Polio Drive For Funds Off To Good Start

Sheppard Air Base Made Permanent Plans \$50,000,000 Expenditure Early For Wichita County, Texas

Secretary for Air W. Stuart Symington will announce officially Thursday (Jan. 19th) that Sheppard Air Base is a permanent Air Force installation.

This was revealed to the Wichita Record News Wednesday night in a joint telegram sent from the nation's capital by Senators Lyndon Johnson, Dan Connally, and Congressman Ed Pett.

Business leaders immediately hailed news with jubilation and saw a huge impact on our economic life. They predicted these continued benefits:

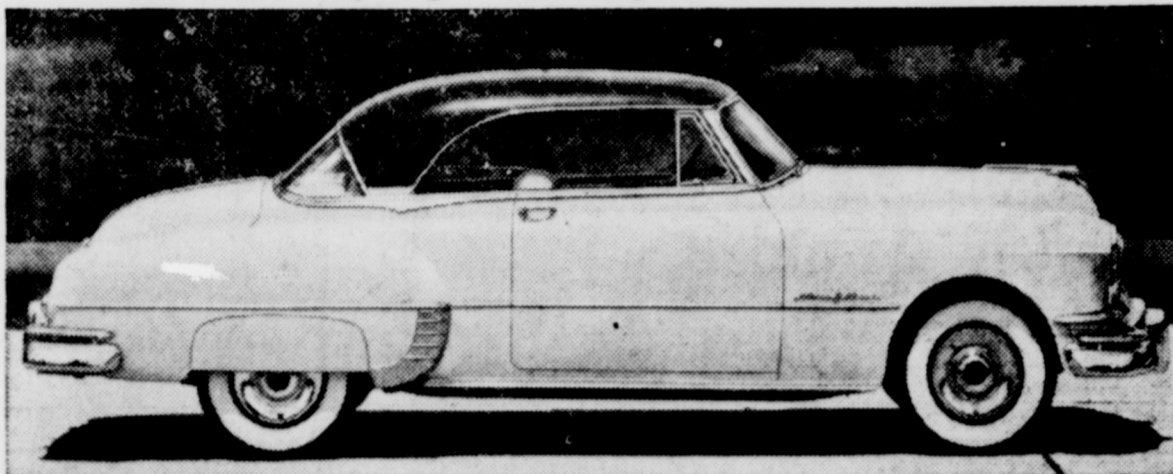

1. Construction now of military barracks on the base to relieve a critical housing situation.
2. A \$50,000,000 yearly expenditure on the government on payrolls and supplies, and
3. A steady force of 12,000 airmen trained at the nation's only Air

Force engine and mechanics' school. Senators Johnson, Connally and Congressman Gossett conferred at great length with Secretary Symington in Washington last Friday. The Texans then urged that the Air Force secretary classify Sheppard as permanent.

The largest military training center of its kind in the world, Sheppard AFB now has a total complement of more than 12,000 officers and enlisted men, with a payroll and supply expenditure of \$50,000,000 annually.

Burkburnett, just nine miles from the field, made great strides in solving housing shortages in 1949. Now that the field has been declared permanent, builders will probably get into high gear this spring and summer. Many, many Airmen already make their homes in Burkburnett, and as more houses are available, this city should experience a substantial growth.

Pontiac Displays Its Super-Sleek 'Catalina'

Envelopes Being Mailed to Burk Residents

One day this week you will receive by mail a white plain envelope in which will be a very important little card. Open this letter immediately, place in a few coins or bills or check and mail in enclosed envelope, already addressed, to the sender, chairman of March of Dimes. By doing this, you will have done your part in helping some Polio victim to regain health and walk again.

Thanks.

Lutheran Church To Show Movie At Town Hall 25th

The Grace Lutheran Church is sponsoring the showing of the movie, "The Sickle or The Cross," at the Town Hall next Wednesday night at 7:30 P. M.

With unbelievable cunning, Communists bring to America one of their comrades called X-14. He succeeds in fooling an entire Church to believe he is a missionary. He plots to discredit Christianity until one day he is face to face with the firm faith of a Christian boy.

This is a full length motion picture of 75 minutes. It was made at Hal Roach Studios in Hollywood and played by a talented cast of top-ranking actors.

There is no admission charge, though a free will offering will be taken. The public is cordially invited to see this stirring picture that none will ever forget.

