SCARLETT BEESON BECOMES BRIDE OF JIMMY MILTON SHARP AT TULIA

MRS. JIMMY MILTON SHARP

Miss Scarlett Beeson, daughter of Mr. and Mrs. Jehu Beeson of Post, became the bride of Jimmy Milton Sharp, son of Mr. and Mrs. Milton Sharp of Tulia, Saturday evening at the First Baptist Church.

The single-ring ceremony was read by Rev. Denzil Leonard, pastor of the First Baptist Church. Candelabras decorated each side of the archway, which was flanked by arrangements of white stock and a prayer bench. The bride's path was marked with turquoise bows.

Mrs. Weldon Davis, organist, accompanied Lewis Sharp, uncle of the groom, as he sang "Through The Years", "O Promise Me", and "The Lord's Prayer".

Given in marriage by her grand-

father, C. B. Jones of Matador, the bride was attired in a gown of chantilly lace over taffeta. The lace tunic, which was styled with a V neckline, dipped to a point over the bouffant skirt. The long sleeves of the gown terminated in petal points over the hands.

The veil of illusion was held in place by a pear and pearl tiara. A crescent arrangement of white carnations with a white orchid formed the bridal bouquet.

Attending the bride as maid of honor was Miss Edna Jean Davis and Barbara Beeson, sister of the bride, was bridesmaid. The attendants wore identical dresses of turquoise cotton satin, which were styled with puffed sleeves and full skirts. Both girls chose white accessories and they wore turquoise hats. They carried turquoise net fans with garlands of white carnations.

Shelley Hutson, cousin of the groom of Tulia, was flower girl. Carrying a white basket of flowers, she wore a turquoise dress styled similar to those worn by the maid of honor and the bridesmaid. Steve George of Vigo Park, was ring bearer.

Candlelighters were Miss Glenda Beeson, sister of the bride and Miss Jana Jones, cousin of the bride of Matador.

Jerry Kitrell served as best man. Ushers were Don Sharp, brother of the groom; Jack Sharp, cousin of the groom; Glen Richardson, uncle of the groom; all of Tulia, and Layton Covington, cousin of the bride of Hart Camp.

For the wedding, the mothers of the bride and bridegroom both chose beige dresses. Mrs. Sharp selected beige accessories and Mrs. Beeson's dress was accented by tangerine accessories. Their corsages were of white carnations.

The reception was held in the Fellowship Hall of the Church. Laid with a turquoise net cloth, the serving table was adorned with a centerpiece composed of white candles placed upon a round mirror. The fan of the bridesmaid was also used to decorate the table.

Presiding at the punch bowl were Miss Ann Richardson and Mrs. Judd Davis. Slices of the wedding cake were served by Mrs. Glen Reed and Mrs. Aaron Issacs.

Other members of the houseparty included Mesdames Easton Wall, D. Myrick, Rodney Smith, Edd Bennett, Roy Pyeatt, Preston Upshaw, Jim Height, J. F. Clark, Paul Brooks, Clay Anderson, Martin Valdez, and Miss Connie Irons.

The bride chose a pink sheath dress and pink accessories for the wedding trip to New Mexico. For her corsage, she wore an orchid from her bouquet.

Mr. and Mrs. Sharp will be at home June 29 in Tulia, where the groom is engaged in farming with his father. Both are graduates of Hart High School.

INCREASE STUDIES AT STATION

HPRF Researching Cotton Irrigation

Research in cotton irrigation and fertilizer levels is underway for the third year at the High Plains Research Foundation at Halfway. The number of irrigation methods under study have been increased from six to nine for 1960.

These methods include application of water compared to dryland cotton with water applied by the following methods: (1) preplant only; (2) preplant plus first bloom and mid-bloom; (3) preplant plus first square and peak bloom; (4) preplant plus first bloom and peak bloom; (5) preplant plus peak bloom; (6) preplant plus first bloom, mid-bloom and August 20; (7) preplant, first square, first bloom, and peak bloom; (8) preplant plus whenever soil moisture content drops to 50 per cent as determined by moisture blocks; and (9) preplant plus first square, first bloom, peak bloom, and August 20. All irrigation methods are being metered, and moisture blocks will determine soil moisture during the growing season.

The September watering test has been discontinued, since this late irrigation has been found to reduce both quality and yield of cotton.

Fertilizer applications have been and will be made in the following proportions: 40-80-0, 80-80-0, and 120-80-0. These will be compared with results from no fertilizer applied.

Gregg, Lankart 75, and Blightmaster cotton varieties will be used in this test.

The most profitable irrigation application in 1958 was preplant, mid-bloom, and August 20; and in 1959, the preplant and peak bloom application.

Conducting this test are Shelby Newman of the Texas Agricultural Experiment Station No. 8, Lubbock, and James Valliant, assistant water engineer, of the Foundation.

THE ELECTRIC CO-OP MEANS SO MUCH TO RURAL TEXANS

The hands that hold the phrase above could be those of most any citizen who shared the darkness of rural Texas 25 years ago. For it was then that rural people organized the first electric cooperative... borrowed money at interest and built the rural electric system that no one else would build.

Today principal and interest on these loans are being repaid... in many instances well ahead of schedule while the rural community enjoys the countless blessings electricity has brought.

Modern electric systems, efficiently managed, offer top flight service to remote areas of the state.

The electric cooperatives are keeping pace with rural development with heavier lines and improved service.

The electric cooperatives that mean "so much" today will mean even more in the future.

LAMB COUNTY ELECTRIC COOPERATIVE

IT ONLY FEELS LIKE POWER STEERING

(Corvaire doesn't need it)

Corvaire's ingenious design simply places the engine in the rear. That means less weight on the front wheels and a lighter, happier feel in the curve of your hands. No power assist is needed in a car that's naturally nimble. See what a fresh engineering approach can do? From handling and parking ease right on, there just isn't anything ordinary or conventional about Corvaire. Look at its practically flat floor, four-wheel independent suspension, fold-down rear seat. Its air-cooled rear engine that never needs water or antifreeze or radiator repairs... and leaves engine heat and noise back where you've been. All these special advantages are standard in every Corvaire. Just wait till you see how much they add to your driving pleasure. But why wait!
