Truscott Sailor Is New Member On Sport Carrier

Aboard the USS Suwanee—Conway E. Myers, seaman first class, USNR, son of Mr. and Mrs. R. R. Myers, Truscott, Texas, helped this escort carrier send planes against the enemy at Okinawa.

The Suwanee's planes provided close support for our assault troops, bombing, rocketing and machine-gunning the Japs until airfields could be established and the job could be taken over by land-based planes.

Her pilots and aircrewmembers flew a total of 2,852 sorties at Okinawa and after her planes were no longer needed against the enemy she cruised along the coast of the island, driving off enemy planes and submarines.

The Suwanee airmen performed numerous other operational tasks including the dropping of smoke bombs to screen our forces, photographing enemy positions and dropping propaganda leaflets on enemy-held territory.

The Suwanee is one of the oldest carriers of the fleet. She was commissioned September 24, 1942, and after participation in the North African invasion moved to the Pacific. She was damaged by Jap bombers at Leyte, but soon returned to that theater after being reconducted at Bremerton, Wash.

Fred Broach Makes Good Use of Soil Conservation Work

Mr. Fred Broach has developed in cooperating with the Wichita Brazos Soil Conservation district, a complete conservation plan with range and croplands.

Mr. Broach's farm is located in the southeast Munday conservation district.

As part of the conservation plan on his rangelands, the pasture will be rested to give the more desirable grasses a chance to seed and increase in vigor. The numbers of livestock will be balanced with forage production.

At the outset, steers will be used to utilize wild rye and other winter grasses. The steers will be marketed in the spring in order to give the permanent grasses a chance to recover from too heavy grazing in the past.

In addition to these range management practices, Mr. Broach has cleaned out an old tank in order to give a more permanent water supply for his livestock.

On his farmland, stubble mulch will be practiced on 200 acres. This practice is a tilling of the soil to incorporate a plant residue within the top layer. Experiments have shown that this method of tillage has increased the soil water holding capacity approximately four times over methods which turn the sod under.

In addition to the added water holding capacity, this treatment provides excellent protection against wind and water erosion.

To bring about soil improvement, approximately 10 acres will be planted to biennial sweet clover or Madrid clover.

The results of this planting will be the basis for extending soil improving crops to additional acres on his farm.

Also on the farm land, construction of approximately 25 miles of terraces is underway. Several miles are complete at this time and the remaining terraces will be completed as soon as possible.

In addition to assistance given through the Soil Conservation Service in developing conservation plans, group meetings will be conducted by technicians assisting the district to give further aid in establishing conservation plans.

Miss Hazel Jones has been here spending part of her vacation from Consolidated Aircraft in Ft. Worth. She left today to return to her home.

Miss Jackie Vance is in Ft. Worth to attend the graduating exercise of her sister, Miss Geraldine Vance, next Tuesday at Harris Memorial Hospital.

City Inaugurates Lower Water Rates

Effective with August water bills and continuing through September all water used over the minimum will be charged at 1-1/2¢ per thousand rather than the present 15¢ rate. This lower rate is put into effect to encourage the use of more water on lawns, shrubs and gardens and thus make our city more attractive.

In previous years, low rates have been made in July and August, however, the City Commission did not deem the step advisable this year due to inadequate pumping facilities at the city well. The equipment was old and worn and has had to have considerable care in order to meet an already heavy demand and at the same time provide a sufficient quantity of water for fire protection.

This week installation has been completed on the latest type of pumping equipment. The new pump is a Peerless highlift and its addition more than doubles the pumping capacity of the city well.

Brock Baptists To Have Revival

First service of a revival meeting of the Brock Baptist Church will be held Friday, August 17, a member of the congregation stated early this week.

Services will be held in the Brock school house. Rev. Shad Stephenson of Goree will be in charge of the services and will do the preaching. Two services will be held daily, one at 10 a. m. and one in the evening.

