Mathis and Connell Co-Chairmen of Scout Fund Drive

Jack Mathis and H. L. Connell will be co-chairmen of the Annual Boy Scout Fund Drive in Burkburnett. The drive will be held the early part of October.

This week the co-chairmen were busy rounding up their workers. Plans are to have a whirlwind roundup and get it over with. Workers who have cards and do not make contacts in a day or two are to turn in those cards and someone else will try to work them.

In past years, Burkburnett has not contributed a very substantial amount to the Boy Scouts, mainly because the contacts were not made. At this time Burkburnett has some of the leading Scout Troops in the Northwest Texas Area Council. The Burk boys took top honors at summer camp in percentage of boys attending. Two Troops are making rapid advancements and a third Troop is now in the process of being organized.

Burkburnett Ties Iowa Park 13-13

Last Friday night the Bulldogs went to Iowa Park and battled the Hawks to a 13-13 tie. It was not a conference game, but held all the suspense of any district play-off.

Iowa Park scored first and made their extra point try good. With only 46 seconds left in the first half, Burk's Doyce Walker skirted right end for 56 yards and a touchdown. Billie Baker kicked the extra point.

Burk scored again in the third quarter. This score was set up when Burk pounced on a Hawk fumble on the Iowa Park 25 yd. line. The scoring play was a pass from Donald McKinnis to Jerry Boren.

It seemed that Burk had the game well under control. They were in possession of the ball on their own 30 yard line, with 3 minutes and 56 seconds remaining in the game. They made one first down and hit the line for short yardage. They fumbled on the next play and Iowa Park recovered with 1 min. 50 sec. remaining. Harvey Klinkerman, Hawk star, fired four passes, all incomplete. An offside penalty gave them another chance. This time Klinkerman shot one all the way over the goal line which was taken in by Todd.

After the touchdown Burk received, but had reached only to the 50 yard line when the final whistle sounded.

Margaret Parks Monte Knox Married Sept. 17

The wedding of Miss Margaret Anne Parks to Mr. Monte Knox was solemnized Monday evening Sept. 17th at eight o'clock in the home of the brides parents. Rev. Felix Kindel, pastor of the First Methodist church, officiated in the double ring ceremony.

The bride is the daughter of Mr. and Mrs. J. C. Parks, 508 E. 4th st., and the groom is the son of Mr. and Mrs. R. W. Knox, all of Burkburnett.

Vows were exchanged before a fireplace banked with arrangements of white gladioli and white fuji chrysanthemums outlined in a gothic candleabra line of white burning candles on each side of the fireplace. Jimmy Parks, brother of the bride, lighted the candles.

The brides father gave her in marriage. She chose a waltz length powder blue antique taffeta gown fashioned with three quarter length sleeves, scooped neckline and of princess style. She carried a bouquet designed of white gardenias and carnations in a cascade arrangement atop a white bible.

Miss Carol Sue Muller was maid of honor. She wore a pink dress of antique taffeta and carried a nosegay of blue carnations. Clifford McKinnis was best man.

At the reception, the table was covered with a white lace cloth over blue and was centered with white mums and asters.

Mrs. Walter McAnallen, cousin of the bride of Altus, Okla., and Mrs. Morris Cheney, served the cake and punch.

Miss Linda Cheney presided at the guest book.

For a wedding trip, Mrs. Knox changed to a sheath costume of gray wool with matching jacket, black accessories and she wore a corsage of gardenias.

The bride is a graduate of the Burk High School where she was elected to Who's Who and was senior class beauty. She attended North Texas State College at Denton for one year.

Mr. Knox graduated from Burk High School in 1955. He lettered in football four years and will attend Odessa College.

The couple will make their home in Odessa.

Burk, Defending District Champs To Meet Seymour Here Fri. Night

Friday night the Bulldogs will be hosts to Seymour at Bulldog Stadium. The Bulldogs, defending District Champs from last year, will be playing the team they beat out in the District play-off last year. The game ended in a tie, with Burk leading in penetrations, but due to no previous agreement in case of a tie, a coin was tossed. Burkburnett won the toss and the District title.

Seymour will be exceptionally strong this year. They have 9 of the former first string players back. They were good last year and should be better this year. Seymour has two fast backs who like those long pitch-outs. These plays bothered Burk considerably the last time the two teams met.

