, to still other new owners.

Prevent any of the seven groups of stores from operating any of the factories.

None of the present owners, who have made A&P what it is today, can have anything to do with either the stores or the factories.

The first A&P store was opened 90 years ago. For the past 50 years the

Company has been managed by George L. Hartford and John A. Hartford.

A TO

These are the men who have pioneered the policy of low-cost, low-profit, low-price food retailing which has won A&P the patronage of millions of American families and given them more good food for their money.

If the anti-trust lawyers have their way, these men and other company executives will be completely out of the picture. No one can predict what the policies of the new owners of the various parts of A&P will be.

No one can predict that they will sell the same quality food at the same low prices, or that they will keep the same employees, or give them the same high wages, short hours, pensions and security.

Nor, despite the anti-trust lawyers' statement, can anyone tell how many A&P stores will remain open or will be closed.

So, while there may be a food store where your A&P is now located, it won't be your A&P store.

Make no mistake about it. If the anti-trust lawyers win their suit it will mean the end of A&P as you know it.

Your Food Will Cost More

The anti-trust lawyers have repeatedly stated that the suit will not increase, but should decrease, grocery prices.

Anybody who has ever shopped in an A&P store, or has ever taken a high-school course in economics, knows better than that.

Everyone knows that A&P's policy has always been to keep costs and profits at a minimum so that it can sell good food cheap.

The very heart of the anti-trust lawyers' case is that A&P's methods, which they claim are illegal, have enabled the company to undersell competitors. How can anyone possibly say that you will get lower food prices by eliminating the company that has done so much to bring them down? Actually, there is no question that this suit, if successful, will mean higher

Here is just one of a number of reasons:

food prices for A&P customers.

We manufacture many of the quality foods we sell in our stores, such as Bokar, Red Circle and Eight O'Clock coffees, Ann Page foods, White House milk, and many others.

The anti-trust lawyers admit that we pass along these manufacturing savings to our customers in the form of lower prices.

But, the anti-trust lawyers have asked the court to order us to get rid of our manufacturing facilities, which would put an end to all these savings.

This means that if these A&P brands continued to be manufactured, you would have to pay higher prices for them wherever you found them.

The anti-trust lawyers say that food prices would go down in other stores. They claim that food manufacturers would be able to sell cheaper to other grocers because they would not have to make up alleged losses they now incur in selling to A&P.

This, of course, is pure nonsense. The suppliers who voluntarily seek our business and are now rushing to our defense obviously find it profitable to deal with A&P. Actually, their sales to this company enable them to build up their volume, reduce their costs, and sell more cheaply to all grocers.

The elimination of A&P from the picture would tend to increase, rather than decrease, the wholesale cost of food; and this, in turn, will be reflected in increases in retail prices.

Make no mistake about it. If the anti-trust lawyers succeed in putting A&P, out of business you will find your food bill is higher.

Others Will Be Hurt

The anti-trust lawyers have insisted that this suit will not affect other distributors, "nor will it destroy any efficiencies of mass distribution."

The fact is that the anti-trust lawyers ask the court to break up the company, make it get rid of its admittedly legal manufacturing operations and in general destroy many of the efficiencies which have enabled it to sell food cheaper.

If such an attack is successful, it immediately raises the likelihood of similar attacks on other chain stores.

The anti-trust lawrence are saying that they "do not contemplate and the saying that they are saying they are sayin

The anti-trust lawyers are saying that they "do not contemplate any other suits of this nature at this time."

But that does not mean that they cannot undertake such suits at any future time if they win this case.

As a matter of fact, the anti-trust lawyers made practically the same allegations against two of our largest competitors that they are making against us. And it can also be used as the basis for an attack against other grocers and merchants in other lines.

There are today literally thousands of chain stores, voluntary groups and individual merchants operating with the same methods and in the same pattern here under attack.

If A&P is destroyed, no businessman could safely pursue an aggressive sales policy designed to lower prices and give his customers a better deal if by so doing he takes business away from any competitor.

Even if the anti-trust lawyers have no intention now of prosecuting other suits, a decision against A&P will establish a precedent that could be used by the present anti-trust lawyers, or any future anti-trust lawyers, to destroy any efficient business that buys cheaply, sells cheaply, and grows big in the process.

Such a decision would mean the end of the vigorous, healthy price competition which has given this country the highest standard of living ever enjoyed by any people anywhere in the history of the world.

The anti-trust lawyers are trying to give a new interpretation to the anti-trust laws that, instead of preserving competition, will reduce competition.

They are trying, by court decision, to impose a new kind of economic policy.

on the people of this country.

Make no mistake about it. If they succeed in destroying A&P they will be destroying the method of distribution that has helped make the American standard of living the envy of the world.

JESUS, THE SON OF GOD

We have studied what Christ did and what he promises to do. This week let us notice that He is our example.

"For hereunto were ye called: because Christ also suffered for you, leaving you an example, that ye should follow His steps." (I Pet. 2:21). We are commanded to follow Christ. He is a perfect example. It is a mistake to glory in men and look to them as our example. We can only follow faithful men and imitate their faith as they followed Christ. Even the apostle Paul himself said: "Be ye imitators of me, even as I also am of Christ." (I Cor. 11:1). Regardless of what others do, we can follow His steps. After all, the gospel is addressed to individuals. It is a matter of personal responsibility. "So then each one of us shall give account of himself to God." (Rom. 14:12). "Take heed, brethren, lest haply there shall be in any one of you an evil heart of unbelief, in falling away from the living God." (Heb. 3:12). It is possible to fall away from the living God.

It is not only possible to fall away from the living God but it is certain to happen when an individual ceases to take Jesus, the son of God as their example in the things they say and do. Let Him be your guide and example in everything is our plea.