Special song services have been arranged and prayer groups will be held prior to the evening service.

The public is cordially invited to attend the meeting. Services will continue through Sunday, August 26th.

'Back To School' Movement Urged As Conflict Ends

Enrollment of 250,000 more boys and girls in high school this fall than last is the goal set for this year's Back-To-School drive sponsored by the Children's Bureau, U. S. Department of Labor and the U. S. Office of Education.

The appeal this year is being made in particular to those who are in summer jobs, those who have been laid off from full-time jobs and those who are still in school but thinking of dropping out to get a job. They are being urged not to limit their own opportunities, but to go back to their job of first importance—completing their high school courses, so that they may be prepared for postwar job opportunities and citizenship responsibilities.

"For four years," Katharine F. Lenroot, chief of the Children's Bureau, says, "war pressures have pushed high school enrollment down and child-labor up. The trend must be reversed. We must start reconversion now, as far as the youth of the Nation is concerned, and one way we can do it is to get every community to support the Back-To-School drive this fall."

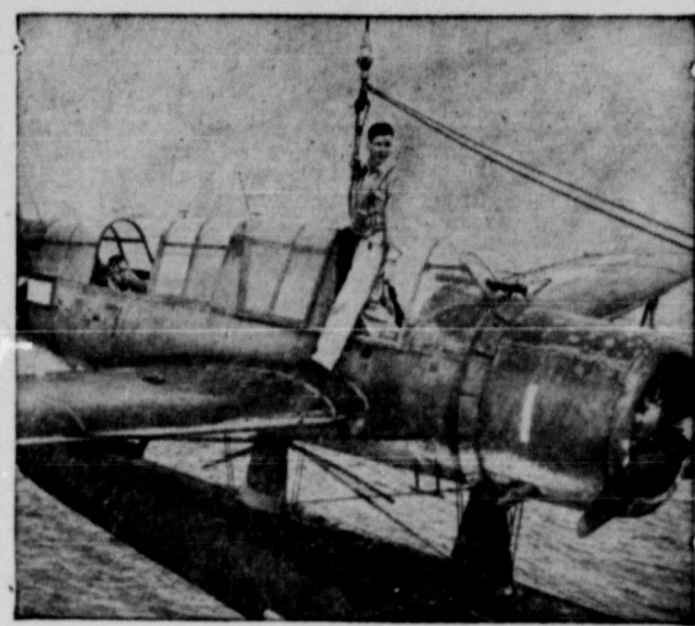

Ellena Fayne White Engagement Told

Mrs. Henry L. White announces the approaching marriage of her daughter, Ellena Fayne, to Sam Angle, CWT, U. S. Navy. Sam is the son of Mr. and Mrs. Cliva Angle.

The couple will be married on Wednesday, August 22, at 5 p. m. in a church ceremony at the First Methodist Church. Rev. Lloyd Hamilton performing the rites.

All friends and acquaintances are invited to attend the wedding.

End of War Greeted Here With Prayerful Thanksgiving

Top Lt. (jg) George E. Travis, 24 USNR, 2730 14th St. Fort Arthur, Tex., pilot of a Kingfisher plane which rescued a wounded Navy flier downed near Kyushu, directs rescue operations aboard a battleship to which the Texas officer is attached. The wounded fighter pilot sits limply in the plane's cockpit. Official U. S. Navy Photograph

Knox City took the official news of the end of the war with thankful hearts but little demonstration out of the ordinary.

Suffering a bad case of jitters from hearing contradictory statements over the radio for several days, most everyone accepted the final proclamation with grateful sighs of relief and words of genuine thanks to the Almighty that at last the bloodshed had stopped.

Business houses were closed Wednesday all day. Many attended the revival service in progress at the Baptist Church to offer their thanks for the safe delivery of loved ones who will now come home from the wars.

It is hard to realize that the thing is actually over at last. To bring home the fact that it is over, rationing has been cancelled on many items. Motorists were able to fill 'er up Wednesday after OPA announced the lifting of gasoline rationing.

