REA Sends \$54,000 To Patrons Last Week, Director Says

The first patronage returns to the members of the B-K Electric Cooperative, Inc., for the years 1952, 1953 and 1954 were placed in the mail last week. The checks for three years totalled \$54,000, returned to those who made the Cooperative possible.

At the meeting of the Board of Directors held on the 31st day of May, mailing of these checks was authorized by the board. The B-K Cooperative, Inc., serves members in Baylor, Knox and Haskell counties, with short lines in the adjoining counties.

There are no farms in this area that do not have electricity. At the beginning of this program less than two and one half per cent of the farms were fortunate enough to have this service. In fact there were those who said it was not feasible to make this electric service available to the farmers of the nation.

Now 98 per cent of the farms have these power lines built to them without paying a super charge such as has been charged for them before rural electric cooperatives came into being. The work is not yet done. As the loads grow, the lines have to be enlarged to carry loads which double every five to seven years.

The average number of consumers per mile in the rural areas is approximately three. For the urban areas it is approximately 33 consumers per mile. The average revenue per mile of rural lines is \$475.00, for city lines it is \$7,400.00. Many rural electric cooperatives over the nation have less than 2 members per mile. The B-K Electric Cooperative, Inc., has approximately three members per mile. This is taking into account oil wells and irrigation wells.

The success of the rural electric program shows what can be done by a group working together and accomplishing what would have been impossible as individuals. The spirit of cooperation pays at all times.

Former KC Youth Gets Scholarship

CHARLES STEPHENS

Charles David Stephens, son of Mr. and Mrs. V. P. Stephens, a graduate of Petersburg High School, has been awarded a four-year scholarship by the National Scholarship Trust Fund of the Education Council of the Graphic Arts Industry to attend Southwest School of Printing Management, Sam Houston State College in Huntsville. The scholarship was made possible through a grant from the National Scholarship Council of the Graphic Arts Industry, Inc., in Washington, D. C.

The scholarship was awarded on the basis of a national competition which involved screening through the College Entrance Examination Board, interviews by a committee of employing printers, and final selection by a group of college admission officers. The scholarship was granted for college studies in preparation for a career in the printing and publishing industry. This industry ranks among the top six major industries in the United States in terms of numbers of establishments and salaries and wages paid.

Technological developments affecting the printing and publishing industry plus a rapid expansion in size of companies and need for professional management has stimulated over 100 colleges throughout the U. S. to establish major and degree granting courses in printing management, printing and printing teacher education.

Stephens has been active in high school annual and paper staffs and was the co-editor of the 1966 Buffalo Yearbook. He also has written and published a non-fiction book, edited a poetry anthology and published it, and is currently working on a poetry anthology, two poetry books, and a history of a football team.

David was born in Knox City on May 7, 1948, and is the grandson of the late Mr. and Mrs. Absalom Stephens, and Mr. and Mrs. C. W. Garrison. He attended elementary and junior high school in Lubbock and high school in Petersburg.

and products. Mr. Stenholm recommended that any vacant buildings the town might have should be obtained and donated to those business concerns supplying farming needs as a place for them to display their products.

Mr. Stenholm said the whole purpose of the Rolling Plains Cotton Growers, was to get the people of the area to wear and use our product and that if we didn't we would have to do something else with our land.

"It would take 10 or 15 years to have a substitute, and we do not have a choice . . . Get behind it and start using it," he told the group.

He said that the war in Vietnam has helped the cotton industry, since the armed forces use cotton 100 per cent. Naturally we hope the war will end real soon, he said, but we still need to promote its use and sales.

He said most people are for the promotion and had the idea that "we have nothing to lose," but that it needed much more than that . . .

"It has to have the support of everyone to succeed . . . We need positive thinking, everyone has to do it," he said, and that "we have nothing to lose by promoting cotton."

An interesting feature of the "Week" could be a Queen Contest, he said, and Sidewalk Sales, Six and Under Pixie Queen Contests were also optional sidelights to add to the interest.

John Crowover, MC for the meeting asked those present to vote on whether to proceed or not and the vote was unanimous to carry on.

Another meeting is planned Tuesday night, 8 p.m. at the Fellowship Hall in the First Methodist Church, and all interested persons are urged to attend to make further plans for the promotion.

Lunch was served in the cafeteria and rest time was spent in the cabins. An hour of swimming ended the day camp.

STATE CAPITAL Highlights AND Sidelights
by Vern Sanford

AUSTIN — Taxes — With its what, why, where, who and because — raised its unpopular head in the Texas capitol this week.