Brazilian droughts and wage increases to coffee plantation workers, exportation of coffee is down so many number of bags, are explanations to the housewife of why increased cost of coffee. Whatever the reasons, the eight-cup percolator gives way to the four-cup pot in local tables. Being practical, women don't like the price per pound, so they use less coffee. Tea is becoming more popular due to high cost of "Java". Folks will figure they have been drinking too much coffee anyway and now is a good time to cut down. The thing may become a habit and the nation become a land of tea drinkers—heaven forbid!

OUR OLD PEOPLE

Often state hospitals can be called an old folks home. When families don't know what else to do with older men and women, though they are fundamentally healthy, these old folks are often committed to state institutions. There are enough problems in state mental institutions without the added burden of caring for people just because they are old. Thousands of these people end up in mental hospitals, falsely labeled as insane. Sane though feeble, well-meaning and with a human's self-respect, they are "dumped" into these state hospitals. Why increased social security tax, why millions of dollars out of pay envelopes, if such a thing is common practice?

THE TRAPPED PUBLIC

We, the captured public, are so listed according to radio standards for commercial broadcasting. If you can't be rid of listening, you are trapped. When music, news and especially, commercials, are fed you in street cars, buses, railroad terminals, trains, it is enforced listening since you can't turn the knob and shut off the program. When music on the radio is offered factory workers, hospital patients, it is supposed to be a healthful purpose, for the good of the individual. But, when private enterprise exploits through radio advertising, an advantage over the travelling public from which they can not escape, they become captives and this isn't healthful.

Justice Brandeis pronounces the right of privacy is the right "to be let alone." Strange such a pronouncement is even necessary in this land of the free. Rural areas fortunately haven't the degree of annoyance over this forced listening that is invading the privacy of the traveller in the cities, but it might come into every village hamlet on public carriers, before the roar of disapproval is heard by commissions and committees. The vanishing right of the individual is something to roar about and the noise issuing from the "captive" audience in protest should be loud enough to drown out the price of washers, too much Brahms or the economy size soap powders.

BENJAMIN FRANKLIN

Benjamin Franklin was not only celebrated as one of our first great Americans, but as the greatest national writer of the eighteenth century. Consider what he had to say on the subjects below: On Absenteeism: "Dost thou love life? Then do not squander Time; for that's the stuff Life is made of." On Education: "The doors of wisdom are never shut." On Freedom of Speech: "Whoever would overthrow the liberty of a nation must begin by subduing the freedom of speech: a thing terrible to traitors." On Inflation: "Buy what thou hast no need of, and ere long thou shalt sell thy necessities." On Public Service: "My rule, in which I have always found satisfaction, is, never to turn aside in public affairs through views of private interest; but to go straight forward in doing what appears to me right at the time, leaving the consequences with Providence..." On Religion: "Sin is not hurtful because it is forbidden, but it is forbidden because it is hurtful." On Tax: "There are no gains without pains."

The penned words of Franklin have been passed down through the ages and many are familiar with us. His homely wit, his humble wisdom, his faith and hope in America, makes Benjamin Franklin a household character, a fireside friend and mentor.

Ford remains alone in low-price "Eight" field

Reports were current several months ago that Ford might encounter competition in the low-price eight-cylinder car field. The manufacturer considering such a development, however, apparently has decided against it.

The competition is ever constant for the market a strong Ford delivery considerable sales support from ability to offer an eight-cylinder car in the low-price market. Factors are attracted by the additional soundness and power performance afforded by the extra cylinders.

Principal reason why manufacturers of eight-cylinder power plants is not Ford has been able to hold expenses down to manufacturing economies not often duplicated by others.

In producing the low-price V-8, the Detroit producer had to strike at the heart of the car problem. The company was the first to evolve a method of making an integral V-block and cylinder casting.

The Ford Company is noted for excellence of manufacturing technique. Part of the reputation is based on willingness of the management to spend money on work-saving equipment. The Rouge plant founder for example is a model of efficiency. Air-conditioning eliminates some of the disadvantages common to most foundries, while conveyor systems and automatic machines obviate much of the manual load-carrying and inefficient-hand work.

With the use of advanced production methods the company has been able to hold expenses within reasonable limits. This is true even though use of the larger engine means less power cylinders with more pistons, rings, and rods, connecting rods, etc.—for each car produced.

