

Abernathy Schools Budget And Tax

The largest increase in school property taxes in history was adopted by school trustees last year, according to the report Bench Marks for 1981-82 School District Budgets in Texas published by the Texas Research League.

Tax bills mailed by the 1,070 school districts in Texas totaled almost \$2 1/2 billion—a whopping \$393 million increase over the previous year. Statewide the increase was 18.8 percent.

The increase for the Abernathy ISD was 36.9 percent.

Last fall school districts adopted

budgets for 1980-81 calling for spending averaging \$1,928.95 per student for current operations. Abernathy's budget called for \$3179.05 per student based on 990 students in average daily attendance in 1979-80.

The average salary for classroom teachers paid by the Abernathy ISD in 1979-80 was \$13,559 which was 12.3 percent above the minimum salary

prescribed by the state. The average among all school districts in Texas was \$14,101 per classroom teacher, or 13.7 percent over the minimum.

There was an average of one teacher for each 10.9 students in the Abernathy ISD, as compared to a statewide pupil-teacher ratio of one to 16.5.

School districts are permitted to levy local property taxes above the local

share of the Foundation School Program and to use the proceeds to "enrich" the program prescribed by the legislature.

In 1980-81 the average school district levied property taxes five times the amount required for the Foundation Program and used the funds to enrich the program by an additional \$695 per student. Enrichment from local taxes in the Abernathy ISD was \$1561 per student.

School districts must adopt new budgets for the 1981-82 fiscal year

which begins September 1st. The tax assessor must calculate a tax rate that would produce the same revenue that was levied last year.

If trustees anticipate adopting a rate that is more than three percent greater, a quarter-page notice must be published and a series of public hearing on the tax rate must be held.

Tech Student Electricuted Near County Line

A 21-year-old Texas Tech student, working for Amoco Production Co. in Hale County for the summer, received a fatal electric shock Monday while unloading equipment under a power line at Amoco's plant west of Abernathy, according to a company employee.

Gordon Barrett of 3210 Second St. was pronounced dead at 5:15 p.m. Monday on arrival at Lubbock General Hospital, hospital officials said. Justice of the Peace Wayne LeCroy ruled the death accidental.

Rick Reep, plant foreman, said Bar-

rett and other employees were unloading an electric transformer from the bed of a pickup truck, which had backed under a secondary power line carrying 440 volts of electricity.

Barrett was standing on the ground and working a winch with a cable when the machinery's long pole touched the overhead line about 4:15 p.m. Monday, Reep said.

District foreman Charlie Miller said

Barrett, an engineering major at Tech, was the only person injured in the accident.

The El Paso native was taken from the plant site 12 miles west of Abernathy to Lubbock General by the Abernathy Emergency Medical Services, which was intercepted by Lubbock EMS on FM 179, about a mile south of County Line Road, separating Lubbock and Hale counties.

Three paramedics from Lubbock joined Abernathy technicians inside the ambulance to assist in the lifesaving efforts. A.J.

City Council Meeting Monday Night

The Abernathy City Council met in regular session Monday, August 10 at 7:30 p.m. to discuss several items of business.

Minutes were approved from previous meetings and the council recognized visitors that were present.

Two visitors were concerned about the Police Department and had complaints about how it was functioning.

One visitor stated that the police were a nuisance because they drove by his place too often. He also stated that one police officer was not working a full shift.

A second visitor complained of two officers riding in the car at the same time. The matter was discussed.

Jerry Oswalt then confronted the Council and indicated to the Council that he will obligate himself to a 20 year contract to purchase the waste-

water effluent from the City.

Oswalt's proposal was taken into consideration, but the Council did not make a decision on the effluent because a price has not been negotiated for it thus far.

Oswalt expressed his intent to use the effluent to irrigate his nearby crops.

Three citizens were present to voice their opinions on the proposed use of General Revenue Sharing Funds received by the City during entitlement Period 13.

The visitors wanted part of the General Revenue Funds to be used to pave roads on the east part of town. The issue was discussed and it was pointed out that roads are paved by members of the private sector who join together and pave their streets. Other alternatives were discussed.

General Revenue Funds are Federal

Grants to Cities, installed during the Nixon administration, which are allocated to cities each year that apply for them. The grants amount to \$19 thousand for the coming year.

It is Abernathy's turn to sponsor the Hale County Elected Officials Meeting, which will be held August 31 in the City Community Center. Each town in Hale County takes turn at having this meeting of Hale elected officials in their town. It is Abernathy's turn.