Texas Committee on State and local Tax Policy presented to Governor John Connally and the Texas Legislature.

Everybody's request for more money indicates that the spending program to be presented the 1967 Legislature will eat up the \$75,000,000 state surplus — and require new money to finance.

Higher education, pay raises for teachers and state employees, water development, state park and recreation expenditures, Texas Highway Patrol — all want in on the act.

The tax policy committee is headed by Rep. Ben Atwell of Dallas, who asked the Texas Research League to list possible sources for new taxes.

Proposed were:

- Increase the state sales tax from its present two per cent to two and a half or three per cent, raising \$72,400,000 to \$144,800,000 a year.

- Corporation income tax of 4.4 per cent (average of those in the 37 states which levy it), raising from \$18,000,000 to \$106 million a year.

- Graduated personal income tax, raising \$75 million a year. (There are 36 states with personal income taxes.)

DRAFT CALL — Texas' part of fulfilling the national draft call for 31,300 men in September includes furnishing 1,381 men in July; 1,837 in August; and 1,585 in September, says Col. Morris S. Schwartz, State Selective Service Director.

In addition, between 4,000 and

John Bullion visited the Kelly Bullion family in Odessa and the Jack Bullion family in Ralls Sunday and Kelly's sons returned home with them for a visit of several days.

5,000 Texas men will be called for pre-induction physical and mental examinations in September.

GRAIN FARMERS CAUTIONED — John C. White, commissioner of Agriculture, advised Texas grain farmers to "make certain your harvest is stored in a state-licensed warehouse and to demand valid Texas Grain Receipt."

Approximately 70 warehouses have failed to renew their licenses this year, though the grain harvest is well underway in many parts of the state. Grain stored in these warehouses is not protected by bonds and license required by law, said Mr. White.

MORE BOAT RAMPS — Thirty-three new boat ramps across the state, making a total of 94 such ramps, have been approved by the Texas Highway Commission.

Twenty of the new ones are adjacent to farm-to-market or park roads.

These new ramps will increase launching facilities by more than one-half and will cost \$241,800, or an average of \$7,327 each.

Source of money, provided for under the Texas Water Safety Act, comes from Certificate of Number fees collected from Texas boat owners.

And, speaking of boats, new boat fees and unclaimed boat gasoline sales taxes are reaping about \$100,000 a month for the state.

According to the state parks and wildlife department, a new system is being set up so that fines collected for boat safety law violations will go to a State fund, rather than to county funds where most other law breakers' fines are deposited.

BIG THICKET ENDORSED — State Parks and Wildlife Commission endorsed "in principle" the creation of a Big Thicket State Park. It will embrace some

THE FAMILY LAWYER

PRIZE CONTESTS
"COUNT THE DOTS AND WIN A COLOR TV"

So said the poster in a furniture store window. In case of a tie, duplicate prizes were to be awarded.

Sure enough, two contestants

15,000 acres of the 300,000 acres in Liberty, Hardin, Tyler and Livingston Counties known as the "Big Thicket."

Will Odum of Austin, commission chairman, said endorsement would be made "specific" after the Parks and Wildlife staff has studied the proposal. Then all the Commission needs is legislative approval.

OTHER PARKS NEED REPAIR — According to William M. Gosdin, park services director, state parks' buildings need repairs to the tune of \$970,000.

State Parks are expected to get \$2,200,000 for improvement from federal sources during each of the coming two years. But Gosdin said a complete statewide outdoor recreation plan is needed by 1970 to keep the state qualified for federal aid for park construction.

CONTRASTING JOB SITUATION — Texas employment is continuing its upward trend, but at the same time, unemployment is rising too, the Texas Employment Commission reports.

Total employment rose from 3,867,600 in April to 3,898,000 in mid-May, while unemployment rose from 121,000 to 124,000 during the same period. The number of workers on non-farm payrolls rose by 6,500 to 3,585,300, and farm employment jumped 23,900 during May. The 3,000 increase in unemployment was caused by early entrants into the market from schools.

SHORT SNORTS — Governor Connally has approved nine grants under the Economic Opportunity Act. Fort Worth and Tarrant County got the biggest chunk of money — \$368,980 — for use in planned parenthood services, family-neighborhood services, poverty centers and dental care. Waco and McLennan county received \$345,130 for day-care services, booster education, medical and summer education, expansion of Planned Parenthood.

—a man and a woman—turned in answers that were exactly right. After due deliberation, the store named the woman as the winner on grounds of neatness and legibility. The man was offered a small radio as a consolation prize.