In the words of Rev. W. H. Albertson, speaking at the Lions Club luncheon today: "The war is over. This morning I drove into a filling station to get some gas and have a tire repaired. While waiting to have the tank filled, they washed my windshield and rear window perfectly clean and shiny. Definitely, the war is over."

Lt. Chas. McKissick Rescued At Sea

News was received here early this week that Lt. Charles McKissick, son of Rev. and Mrs. J. T. McKissick, Abilene had been safely rescued following the disastrous sinking of the USS Indianapolis.

Rev. McKissick is pastor of the Knox City Christian Church and grave concern was felt here for the safety of his son when news of the sinking, which happened in late July, was released.

Lt. McKissick related a gripping eye-witness story of the disaster following a Jap torpedo hit and the subsequent days of hunger and thirst while drifting on the sea before rescue planes spotted them.

Presently Lt. McKissick is in Guam hospital recovering from exposure and fatigue.

16 Additions Made In Baptist Revival

Good results are being evidenced at the Baptist revival with 16 additions being made to the church up to Thursday noon. Ten of the new members are candidates for baptism, six others placing their letters in the local church from other places.

Large crowds have been attending the open air services on the church lawn. Good singing and inspirational sermons by the pastor, John Stout, have been enjoyed.

The revival will continue until Sunday night when a baptismal service will close the meeting.

Shower Honors Mrs. Irvin Paul

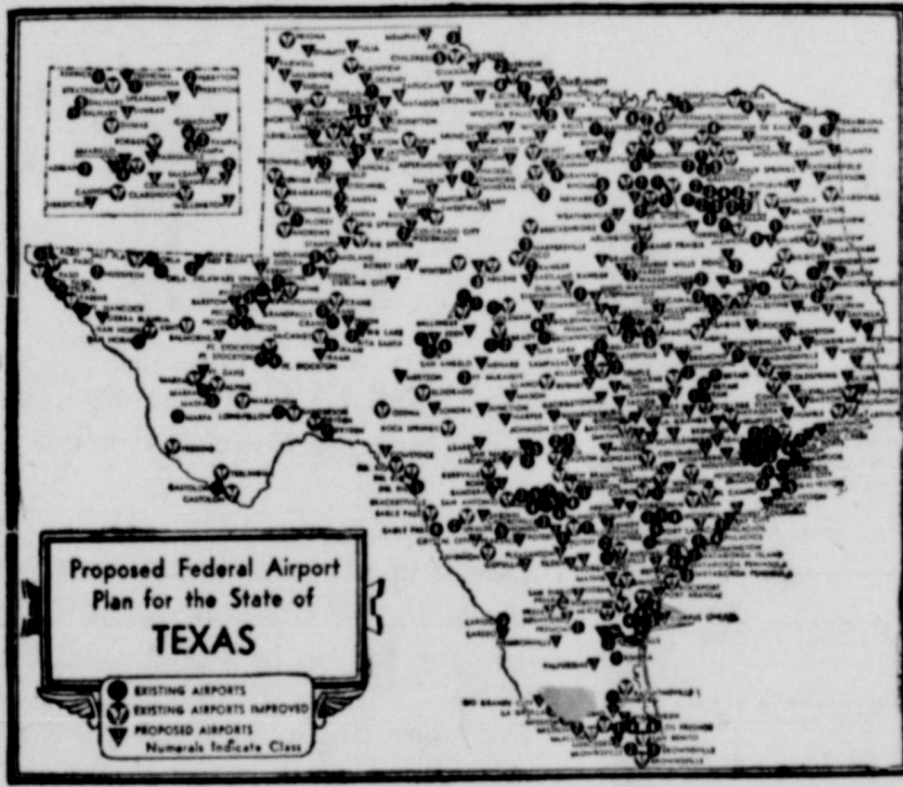

Honoring Mrs. Irvin Paul Paul, the former Miss Inogene Martindale, a shower was given Thursday, August 9, in the home of Mrs. C. A. Hull. Mrs. Hull received the guests and presented them to the honoree, her mother, Mrs. E. H. Martindale of Rochester, and the groom's mother, Mrs. W. H. Paul. The bride's corsage was of war stamps.

