What the Tennessee Valley Authority is Doing

I MADE a trip to my old home in Knoxville, Tennessee, in July and August. I have made 42 trips back there since I came to Texas in 1877. The Tennessee Valley Authority, a governmental agency for developing hydro-electric power from the mountain rivers in connection with the Muscle Shoals project, has its headquarters in Knoxville. About 1200 white collar government employes work in the half dozen office buildings in the city, and 2000 more work in the construction of the great Norris dam, 18 miles from Knoxville on the Clinch river, a river that has its beginning 300 miles up in Virginia. I went to see the dam now being constructed and it is the most stupendous thing I ever saw. The workmen had just begun to pour concrete, and I was told that it would be completed in three years.

The dam is to be one of the great river bottoms in the United States. It will flood scores of thousands of acres and skeletons of more than 20,000 graves. The Norris dam is one of four that will be built on these Tennessee streams—that is, they will be built if Congress appropriates the money to carry out original plans. Three hundred and sixty millions already have been appropriated, but only about \$50,000,000 is being expended annually. It is the first time the South ever got a good lick at the treasury and I heard no complaint from anybody.

Great Smoky Mountain Park

The government also has thousands of CCC men working in the Great Smoky Mountain National Park that lies along the line of North Carolina and Tennessee. This park consists of several hundred thousand acres of scenic mountain land. The two States herein mentioned appropriated \$5,000,000 each, and John D. Rockefeller gave a like amount to buy the land, which was turned over to the Federal government. I have made several trips through this park, and while I have seen Yellowstone and other national parks, I can truthfully say that the beauty of Great Smoky Mountain Park will have no superior. Deer and bear already roam these mountain fastnesses, the scenery is superb and mountain streams make a

fisherman's paradise. Because of its location near the centers of population, I predict it will be visited by more people than visit other national parks.

What Uncle Sam is Doing for Users of Electricity

The Tennessee Valley Authority has already bought out the Tennessee Power Company, a company which furnished electricity to Knoxville and most of Eastern Tennessee, and is now constructing a high-powered line from Muscle Shoals to Knoxville. The kilowatt price to patrons has been already cut one-third, and when Norris dam is completed a deeper cut is anticipated. This seems to please everyone except stockholders of the Tennessee Power Company. This company had to sell or submit to a competition, it is said, that would have failed to earn anything on its investment, though tax free. I was sold for just enough to pay bondholders 96 1/2 percent of their investment. Stockholders, representing the common people who had put their savings into the stock of a company which was paying satisfactory dividends, are left to hold the bag. Many employes of the company had all their savings invested in company stock. Two years ago this stock sold at par; now it is worth nothing. It would seem that these stockholders are the "forgotten men." But the great majority of people will benefit from cheap electricity, so I suppose it's all right; yet stockholders lost \$7,000,000. The bonds were held in New York; the stock locally.

Has the Government Your Finger-Prints?

The Federal Department of Justice files now contain more than 4,000,000 finger-prints, the "largest and best collection" of its kind in the world, according to Attorney General Cummings. It grows on an average of 2700 daily, with 6,744 agencies contributing. General Cummings reports that during the year ending July 1, 1934, 265,128 persons with criminal records were identified through the central finger-print bureau. During recent months a "non-criminal" finger-print division has been organized for the protection of law-abiding folks; their finger-prints are voluntary, of course, but in 90 days more than 6,000 citizens have placed their finger-prints on file—chiefly for purposes of identification in case they are kidnaped, or against the possibility of mental lapse, or death, or injury by violence, or accident in places where they are unknown. One of the most puzzling things to the Justice Department is that many criminals, who know their finger-prints are on file, are disfiguring their fingers so as to destroy all records of the finger-prints on file. Frequently these criminals get doctors to scarify their fingers, and one doctor in Chicago has been arrested for so treating John Dillinger's fingers.

Are the People Satisfied With Primary Elections?

Now that the primaries are over in

Texas and Oklahoma, the people should not forget the objections to the selection of a primary vote. The blanket aggregation of unfamiliar names makes such elections in some cases a farce. Here in Texas we find a man, absolutely unknown to 99% of the voters, having his name changed with the avowed purpose of running for a State office, substituting for his name the name of a very popular public citizen. By so doing he received 264,000 votes. In Oklahoma two years ago a man was elected to Congress because his name was the same as that of a very popular former citizen of that State. In the latter case it seems to have turned out all right, as the voters gave him the nomination this year. He apparently has something in his make-up besides the name of Will Rogers. But how many of us in the two States could vote intelligently when handed the bed-sheet ballot? Believe I keep informed about who is running for office as well as the average man, but I voted blindly for several offices. It might be best to retain the primary for Governor and Attorney General (though I doubt this), but all of the other State officers should be selected in some other way. Many of the States have adopted the "short" ballot and say the results have been exceedingly satisfactory. The convention plan is likely better for selecting our Governors and Attorney Generals than the primary way. It takes so much money to make a canvas for a State office that a man must have wealth or have friends who are willing to contribute to his campaign expenses before he can consider running. In the amount of expenses, as filed in the law by Texas candidates for Governor, all of the six candidates spent as much as the salary of a State judge will pay during the two year term. This cannot be a healthy situation, and is fraught with danger. The conventions are sometimes "boss" controlled, but it's always an intelligent control that knows the voters will not stand for an unworthy candidate. The legislatures of the two States should give this matter serious consideration, and try to evolve a better way.

Is It a Bad Custom?

Tony Miller who lived in Muskogee, Oklahoma, never bought flowers for dead friends but gave money to buy food for the hungry. He was the pioneer jeweler of his city and when he died last month many of his friends followed his example and, instead of flowers, checks for charity lay on his bier. He was born in Czechoslovakia and brought this queer custom to the United States from faraway Prague. But is it a bad custom?