An employee of the City Water Department requested a pay raise of \$25 a month. It was granted.

The Council then considered a resolution to suspend the effective date of proposed increase in gas rates by Energas Company.

Energas filed for a rate increase, but the 63 cities Energas serves in West Texas have the right to suspend the rate increase date another 128 days.

The increased rates would have gone into affect September 4.

The Council suspended the increase date and will have another 128 days to study the situation.

The airport lease was discussed. It was decided that Max Crowell has until the next regular meeting of the City Council to pay the \$1,500 on the lease. If it has not been paid by then, the lease will be cancelled.

The Council discussed hiring a School Crossing Guard and they decided to find someone for the coming school year. The meeting adjourned.

Davis Snack Bar Purchased

Louise Thomason purchased the Davis Snack Bar two weeks ago from Mr. and Mrs. Preston Davis.

The snack bar is located across from Abernathy Schools at 712 Ave. E.

The Davis's owned the snack bar for a period of 12 years. Mrs. Davis managed it during this time.

Louise Thomason has worked at Davis Snack Bar for the past 11 years.

Hayden Blalock Robbed At Knifepoint

Hayden Blalock of Abernathy reported he was robbed early Sunday at knifepoint by a tall black male near Park Road 18 off Broadway, police said.

According to reports, Blalock was coming out of a restroom near the road when the robber grabbed him by the shirt and threatened him with a six-inch long knife. Police said the suspect took everything out of the victim's pockets, as well as drove off in Blalock's 1977 Buick Skylark.

The suspect shoved the victim into the restroom and locked the door from the outside, police said. By the time Blalock managed to get out, the suspect was gone and so was the car.

Blalock's Skylark was still missing at press time.

He was robbed of \$10 cash and his car was electronic equipment and two sets of golf clubs.

On The County Line

By: Keith Tooley

We attended the West Texas Press Convention held in Lubbock this past week at the Southpark Inn.

It was an enjoyable convention and provided a good learning experience for those of us in the Journalism field.

Kent Hance gave a speech at the Saturday luncheon and expressed optimism and support for the Reagan tax cut bill. He received two standing ovations from the crowd of editors and news reporters.

He stated that taxpayers will receive a cut averaging \$250 for every \$1,000 each individual pays in taxes with the new tax cut bill. The tax will become permanent in 1985.

Hance believes the bill will reduce inflation and that the money now going into the public's pockets should be put into savings and investments. Hance also expressed concern for a policy directed toward foreign affairs. He stated that foreign aid was necessary and should continue.

Hance seems to represent the thoughts and goals of many of the people in this area regardless of what party or party policies he favors.

error appearing in his paper, and in the next issue had something to say about it.

"Yes, we know there were some errors in last week's paper. We will further agree that there were some errors in the issue of the week before, but before bawling us out too unmercifully about it, we want to call your attention to a few facts.

"In an ordinary newspaper column, there are 10,000 letters, and there are seven possible wrong positions for each letter, making 70,000 chances to make errors and several million chances for transposition. There are 48 columns in this paper, so you can readily see the chances for mistakes.

"Did you know that in the sentence, 'To be or not to be,' by transposition alone, 2,759,022 errors can be made? Now aren't you sorry you got mad about that little mistake last week?"

THE DOCTOR finally reached his table at a dinner, after breaking away from a woman who sought advice on a health problem.

"Do you think I should send her a bill?" the doctor asked a lawyer who sat next to him.

"Why not?" the lawyer replied. "You rendered professional services by giving advice."

"Thanks," the physician said. "I think I'll do that."

When the doctor went to his office the next day to send the bill to the woman, he found a letter from the lawyer. It read: "For legal services, \$50."

Lon Carmickle Awarded WW II Medal 36 Years Late

Lon F. Carmickle received a medal in the mail recently that should have been presented to him 36 years ago in 1945.

The letter he was awarded is the Philippine Liberation Medal, given to Carmickle for his services to the United States of America during the U.S. invasion of the Philippine Islands in 1943. The invasion freed the Philippines from Japanese rule.

Carmickle should have received the medal in 1945 following WW II, when he was given two other medals for serving his country.

In 1945 he was awarded the Asiatic-Pacific Campaign Medal and the Bronze Arrowhead Medal.

Carmickle was born in Petersburg in 1918 and lived in this area through his schooling years. He became active in WW II at 23 years of age in January of 1941 and was stationed in Hawaii for the next three years.

