STREAMSIN DESERT PLACES By OZELLE STEPHENS

"Those who love the laws of God and do them, have great peace of heart and mind and do not stumble." (Psalms

David found this great truth when he believed and obeyed the Word of God. He like all men were under God's curse, doomed forever for our sins. We started out bad, being born with evil natures. and were under God's anger just like everyone else. But God is so rich in mercy, he loved us so much that even though we were spiritually dead and doomed by our sins, he gave back our lives again when he raised Christ from the dead-only by his undeserved favor have we been saved-and lifted us up from the grave into glory along with Christ Jesus, where we sit with him in heavenly realms-all because of what Christ Jesus did. And now God can always point to us as examples of how very, very rich his kindness is, as shown in all he has done for us through Jesus Christ. Because of his kindness you have been saved through trusting Christ. And even trusting is not of yourselves, it too is a gift from God. We could not do this ourselves, it is a gift from God himself who has made us what we are and given us new lives from Jesus Christ; and long ago he planned that we should spend lives in helping others. Christ Jesus himself is our way to peace. The kind of peace David found by believing the Word of God and doing what He said. Have you trusted God and obeyed his great overflowing kindness and His Word? If you have, it is all

yours for all eternity.

Letters From Our Readers

Editor: I am writing concerning the letter in last week's paper about Benjamin. I could commit on the junk cars but that isn't really important to me. What is important to me is why I live in Benjamin. My husband and I was raised here in Benjamin and we are one of the few that didn't have to move away and then come back to know that Benjamin is one of the best places around to live and raise our

People in Benjamin are kind, loving and caring folks. For example: If someone accidently calls the wrong number they may visit for fifteen minutes before hanging up, someone might miss a couple of days coming in the grocery store, more than likely, someone is going to check to see if something is wrong, there is people that walks daily for exercise and they enjoy it but if someone doesn't know that they are just walking they will ask them if they need a ride, if someone misses church one Sunday more than likely the The Knox County News, person will receive a phone call or get-well card. In time of a terrible sickness there is always a helping hand, and in time of a death in the family you are never alone.

We do have several older citizens, not as many as we did at the first of the year, but do try to take care of them. I just hope that the younger generation learns from our elderly people before it's to late. These people stand for everything that Benjamin used to believe in. Such as caring for our neighbors, Christian attitudes and morals, some people do not even know what these words mean. something goes wrong we will stick together for what we believe in, not what other people lead us to believe.

I could go on and on about Benjamin people, but I want. What I have written is the way I feel from my heart.

Wow. No, WOW. I'm certainly glad there are not yardarms around. The wind would be whistling through these bones. Nat seems to have committed the ultimate faux pas. It seems I owe the inhabitants of Benjamin a bouquet of apologies. My attempt at literary immortality has offended numerous readers. First, let me explain that my effort to view the situation in our fair town was meant to be a satyrical essay to ease the nerves not to open new wounds. I suppose that some of us struggle to see our reflections in even the dust of a country road. What you heard was not what I said. My reference to the stagnant gene pool was more a visit by the ghost of Christmas future than a comment on the present. I bear no ill will toward my neighbors and certainly do not suggest anyone currently resideing in town has suffered from genetic combinations. The intent was merely to suggest if a community, or society remains static and does not induce an influx of new thoughts and ideas it has no choice but to become

forgiveness. I've also learned that coming out in print gives everyone a critic's license. We should all be so perfect. To read true satire one must work a little, dig between the lines and look under all the rocks to find the intent and/or humor. I have concluded my lack of writing ability made the satire disappear and the superficial appear as the objective. Now, while I take full credit for my literary iniquities I think those who are so quick to judge and take offense might back off just a

I wish to convey a sentiment to you all. Yes, I do know the roads out of town. I am here by choice and Providence. Benjamin is not just a geographic location, but an attitude. It is a place where people care and help each other, a place where you can count on a neighbor. If all we have to get upset about are minor esthetic differences we are truly blessed.