Miss Virginia Tankersley regaled the guests in the bride's book and Miss Billie O. Faubion presided at the punch bowl. The hostesses presented Mrs. Paul with china. Mrs. Bedford Smith played piano selections during the receiving hours.

Hostesses for the afternoon were Mrs. J. M. Averitt, Mrs. O. L. Knight, Mrs. George Nixon, Mrs. John Crowner, Mrs. J. T. May, Mrs. Bedford Smith, Mrs. Aubrey Fox, Mrs. Ullie Lea, Mrs. Mondell Mills, Virginia Tankersley, Inez Logan, Mrs. T. E. Holcomb, Mrs. Loyd Huntman, Mrs. Charles Cape, Mrs. Erwin Ebenbacher, Mrs. J. S. McBeth, Mrs. Neil Purdue and Mrs. C. A. Hull.

Cpl. Glover McCarty wired his parents from El Paso that he would be home in a few days.

Knox City In Line for \$217,000 Federal Airport

—Cities Service Company Map from CAA Records

SKYWAY TRANSPORTATION—Texas will participate in the national airport expansion program being sponsored by the Civil Aeronautics Administration more wholeheartedly than any other state. When the program is completed Texas will have 532 airports, far more than any other state. The entire program is designed to encourage private flying and development of commercial air transportation. Knox City has been allocated \$217,000 under the program for airport development.

A national airport program of which Knox City and this section of Texas are a part, is taking shape under the sponsorship of the Civil Aeronautics Administration.

Robert Hinckley, formerly head of the CAA and now with the Office of War Contract Settlement said, "It will make possible for anyone who flies his own plane to land or take off within easy reach of home, work or vacation spot."

Texas will have 532 airports, far more than any other state in the Union. Cost of the project for the entire nation is estimated at \$1 billion with Texas' share estimated at \$129,923,000. CAA engineers have made a survey of this area and have estimated that \$217,000 will be spent at Knox City for development of a Class One port.

To participate in the Federal program, it will be necessary for Knox City to provide approximately 160 acres of land adjacent to the town. This amount of land is necessary to assure runways in all directions of sufficient length for a standard Class One field. Federal funds are to be used in paving runways, taxi strips, grading, drainage and lighting.

Hundreds of student pilot certificates are being issued each month in Texas by CAA. It has been estimated that the United States will have, when the war ends, 350,000 trained Army, Navy and Marine pilots, 150,000 civilian and student pilots, plus a backlog of 4,000,000 others interested in aviation.

After the war it is estimated that there will be 400,000 civilian

airplanes in the sky, 16 times the peacetime total. Ninety percent of these planes will be private craft, while the remainder will be commercial air transports and cargo planes.

It is anticipated that all first class mail will be carried by plane and the communities providing adequate landing facilities will enjoy fast mail service as well as express and passenger service. Communities that do not have these facilities will no doubt be in the same classification as those that do not have access to paved highways and railroads at the present time.

It seems that big things are in the making for Knox City and surrounding territory if we will take advantage of the opportunities and make necessary provisions.

KC Building Booms In Wake of Peace

Room building conditions have come to Knox City in the wake of the close of the war, with several new dwellings going up and alterations being made on others.

Several permits for new homes have been approved this week, and more are going in each day.

Three new dwellings are under construction. Tom Orsborn is building a new home east of the A. J. Hallmark home. Two smaller homes are going up in the east part of town.

Mr. Hallmark is adding a room to his home, and several other alteration jobs are under way.

It's The Truth...

It takes experience, good materials, and the proper equipment to repair or recap tires that will hold up under the punishment of today's needs.