In the later part of 1943, Carmickle served on the 556 Medical Ambulance Company of which he was a First Sergeant. The ambulances transported Americans to ships after they were injured on the battle field during the invasion of the Philippines.

Following WW II, in 1945, Carmickle was transferred back to America and

began to pursue a life in the business world.

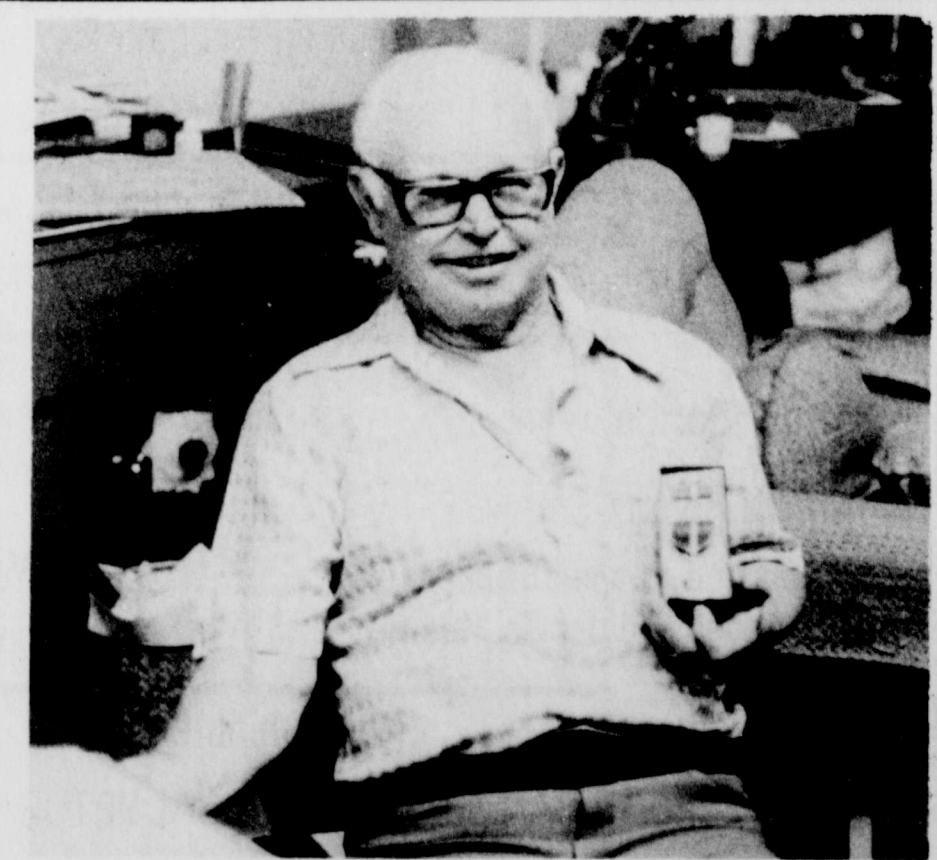

He moved directly to Abernathy following the war and worked at Southwestern Public Service at Tuco for almost a year. Then in 1946, he bought a farm at Tulia and farmed for a year before moving back to Abernathy in 1947.

At this time, Carmickle started his own dry-cleaning business, which today is one of the oldest established businesses in Abernathy, Viv's Place.

Carmickle had several other businesses from time to time in Abernathy, but dry cleaning remained his most prevalent business through the years.

In 1949, he married the former Vivian Heflin of Plainview. The Carmickles have two daughters, Patti Walsh of Lubbock and Nancy Smith of Abernathy.

Carmickle has served Abernathy as a community leader. He served on the Volunteer Fire Department for 26 years, 9 years on City Council, 7 years on the School Board and has been a member of the Lions Club for the past 32 years, from 1948 to 1980. The Carmickles are also active members of the First United Methodist Church of Abernathy.

LON F. CARMICKLE is pictured with a WW II medal he received recently through the mail. He should have received it 36 years ago in 1945. As well as serving in WW II, Lon has been of service to Abernathy for the past 34 years. (Review Photo)

When asked why he might have received this medal now instead of in 1945, Carmickle stated that they probably didn't have them made at the time and just recently decided to give

the medals.

America will be celebrating the 36th anniversary of Japan surrendering to the United States August 14, 1945, tomorrow, which is August 14.

