TOMMY MEGNA IS KILLED IN ONE-CAR ACCIDENT

THOMAS W. MEGNA

A one-car turnover in the early morning hours Sunday resulted in the death of an Abernathy High School Senior student, Thomas Wayne Megna, 17, son of Mrs. Frank (Mary) Megna of Abernathy.

The accident happened at a slight curve in FM 597 about two miles west of Abernathy. Site of the wreck is between the Goeth and Konesko farms. The victim was alone in the car at the time of the acci-

Justice of the Peace Charles E. Smith of Lubbock pronounced Megna dead at the scene of the accident, which occurred in Lubbock County.

A native of Chelsea, Mass., he had lived here most of his life. He was a member of the AHS Antelope football squad.

Funeral rites were held Tuesday in St. Isidore Catholic Church in Abernathy, with the pastor, the Rev. Clifton Corcoran, officiating. Burial was in Abernathy Cemetery under direction of Chambers Funeral Home.

Pallbearers were Billy Beeson, Danny Joe Allen, Steve Gregory, Varric Horne, Clinton Reeves and Mike Abbe.

Survivors, in addition to his mother, include a brother, Johnny; and a sister, Laura, both of the home; his maternal grandmother, Mrs. N. C. Hix of Abernathy; and members of his late father's family in Massachusetts.

ATTEND SHOWING OF 1974 FORDS

TALK IN PRINT

The Younger Generation. Mr. and Mrs. Richard Havens and Mr. and Mrs. Sammy Hunley, gave Abernathy Weekly Review readers a good newspaper for the two editions, August 16 and 23, while we were away on vacation. This came as no surprise to me, because I knew they had the ability to put out a good newspaper. Our thanks to them. And, we had a great vacation in California with Shag and Mary Nell Willis ... good friends and perfect hosts.

The best news we brought back from California is that Mr. and Mrs. Ray (Shag) Willis plan to return to Texas to live in the not too distant future. They hope to be here not later than the first of the year if they can sell their property in Oceanside and tie up other business loose ends by then. At this time, their plans are to make their home in Amarillo for the next two or three years. Shag, an electrician by trade, may work on two huge building projects due to be started near Amarillo. Currently, he is retired, but would like to go back to work for a couple or three more

Note to Dot von Struve: It WAS the "first person' that required your name, and I WAS not ashamed to claim the story. That's the only reason.

I enjoy reading your stories about the Sunshine Group meetings. It's for the same reason I've heard housewives complain that they are tired of eating their own cooking. After more than 40 years of writing news stories it has become a perfunctory thing of who, what, when, where and why reporting, which is dull compared with stories by the Havens, Hunleys and Dot von Struve.

Review readers and the community will be in better hands when I turn over the reins to my successors, the Havens. They will escape

PIONEER GAS INCREASE

Hale County - Abernathy, Texas - Lubbock County

AMARILLO, TEXAS August 22, 1973....Pioneer Natural Gas Company made application today to all incorporated cities and towns served by its West Texas Transmission System to change the cost-of-gas adjustment provision of the general service rate, according to an announcement by K. Bert (Tex) Watson, company president.

For the last three years, the general service rate has been adjusted annually in April to reflect increases in the average cost of gas for the prior year. Pioneer's request would allow making this ad-justment each month for the current monthly average cost of gas. According to the company, this change would more closely meet the objective of the original adjustment pro-

"Annual cost-of-gas adjustments," Watson explained, "will shortly penalize the company for aggressive competition for new gas supplies because of the lag between increases in the average cost of gas in the field and the time these increases may be passed on to the customers.

Watson made note of the increasing demand for natural gas and the critical gas supply shortage which has developed within the last few years. There is increasing demand in the company's gas supply area for new gas that is being developed at much greater costs than existing supplies. Pioneer must be able to buy this new and more expensive gas and participate in more costly drilling and exploration activities in order to assure an adequate gas supply for its ly, Pioneer has pipelines into two areas of good potential gas supply, and since the acquisition of new gas will be necessary to continue serving existing customers, this advantage should not be lost to Pioneer's service area by failure to meet going prices,' Watson said.

If approved, the effective date of the new rate adjustments would be October I. 1973, and the first adjustment would be applied to all bills rendered on or after that date. Since the end of 1972, the company's cost of gas has increased by about 2-1/2 cents per thousand cubic feet (MCF) and the first adjustment would therefore be about 3 percent

of the average domestic price. "In 1970, when we reached the original agreement on a cost-of-gas adjustment with the cities, it appeared that an annual adjustment would be appropriate," Watson said.
"At that time, it was not predicted that the energy situation would develop so rapidly accompanied by the accelerated increase in the field cost of gas which makes it necessary for us to request this more current provision," Watson continued. "I think the spirit of the oniginal agreement, to permit Pioneer to recover its increased costs for gas, is reflected in this request, " Watson concluded.

EXPERIMENT STATION FIELD DAY ACTIVITIES SET FOR SEPTEMBER 11th

LUBBOCK -- The 64th Annual Field Day and Open House of the Texas Agricultural Experiment Station has been set for September II. A review of new developments in agricultural research on the South Plains will highlight the special occasion.

Announcement of the upcoming field day activities was made by Dr. George McBee. resident director of the TAES. and Oliver Newton, meteorologist with the National Weather Service and field day committee chairman.