Seeing Things Beautiful

David Wamble of Memphis, Tennessee, blind from birth, was 19 years of age before an operation gave him sight. "I don't know what to make of myself," he said, while looking into the mirror. When asked what was the most beautiful thing he had seen he replied: "I don't know what is the most beautiful thing I have seen yet, but I think it is a tree." He must have had the same feeling Joyce Kilmer had when he wrote:

"Poems are made by fools like me,
But only God can make a tree."

I knew another young man about the same age of this Tennessee lad whose eyesight was restored by a Dallas physician several years ago. Always blind, the unfortunate young man had been reared in a country home in Anderson county. He was brought to Dallas by his mother and left there for treatment. One Sunday morning I was in the waiting room of his doctor along with a dozen other patients. Presently the doctor came out, told us of the boy, said he had operated on his eyes a week before and was sure he could see when the bandage was removed from around his eyes. "I will bring him to the door and remove the bandage," the doctor said. Then followed the most dramatic scene I have ever witnessed. The young fellow was trembling like a leaf, though the doctor tried to calm him. When bandage was removed the young lad stood for a moment speechless, then cried at the top of his voice: "Oh, thank God, I can see!" Falling on his knees in front of a chair, his whole body convulsed, he said: "I want to see my mother who has been my only eyes all my life. I am sure she will be the most beautiful thing I shall ever see." We were all crying along with the boy. Can any of my readers tell me why we cry when we are happiest?

To Illustrate

To illustrate why we cry when we are happiest, I know of a young mother and father who recently made a trip to the Century of Progress Exposition at Chicago. Mollie, their little 4-year-old girl, was left with an aunt. Mollie never cried while her mother was gone, and was brave as she promised she would be. But when daddy and mamma came back, unexpectedly to Mollie, she ran to the automobile, jumped in her mother's arms and burst into tears. Mollie's mamma cried also.

Why He Quit?

A man whom I consider one of the best teachers I have ever known declined to make application this year for re-election as principal of a school that he has managed for at least a dozen years. I wrote him for his reasons for wishing to retire from teaching and received a very peculiar answer. I can but wonder if the position he takes is sound. I will let the reader decide. Here are his reasons: "There is such an absence of training and discipline in the home that teaching has become a burden that I have decided I will not carry any longer. There is so little backing up of the teacher by parents that discipline in the schools is becoming harder and harder to maintain. The lesson of obedience is taught so lightly in the home that struggling to enforce it in schools has become too irksome for

Dire Prophecies of the World Coming to an End

By JOE BRAPPINGTON

(Copyright, 1934, by the Home Color Print Co.)

PEOPLE don't get excited now over prophecies of the world coming to an end like they did when I was a boy.

Between childhood and manhood I suffered much anxiety over the many reports circulated from time to time in Cave Creek that the world would come to an end on certain days.

I can recall at least a half dozen of these dire prophecies, regarded seriously by many folks. As for myself, such prophecies always had a chastening effect, caused me to be gentler and kinder to my brothers and sisters. One prophesy in particular impressed my young

"Reverted to the little savage."

only, this prophesy telling not to begin to attend school in the month but the hour would surely come to

These prophecies perturbed some of Cave Creek's most practically-minded people. Just before a predicted catastrophe of this kind social functions would be poorly attended and some functions postponed indefinitely. Signs and portents of the coming disaster were pointed out by timid and superstitious souls. These claiming that the winds had a mournful sound and barnyard roosters crowed less lustily.

Old Grudges Forgotten

Bill Hawkins and Hark Davis, who had had three fist fights over political and religious disputes, shook hands and became friends again, as became men whose lives were soon to be snuffed out in the twinkling of an eye. Old Joe Brown, who had a grudge against me for some years, remained unfulfilled. I recalled the little savage I always had in my pocket and yelled, fought my part of the grudge, and my part of the grudge, I had marbles ()

Personally I did everything I could to make amends for my past meanness—not only insisted on doing all the churning, but begged my sisters to let me wash and dry the dishes. I was especially considerate of mother; wanted her to sit all day in the family rocker and watch me run things. My piety increased as the day of doom drew nearer.

According to age I was the best marble player in the community, had two pockets full of marbles, won "playing keeps," a game played with marbles, and which is a mild form of gambling. The rattle of these marbles smote my conscience and two days before the end of the world I went in person and restored the marbles to all "rightful owners."

Good Resolutions Discarded

What a saintly man I would have been today had I kept up those boyhood resolutions made when I thought the world was doomed to destruction. But, alas! when the danger passed, and the resolutions remained unfulfilled, I reverted to the little savage I always had in my pocket and yelled, fought my part of the grudge, and my part of the grudge, I had marbles ()

"rightful owners," under protest, however, and not without some severe fighting.

A few months following this dire prediction about the world coming to an end, Cave Creek had another scare—a comet scare. Old Dunk Griffin pretended to know all about comets the same as he knew all about everything else. A group of us small boys had gone to old Dunk's house to ask him if he thought there were any danger lurking in the big comet then visible across the northern skies.

"Well, boys, I don't want to skeer ye," old Dunk began, "but I'm afeared that's a dang'rous comet."

"What do you mean about it bein' dang'rous?" Tom Hulkey, the oldest boy in the crowd, asked in a voice trembling with fear and emotion.

Swishin' Its Tail

"Well," replied old Dunk, "if it starts swishin' its tail it's goin' to do a lot of damage in this here kermunity."

"How can you tell when the comet swishes its tail," Alf Huggins wanted to know.

"In my time I reckon I've seed more'n a hundred of them things," continued old Dunk, "but not more'n ten swished th' Howsomever,

I ain't got it in fur comets, no matter how they wobble. Ef it hadn't been fur a comet ever soldier in my company would er been captured by the Yanks. They had us cut off frum the main army and was fixin' to close in on us when a comet begun shakin' its tail."