The Ford production technique involves a high degree of precision. Features regard the company as a "rough customer" because of the rigidity of inspection standards. Suppliers know they must comply closely with specified requirements or face heavy rejection.

The precision, together with the extra power of the engine, accounts for the unusual performance of the Ford V-8. Ford's rate of applied horsepower to gross vehicle weight has long been a favored design characteristic. Other manufacturers have found the power plant too difficult to build independently enough for a small car.

From present indications, it may be a long time before competitors can challenge Ford at its low-price eight-cylinder field.

Here Is Another Time The Anti-Trust Lawyers Were Wrong!

Ever since the anti-trust lawyers filed their suit to put A&P out of business, they have been making, in the newspapers and over the radio, various "allegations" about how they think this company does business.

Please remember that "allegations" are charges that have not been proved.

In this case they will be disproved.

There have been times in the past when the anti-trust lawyers made very damaging "allegations" about this company that the courts eventually decided were utterly without foundation.

In our last advertisement we told you about the time the anti-trust lawyers charged that A&P, two other food chains and two labor unions conspired to fix the price of bread in Washington, D. C.

And yet, when this case came to trial, it was revealed that the defendants were actually selling bread cheaper than most other stores in Washington, and there was absolutely no evidence that they had ever engaged in any such "alleged" conspiracy.

That was the time Federal Judge T. Alan Goldsborough instructed the jury to bring in a verdict of "not guilty."

It was the time he said to the anti-trust lawyers:

"If you were to show this record to any experienced trial lawyer in the world, he would tell you that there was not any evidence at all."

"Honestly, I have never in my over forty years' experience seen tried a case that was as absolutely devoid of evidence as this. That is the honest truth. I have never seen one like it."

But this was not the only time that the anti-trust lawyers made such serious "allegations" against A&P which were false. Again, and still again, they brought cases against A&P and suffered defeat.

As we have said, we think you are entitled to know about these other cases. And now, we are going to tell you about the second time the anti-trust lawyers were wrong.

The North Carolina Potato Case

In December, 1941, the anti-trust lawyers brought a criminal suit in Wilson, North Carolina.

They charged that A&P's fresh fruit and vegetable buying subsidiary, and other good American citizens, had conspired to fix and depress prices paid farmers for potatoes in North Carolina, Virginia and Maryland.

Can anyone imagine any charge calculated to be more damaging to a retail grocery business that must rely on farmers, day after day, for the food we distribute to our customers?

In this case the anti-trust lawyers gave a story to the newspapers, telling millions of farmers that we were the kind of people who would force their prices down, deprive them of a decent income, and lower their families' living standard.

These charges were false.

They made these charges despite the fact that it has always been A&P's policy to pay our farm suppliers fair market prices for all produce; to aid agriculture through better distribution of its products; to narrow the spread between farm and retail prices; and to help farmers build better markets for their products.

That is why many thousands of farmers all over the country are now coming to our support.

When the case finally came to trial, the anti-trust lawyers put on as their first witness a potato expert of the U. S. Department of Agriculture.

This expert, who was the anti-trust lawyers' own witness, testified that contrary to the anti-trust lawyers' "allegations," the defendants made every effort to help the Department of Agriculture in its efforts to aid the potato farmer in better marketing of his products and in getting a better price for his products.

When the anti-trust lawyers had put in their evidence and had argued their case Federal Judge C. C. Wyche directed the jury to bring in a verdict of "not guilty."

Judge Wyche said to the anti-trust lawyers:

"I have studied this case from the very outset. In my opinion there is no testimony produced from which it can reasonably be inferred that the defendants entered into a combination to depress or lower the price of potatoes."

"I might say that I never tried a case in my life where a greater effort, more work, more investigation had been done, combing almost with a fine-tooth comb to gather evidence, as was done in this case."

"But, as was said a long time ago, you can't make brick without straw, and you can't make a case without facts."

So, here was a case in which the anti-trust lawyers made seriously damaging charges against A&P in which the Judge decided that there were no facts to support those charges.

That is why we say the anti-trust lawyers can be wrong and have been wrong.

That is why we say that they are wrong again, just as they were wrong in the Washington bread case and the North Carolina potato case.

We are going to show the American people that the suit to destroy A&P is really a suit against efficiency and against real competition.