Christmas wish follows; Lord we pray you smile on this community, we ask you continue to bless us as in the past. We ask you once again make us the closeknit community we have all known. Forgive us our trangressions and be with us as we celebrate this upcoming time of joy and peace. We ask you impart the wisdom of forgiveness and brotherhod to us all. God bless us everyone.

AMEN. Sincere as always, Nat Hawthorne P.S. Now what is really offensive to the eye and the landscape are all those obnoxious satillite receivers poping up everywhere...I know, I know I'll go get my shovel. Merry Christmas.

The girls in FHA prepared some of the food served at the meeting. There were lots of cute ideas presented at the program. The girls in Homemaking I discussed a lot about foods for the Thanksgiving holidays and I'm sure as the Christmas season comes near, we will discuss and experiment with new recipes.

USE CHAIN SAWS SAFELY Buzzing sounds of chain saws at work fill the air this time of year--sounds that can signal impending danger.

A chain saw is one of the most potentially dangerous power tools on the market today. Individuals using lightweight chain saws for trimming trees, cutting firewood or clearing land should be aware of hazards associated with their use.

Each year some 23,000 persons require hospital emergency room treatment for chain saw injuries. Two of every three chain saw injuries to operators and bystanders are caused by inadvertent direct contact with the chain saw blade due to a failure to follow recommended operating procedures.

Chain saw accidents occur in many different ways. For instance, an operator may reach across or hold work too near the moving saw. Or he may lose control of the saw through loss of footing, sudden turns, climbing above ground level, shifting of the saw's weight while cutting at or above waist level, or through chain saw "kickback.

Kickbacks can occur when the saw grabs in the wood, pushing it backwards, or when something touches the top of the saw blade, causing the saw to jump or kick at the operator. Kickbacks may also occur when the chain is misfiled or loose, when a cut is started too slowly, or when the blade nose strikes another

In addition, if the bumper at the rear end of the blade is

not against the wood being cut, the chain riding across the wood may jerk the saw forward and out of the operator's hand.

By David Tunmire

Here are some tips for safe chainsaw operation. Hold the saw securely with both hands and close to your body to provide maximum control. Keep your left elbow locked. Place one foot comfortably behind the other to provide a firm footing for maximum balance.

Cut with the lower part of the saw blade. This is the safest and least tiring position. If you cut with the top of the saw, the risk of kickback is greatly increased.

Studies show kickback is responsible for about onethird of all serious chain saw injuries each year. To avoid kickback take these precautions:

-- Keep a firm, two-hand grip on the saw. -Grip the top handle with

the thumb under and around -- Never stand directly in

back of a cut. Stand to the side of the cutting line. When limbing, stand on the opposite side of the tree trunk from the

-- Saw only with the bottom part of the chain, close to the bumper, never with the nose of the chain.

-- Watch for obstructions, limbs or twigs that could inadvertently catch the upper chain or nose of the saw.

-- Maintain high saw speed when entering or leaving a

-- Saw only at waist level and below.

-- Keep the chain properly sharpened, tensioned, lubricated and tuned. A wide kerf, fine sawdust instead of chips, or a need to use force indicates sharpening is due.

-- Choose a saw with a chain brake, nose guard, anti-kickback chain and guide bar, and other anti-kickback devices

Protective equipment is important to safe operation of a chain saw. He suggests protecting the eyes, head, ears, feet and hands from injury by wearing protective eyewear, a bump cap, heavy shoes and light, non-slip gloves. And now in closing my column this week, may I say to Mr. (or Mrs.) Nat Hawthorne who wrote the editor a letter last week, I feel your journalistic effort was in very poor taste. Whether or not, you intended it, the contents were very much directed to a certain group of people. Namely those against the abandoned vehicle issue. I do not intend to make a statement on the issue either pro or con, but I do resent you calling our town a "burg" and an "uncivilized out post." We are proud of our town and a large percent of the people who live here do not appreciate your insulting remarks. Just one more thing, you thought enough to write the letter, why didn't you sign your name? (I can't find Nat Hawthorne on the Tax Roll or Voters Registration list) So that's bound to be a Pen Name you

See you Next Week!!