"What happened to them Yankees?" Hep Brown inquired.

"It killed ever derned one uv 'em," old Dunk answered, solemnly. "You boys had better run in home now as you can't tell when that thar comet may start floppin' its fiery tail."

With these last words of old Dunk's ringing in our ears, we took one last fearful look at the comet and then stamped in the direction of Tom Mulkey's home, arriving there out of breath and making so much noise we awakened Tom's father, whom we excitedly retold word for word just what old Dunk had said to us about the comet.

Tom's pa, looking disgusted, yawned a couple of times and then said: "You boys ought to have better sense than believe old Dunk Griffin. He is the biggest liar in Cave Creek. Comets don't swish their tails."

God be merciful to me a sinner. Luke 18:13.

DEER PLAGUE TEXAS FARMERS

Farmers and truck growers in the Fort Davis section are plagued by black-tail deer, emigrating from the usual grazing grounds because of grass shortage. About 30 deer were seen frequently in the cane patch of County Clerk H. D. Bloys, near Fort Davis. I says the deer are doing much damage. Ed Dutchover complains that does, yearlings and fawn ate up his beans and corn. W. G. Patton, a gardener, has a similar complaint. On the 1st of the deer have not only ruined the crops but also

Why He Quit?

A man whom I consider one of the best teachers I have ever known declined to make application this year for re-election as principal of a school that he has managed for at least a dozen years. I wrote him for his reasons for wishing to retire from teaching and received a very peculiar answer. I can but wonder if the position he takes is sound. I will let the reader decide. Here are his reasons: "There is such an absence of training and discipline in the home that teaching has become a burden that I have decided I will not carry any longer. There is no little backing up of the teacher by parents that discipline in the schools is becoming harder and harder to maintain. The lesson of obedience is taught so lightly in the home that struggling to enforce it in schools has become too irksome for

me to longer attempt it. I have been solicited to put in my application in a dozen schools, but I have enough. The fact that I have determined to quit teaching is of little moment, but it is a very serious situation that has caused me to change my vocation after giving a dozen years of my life to it."

Poor Little Rich Girl

Lucy Cotton Thomas, 9 years old, is heiress to several million dollars from the estate of her father, the late Edward Russell Thomas, sportsman-publisher of New York. Until Miss Lucy reaches her majority all she will have to live on is the income from the estate. This income amounts to \$5,000 per month and her mother, who is also her guardian, appeared in court and asked that she be allowed to use some of the principal of the estate because she cannot rear Miss Lucy in the style her fortune demands on the \$5,000 per month income. The judge in the case asked the mother to detail how she was spending the \$5,000. He called her attention to the fact that this meant \$166.66 per day, and added that he was supporting his own family on \$10.00 per day; that his children were healthy and happy. The guardian replied that it cost \$1500 per month for Lucy's board and the board of her attendants and servants. She was boarding at New York's most expensive hotel. In addition, Lucy was eating \$288 a month in groceries, (although most of us would think the \$1500 should have covered this). Eighty dollars per month went to the little girl's dentist for looking after her teeth. It cost \$150 per month to maintain a piano for Lucy's music lessons.

Down here in Texas one can buy a good enough piano for a 9-year-old girl to practice music on for \$150 and it can be bought on the installment plan. We can get the very best musical teacher to give instruction for \$50 per month, but Lucy's teacher cost her \$400 a month. The man who is teaching Lucy how to ride a horse receives \$85 per lesson. It takes \$64 per month for her perfumes and confections. Lucy's lip-sticks must be made of gold. A beauty specialist cost \$110 per month. A chauffeur to drive the little girl around costs \$200 per month. But all this is not providing much fun for Lucy. She is only allowed to spend \$47 a month for long distance telephone calls and \$71 a month for toys.

The judge asked the guardian if she didn't think Lucy would be happier rolling a two-bit hoop, riding a merry-go-round at 5 cents per trip than all the foolish expenditures she had narrated. He refused to allow any additional expense and her guardian burst into tears. Poor little girl! The chances are some foreign count (or no account) will marry Lucy for her money after awhile, then will come a divorce with a money settlement to the count. I know lots of poor girls who have a brighter future ahead of them than Lucy. While writing this, five little 7 to 9-year-old girls called to see me and they were playing grown-up ladies, had on dresses of their mothers, and were having a big time.

Dire Prophecies of the World Coming to an End

By JOE D. APPINGTON

"rightful owners," under protest, however, and not without some severe fighting.

A few months following this dire prediction about the world coming to an end, Cave Creek had another scare—a comet scare. Old Dunk Griffin pretended to know all about comets the same as he knew all about everything else. A group of us small boys had gone to old Dunk's house to ask him if he thought there were any danger lurking in the big comet then visible across the northern skies.

"Well, boys, I don't want to skeer ye," old Dunk began, "but I'm afear'd that's a dangerous comet."

"What do you mean about it bein' dangerous?" Mulkey, the oldest boy in the crowd, asked in a voice trembling with fear.

It's Its Tail

"Well, old Dunk, 'if it starts swishin' it's goin' to do a lot of damage here kermunity."

"But you tell when the comet swishin' tail," Alf Huggins wanted to know.

"I reckon I've seed a hundred of them things," concluded Dunk, "but not more'n ten swished through Howsomever,

I ain't got it in fur comets, no matter how they wobble. Ef it hadn't been fur a comet ever soldier in my company would er been captured by the Yanks. They had us cut off from the main army and was fixin' to close in on us when a comet begun shakin' its tail."

"What happened to them Yankees?" Hep Brown inquired.

"It killed ever derned one uv 'em," old Dunk answered, solemnly. "You boys had better run in home now as you can't tell when that thar comet may start floppin' its fiery tail."

With these last words of old Dunk's ringing in our ears, we took one last fearful look at the comet and then stampeded in the direction of Tom Mulkey's home, arriving there out of breath and making so much noise we awakened Tom's father, whom we excitedly retold word for word just what old Dunk had said to us about the comet.

