## Rain and Hail Fell Here Wednesday

Quite a bit of rain and some large hail fell in Burkburnett Wednesday morning. No damage has been reported to roofs or other property in the city proper.

Wheat is beginning to turn golden. It is doubtful if it can stand much more rain without very serious damage being done. Clear water is still coming out of some of the fields from the rain last Saturday.

It is believed that most wheat will be ready to harvest long before the soggy fields will support combines. A few farmers are entertaining the idea of cutting wheat with a swather, raking it in rows, then using combines when the ground dries out.

Mr. and Mrs. Johnny Crane are the proud parents of a new baby boy born Thursday, May 16th in a Wichita Falls Hospital. The baby weighed 6 lbs., 8 1/2 ozs., and has been named John Newton Crane, Jr.

## Something New For Burkburnett

A preliminary survey is to be made of the Burkburnett area starting in the next few days for the Community Mausoleum to be constructed adjacent to the present Burkburnett Cemetery. The mausoleum is being financed by Lewis W. Brocker of Burkburnett. He will make a canvass of the entire community, showing pictures and explaining exactly what the mausoleum is and gives to each individual. This survey is necessary first, because few people understand the important aspects of this type of burial, and second, it is necessary because in this type of mausoleum only space is included in its construction for those desiring it.

After seeing pictures and other explanatory data which gives each person a full knowledge of its many points, then an intelligent decision can be rendered. Those inquiring about or those having the mausoleum explained to them are under no obligation whatever.

The quicker the survey is completed, the quicker construction can begin on the mausoleum.

## Stan Owen To Captain HPC Jacket Cagers

Stanley Owen, 6-1 junior to be from Burkburnett has been selected by his Yellow Jacket team mates to lead the Howard Payne basketball team for the 1957-58 season.

Owen, a two year letterman, was second high scorer on the team last season. He looped in 341 points for a 13.6 average.

Here replaces Robert Moore three-letter senior, as captain. Moore topped the team in scoring for the third straight year last season.

Stanley, a flashy guard, was third on the team defensively, pulling down 160 rebounds. Coach Glen Whitis is counting on Stan to be a mainstay on the squad this winter as one of three returning starters. Moore and David Wells are the other two veterans.

As a first year starter, Owen set a freshman scoring record by sending 413 points through the hoops. He scored the winning basket in the game's closing seconds to nip Baylor, 51-49.

Owen, who was a leading hitter on the Jacket baseball team this spring, is tied with Moore for the school single game record, 32 points.

## GRASS ROOTS OPINION

**RIVERTON, WYO., RANGER:** "The states and the local school districts are doing a much better job building schools than the Federal government ever thought they could. We have the wherewithal, the knowledge, the local control over our American schools. Let's keep Washington's finger out of the education pie."

**WEST BRANCH, IOWA, TIMES:** "From the 'WHAT'S NEW DEPT' Ready to eat meat that you can warm for serving without a stove or fire; pull a tab on the box and a chemical heats it up."

**LEESBURG, FLA., DAILY COMMERCIAL:** "There's nothing like a horde of ants to break up a picnic. While we had a picnic debating and philosophizing about Juan Peron, deposed Argentine dictator, a less newsworthy character from that country was busy infiltrating the United States from Mobile, Ala., to Wake County, N. C. The Argentine fire ant apparently arrived on a South American ship 24 years ago, by passed immigration officials and went to work. The ants reportedly have spread over 22 million acres."

**BASSETT, NEBR., LEADER:** "At the present time with the greatest prosperity our nation has ever known nothing is being done to reduce our national debt, but rather the spending is at an accelerated rate. It is said the high rate of taxation is a curb to inflation. Perhaps it is, but for our money we would prefer to see some of that money used to retire the national debt rather than spent on 'programs'."

**ST. JOHN, KANSAS, NEWS:** "Divine law does not suggest that the poor tithe and the wealthy pay half their substance. Yet in this nation we are witnessing an accelerating tendency towards taking a larger proportion from those who have more to pay the bill for those who have less."