We have been in the business for several years and know "the ropes" when it comes to tire work. Using the "OK" method, we know we have the best in equipment and materials.

All we ask is a chance to prove these statements.

KNOX CITY

FARM NEWS

Farmers are turning more and more to green manure and cover crops to boost their acre yields and to protect their fields against erosion, according to Doyle G. Thomas, secretary to the Knox County AAA Committee.

Knox County farmers last year devoted a large acreage to these crops in addition to their record in food production. Mr. Thomas pointed out that the experiment station tests show that the systematic return of organic matter to the soil is vital to good soil management. Probably the most important one of these fertility-restoring practices is growing grasses and legumes for rotation. Besides adding organic matter to the soil, legumes provide nitrogen. They prevent leaching of plant food elements as well as furnish winter pasture for livestock in some areas.

Mr. Thomas says there are ample supplies of Austrian winter peas and Common Vetch for farmers to carry out an even bigger green manure and cover crop program this fall and winter. Also, there is available a good supply of phosphate and basic slag to go under these crops. So, if you've not already carried out this practice on your farm, maybe you'd like to talk it over with one of your county or community committeemen.

J. C. Saunders of Knox City was a Triple A visitor a few days ago. Mr. Saunders was submitting his April, May and June cream stubs and reporting his completed conservation practices. Mr. Saunders milked 10 cows for the April, May and June period and will receive a payment of \$78.50.

Mr. Saunders is seeding 15 pounds of Weeping Lovegrass (Permanent pasture grass) and will receive a payment of \$2.50 per pound. Besides reporting the pasture grass practice, he also reported his deep plowing practice.

The County Committee states that returning veterans who are farmers or who plan to take up farming are eligible for priority assistance to enable them to purchase new farm machinery and equipment. The county AAA committee has been authorized to issue a certificate to the farmer-veteran giving a priority for a certain piece of machinery or equipment. In addition, if a veteran wishes to purchase used army equipment from the Smaller War Plants Corporation, the county AAA committee can issue him a certificate to the SWPC recommending that he be permitted to make the purchase. The certification to the SWPC is a statement that the veteran is a farmer and that he will use the equipment in farming operations. Veterans who are farmers or who plan to farm have been urged to contact their county AAA committee for information on these programs.

J. H. Glasscock, Ralph Caram, J. W. Crowning, Brooks Chessier, and W. W. Clark, all of Truscott, were in the office Monday securing dimensions of the tanks constructed for them under the Triple AAA last year. It seems that they are planning to stock them with fish this year.

In all this discussion of enormous crop production, had you

stopped to think how much farmers in this county have expanded the wartime production of oil-bearing crops? And then that thought leads right to the question of how big a market for fats and oils U. S. farmers will have after the war.

Well, a study by the Department of Agriculture shows that, before the war, the U. S. was a net importer of about one and a half billion pounds of fats and oils each year. But last year, the U. S. was a net exporter of six hundred and fifty million pounds. The study goes on to say that in 1945 we'll continue to export more fats and oils than we import. But after the firing stops, we'll probably return to a net importing basis.

The deep plowing practice is beginning to pay off, according to quite a few of the Knox County farmers. Their crops, cotton in particular, are showing a remarkable difference over cotton planted on acreage which was not deep plowed. Anyone doubting the benefits derived from the deep plowing practice should drive by the Ancil Waldrip and the C. A. Richardson farms near Knox City and view the results. The AAA payment for deep plowing this year is \$1.20 per acre.

Wheat farmers are reminded that August 21 is the closing date for accepting wheat insurance applications.

Gems of Thought
PLEASURE

What happiness is, the Bible alone shows clearly and certainly, and points out the way that leads to the attainment of it. —Coleridge.

No pleasure is comparable to the standing upon the vantage-ground of truth.—Francis Bacon.

The difference between false and true pleasure is this: for the true, the price is paid before you enjoy it; for the false, after you enjoy it.—John Foster.