Tom's pa, looking disgusted, yawned a couple of times and then said: "You boys ought to have better sense than believe old Dunk Griffin. He is the biggest liar in Cave Creek. Comets don't swish their tails."

God be merciful to me a sinner. Luke 18:13.

DEER PLAGUE TEXAS FARMERS

Farmers and truck growers in the Fort Davis section are plagued by black-tail deer, emigrating from the usual grazing grounds because of grass shortage. About 30 deer were seen frequently in the cane patch of County Clerk H. D. Bloys, near Fort Davis. He says the deer are doing much damage. Ed Dutchover complains that does, yearlings and fawn ate up his beans and corn. W. G. Patton, a gardner, has a similar complaint. On the other hand, the deer have ruined

Changed Conditions Call For Changed Banking Methods

New conditions today call for new and higher standards of banking management and safety. Due to the new conditions under which banks operate today, bank earnings from loans and investments have been greatly reduced. These earnings are no longer adequate to cover many services, which heretofore, banks were glad to give to their patrons free of charge. Meanwhile depositors have demanded greater protection, and the costs of providing deposit insurance is a new item of expense. After all, a well managed bank like any other properly conducted business, should make money. If it does not make money it will not be a strong bank, and if it is not a strong bank, it cannot be a safe place for a depositor's money. These facts should not be overlooked and this is the reason that the First National Bank of Baird is adopting a schedule of service charges, which are found elsewhere in this issue of The Star.

Griggs Hospital News

Miss Jolly Faye Stephens, daughter of E. M. Stephens of Cross Plains who underwent major surgery Tuesday is doing well. Eugene, 10 year old son of Bob Swinson of Baird, who entered the hospital Sunday night in a serious condition, from partial obstruction of the bowels, is reported improving. J. S. Gambel of Denton, who entered the hospital Monday suffering from gall bladder trouble is considerably improved and will be able to leave the hospital in a few days. Miss Dorothy Wilkerson of Throckmorton, was a tonsilectomy patient Monday. Lloyd Farrar of Eula, was a patient Sunday for dressing of a severely lacerated hand sustained when caught in a windmill. John D. Campbell, 14 year old son of Roy Campbell of Oplin was able to leave the hospital a few days ago. He is recovering from an appendix operation. Durwood Edwards, 12 year old son of Mrs. John McMellon of Rowden was a patient Saturday for adjustment of fractured ribs sustained in a fall. Royce, 1 year old son of C. M. Ables of Moran, was a surgical patient Sun. Mrs. E. L. Dunlap of the Hatchett oil field, was a patient for adjustment of a fractured fore arm. Jimmie, 6 year old son of Chas. Wristen was a patient Sunday for treatment of an injured eye. Dave Poindexter of Oplin entered the hospital Wednesday suffering from nephritic colic. Harold Bryant of Iona was a patient Sunday for treatment of lacerations on the face caused by falling on a wire fence. Miss Kathleen Allen, daughter of Ben Allen of Denton who entered the hospital Friday suffering from ruptured appendix and general peritonitis was to undergo surgery last night. Mrs. Noah Cook of Okemah, Okla., entered the hospital yesterday morning. Mrs. Cook is in a serious condition and was to be given a fusion last night.

Stock Law Will Be Enforced in City of Baird

Complaints are made almost daily about stock running at-large in the city limits, damaging shrubbery and gardens that people are planting for fall to provide something for their families. It is not right for you to turn your stock out and destroy gardens. We do not want to put you to extra expense, but you MUST keep your stock up—because this law will be enforced. C. W. CONNER, City Marshal.

CATTLE CHECKS RECEIVED TOTAL \$12,756.00

County Agent Ross B. Jenkins, reports that up to yesterday morning there had been \$12,756.00 received on the cattle that were bought by the government. More than 175 animals had been cleared through the office before the order to stop buying was received on Wednesday September 12th. There is no indication at this time when, if ever, that the government will resume buying cattle. The County Agent said he believed that the people of Callahan should sign a petition and send it to the Secretary of Agriculture requesting him to continue the program further as there are at least as many more cattle that need to be removed from the farms as has been bought up to date. Callahan has sold a total number of 4,531 cattle. When the cattlemen met and petitioned the government to include Callahan in the Drouth zone, it was estimated that there would be 4,500 head that would need to be sold. It can be seen that the estimate was that number taken by the government. Conditions have steadily grown worse since that date which is the reason for the extra number to be offered.

1935 Cotton and Adjustment Program Being Discussed

Miss Vida Moore and Ross B. Jenkins are calling the attention of the people to the community meetings that are scheduled for the coming week. Both men and women are cordially invited to meet them at Dressy on Monday night Sept. 24th; at Putnam on Tuesday night, Sept. 25th and at Atwell Wednesday night, Sept. 26th. The Putnam Woman's Club will be the host on Tuesday night, and it is hoped every one who is interested in the agricultural progress of the county will be present. They plan to visit every community in the county as soon as they can reach them.

WITH BAIRD BAPTIST

Sunday was a good day with us but it was not our last Sunday at the courthouse. We find that it will be still another week. We definitely decided to hold our first service in our new building next Sunday week, the 8th Sunday, the same being the 30 day of Sept. 1934; so we are inviting our friends to come with us on that Sunday and be in the first service in the new church. This is not our formal opening, when we shall dedicate the building, but it is a quiet important occasion. Let us all be in for this important occasion. Let us all be in for this important occasion.

Baird Boys and Girls Off To College

Reaves and Miss Beatrice Hickman are attending Daniel Baker College Brownwood. Miss Ritchie and Dan Mitchell are attending John Tarlton at Stephenville. Their parents, Mr. and Mrs. E. Mitchell accompanied them to Stephenville Monday returning next day. Joe Glover is attending college. Miss P. ...