## WE'RE A LITTLE ASHAMED

Memorial Day begins, for millions of Americans, the longest weekend in a number of years, from Thursday to the following Monday. And in the light of past experience we can be sure, unfortunately, that it will not be an unmixed blessing. In spite of the stepped up warnings via press, radio and TV against reckless driving and heedless cavorting on beach and boat, the news of June third will be grisly reading.

And we may also expect as an aftermath of this extended holiday a trail of trash along our highways and in resort areas from coast to coast and border to border to remind us that the litterbug is still in our midst. But there is some reason to hope for some reduction in its tonnage. As a result of the intensive three years work of Keep America Beautiful, Inc., and the hundreds of civic organizations, both local and national that have joined this crusade against litter, measurable results are showing up in some areas.

In Ohio, highway cleanup costs have been cut from \$621,733. in 1953 to \$269,787 last year. Connecticut reports: "The litter problem on our highways has improved appreciably in the past 2 years." And from the state of Washington comes the word that "in the Vancouver area we have 30 percent less litter to pick up than formerly."

All over the nation legislatures are debating, and passing or strengthening anti-litter laws, while enforcement is being stepped up. But it is reasonable to believe that the results noted are largely due to pricking the public conscience, and to the availability of litterbugs for cars, and receptacles into which they may be emptied.

However, the national rubbish problem still retains the proportions of a national disgrace. Trash removal from primary highways alone still cost 50 million dollars a year. The cost to towns, cities, parks and beaches is still beyond estimating. Litter thrown on the roads, that figured in 1,000 fatal crashes in a single year, is still being tossed gaily out of car windows.

Normally self-respecting citizens, however, are gradually recognizing the virtue of carrying a litterbag in the car, as well as their personal responsibility for disposing of their own refuse. In fact, the litterbag is fast becoming a mark of good citizenship, with today's travellers carrying a variety of types including home made devices, plain grocery bags or boxes and numerous patented commercial products. They find, incidentally, this also makes for neatness in the car.

If "Cleanliness is next to Godliness," it is surely on the side of safety, too. And in time we may expect this growing attitude of responsibility to be reflected in the highway casualty figures.

## BIG THINGS AND LITTLE THINGS

Here is a sound rule of thumb that every householder can profitably follow: If your fire insurance has been in effect for a number of years without review or revision, it's an odds on bet that you are seriously under insured.

Since 1945, the statistics show, the cost of home building has just about doubled. So, if your home fire insurance policy dates back to that or some comparable time, you can imagine what could happen to your pocketbook if fire strikes.

What is true of the home itself is true of practically everything inside of it. For instance, the cost of household furniture, women's clothing and dinnerware, items found in every home, has more than doubled since 1940. The cost of washing and sewing machines has almost doubled. A similar inflation in the cost of the "little things," like books and bedding and curtains and so on has taken place. These "little things" add up to a surprisingly big total when an accurate inventory is made.

The remedy is for every householder to consult his local insurance agent and bring his coverage up to date. In many cases the householder will find, to his pleasure, that adequate insurance may not cost him much more with a new combined or single policy than he is now paying for inadequate insurance through two or more separate policies.

## LAST DAY OF BONDAGE

It is pointed out that on May 10th, the average American will serve a theoretical "last day of bondage," so far as 1957 taxes are concerned. What he has earned up to that time will just about cover his tax bill for the year.

What this means is that taxes in the United States currently takes about 36 percent of all our earned income. Putting it another way, all that we earned during the first 130 calendar days is needed to support our own governments of one kind or another.

So much for 1957. What of the years ahead? Will the "last day of bondage" come earlier in the year, or will it come later?

That depends on whether the people really want cheaper government, with the reduction in government activity that will involve, or just want to talk about it. Every billion dollars cut from the over all cost of government would permit it to come one day sooner, and conversely, every billion dollars added to that cost would delay it one day longer.