The real question involved in this suit is whether businessmen are going to be encouraged to do a better and more efficient job; or whether we are going to let the anti-trust lawyers in Washington blow the whistle on anybody who gets big by giving the people more for their money.

No one can make us believe that it is a crime to try to sell the best quality food at the lowest possible price.

A. & P. Grocery States Its Case

The Great Atlantic & Pacific Tea Company charged today that the current Anti-Trust suit against the company is really "A Suit Against Efficient and Against Real Competition."

The company announced its intention of printing a series of advertisements telling about previous suits brought against A. & P. by the Anti-Trust lawyers in which the charges were proved to be false.

"In case after case they made charges against A. & P. which were proved in court to be utterly without foundation," she said.

Today's ad cited one such suit in which it was charged of Justice-Trust charges of conspiracy to fix bread prices. Under the caption "The Washington Bread Case," the decision of Federal Judge Allen T. Goldborough is quoted "If you want to show this record to any experienced trial lawyer in the world he would tell you there was not any evidence at all. . . . Honestly," he said, "I have never in my forty years' experience, tried a case that was as absolutely devoid of evidence as this. This is the honest truth. I have never seen one like it."

The fact is crystal clear, the food chain points out, that while the Anti-Trust lawyers constantly protest that they are not against "Bigness" they only brought their bread suit against the big companies that sold good bread at the lowest

Tax On Margarine Battle Is Raging

There is an old adage which says that the power to tax is the power to destroy.

Democrats have long depended on a vigorous, well-informed electorate to guard against any abuse of this power. But despite the utmost vigilance, times now and then are imposed which deny to a person or an essential industry the free and equal opportunity that is the very core of the Bill of Rights.

The tax on yellow margarine is a case in point. For years this important foodstuffs industry has been shackled by federal levies. As a consequence, users of this product are compelled to pay at least five cents more than they should for every pound of margarine they buy. To the cost of making yellow margarine must be added license fees for retailers and wholesalers

ranging from \$48 to \$480 per annum and \$600 for manufacturers. Now these levies produce little revenue. They were put on the book by certain butter interests with the sole intent of restricting if not destroying a competing industry.

Yellow margarine is highly nutritious. Its ingredients for the most part are cottonseed and soybean oils. It contains 1,300 calories per pound as does butter and is an excellent source of Vitamin A. It is an important contribution to the nation's essential food supply.

The United States Senate now before the U. S. House to eliminate this tax.

margarine. It is a bill deserving the support of every American. It should be voted on its own merits, without crippling amendments. Consumers plagued by high living costs, citizens anxious to maintain our system of free enterprise should write or wire their senators immediately, tell them how they feel about it and ask them to remove from the statute book the discriminatory laws hindering the margarine industry.

The Texas Republican, first printed at Nacogdoches in 1889, was the first newspaper published in Texas.

The first steam-powered newspaper printing press in Texas was used by the Galveston Cyprian in 1850.

HADACOL IS HELPFUL TO FOLKS OF ALL AGE GROUPS

Countless thousands have proved that HADACOL is beneficial to folks of all ages. That is the reason so many purchase the economy size bottle so all family can benefit from its vitamins and minerals in HADACOL.

For instance, Miss Ethel Guidry, Montgomery St., Port Neches, Texas, only 17 years old, was lying nervous, had little appetite, her face was pale and drawn, she suffered from the "flu" system of the B vitamins and minerals in HADACOL.

Miss Guidry gave up her job at the bank and after taking several bottles of HADACOL she is now feeling wonderful, and has gained weight and energy.

Most folks take HADACOL because it has worked such wonders for relatives or friends. Miss Guidry took HADACOL because her mother had taken 12 bottles with excellent results.

nearby Port Arthur, Texas, W. M. Thompson took HADACOL because it had done his husband so much good. He, in turn, had taken HADACOL and an elderly neighbor told of "feeling so much better" after taking several bottles of HADACOL.

Ms. Thompson's normal weight is 135 pounds but she was down to 110 pounds before taking HADACOL and after taking a bottle of HADACOL she regained her normal weight.

was bothered with stomach and gastric disturbances, I lost my appetite and was ed," said Mrs. Thompson.

She had tried several preparations before taking her husband's advice on HADACOL and now she enthusiastically recommends HADACOL to her friends.