Robert Estes Named Feed Loan Inspector For Callahan County

Robert L. Estes of Baird, has been named Feed Loan Inspector for Callahan county having received notice of his appointment from Regional Director Sherrell. Mr. Nolte, field supervisor for the emergency crop and feed loan was in Baird Wednesday going over the plans for this work with Mr. Estes. Service for this type of loans is being established in practically every county in the southwest. Inspectors are under the direct supervision of the regional office field supervisor in the county. Personal inspection of all feed and forage loans will be made as rapidly as possible to prevent misrepresentation and misuse of funds for any other purpose than that stated in the application and to prevent waste and fraud. R. ... field, E. G. Hampton and Bob ... are the county committee. The Emergency Crop Loan Production Committee who approve these loans. Miss Agnes Eastham is secretary in charge of this work in the County Relief office.

Admiral Canning Club

The "Thrifty House Wives" Home Demonstration club of Admiral Me in regular session August 15 with Mrs. W. E. Smartt as hostess. The President, Mrs. Edgar Smith gave a most interesting account of Club Work during the Short Course at Callego Station. The Club voted to answer roll call at the next meeting, with quotations from the Bible. The club was then adjourned to meet September 27 with Mrs. Joe Higgins. This was a called meeting by Miss Moore, who met with the club and gave a splendid demonstration on Tile Making. Following this, Miss Moore outlined more fully the program to be followed for the remainder of the year. The club adjourned to meet with Mrs. C. W. Fowler. The Admiral Home Demonstration Club met September 12 with Mrs. C. W. Fowler. The house was called to order by the president. A letter from Dr. Martin of Clyde asking this club to bring an exhibit to the Clyde Community Fair Sept. 21-22 was read. After a brief discussion the club decided to accept the invitation. A number of committee were appointed to plan for and arrange the exhibits. The next meeting will be September 26 with Mrs. Edgar Smith. Every club member is urged to be present and visitors are always welcome. Reporter.

New Pupils in Baird Public School

The following is a list of new pupils: 11th Grade.—Donald Dunlap, Admiral, Daphne Mae Wylie, Union Mae Louise Jones, Midway, Leona Wiley, Bessie Plain, Beryle Jones, Midway, Maurine Eubanks, Mayo Fowler, and Jackie Street, Admiral. 10th Grade.—Juanita Neff, Rowden Haynie Carter, Lou, Texas, Evalyn Childers, Gilliland school, Opal Sprouse Admiral, Beulah Maye Robins, Emlendale. 9th Grade.—Nell Bryant, Iona, Connie Strickland, Corsicana, Florence Hatley, Iona. 8th Grade.—Nila Pearl Appleton, Iona, W. H. Berry, Midway, Ellen Louise Nunnally, Big Springs, Frances Berry, Midway, Dorothy Bryant Corrine Simpson, Iona, Velemaree Watts, Lubbock, Billie Matson, Admiral, Bernard Munson, Iona. 7th Grade.—L. H. Scott, Putnam Sidney Robbins, Virgil L. Robbins Edwin Hunt, Juanita Franklin, Margie Harding, Iona, Charles Graves Anson. 6th Grade.—James Browning, Margie Nichols, Iona, Claire Russell, Roscoe, Jerald Watts, Lubbock, Vivian Nunnally, Big Spring. 5th Grade.—Leverne Bryant, Letha Robbins, Leferne Bryant, Iona, La Vaughn Johnson, Stamford, La Delle Hufstutler, Lameda. 4th Grade.—Verna Fay Franklin, Harvey Hatley, Truman Hatley, Jack Browning, Durward, Smith, Glynn Austin, Iona, Calvin Moore, Abilene Thomas Hughes, El Paso.

Callahan's Tax Exemption Certificates

Callahan's Tax Exemption Certificates were brought to Baird Wednesday night by Mr. A. L. Cook, Assistant in Cotton Adjustment in the Co. Agents Office. Mr. Cook stated that all temporary certificates called in before the 1st of September may expect to be all ginned. Certificates in the office and in the hands of ginners shown on the books before the farmer's certificates. When they are called in they may give a wish. Any farmer who has an Interim Certificate may call for certificates at the office, provided he had cotton in the years either of 1929, '30, '31, or '32. Certificates for the year of 1933 and '34 have not been issued as those certificates are coming from the 10 per cent State Reserve and will not be ready for distribution until the entire State has had the certificates issued from the allotment covering the base period. It is hoped that no farmer will call for his tags before Tuesday, Sept. 25th as he will most likely be disappointed, as it is calculated to take that long to clear the gin records.

C. Q. Armstrong Buried At Clyde Yesterday

C. Q. Armstrong of Clyde, who has been ill for some time died Monday in the Veterans hospital at Alamogordo, New Mexico. The remains were brought back to Clyde, his home for burial, services being held at that place yesterday afternoon at 2:30. "Happy" Armstrong was a World War Veteran. We will give a more extended write-up next week.

Clyde Community Fair Opens Today

The Clyde Community Fair opens this morning at 10 o'clock with a parade. This two-day fair is sponsored by the Ladies Canning Club of Clyde and community. A splendid exhibit has been arranged. The management wants volunteer girl acrobatic and boy pugilists to assist in the entertainment tonight and volunteers for the "Old Fiddlers Conster" Saturday night. Baby Show at 10 o'clock Saturday. Be sure to attend the fair.

36th Division Reunion October 6 and 7

One of the features of the Reunion of World War Veterans of the 36th Division in Fort Worth on October 6 and 7 will be the 36 gun salute in memory of the citizen soldiers of Texas and Oklahoma who made the supreme sacrifice. A regiment of 6 batteries of the division will be present. Texas National Guard will be organized here. On ...