That brings up a slogan which is 100 percent relevant. Here it is: "I'll take less from government—if government will take less from me."

## Car Care Tips

by JIM KANE

With warmer weather just a few week-ends away, your car's cooling system needs attention. Now is the time to drain, flush and refill the radiator. Add clear water and a good anti-rust. Your dealer can check and make sure the hose connections are tight and hoses free of leaks.

Summer is the season to watch out for overheating. So when you find yourself in constant "stop-and-go" traffic, don't shut off your engine while waiting to move. Frequent restarting heats up the engine and weakens the battery. Just keep the engine idling, racing it moderately for 30 seconds every two minutes.

Getting stalled on the road is not only inconvenient but a major cause of accidents, and failure to clean out the radiator thoroughly is a big cause of stalling. There's no doubt about it, experts can tell you: In summer months, preventive maintenance and sensible driving pay off!

## 50th Anniversary Deserves Wholehearted Support

Thursday, June 13, Burkburnett will begin a three day celebration in observance of the Fiftieth anniversary of this city located almost on the banks of the Red River. The celebration date falls very near the day 50 years ago when the first town lots auction sale was held—June 6, 1907. On that day the train service was maintained from Wichita Falls and Burkburnett for the benefit of would-be town lot purchasers. It was quite a day.

Many plans have already been made for this year's celebration. Committees have been working several weeks to make it a successful event for all concerned. Up to this date, just a handful of interested workers have been preparing for the big event. Now that time draws near, more and more cooperation is needed.

This year's efforts will be in honor of 50 years of progress. Fifty years of struggling to make an old boom town into a modern, progressive city. All we expect to witness the Fiftieth Anniversary of our city. Many will not be here for the 75th Anniversary. Fewer will be around when the century is reached. Let's make the most of the opportunity we have now. Let's make this celebration one to be remembered for years and years.

To get in the real spirit of the occasion, more hats are needed to enter in the parade opening. Course it takes work to make a presentable hat. But we expect visitors here from all over everywhere and they get their impressions of our enthusiasm from the amount of effort we put forth.

Saturday, June 15th is Pioneers Day. Old timers will be returning to Burkburnett who have seen the city in many years. They will be proud of the old home town if we all do our part to make the greatest occasion since the first sale of town lots way back in 1907.

Don't be bashful—offer your services to help out. If you are asked to help, give service rather than excuses. You'll be glad you had a part in it. We are proud of it. Let's let other people know that we are really sincere.

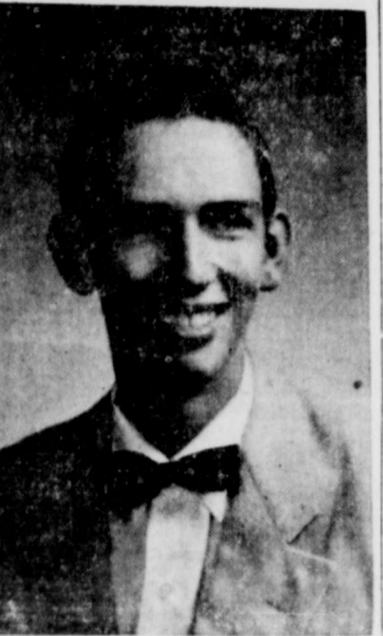

There will be a lively contest to determine who will reign over the festivities as Queen. This is a nature every one can participate in. This is going to be a grand and glorious celebration. Let 'er roll!

To beat the bugs, soak cigarette stubs in a little water overnight; then strain and dilute the resulting liquid and pour it around the plants (but not on the plants). You'll free your plants from ants.

To open a lock that's hard to turn, oil the key rather than trying to lubricate the lock. Same effect!

If a hot kitchen is your problem, place a pan of cold water in the oven after food is removed. That way the water will absorb the heat instead of the kitchen getting hot.

ever, when federal officials refused to let them switch flooded acreage for higher land in the soil bank program. It means some will have usable land they can't cultivate because it was previously allotted to the soil bank and other land, not in the soil bank, they can't plant either because of flooding.

