WASHINGTON — Congressman Omar Burleson has been advised that the Department of Housing and Urban Development has recertified the Workable Program for the Community Improvement of Baird.

Recertification means that the community remains eligible for the several types of Federal assistance which became available to it when it received its original Workable Program certification.

Certification of a Workable Program is necessary before a community is eligible to receive

Federal aids in the form of loans and grants for urban renewal programs and for federally aided low-rent housing and more liberal FHA mortgage insurance to assist in the private redevelopment of project areas for rehousing displaced families.

Congressman Burleson points out that such certification does not constitute approval of any specific Federal aid. The Workable Program is a showing by the community of how it intends to use its own public and private resources to eliminate and prevent slums and blight. Once its program is approved, it can apply for the Federal aids to supplement local resources as needed. The community must show reasonable progress each year under its Workable Program in order to obtain recertification and to remain eligible for Federal aids.

Highway Signs Not Gun Targets

AUSTIN — Highway signs are erected for the safety and convenience of the motoring public -- not to provide gun-toting punks with a handy target for plinking.

Yet, a major share of the \$450 thousand vandalism to Texas highway signs annually is caused by gunfire, according to D. C. Greer, State Highway Engineer.

Bullet-riddled roadside markers accounted for 85 per cent of all signs which had to be replaced in one Texas Highway Department District in West Texas in one year.

Even a small highway sign costs about \$10 to replace. Larger, more elaborate signs costing hundreds of dollars have been targets for wanton vandalism too, Greer said.

If apprehended, vandals can be made to pay for the destruction they cause. But the person who operates a motor vehicle in Texas foots the greater portion of the bill for replacement through his motor fuel taxes and licensing fees, Greer said.

More important, destruction of signs causes inconvenience -- and many times deadly peril -- to motorists using the highways.

"So be a good sport during this hunting season," Greer said. "Point your gun only at game, not our highway signs."

We go to all the trouble of
redesigning our interiors,
improving our handling,
and refining our Wide-Track ride,
and some people buy us
just for our looks.

Our new Executive Hardtop Coupe.

Just once we'd like to have people fall in love with
the inside of our cars before they flip for the
outside. Why, this year alone we've made avail-
able brand-new wraparound buckets. Profile
bench seats. More rich, genuine walnut paneling.
And nicer instrument clusters you've never seen.
We even had our engineers take our test cars

apart piece by piece to come up with improve-
ments that, incredibly enough, make our Pontiacs
smoother, quieter, more enjoyable to drive.
Really, though—we don't care which feature
gets you inside a new Pontiac, as long as it gets
you there. And it will. At least judging by the
number of Pontiacs you see on the road.

Everything's new in tiger country. Wide-Track Pontiac/66

"THE DEEPEST NEED OF CIVILIZATION"

"Tell me, I pray thee, where the Seer's House is." I Sam. 9-18. We know where the man of fame lives. One can find his address in almost any telephone book. We know where the wealthy man lives. It is easy to find out where honor or love or knowledge dwells.

But where is the wise man's house? This is a serious question of our DAY AND TIME. Is it at Washington, London, Moscow? From time immemorial the human race has asked, "Where can wisdom be found?"

Nothing is more desperately needed than just what the Bible calls wisdom, more insight, ability to discriminate between values, understanding of what things are worth living for and ability to put them into practice. For centuries the Christian church was the custodian of the world's values. Now this crucial function of our civilization has been taken over by some who have largely failed. There is a growing dissatisfaction with their leadership.

We need the rare, creative and practical wisdom described in the book of Proverbs, and incorporated into the teaching of our Lord Jesus Christ. This wisdom became personal according to the Christian idea. As the Love of God was shown forth in Christ so also was the wisdom of God. Man can live by His love and His law?

Wisdom can become any man's possession. It is the gift of God to any man who will ask for it and consistently seek for it. The deepest need of our civilization is for the common man to be wise. And wisdom is within his reach.

Where does the wise man live? Does he live at your address?