Farm, Livestock and Hints

Jenkins, County Agent

SELECTION OF 1935 COTTON ACREAGE

Many questions have been raised as to where the 1935 cotton planting may be made. It is the opinion of some that the same acres that have cotton on them this year must be the ones to which cotton may

be planted next year is an error. A farmer may plant cotton on any portion of the farm under contract so long as he secures a good contract as he uses for his own part. Good farming practices should be followed. The same acres be not planted the same crop the succeeding year. Rotation of crops has always been a practice that system. A suggestion for this year is to plant the three year program of cotton, one year, for corn which should have peas in the middles, then the timothy or other small grain crop. Sections can not raise corn to advantage so heifers is substituted some rotate with peanuts other than the small grain crop.

COTTON OPTION TRUST CERTIFICATES

Any one wishing to sell their Cotton Option Trust Certificates may do so any day by presenting them to the buyer who is officing at the county agent's office. The price paid is based on the October New York quotation less \$1.068 which has already been advanced.

PLAN AN ORCHARD

Callahan has proved to the world that orchards pay more than the expense in putting them out and in keeping them up. When the rains begin to fall again this fall it is time to start getting that soil in condition for the planting of good fruit trees. The county agent would be especially glad to come out and make soil tests and offer any suggestions that might help to get such a project started. Some lands are not suited to the growing of an orchard but might be fine for a vineyard. Plan to plant some fruit trees and vineyard this fall.

Home Demonstration Agents Column

(By Biss Vida Moore)
CLYDE COMMUNITY FAIR

The Clyde Community Fair is an example of sincere cooperation and faith that things can still be done regardless of the times that we may have. This fair, from my observation, verifies the statement that "There is no single thing, except integrity, in an individual's life that gives more happiness than does cooperation in action". The county is invited as a whole to participate in and attend the fair. Show your appreciation for the effort being put forth to revive an interest in "Living at home in Callahan County" by going.

FALL GARDENS

Summer gardens as a whole were failures but there is still a chance for some to have fall gardens. Of course where there are no chances for irrigation the chances are not so good, but by using the sub-irrigation method a plot half the size of the usual garden can be made to produce as much as twice the size not irrigated or surface irrigated.

The demonstration on making and use of tile has been given at fourteen places in the county but if many have not seen it who are interested, a demonstration and use of tile should be given any morning.

5. Buy one-fourth of seed more for fall gardens than for spring gardens as it is dry and all the seeds will not come up.

6. Plant as many varieties as possible, carrots, turnips, beets, swiss chard, spinach, mustard, a different variety of greens that is very good and pinto beans may yet be grown. Onion sets may be planted now and the crop will be ready to harvest next May. A few feet of Icicle or Winter Rose radishes will add variety to fall foods. Shogoin is a new variety of turnips which grow well under hot weather conditions and are reported to be lice proof.

150 FUNMAKERS WITH HUGE CIRCUS

Bailey Organization Presents Largest Number of Clowns Ever Assembled—Great Ringling Bros and Barnum & 800 World-Famous Men and Women Arenic Stars on Show's Thrilling 1934 Program.

Ringling Bros and Barnum & Bailey Combined Circus, truly The Greatest Show on Earth, making its grand and glorious 1934 tour of the continent and definitely scheduled to exhibit in ABILENE, SATURDAY, SEPT. 22 as assembled from the four corners of the earth—and points in between—the greatest aggregation of clowns in all amusement history.

One hundred and fifty internationally-famous funmakers cavort and caper about the seven rings and stage and the huge hippodrome track this year in the most stupendous city presentation ever offered.

Clowns have always been a important part of the circus and the amusement world was amazed and delighted when an even hundred were brought together for the first time by Ringling Bros and Barnum & Bailey. But when 150 of the most clowns imaginable were placed in the same program in a simultaneous display this spring, the enthusiasm of circus-goers knew no bounds.

The big show, however, has a jealously guarded reputation for doing the new and unheard-of and there is evidence of this throughout its gigantic new performances this season.

Besides the clowns, there are 800 men and women arenic stars of international eminence, many of them touring the American continent for the first time.

Several of the producing clowns have introduced splendid ideas into this year's all new and greatly enlarged opening spectacle. The Durbra of Delhi in which more than 2,000 people and animals take part. The Durbra heads a list of features newly assembled that will compel the vast 1934 program to be recalled with deep pleasure for a lifetime.

Among them is a great new congress of the world's foremost acrobatic champions leapers and somersaulters presented together in the most amazing athletic contest ever witnessed and a series of thrilling innovations including a startling new sensation presented by the Great Hugo.

The great combined circus will arrive on four long trains of 100 double-length steel railcars, bringing over 1,600 people, 50 elephants, 1,009 menagerie animals and 700 horses.

CARD OF THANKS

We wish to extend our sincere appreciation to all for kindness shown us in the illness and death of our beloved daughter Faye and sister. We wish especially to thank Dr. Baily and John Baily and friends in Clyde for the many kindness shown Faye during her illness and members of the Woodmen Circle and friends in Bairst for kindness shown us.

Sincerely,
Mr. and Mrs. J. F. Price
and family.

UNHAPPY HOMES "Would you marry a man for money?" "No," said Miss Cayenne. "I've seen too many homes spoiled by husbands who were perpetually worrying about their income tax."

FRESH FLAVOR

By Charles Sughroe

Italy's Volcanoes Are Always Threat

...Again Gives Is- ... a Bad Scare.

Stromboli, the constantly active volcano on a small island in the Tyrrhenian at the toe of Italy, burst into more than usual activity a few days ago causing fear among the residents of the island and the nearby mainland.

The conditions which exist in the neighborhood of these well-known volcanoes are duplicated in hundreds of places throughout the world where volcanoes are located in areas so highly developed and densely populated.

Not All Volcanoes Have Cones There are probably several thousand active, or semi-active, volcanoes on the earth, but only about 400 are known and recorded.