Even so, encouraging reports continue to come in from rural areas. First post-drought sales show grass fattened cattle bringing higher prices. Small town bankers and businessmen report people are daring to spend again in anticipation of good crops.

NAACP can continue to operate in Texas, but with clipped wings. Unless a higher court reverses a Tyler district judge's ruling, NAACP will henceforth be permanently barred from all but "educational and charitable activities."

Suit to outlaw the organization in Texas was begun last year by Former Atty. Gen. John Ben Shepperd. It has been carried on by the present staff under Atty. Gen. Will Wilson.

A temporary injunction issued by the Tyler court last fall halted all NAACP activity in the state. Present permanent injunc-

tion bans solicitation of lawsuits and lobbying in violation of state law. Court also ordered payment back of franchise taxes plus interest.

NAACP attorneys filed immediate notice of appeal.

### Water Bill Filibustered

A water storage buying proposal was down and maybe out, after a 13 hour discussion by Sen. Otis Lock of Lufkin.

Lock's determined opposition meant several days delay on the measure at a time when delay often means death. Sen. George Parkhouse of Dallas, sponsor, was so disgruntled he threatened to junk the whole water conservation program.

Proposal, if approved by the voters, would allow the state to issue bonds to purchase water storage space in federal reservoirs. Lock contended the plan would be so unpopular with voters it would sink the whole water plan at the polls. He objected on grounds it would be non-self liquidating and would bring in federal controls.

### ENOUGH SAID

First such bill to come up brought on a record breaking 36 hour filibuster. But the second one was shoved through in minutes after a vote to shut off debate.

Passed was a bill to require local elections before schools can be integrated.

Last apparent hope of the segregation opponents now is that the bills will be referred to the attorney general and ruled un-ly, if asked. Gov. Daniel said he plans a thorough staff study of each bill before deciding whether to seek a ruling.

### BETTER PAY APPROVED

If voters consent, future legislators may avoid some of the financial pinch many complain of now.

Senate approved a House constitutional amendment providing for annual sessions and more pay. But it upped the House-suggested salary of \$4,800 to \$7,500 a year.

Present arrangement is \$25 a day for 120 days. It totals \$3,000 for two years unless a special session crops up. Since May 7th when the 120 days ran out,

lawmakers have been on their own moneywise.

Legislators wives have been heard to speak bitterly of going home in the hole every session. They cite cost of campaigns, two moves, high expenses in Austin plus payments on house back home and constant telephone calls and trips to Austin between sessions to handle constituents' requests.

Concluded one wife from an extreme north Texas district: I have put my foot down. This is our last term."

### SCHOOL LAW STUDY

A searching examination of Texas school problems, such as preceded the Gilmer-Aikin laws has been proposed.

Resolutions introduced in both House and Senate said many districts are unable to provide teachers and buildings to keep up with the rapid increase in

pupils. A 24 member committee to study needs and report to the 1959 session was recommended.

Committee would be made up of six appointees of the governor, six by the Board of Education and six each by the Lieut. Governor and speaker of the House.

### SHORT SNORTS

Texas will have 205 new lawyers after the Supreme Court holds swearing-in ceremonies May 18th for those who passed the spring bar examination. Fishing may cost more as a result of a House passed bill raising the fishing license from \$1.65 to \$2.15. Senate finally passed a controversial House bill which will enable cities to obtain federal aid for slum clearance and urban redevelopment. As finally passed by both houses, the REA bill will allow co-ops to serve (1) persons in rural areas where private power is not avail-

able, (2) city residents where there is no private power company and (3) all former patrons in a rural area annexed by a city plus other patrons to whom private power is unavailable. Included in the general appropriations bill, now in process of legislative approval is an allocation of over \$26,500,000 for salary increases for state employes for the next two years.

### STATE CAPITOL News

By VERN STANFORD  
Texas Press Association

Laws are fine so long as they have no teeth in them.