According to Newton, discussions and explanations of research work conducted by TAES and USDA-ARS scientists will be presented in 11 different field locations on the sprawling 320-acre site north of Lubbock

"The field tours will begin at 1:00 p.m. and will include new research developments in cotton physiology, environ-mental effects on grain sorghum, cotton diseases, irrigation studies, cotton varieties, soil fertility, weed control, grain sorghum insect resist-ance, narrow-row cotton, sorghum varieties and oil-seed

Says Newton, "We have added several new field tours this year, and as an aid to visitors, a shuttle service will be available. The shuttles will depart from the station headquarters every 15 minutes throughout the afternoon, allowing visitors to get on or off at anyfield stop. Visitors will be able to examine and discuss the particular area in which they are interested for as long as they wish, then catch another shuttle when

ready to move on. Also, reports the chairman, displays and exhibits of plant diseases, soil testing, plant physiology and a large ma-chinery exhibit will be featured for public viewing.

"Because of the recent developments in the agricultural industry," concludes Newton, "both the producer and the consumer should be interested in this informative examination of agricultural research work being done here on the South Plains,"

we visit for a few minutes by way of a letter? How wonderful it would be if we could see all of you in your homes, but that seems to be next to impossible. We did have the privilege of visiting in some homes, and we chatted with some on the telephone. We missed some of you because you weren't home when we came or called. We want you to know how much we appreciate your faithful support and prayers for us.

We have traveled together as a family this summer, and our schedule has been very full. In meetings at Stuttgart, Arkansas, June 8-10, children gave very generously for VBS's in Burundi. Next, we had a wonderful time in a youth camp at Smackover, Arkansas, June 11-16. The Lord blessed. and most of the campers found victory. What a glorious time! The blessings of the Lord were upon the Summer Conference at Wilmore, Kentucky, June 27 - July 1. You missed it. My, what a shame! Then on July I we had the privilege of being in services in Lexington. With a few days off, we visited college friends in Flemingsburg, Kentucky, July 2-5. Then it was on to West Asheville, North Car-olina, for a weekend revival, followed by a few days of rest.

In Washington, D. C., we found we didn't have enough money or time to stay many days, but the sights were tremendous! In the Washington monument, up so high, we were reminded of the little girl who asked her mother, Is Jesus expecting us?"

On July 15 we spent the morning in Alliance, Ohio, and the evening in Canton. Currently we are at the WGM office in Marion, Indiana, A few more services, a few more visits, and two months on the road as a family will be history. We have had a wonderful time together. God's presence has been so great. His protection so abundant. The girls now sing as a trio in some services, and have sung over the radio. Sometimes Jonathan sings with them in Kirundi.

The State of Texas House of Representatives Austin, Texas June 29, 1973

To the Editor: It is with great pleasure that I take this opportunity to commend Representative James E. "Pete" Laney for the time which he devoted to the Committee on Agriculture and Livestock during the 63rd Texas Legislature. The honor and pleasure I enjoyed in serving with Pete while I was Chairman of this Committee will always be treasured.

You may be assured that his hard work and dedication will be written into the history of good government as it concerns this past session of the Legislature. I only hope that people throughout this state will be appreciative of the accomplishments and hard work that he and the entire committee have achieved.

I truly hope that the committee has served and will continue to serve agriculture to the best of its ability as we continue into the future in the legilative process.

It has been a pleasure to work with Pete and the other members of the committee in the pursuit of good and bene-ficial legislation in the agricultural area this past session of the Legislature. Let us hope that we shall be able to work together toward this end for many years to come.

Crop Irrigation

Information The cotton plant is basically a dry-land crop. Very little water is used by the plant until first bloom; then water use increases quickly until peak bloom and then gradually decreases until growth is stopped, states County Extension Agent

James Esty.
Irrigation applied late in the season delays maturity. In our area an irrigation after the middle of August may prove of little value, except some few years when it is extra dry in late August and early September. An extremely high level of soil moisture may encourage excessive vegetative growth at the expense of ball set.

If the soil moisture becomes too low and extensive wilting occurs the irrigation of cotton may cause the plant to shed many of its younger squares and bolls resulting in a loss in When fields have a flower

garden effect as to blooms.

this is an indication that growth is restricted and irrigation has been delayed too long.
When a late irrigation causes a vegetative crop and this is coupled with our low night temperatures (soon to reach 60 degrees, which stops

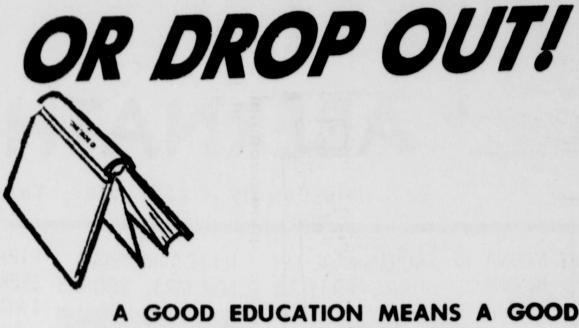

all ball development) yield loss can be significant, and stripping difficult.
At this stage grain sorghum and soybeans seem to be stressing more than cotton. Irrigation is critical at this time for these crops especially soy-beans. After grain sorghum has turned red, irrigation has little value. If grain sorghum is going to lodge it will normally do so because of moistures stress

earlier in the season. Information on irrigation of High Plains Crops is available at the County Extension Office.

DOPE OUT...

A GOOD EDUCATION MEANS A GOOD JOB . . . A GOOD LIFE!

Face it! Those hang-ups you're trying to escape will only get bigger if you drop out of school or get on the drug kick. Think you don't need an education to have money in your pockets? Think again. A diploma will mean greater earning power for you in the years ahead. Think you don't need to be warned about the drug menace? Think again. Many youngsters have found themselves trapped by experimenting with dope "just this once." If you're doping out or dropping out, you're not as cool as you think you are. Play it really cool . . . stay in school and away from drugs. Now's your chance to build a future for yourself . . . don't blow it by taking the wrong step. Whenever you start thinking about quitting school or going the drug route — stop — and think again!