Navy's New Coach

Lieut. Thomas J. Hamilton, the new head football coach of the United States Naval Academy at Annapolis, who already is busy training his squads.

Some volcanoes do not build cones. Mauna Loa, in Hawaii, covered a vast plain with its flow before building its present crater.

Chain Around the Earth.

Great chains of volcanoes stretch around the earth. The greatest chain is in the mountain range that extends like a ring around the Pacific ocean.

What causes volcanoes to erupt is not known. In recent decades observatories have been established to study them and much information is being gathered.

Their activity is due to internal heat of the earth. This heat is not the heat of the great internal core of the earth, because that heat is reached only at great depths, and volcanoes do not have their roots at greater depths than six to fifteen miles.

Some forces of world-wide effectiveness also may be involved. This is indicated by the frequent simultaneous activity of volcanoes or of earthquakes in widely separated parts of the world.

Long Line of Firsts Is Tallied by Infant

Bryan, Texas.—It's John Sidney Boriskie the First at the Frank Boriskies. For these reasons: John Sidney is the first child of his parents, the first grandchild of both his paternal and maternal grandparents, the first great-grandchild of Fritz Brandies, who has 16 grandchildren, and the first child born in the recently reopened Bryan hospital.

Beggar's Disguise Nets Sleuth \$37.50

London.—The detecting business can be made a profitable affair over here by "them as knows 'ow." One Scotland Yard investigator, ordered to watch a certain street corner for a wanted man, disguised himself as a beggar and stood for six days on the spot before he finally made his arrest.

CONFIDENCE

By LEONARD A. BARRETT

By common consent prosperity will not be fully restored until we have a return of confidence. The collapse of securities and the general decline of all economic values is attributable to the sudden reversal of a mental attitude; from confidence to distrust, from hope to fear.

but also is a prime requisite for the permanent our civilization remove confidence from business have bankruptcy. The lack of confidence in the security of a bank runs and the ultimate failure of a bank, if it is not strong enough to withstand the runs.

Champion

During American Farm week at the World's fair in Chicago, the world's champion husband and hog callers were selected, and here they are. Above is Mrs. Charles Huyes of Alta, Ill., whose husband can hear her melodious call of "Charrrileece," no matter what corner of the farm he is working.

lead to divorce. True and lasting friendship can only be built up upon confidence. As confidence is essential to the security of the family, so it is the mainstay of government.

We are not surprised then to read in almost every appeal for loyalty to our government that we should cultivate confidence. The restoration of confidence to be the main object of our policy.

The Household

By Lydia Le Baron Walker

The Inside of This Awning Lends Decoration to the Interior Since It Is Gaily Painted in Flowers and Birds.

THE intense heat of summer made many householders consider having awnings for windows which have been left unprotected hitherto. From the standpoint of economy, now is a good time to do this work since there are excellent opportunities to buy awnings, ready to put up, at decided reductions, and awning cloth very specially priced.

Awnings not only reduce the temperature of rooms, and soften the light but they go far toward dressing up the outside of the house. There is a tendency in newest styles to have this ornamental element featured for the inside of the rooms as well as the exterior of the house.

Another feature to hold in mind is that fringe is the smartest finish for awnings. White fringe is in high favor even though there may be no touch of white in the awning cloth. The decided contrast accents the style.

Great Round-Up of Wild Horses

ODD THINGS AND NEW—By Lane Bode

NICHOLAS

PLAIDS

...right, plaids to as everywhere in the percent, did one ever plaids as are flaunting lars and bold patternings fashion's realm this sea- is in alluring lightweight woollens. In smart rayon weaves, stunning taffeta plaids and knitted plaids, too, they are all among "those present" in the early fall collections with very special emphasis given them in the much-featured showings of campus fashions.

Evidently, according to the fall style program, the college girl is supposed to dine, to dance, to play golf and tennis, to motor, to study and even to sleep in plaids. Not fiction but fact, this about sleeping in plaids, for one of the smartest trends to enroll in a college wardrobe is a sleeping and lounging pajama outfit of gay plaid. The most practical are made of smart cotton prints which are styled with cunningly designed tunics which are made delightfully feminine, with such dainty details as collar and cuffs of scalloped white organdie piped with the plaid, together with a wide sash of the plaid material which ties zypsy fashion in a big romantic bow at one side.

A leading question put up to the college girl is as to whether she will have her frock, suit or ensemble of all-plaid "alone by itself" or shall it be partly of plaid and partly of a weave in solid color. Either or both is the answer, for the advance showings present as convincing arguments in favor of one as the other. An outstanding fashion is the dress which is tailored of all-plaid with not a frill or furberlow to mar its sophisticated simplicity. You see the idea illustrated to the right in the picture. The girl seated is also wearing a frock of this type, in brown and light beige, made in shirtwaist fashion. The buttons are

of brown braided leather. The plaid for the dress on the standing figure to the right is in red, white and blue and it is one of those fashionable thin woolen weaves which is delightfully lightweight and therefore pleasing to wear in the classroom. A bright blue belt and scarf enter attractively into the color scheme. As a matter of fact the two-piece dress tailored of plaid is not only a college girl favorite, for whether you go to school, to office or saunter about town during the shopping hours a plaid frock's the thing this season which interprets chic at its smartest.

Tremendously clever things are being done with plaid plus plain. Such as the topping of a black velvet skirt with a striking plaid jacket such as is shown in the foreground of the group. The plaid wool jacket is in black, green and white with black calf belt. The modish beret is of green duvetyn and of course, in answer to the demand of present-day millinery fashion, it needs must sport a dashing little feather. The blouse, which you cannot see in the picture, is of matching green duvetyn. An ascot scarf of black velvet adds the finishing touch to this ensemble.