Burk has a team which should be able to handle the lads from Seymour. Doyce Walker, moved from the line to the backfield, has been showing up mighty good on long runs in the two games played this season. He is aided by Donald McKinnis and Alex Mills in the ball carrying department. McKinnis is a triple threat man. He can run, pass and punt with the best of them. Burk's line is also one to be envied. Ed Elliott, Norman Morgan and Frank Morton plug the center of the line. Jerry Boren and Otis Waddell handle the end positions well.

This is not a conference game but it will be played with all the vigor of a championship match. Kick-off time is 8:00 P. M.

GRASS ROOTS OPINION

DUBLIN, TEXAS, PROGRESS: "The trouble with foreign affairs today is that you can never tell whether dictators are smart men bluffing or imbeciles who mean it."

MARION, IOWA, SENTINEL: "This writer used to work a 48 hour week on the section for \$18. Now a section man gets this much in little over a day. The union can get much of the credit for this—But all of us need to study the problems involved to see that everyone gets his fair share, but to avoid killing the goose that lays the golden eggs."

ST. LOUIS, MO., LABOR TRIBUNE: "We are inclined to agree with Mr. Arthur Patzer, youth secretary of the Seventh Day Adventists Columbia Union Conference who recently blasted popular song writers who are cashing in on current religion revival. The religious 'rock an' roll' we have been getting via the airwaves and juke boxes is as uncouth as it is uncalled for and makes a mockery of all real spiritual values."

WAVERLY, VA., DISPATCH: "We were at a fellow's house recently who boasted that he never had taken hand or rod to his three year old, who at that very minute was trying to snip off the rat's ears with a pair of scissors. Regarding this conception of child raising, which says don't touch Junior, let him be a free soul to develop his natural whims, we are reminded of the Chinese proverb: 'Give a pig and a boy all they want and you will end up with a good pig and a bad boy.'"

A Negro Looks At Integration

At this time when hare-brained white mobs at Clinton, Tenn., and Sturgis, Ky., have required restraint by the National Guard, and much of the country has gained the impression that racial mingling is the universal ambition of negroes, we would like to quote Davis Lee, negro editor of a national negro newspaper, The Newark (N. J.) Telegram. The following is from his recent editorial, "You Can't Eat Integration":

"This intergration-segregation issue has stirred up bitterness, hatred, prejudices, and has destroyed long-standing friendships. But, strange as it may seem, fifty percent of the Negroes are not concerned about it either way.

"The liberals are frothing at the mouth and shedding crocodile tears over the plight of the poor Negro in the South, will gladly give him integration, but won't give him a job or provide his family with clothing or bread.

"The Southerners don't want to have integration, but they will gladly give him a job and help clothe and feed his family.

"The liberals will open their schools to Negro children, but they won't hire many Negroes as teachers. The South won't admit Negro children to its school, but they will give the Negro his own school manned by teachers of his own race. And all of this is given to him without cost.

"There are forms of segregation that are degrading and humiliating, but to have one's own school and teachers is not one of them. Giving the Negro his own school and teachers is more in keeping with that concept of freedom, justice and equal opportunity that the founding fathers had in mind than is an integrated system of education."

Mr. Lee pleads for "ample time" for adjustment. He points out that the South has never attempted to tell the rest of the nation how to run its affairs, "and in no section of the country does the Negro enjoy the educational, employment and economic opportunities which he enjoys in the South.

"The labor unions," he notes, "are pouring thousands of dollars into this integration movement, yet Southern Negroes are working at jobs that Northern Negroes can not get, because the unions will not accept them as members. There are more Negro carpenters, brick-layers and building contractors in North and South Carolina than there are in the 3 integrated states.

"Negroes can't eat integration. They need jobs. They need the opportunity to develop their talents. The South is the only section of this nation that offers such opportunities. If these liberals and agitators are the Negro's friends and Southern whites are his enemies, then someone needs to protect him from his friends."

Right To Work In Kansas

The Republican gubernatorial primary in Kansas was hard fought. A dominant issue was the right-to-work law — the law which provides that a man can join or not join a union if he so chooses, and that he shall have the right to work at his trade in either case.

In this Kansas primary, the incumbent governor opposed the law. He was beaten by man who supported it.

Long ago, the indefensible practice followed by some employers of blackballing union members was outlawed. The practice of making a man join a union in order to support himself and his family is blackballing in principle and equally indefensible.

Car Inspection Sept. 15-April 15

The Texas Public Safety Commission has set Sept. 15, 1956 to April, 1957, as the period during which automobiles and other motor vehicles must be inspected under provisions of the State's Motor Vehicle Inspection law.