In every part and corner of our life, to lose oneself is to be gainer; to forget oneself is to be happy. Robert Louis Stevenson.

Hegari Equals Corn As Laying Feed

In a three year's test with White Leghorn fowls at Substation No. 1 at Beeville, Texas, comparing hegari and corn, the hegari proved to be equal to corn pound for pound in an egg laying feed. There was no significant difference in egg production or mortality. No tests were made on the hatchability of the eggs produced from hens fed these feeds.

We like any man who comes right out and says what he thinks, when he agrees with us.

Invest in the Future—Buy War Bonds Now

It's Easy If You Know How

People used to say there were only two things certain in this funny old world of ours—death and taxes. We would like to nominate a third. And that is that a dollar buys a lot less today than it did fifteen years ago. That's certain, isn't it? Every time you go to a store to buy anything, you can't help realizing it. But—unlike the other two—there is one exception. It's electricity! Believe it or not, a dollar today buys more electricity than ever before!

You may not have noticed it—because with everything else going up in price, you'd likely assume your electricity costs more too. Actually, however, electricity has been coming down in price for years—and has even been reduced since the war. Of course, you've probably added a lot of electrical conveniences to your home in the last few years, and that's another reason you may not have noticed how much the price of electricity has come down. So much, in fact, that if you're an average user of household electricity, you're getting about twice as much for your money as you did fifteen years ago.

And that's quite a trick! Because the business-managed electric light and power companies that supply over eighty percent of our electric needs, have had enormous tax bills—and a lot of other problems to meet since the war. Nevertheless it has been accomplished... through efficient business management on the part of the experienced men and women who operate America's electric light and power companies.

Calcium Chloride Useful in Canning Tomato Crop

Now that tomatoes are coming on we must turn our thoughts to canning. If we wish to have well balanced meals we will need to furnish our supply of vitamin C. In order to save more vitamins, preserve the color and texture, we can use calcium chloride in canning tomatoes, says Lucile King, County Home Demonstration Agent.

Calcium chloride is not a preservative or canning powder and it will not take the place of the regular processing. You prepare and process exactly as you do in canning salad pack tomatoes. Method: Pack raw and steam. Select fresh, firm, red-ripe fruit. Put in thin cloth bag or wire basket and dip in boiling water one minute. Then plunge into cold water. Drain, core, peel. Work fast in all steps. Add one teaspoon salt per quart. Cover with hot tomato juice. Steam 19 to 15 minutes. Process in water bath, quarts and pints 25 minutes, half gallons, 30 minutes. The only difference is to add one teaspoon of calcium chloride solution per quart along with the salt. Commercially, salt tablets which contain calcium chloride are used in canning tomatoes. These tablets are not usually available on local markets, but you can secure small amounts of anhydrous calcium chloride from most any drug store. Here are instructions for making the solution:

Dissolve 2 1/2 ounces of anhydrous calcium in one pint of distilled water or in clean, preferably boiled, tap water. If calcium chloride preparations containing water are used, corrections in the weight should be applied in the amount used to allow for the water of crystallization.

Miss King suggests you take a clean jar to the drug store and have the druggist mix it for you. One pint of the mixture is sufficient for almost 100 quarts of canned tomatoes.

Be sure to use the exact quantity because too much calcium chloride will cause the tomatoes to be tough rather than firm.

More Pork Needed To Balance Need

Since the amount of pork that will be produced in Knox County in the year 1945 will be less than the amount of pork needed to feed the people in Knox County, it becomes very necessary that we concern ourselves about the probable meat shortage in 1946.

One of the best known methods of profitable pork production is by the use of a self feeder. Most fortunately from a practical standpoint, it happens that self-feeding by the free choice plan works out well when grain sorghums and protein supplement are fed in a self-feeder; so that the pigs may choose the protein supplement or the grain to suit their own appetite.