She, too, like Miss Guidry and the others, was suffering from the lack of the B Vitamins and Minerals in her system which HADACOL contains.

A lack of only a small amount of the B Vitamins and certain Minerals will cause digestive disturbances. . . . Your food will not agree with you. . . . You will have an upset stomach. . . . You will suffer from heart burn, gas pains, and your food will sour on your stomach, and you will not be able to eat the things you like for fear of being in misery afterwards. Many people also suffer from constipation. And while these symptoms may be the results of other causes, they are surely and certainly the symptoms and signs of the lack of the B Vitamins and Minerals which HADACOL contains. And if you suffer from such a disorder, there is no known cure except the administration of the Vitamins and Minerals which your system lacks.

HADACOL contains not only one, but five of the B Vitamins. HADACOL contains not only one, but four of the necessary Minerals. It comes to you in liquid form, easily assimilated in the blood stream so that it can go to work right away.

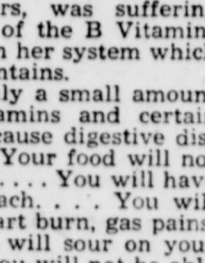

It is easy to understand, therefore, why countless thousands have already been benefitted by this amazing tonic, HADACOL.

So, it matters not who you are . . . or if you have tried all the medicines under the sun, give this wonderful preparation a trial. Don't go on suffering! Don't continue to lead a miserable life. Many persons who have suffered and waited for 10 to 20 years or even longer, are able now to live happy, comfortable lives again because HADACOL supplied the Vitamins and Minerals which their systems needed. Be fair to yourself. Give HADACOL a trial.

LORD'S DAY:
Bible Study, 9:45 A. M.
At this hour there is a class for every age.
Worship, 10:45 A. M.
The attendance in every service of late has been good but exceptionally in this hour of worship. It is good to see people that love to worship God as directed by his holy word.
Young People's Classes, 6:30 P. M.
Worship, 7:30 P. M.
The subject for this hour is: "What Is The Church of Christ Teaching In Italy?" This question will be discussed from the pulpit of every congregation in Wichita and surrounding counties on Sunday evening. We believe you would like to hear this message in order to better understand why the evangelists have been so persecuted in Italy. The persecution of these men has caused the offices of the congressmen of our nation to be flooded with telegrams and letters. It has been called to the attention of people throughout the nation. Why all the concern? What have we been teaching that has brought about such a conflict?

TUESDAY—
Men's Bible Class, 7:00 P. M.
WEDNESDAY—
Bible Study, 7:00 P. M.
THURSDAY—
Ladies' Bible Class, 2:30 P. M.

At this time, F. E. Hill of Iowa Park was elected president; Flynn Stewart, Wichita Falls, first vice-president; Mrs. Tom Britton, Burkburnett, 2nd vice-president; Mrs. John Barbour, Iowa Park, secretary; Pat Simmons, Wichita Falls, treasurer, and Mrs. W. "Discovery Unlimited" is the Camp Fire theme in 1950, an audience of approximately 200 was told by O. T. Freeman, Wichita Falls district president and program chairman.

W. B. Featherston, outgoing area president, was in charge of the meeting. Area districts besides Burkburnett are: Electra, Iowa Park, Wichita Falls, Olney, Henrietta, Nocona and Saint Jo.

The North Central Texas Area Council stands out in this five-state region as the most successfully operated area council, Felix Harris of Dallas, regional chairman and guest of honor, declared.

Harris said that the area council deserved much credit for setting a model for other regions and the nation. He introduced other members of the regional executive committee which had been in Wichita Falls Friday to plan the regional conference to be held in Wichita Falls in March.

Sites for a permanent Camp Fire campsite are being considered near Craterville Park in Oklahoma and in Montague County, Texas, Henry Penix reported.

Area Council reports were highlighted by a series of "living pictures" by Camp Fire Girls and Blue Birds. Dana Riddle, Peggy Terry, Mildred Hinnant, Paula Buckner, Marilyn Felty, Janice Henry, Patsy Austin, Louise Boyd, of the Tando group under the leadership of Mrs. Don Mills portrayed a Council Fire ceremonial. Other special features included a chorus of girls under the leadership of Mrs. Frank King, and the Saint Jo 20-piece rhythm band under the leadership of Mesdames V. W. Redman and Roy Kingery.