Col. Homer Garrison, Jr., Director of the Texas Department of Public Safety, said in announcing the Commission's action that motorists should avail themselves of the opportunity to have their autos inspected as soon after Sept. 15 as possible in order to avoid the inconvenience and delay usually associated with the log jam of cars waiting until just before the line to have their vehicles checked.

George W. Busby, Chief, DPS Motor Vehicle Division, stated that more than 4,200 licensed stations in the State will have sufficient supplies of inspection tags on hand by the starting line to have their vehicles checked without delay.

Mrs. J. D. Majors is to be recovering from a recent illness in the hospital. She plans to visit in the near future in Dallas and Corpus Christi returning to Burkburnett.

The Backbone Of Scouting

There are more than 181,000 Texas boys in Scouting.

That is an important statistic to remember. It means that each of those young Texans is receiving training and instruction during his formative years which will be invaluable as he grows into manhood and assumes adult responsibilities.

But where does that instruction come from? Who supervises the training? Who shows the way?

The 197 adults in the professional service of the Boy Scouts of America in Texas are vital to

year both program and activity wise.

Delicious refreshments prepared by the co-hostess were served to the following: Mesdames Francis Beaver, G. C. Beavers, Jr., J. F. Eastman, Harry Elliott, E. M. Kinnett, John V. Lilley, Jim Maag, Joe Parsons, Irving Smith, H. S. Thaxton, P. O. Wise.

the program, but they couldn't handle 181,000 boys alone.

No, the backbone of the Scouting programs in Texas is represented by the 47,500 volunteer adult leaders who give their time and talents to Scouting. These are the men and women who make Scouting possible. Without their interest and their sacrifices of time and energies, there would be no Scouting program.

In Burkburnett there are 47 adults currently working with our Scouts. If one of them is a friend or neighbor of yours, take the time to thank him personally and tell him how much you appreciate what he is doing to help train and develop our boys.

Each of them deserves the thanks of all of us.

Machine Unknown TB Each Year

Single year has passed years that the Wichita TB association has the county-wide Free survey without finding any new cases of tuberculosis.

is one of the oldest known to medical science. Hippocrates, the father of medicine, was the first link in the chain for the control of TB.

until 1882, however, the "cause" of the disease was not known. Following the discovery of the specific "cause" of the disease, tuberculosis is a recurring, or relapsing, disease. Measles and the others have short attacks.

Tuberculosis is a chronic, or of long-duration, disease. For the most part, it works slowly and kills slowly.

Everybody now knows, or should, that TB is not inherited but is spread from person to person; from the sick to the well. People with TB, some of whom don't even know it, cough, sneeze or spit carelessly. Tiny droplets of spray can travel several feet through the air, carrying their burden of germs to where they are breathed in by other persons.

Infected spit may load floors, sidewalks and dust particles with danger for the small child or the unwary adult. Kissing is a frequent direct means of spread. Objects handled by a thoughtless patient become peppered with TB germs which are passed on to persons whose fingers, invisibly soiled, may later convey the germs to their mouths and so into their digestive or breathing systems.

mestic animals. Cattle, swine chickens are particularly affected. The cattle, or bovine type of the disease is transmissible, through milk, to human beings, especially children.

Human tuberculosis is primarily an air-borne (breathed-in) infectious, or contagious, disease. Tuberculosis differs from contagious diseases like measles, scarlet fever, whooping cough and the other contagious disease in this important respect: Following a short incubation period after exposure, the other diseases culminate in an acute onset from which the patient has lasting immunity.

Tuberculosis has no set incubation period. In millions of people where the strength of the body's forces is sufficient and is maintained, active TB never develops. But the disease can result within months, years, or even decades. Unlike the others, tuberculosis is a recurring, or relapsing, disease. Measles and the others have short attacks. Ford tandem axle BIG JOBS are rated to carry more payload than comparable tandems of any of the leading manufacturers. T-800 model has max. GVW of 45,000 lb.—GCW is 65,000 lb.

Ford's F-100 Custom panel is one of the top load carriers in its class. It provides 155.8 cu. ft. of cargo space in a smooth, fully lined interior and hauls up to 1,535 lb. of payload.

The hardest-working, biggest-saving "two-tonner" of them all is the Ford F-600. Only Ford offers a Short Stroke Six and three Short Stroke V-8's in this field. Max. GVW is 19,500 lb.

FOR BIG JOBS... SMALL JOBS... ALL JOBS

Ford Trucks cost less

And low first cost is only your first saving

Ford's F-100 pickup with 8-ft. box is the biggest in the half-ton field—up to 19 cu. ft. more loadspace than the others. Regular 6½-ft. box with a full 45 cu. ft. capacity also available.