As a rule pigs will eat about the proper proportions of the feeds to make a well balanced ration. The protein supplement referred to is a mixture of 40 percent tankage, 40 percent cottonseed meal and 20 percent alfalfa leaf meal.

The Family Altar

By Rev. Violet Myers
Co-Pastor Foursquare Church

Celebration of V-J Day is uppermost in the minds of every American, and as one might walk through any residential section of a city, one cannot help but hear the radios tuned in to the news broadcasts knowing the heart of the nation is anxiously awaiting the news that will change the course of millions.

Truly the heart of the nation is the American home, and V-J Day will certainly bring rejoicing to hundreds of thousands, and sorrow to others, not because the war is over but because the loved one in that home will never return.

Dear friends, at this time of jubilation why not stop and take stock of our lives and examine our hearts to see if at the close of our lives it will be V-Day for us or will it be J-Day. The word of God tells us of an appointment that we all must meet in Heb. 9:27. "And as it is appointed unto men once to die, but after this the judgment." (J-Day) To many on that day surely the judgment will fall but to those who have accepted Jesus as their personal saviour that judgment day will turn into a victory (V-Day) because God's word tells us in 1 Cor. 15:55-57. "O death where is thy sting. O grave where is thy victory; the sting of death is sin, and the strength of sin is the law. But thanks be to God, which giveth us the victory through our Lord Jesus Christ."

The average American is rejoicing today but the pity of it is that, in their rejoicing they are taking no thought of where they will spend eternity. We have no assurance that we will see tomorrow's sun rise, and we also know that there is only two places for the soul of man to go. First, the place that Jesus has gone to prepare for those that love Him, and secondly, the place of torment prepared for the devil and his imps. Jesus told the disciples that He was the way, and the truth would set us free, and that we might have eternal life with Him, and also that there would be rejoicing in Heaven over one sinner that repenteth.

Dear ones, why not set the angles to rejoicing too by accepting Jesus now and assuring ourselves that on that day when we are called to keep that appointment it will be a V-Day for us instead of J-Day. God bless you all, and remember that Jesus loved you enough to die for you.

HEALTH LETTER

The State Health Department's campaign to control venereal disease in Texas is showing highly gratifying results in the number of cases found, and cured in the quarantine and rapid treatment centers.

This campaign, Dr. Geo. Cox, State Health Officer, declared has helped to keep venereal disease infections from spreading and has played a major part in aiding servicemen and civilian industrial workers to stay on the job. In fact, man days lost thru such infections, in the armed forces and in industry, have been brought to an all time low and Texas can list this gratifying result among its contributions to the nation's military and industrial achievements.

In a report this week, Dr. Cox disclosed that approximately 15,000 infectious cases of gonorrhoea and syphilis are being treated annually and dismissed as non-infectious in the six rapid treatment centers now in operation. Located at San Antonio, Corpus Christi, Mineral Wells, El Paso, Waco and Overton, these hospitals have a combined capacity of 325 beds.

The staff of trained investigators who trace contacts and locate the sources of infection have been concentrating their efforts in military areas with excellent results. All contacts found to be infectious and who refuse to take treatment from their family physician are placed in quarantine and treated until cured.

People are taking more stock in peace. We hope it isn't watered.

What this country needs is a good cigar that sells for less than 5c a puff.

LOWEST OPERATING COST

The Gas Refrigerator takes little bargain-priced Lone Star gas to run!

LONG LIFE
Has no machinery to wear and need replacing

CONSTANT COLD
No starting and stopping of cooling cycle

SILENT
No machinery to vibrate and make noise

★ Wartime is proving the value of this basically different refrigerator. Operating without machinery, there are no moving parts to wear and need fixing. So in these days when repair men and replacement parts are hard to get, owners are happy they chose a gas refrigerator. Let your next refrigerator be a trouble-free, silent gas refrigerator. They will be back in the stores after the war is won. In the meantime, keep on buying war bonds.