In the charming autumn costume pictured to the left above the order is reversed in that the skirt is plaid and the jacket is in the solid color. Here a dark brown cut-velvet jacket surmounts a skirt in plaided brown, green and beige. The turtle-neck blouse is of green jersey. The color combination for this costume is noteworthy since it is typical of the newest trends. There is a disposition on the part of designers to combine any number of rich autumn colors working out effects which flavor of the picturesque Alpine costumes even to the soft felt hats with their audacious little quills and feathers.

And have you seen the perfectly stunning velveteen and corduroy prints done in bold plaids and checks? No college girl once glimpsing them, will not be able to resist this temptation.

Sir Buckston Browne, the surgeon, speaking at the annual dinner of the Harveian society, pleads that the power to give incurable sufferers happy release, power to decide that a congenitally insane deformed baby should not live should be given into the hands of a joint council of doctors and lawyers, says a cable from London.

He said that he looked forward to a time when the medical profession should have the power of sentencing to death those who are not fit to live, either from disease or crime, and of granting permits to the old and wornout who wish to go to the lethal chamber. Sir Buckston is eighty-four, and has been a surgeon for 60 years.

AUTUMN CHIC

By CHERIE NICHOLAS

"BUTCHER BOY BACK" IS MUCH IN FAVOR

Possibly you have never thought of your butcher as a very stylish person. Now we have Malinbocher's "the butcher boy back." It's a loose back gathered from a shallow shoulder yoke. The front of this jacket or tunic, whichever it happens to be, is belted. Belted front and unbelted backs are regarded with favor by all who have seen this new arrangement. It adds an extra filip to the two-piece costume, which is, as you know, one of the season's latest pets. Since so many women find difficulty in wearing belted coats, the partially belted idea is a life saver.

Tunics have a long way to go before they catch up to their reputation. We've been hearing about tunics consistently, but that's as far as one can truthfully say the idea has gone. With the two-piece idea having the endorsement of the haute couture, there is every reason to see the tunic coming in vogue at last.

FREE about CAMAY \$1,000 EVERY YEAR OF YOUR LIFE! AND 553 GENEROUS CASH PRIZES

IN every section of the country, good-looking women use Camay. It's the finest beauty soap made, they say. It's so delicate on the skin, so mild, and so generous of lather.

But we want 2,000,000 more women to use Camay. And that is why we planned this amazing Prize Contest!

\$1,000 a Year— Think What It Would Mean!

Just imagine! \$1,000 a year every year of your life! \$1,000 a year with which to buy the things you've always wanted! 553 other marvelous cash prizes!

Dreams come true, if you win. Smart clothes—a vacation—a new car—a cruise around the world!

Here is What You Do!

Try Camay. After you've cleansed your face and hands with it several times you'll know why it is the favorite beauty soap of so many thousands of women. Notice

how quickly Camay lathers—how refreshed it leaves your skin.

Then, on a plain piece of paper, write your reasons for liking Camay. Mail it to us at once, together with 3 green and yellow Camay wrappers, or 3 copies of the wrapper drawn by yourself.

Remember—you don't have to be an expert writer to enter this contest. Any woman who really likes Camay may be a winner. 554 prizes—all to be paid to women like yourself. So just tell us, as simply, as briefly as you would tell some woman friend "Why Camay is the Best Beauty Soap for My Skin."

100 EXTRA PRIZES for QUICK ACTION

If your entry is received between Sept. 15th and Sept. 30th, 1934, it may be awarded one of the special prizes of \$10 to be given for each of the 100 best letters received during this period. Winning one of these prizes will not in any way affect your opportunity for winning one of the 554 regular prizes.

SEE HOW SIMPLE IT IS—JUST READ THESE EASY RULES

- 1 Anyone may compete, except employees of Procter & Gamble (and affiliated companies), the Union Central Life Insurance Co., and their families. 2 Write 100 words or less on "Why Camay is the Best Beauty Soap for My Skin." Attach to your letter 3 green and yellow Camay wrappers or 3 copies. Write as many entries as you wish, but each must be accompanied by 3 Camay wrappers or copies and signed by the actual writer. 3 Print your name and address, and the name and address of your regular dealer or grocer on your letter. 4 The First Prize of \$1,000 a year for life will be awarded each Christmas Day, beginning Christmas, 1934, for the remainder of the winner's life to the contestant whose letter the judges think best. (If the winner elects, a lump sum of \$10,000 cash will be paid as First Prize in lieu of \$1,000 a year for life.) First Prize guaranteed by the Union Central Life Insurance Co. All

prizes except First Prize are one-time cash payments.

5 Letters will be judged on the clearness, sincerity, and interest of the statements you make about Camay, and prizes will be awarded for the best letters meeting these requirements. Judges will be: Katharine Clayburn, Associate Editor, Woman's Home Companion; Hildegard Fillmore, Beauty Editor, McCall's Magazine; Ruth Murrin, Beauty Editor, Good Housekeeping Magazine. The judges of this contest are unbiased. They will judge only the effectiveness of the arguments submitted. Their decisions shall be final and without recourse. In the event of a tie, identical prizes will be awarded to tying contestants. All entries submitted become the property of The Procter & Gamble Co. 6 Mail your entries to: De- P.O. Box must ni w

A V-8 is no longer the privilege of the Wealthy

Low First Cost
Low Upkeep Cost
High Resale Value

It is not just chance that the Ford V-8 is the only V-8 selling today for less than \$2,500. It is due entirely to the skill of Ford engineers. For the V-type engine costs more to build. It is the type of engine that powers the most expensive cars—holds every world speed record. And only Ford has been able to put it in a low price car. The advantages of a V-8 are apparent the moment you drive it. Increased flexibility in traffic—faster pick-up—an ability to get places without driving strains. The new Ford V-8 is not only low in first cost. It costs less to operate than any other Ford car ever built. Gasoline and oil costs are lower. Valve grinding is virtually eliminated. Drive this new Ford V-8—and you'll want it!