COME IN TODAY!

Before you buy your next truck, look at both sides of Ford's story of value. Check what you get and what it costs. You'll like what you see.

Look at the costs. Ford's first cost is low. Resale value is high. Modern Short Stroke engines—V-8 or Six—are designed for less friction, less wear, lower running costs. Maintenance costs are lower, too, because Ford trucks are built stronger for rugged long life. And a 10-million truck study proves Ford trucks last longer.

Look at what you get and you'll see you get more in a Ford. For example, more horsepower per dollar—proved by a comparison of factory-suggested list prices and net horsepower of all truck lines. You get more comfort with a Driverized Cab, and more safety with Ford's exclusive Lifeguard features.

Look carefully... consider everything. You'll agree Ford trucks cost less, give you more. If you want a great deal—a great deal more for your money—see your Ford Dealer.

FORD TRUCKS LAST LONGER

Using latest registration data on 10,502,351 trucks, insurance experts prove Ford trucks last up to 9.9% longer.

News From The County Ag. Agent And Home Agent

San Antonio is the hostess city for the National Home Demonstration Council meeting, Sept. 23-26, and the annual meeting of the Texas Home Demonstration Association, which follows Sept. 27-29.

Wichita County has six club members who are planning to attend. Mrs. Herbert Adams, county THDA chairman, Mrs. Jack Marshall, council secretary and Mrs. Louis Maloney, council treasurer, are the official delegates to the state meeting. Mrs. J. L. Graham, incoming council chairman, Mrs. R. J. Ring and Mrs. Gail Mitchell also plan to attend as visitors. All six women will take the once-in-a-lifetime opportunity to visit the National Council meeting.

Mrs. Gail Mitchell is the Wichita County chairman for civil defense and has led the county in a number of outstanding activities. Because of her contribution to the state civil defense program Mrs. Mitchell will help with the Civil Defense workshop at the state meeting.

The delegation will give a report on their trip at the regular Wichita County Home Demonstration Council meeting October 9th.

Mr. and Mrs. E. J. Simons have completed a number of

their family goals for this year. They have made curtains and draperies, decreased their number of cattle, provided good family recreation, worked to improve their community, planted Chinese red peas to build the soil, bought a registered bull, made a landscape plan and made other home improvements. If every family would make a list of goals for a year they would find it easier to make every dollar count.

It is good business, points out B. T. Haws, county agent, to see that wheat in storage doesn't become contaminated. Rodents and insects offer the biggest threat to stored grain. Both can be controlled. A recent extension publication, L-257, Clean Wheat Program for 1956, is now available at the offices of county agents in the major wheat producing areas.

For the fourth time in 50 years of operations, the Feed Control Service reports that Texas Feed manufacturers during the last fiscal year sold in excess of 4 million tons of feed.

Compensation to farmers for reducing their 1957 crop winter wheat acreage below their wheat allotment, designating such acreage for inclusion in the Soil Bank's Acreage Reserve Program, will be in the form of negotiable certificates. The certificates may be redeemed in cash through regular banking channels or in grain by the producer to whom they are issued.

Farmers are raising 16 percent more turkeys this year compared to last year. There is 29 percent more heavy breed turkeys while light breed show a decrease of 19 percent. With a 16 percent increase in the number of turkeys raised compared to last year we cannot expect prices to be as high as they were last year.

During the first six months of 1956, egg prices averaged 11 percent above last year and feed prices about 7 percent less. This increase in prices received by farmers was expected, states B. T. Haws, county agent. However it appears that prices received for eggs during the latter part of 1956 will be lower than during the same period in 1955 because the laying flock will be somewhat larger and there will be a continuation of the trend towards a higher rate of layers.

Predictions of rainfall cannot be made on the basis of weather cycles of "wet and dry" years. Recent studies of 31 locations in the High and Rolling Plains of Texas show that cycles play little or no part in annual rainfall figures dating as far back as 89 years.

Grade School News

We are back in regular school routine this second week of activities and have many events in our daily program that helps to keep interest at a high pitch. Several of the rooms are working on science problems and have science corners that help to stimulate participation by all members of the class in the various projects.

Some children enjoy reading, others enjoy handiwork; but all of the group become very much enthused over gathering rocks, leaves, pictures of birds, insects or many other similar material that we are concerned with in our every day activities. One group of children have found that it is very interesting to study about the Horned Toad and to try and find out what he has for dinner. It is also very interesting to find out that the menu of each animal is very different and it offers a challenge to try and find out the amount of work and labor that is involved in securing food.