WEEKLY DEVOTIONAL

Jesus tells us about people who appeared to be holy to others, but in reality were just the opposite (Mt. 23: 27-32). They were kidding themselves. Doing external acts made them feel good about themselves and look like good and holy people to others was their pattern of life.

This is a temptation all of us might have had at one time or another-to look good to others, but really not be the person others think we are. Our wants and needs inside ourselves tell us we have to be important well thought of by others.

Temptation comes from within the majority of the time and is not someone's actions or thoughts we can pinpoint and say, "That is a temptation". Most of the time it is a way of life, an attitude that we have developed over the years. The only way we can conquer these attitudes is to pick out one situation in which this attitude is present and work on this situation and the ways in which we manifest it in our daily lives.

Plains Pest Management Report

Cotton
Cotton bollworm egg laying has been on the increase over the past week. Light trap collections of adults have also increased over last week's collections. The heaviest egg lays and small worm counts have been in the Edmonson and Kress areas. Egg counts in this

area have been ranging from 10-80 per 100 plants with an average of 41 per 100. Worm counts for the same area have been ranging from 10-120 per 100 plants, with an average of 30 per 100. In the Hale Center, Cotton Center and Mayfield area, counts have been much lower. Egg counts in these areas have been 0-30 per 100 plants.

Worm counts have averaged 0-20 per 100 plants, averaging around 10 per 100.

Over the past couple of years we have discussed worm and egg populations as numbers per acre and numbers per 100 plants or percents. Economic thresholds should be based on a number per acre basis when making decisions.

Spider mites should continue to be watched in fields that are not in the dent stage.

Sorghum
Greenbugs have reached economic levels in a few fields this week and have required treatment. Aphid parasites remain low on all sorghum observed.

A few headworms are now being found in fields where the grain is in the milk to soft dough stage. When headworm populations exceed an average of two small larvae per head, control should be implemented.

Sorghum midge have been found on blooming sorghum heads west of Plainview. The midge is a small red to orange colored fly. Sorghum midge deposit eggs in the spikelets of the blooming head. Maggots hatch and feed inside the developing seed. Blasted heads may occur under heavy infestations. Insecticides should be applied when 25 to 30 percent of the heads begin to flower and the number of midge adults average one per head.

Male horses have 40 teeth, female horses, only 36.

Corn
Many corn fields were reaching the dent stage this past week. Several growers have indicated that some fields will probably be ready to harvest around the last week in August or first week of September.

Southwestern corn borer (SWCB) egg laying activity has declined. Early planted fields which are now in the dent stage should be past consideration for SWCB control. Later planted fields with high small larvae counts may need an additional treatment. Light trap collections of adults is down at all trap locations. A field in the Edmonson area, which was infested early (July 5) with 2nd generation eggs, has produced larvae which were found in the pupal stage this past week. These SWCB moths will probably migrate to late planted corn in an attempt to produce a partial 3rd generation. Eggs and larvae of the third generation should not be a concern for most growers.

REPAIR IRRIGATION UNITS FOR EFFICIENCY
Costs of irrigating cropland can be reduced by keeping irrigation pumps and power units in good repair to improve fuel efficiency, says an economist with the Texas Agricultural Extension Service, Texas A&M University System. To evaluate the potential profitability of such repairs, consider current

pumping efficiency, depth from which water is lifted, interest rate, cost and expected life of the improvement, and current condition of the power unit and pump. Repair costs to increase pumping efficiency 10 percent from 40 to 50 percent can usually be paid in two years from reduced fuel costs.

COTTON TODAY

A NATIONAL COTTON COUNCIL SERVICE

FARM LABOR POLICY CHANGED: In a recent letter to the National Cotton Council, Secretary of Labor Raymond Donovan outlined a new policy regarding the Farm Labor Contractor Registration Act (FLCRA).

Donovan stated it is the policy of the Department to target traditional farm labor contractors who have repeatedly and seriously violated the act. All field enforcement officers, he added, have been issued clear instructions to that effect.

He stated "any individual, corporation, partnership, etc." will not be subject to FLCRA enforcement procedures as contractors when supplying migrant workers solely for their own operation.

Previously, the Department had held that corporations could not act personally and denied exemptions from FLCRA to farmers, ginners, and other agricultural employers who were incorporated.

PROFITS TO BE SPOTLIGHTED: Researchers, engineers, and other public and private scientists will join agricultural educators, consultants, and cotton industry members January 3-7 in Las Vegas for the 1982 Beltwide Cotton Conference. The event will generate

more than 250 papers and speeches—all focused on problems and opportunities in cotton production. The theme is "Productivity-Profits-Progress."

