The year 1956 will see changes and advances in many fields and the insurance industry is no exception to this statement.

Specifically, all insurance companies in Texas have a new crop-hail contract for 1956. The changes in this new contract are rather sweeping, especially in regard to hail losses on cotton.

The purpose of these changes is primarily to reduce the cost of insurance and to pay losses more fairly when they occur. It is our hope that you will endeavor to understand these changes before buying your hail insurance. We shall be glad to personally explain all of these changes as will any other reliable and permanently established agent selling hail insurance in Texas.

As you well know, the Texas insurance industry has experienced some very unfavorable publicity during recent months. This publicity is a direct result of persons "hunting a bargain" and companies and agents offering a bargain in insurance. Insurance rates are determined by the Texas Insurance Commission and are based and adjusted directly on losses and premium volume which only time and experience can determine. Beware of so-called "bargain" or low premium insurance.

Sincerely,

HOWARD HALL INSURANCE AGENCY

PS: Howard Hall Insurance Agency represents only strong, reliable stock companies with years of crop-hail writing experience.