Apparently that's the feeling of 74 members of the Texas House of Representatives.

At least that's the way they voted as they came down the home stretch to final adjournment.

House members had their best opportunity to express their opinions about putting teeth in Texas laws when Senate Bill 55 by Sen. Preston Smith came up for House consideration.

Previously it had passed the Senate with flying colors; it was given a "do pass" recommendation by the House State Affairs Committee and it carried Gov. Price Daniel's endorsement.

SB-55 pertained to publication laws. But only to laws already on the statute books. Specifically only those laws ignored by those public officials who dislike to report their activities to the home folks.

No new public notices were called for in the bill. All SB-55 did was strengthen existing laws. It merely pin-pointed who was responsible for printing public notices, so that the people might be informed.

Present laws provided that any public official who flatly refuse to follow the requirements of existing laws shall be subject to a fine or removal from office. That's already on the statute books. But Texas laws fail to designate specifically who is responsible.

The new bill was even more considerate than existing laws, for it even allowed for relays due to oversights or plain carelessness.

Actually SB-55 applied only to those public officials who intentionally violated the law. It required numerous "warnings." It would therefore affect only those public officials whose attitude was "The public be damned. I'll spend their money as I please. I'll tell the people only what I want them to know."

SB-55 was one of the Better Government bills proposed by the Texas Press Association. House sponsor was Rep. John R. Lee of Kermit, Texas.

The vote was 74 against and 56 for the bill.

Although in the minority these Representatives fought to open public records to public view. They made a sincere effort to tighten Texas laws against further secrecy in governmental operations.

## BOYS - BE CAREFUL You Are Playing With Death

A group of boys are flirting with death—but they possibly don't know the risks they are taking. They like to hang around the Sales Barn on East Third Street. They play around there and have had some enjoyable times. They probably have never thought that some time one or more of their bunch might be killed instantly, or horribly burned.

These boys take delight in tossing baling wire binding from around hay up over the electric light lines. They don't think of the danger to themselves or the inconvenience it causes great numbers of electric service users. Several times recently when lights were blinking, or going off entirely, City Light boys have found the trouble at the Sales Barn. The other night while it was raining, a piece of baling wire was removed from one of the high, hot wires. It was draped over one wire, swinging in the wind into another hot wire. Each time it touched lights all over town flickered. Lights went out everywhere. On another occasion one of the innocent looking pieces of baling wire became entangled with a hot wire and swung into the guy wire on a light post. If one of the boys had touched the guy wire he would have been killed instantly. Wednesday morning while it was raining one of the wires was hooked over a hot electric line and grounded to the wet post. Touch the wet post, and zing—no more life.

Boys, you can see this bit of fun has dangerous complications. To protect your own lives, and the lives of others, for goodness sake, wake up.

okayed a proposed constitutional amendment upping the amount the state can spend on public welfare each year, to \$47,000,000. If approved by the voters it will bring a \$10 monthly increase in the old folks' checks.

Congressional Redistricting—In a redistricting bill the legislators abolished the Congressmen at large post now occupied by Martin Dies and gave Harris County (Houston) a second congressman. They also juggled around eight other districts and divided Harris County into two districts.

Urban Renewal—Approved was a slum clearance bill which would allow cities to condemn blighted areas for redevelopment by private enterprise.

Teen Age Drivers—Two bills affecting the hot rod crowd were given final okay. One makes girls under 18 and boys under 17 responsible for traffic violations. Other gives the Department of Public Safety the say so as to whether youngsters under 16 can have drivers licenses. Previously, county judges had the authority. Another bill, governed destruction of property by minors. It would make parents responsible up to \$300.

55th Gravestones—Apparently dead for this session are these issues:

Law enforcement Commission—Governor Daniel's plan for a "super grand jury" for investigating crime and official misconduct.

Reform Bills—Prohibiting law makers from appearing before state boards for a fee, and (2) eliminating the automatic delay of lawsuits when a legislator is hired as an attorney.