The series of meetings is sponsored by the National Cotton Council and The Cotton Foundation, in cooperation with the U.S. Department of Agriculture, land-grant universities, and other farm and industrial organizations.

COTTON EXPORTS TO CHINA LOOK GOOD
U.S. cotton exports to China during 1981-82 should be up from the previous year, a U.S. cotton trade team reports.

Reporting after a six-day trip to China, the trade team said it expected that nation to take about 1.5 million bales of U.S. cotton in 1981-82.

The team is sponsored by

Cotton Council International, overseas arm of the National Cotton Council, and the U.S. Department of Agriculture's Foreign Agricultural Service.

The team visited Chinese cotton-growing areas and textile mills. Team members said they were very impressed with the quality of Chinese cotton but surprised at China's antiquated spinning methods.

The group reported that there is a swing to synthetic materials in Chinese domestic textile consumption, because consumers think the synthetics are more durable and because synthetics are readily available. In contrast, cotton garments are sold under strict quota laws in China.

DUST RESEARCH STRESSED: The Industry-wide Cotton dust Committee agrees that the Supreme Court's recent dust ruling underlines the need for the cotton industry to join with other industries in pursuit of regulatory reform.

The new rulemaking, expected to be announced soon, is seen as the most promising opportunity for relief in the immediate problem with the cotton dust standard, the committee reported at a recent meeting in Dallas.

The group also agreed that the expanded industry/government research on cotton dust is progressing on schedule and should continue to be funded at a level to speed up a final solution to the dust problem.

Homemaking Teachers Attend Conference

The Vocational Homemaking teachers of Texas were given a challenge to excel during the State In-Service Education conference, July 27-30th at the Dallas Convention Center.

Robert W. Carter, Associate Commissioner, Department of Occupational Education and Technology, Texas Education Agency, offered the challenge at the first general session. There was a choice of twenty-six interest

groups attending that permitted each conference participant to improve his or her professional competencies.

In attendance from Abernathy Schools was Mrs. Jan Montgomery and Mrs. Marilyn Stone. Serving as a member of the Area 1 Advisory Council, Mrs. Stone helped in planning the area in-service to be held October at Plainview High School.

LAKEVIEW PHILOSOPHER

Thinks He Knows Why Those Washington Editors Were So Badly Fooled

Editor's note: The Lakeview Philosopher on his Johnson grass farm reacts to the Pulitzer Prize hoax, in a minor way.

Dear editor:
When the Washington Post got taken in by one of its own reporters who made up a story, got it printed on the front page and won a Pulitzer Prize for it, only to have to give it back, the paper took up over three pages of type explaining and apologizing.

This seems to set a bad precedent. If everybody who ever got taken in by a political promise or a slick salesman used that much space regretting it, no paper would have room for anything else.

I don't know what those editors were thinking about when they let the story appear without checking on it, but obviously they weren't, when they were young, among those of us who were taken in by that ad that said ten cents for a magical gadget you could place under your tongue and mystify your friends by throwing your voice. It didn't work and the dime was wasted but it was excellent training for being on the

lookout for frauds.
As you can see, lack of a ten-cent gadget when they were young left those editors unprepared to face the realities of life in the nation's capital.

But in the oldest case of being taken in occurred a few weeks ago in Iran. Some international sharpster in Paris convinced the Iranian leaders he had 50 million dollars worth of sophisticated military equipment to sell on the black market, and they shelled out. Then they found out he didn't even have a B-B gun, and they're out 50 million.

Nobody likes to see anybody get taken in, but if you'll recall the televised scenes of those Iranian students parading those blindfolded Americans in front of the embassy and using the American flag to haul trash in and the Ayatollah bragging about rubbing the U.S. nose in the dust, you'll have a hard time keeping from laughing over their buying 50 million dollars worth of nothing.

Yours faithfully,
J. A.

ESTATE PLANNING FOR AG PRODUCERS

Estate planning at some point becomes a concern of every farmer, says an econo-

mist with the Texas Agricultural Extension Service, Texas A&M University System. An "asset freeze" is one of the biggest estate planning ideas with respect to preparing for disposition of farm land. This involves fixing the taxable estate of the

landowner at today's prices and letting future appreciation pass to the next generation, and retaining operating control and income from the land. To do this the landowner sets up a corporation authorized to issue common and preferred stock.

Each individual in the United States requires an average of 1800 gallons of water per day.