But when the man filed suit, the court held that he too was entitled to a television set. The court said the store had no right to make new rules after the contestants, by submitting their entries, had already accepted the original offer.

For the contract created in a prize contest is just as binding, in the eyes of the law, as any other kind of contract. A winning contestant can enforce his rights in court.

But suppose the rules say: "The decision of the contest judges shall be final."

Even then, if the judges tamper with the rules or use other trickery to foil a winner, the law will still uphold his claim to whatever he has legitimately won.

On the other hand, you cannot insist on a prize if you yourself have not lived up to the rules. For example:

A car dealer offered a valuable gift certificate as first prize in a drawing. But according to the rules of the contest, ticket stubs had to be deposited "in person" at the dealer's showroom.

As it turned out, the holder of the winning number had sent his stub in by messenger. A court ruled later that, since he had not complied with the terms of the offer, he had not earned a right to the prize.

What if the contest is an illegal lottery? Then, even if you do win, you should not expect a court to enforce your claim. As a general rule, the courts will not lend their aid to carry out an illegal contract.

The Supreme Court has given the reason: "No court of justice can be made the handmaid of iniquity. There can be no legal remedy for that which is itself illegal."

Duke Receives Canal Assignment

Pfc. William F. Duke, son of Mr. and Mrs. E. W. Duke of Benjamin, has recently received his orders of his assignment to the Canal Zone in Panama. Duke was inducted into the Army in August, 1965, and received his basic training in Ft. Polk, La.

He was awarded a trophy for his high score on the proficiency test of his basic training. He was assigned to the Signal Corps and sent to Ft. Monmouth, N. J., where he has just completed twenty-four weeks of school. Duke attended Benjamin High School and graduated as an honor student in 1963. Following his graduation he attended Texas Western College in El Paso.

ATTEND SIG FLAGS

Mr. and Mrs. Jack Hamilton and children and Mr. and Mrs. N. L. McHam attended Six Flags Over Texas last week end.

not file a claim for refund of Federal tax on gasoline used on their farm and or ranch as they have done in past years. Instead, the refund of Federal tax on gasoline used on or after July 1, 1965 must be claimed as a credit on their annual income tax return.

This credit will first be taken on the return for the first full tax year beginning after June 30, 1965. If the return is filed on a calendar year basis, the credit for gasoline tax refund taken on their 1966 return will include the tax on gasoline used in the period from July 1, 1965 through December 31, 1966.

The refund is claimed as credit in a manner similar to the credit for tax withheld on wages.

Anyone with vegetable crops, cotton, fruit trees and ornamentals may have plants that are stunted in growth. These plants will stay alive but do not grow. Other plants in the same field may be normal in size. When these stunted plants are dug rather than pulled from the ground, they may have fleshy knots in the root they may have a stubby short root system with excessive branching, small roots larger near the tip end or in the case of carrots, forked or crooked tap roots.

If you have the above symptoms, the cause is probably the root-knot nematodes. This is a worm-shaped almost microscopic animal from one-fifty to one-tenth of an inch long.

Feeding by these animals is usually done by means of a pointed spear or stylet. These spears punch holes in plant cells and such the sap. In the case of the rootknot, the female enters the root to do the feeding. The plant then develops the fleshy knot to attempt to bypass the nematode. When they are very numerous raising a susceptible crop is impossible without soil fumigation.

There are many other species but the rootknot probably does the most damage. It has been showing up in many fields in Knox County the past few years. They are spread from one area to another by soil carried on cultivators, irrigation water and other means.

Among the crops effected are cotton, tomato, okra, peppers, sweet potatoes, watermelons, canteloupe, carrots, cucumber, just to name a few. Fumigation of the soil or the growing of resistant varieties is the only means of combating these pests.

Ozelle Stephens

It was almost sundown, a great throng of people was following Jesus to hear his wonderful preaching. There were over 5,000 hungry, fainting people. Jesus had compassion on them and after feeding them, they picked up 12 baskets full of left overs, yet all he had to begin with was a boy's lunch of five loaves and two fishes. This is the kind of faith we should have when we pray.

Many people can say the Lord's prayer but few have learned to pray it which is the secret of the power that gets prayer answered. Praying is not saying words. Words merely form the form in which the temple of thought is built. The power of the Lord's prayer is not in the words, but in the pattern of thinking in which our minds are formed. We must "Be transformed by the renewing of your mind". When our thoughts begin to flow in the channels of the Lord's prayer, our minds do become new and we are transformed.

We fail because our prayers are words without thoughts and faith.
