

Lions Club Team To Play First Game Under Lights Here Saturday Night

Old Settlers Plan August Meeting

The Knox County Old Settlers Reunion will be held on Sunday, August 11, in the Mackenzie State Park in Lubbock, according to S. C. Rawlings of Lubbock, president of the association.

A basket lunch will be spread at noon, followed by special singing, hand music and speaking in the afternoon.

All residents of Knox County are invited to attend the affair.

State Contests Open For 4-H Club Boys and Girls

A wide variety of national, state and county contests are open to ambitious 4-H Club boys and girls in Texas, as a means of stimulating good demonstrations on the home and farm, and developing rural leadership.

On a national basis, there are five contests for girls only, nine contests for both boys and girls, and three contests for boys only, according to 4-H club specialists of the A & M College Extension Service.

The five contests open to girls only are the dress revue, clothing achievement, canning, food preparation, and girls' record contests. State winners of each will get trips to the National 4-H Club congress this fall, and county winners will receive medals.

There are two contests for boys and girls in which the state winner receives a trip to the congress. They are in poultry work and in better methods of using electricity on the farm.

Bonds will be awarded to state winners in contests on farm safety, poultry, gardening, frozen foods and dairy foods work, which are open to both boys and girls. County winners will receive medals.

State winners in home beautification and meat animal contests will receive gold watches, with medals for county winners. Both of these are open to boys and girls. Contests for boys only include dairy production, field crops, and soil conservation. Winners will get trips to the National club congress.

4-H club members interested in competing for these awards should consult with their county agricultural and home demonstration agents.

WALDRIP FAMILY IN ABILENE REUNION

A reunion of the Waldrip families was held in Cobb Park at Abilene Sunday.

Families from here and surrounding towns joining the Lynn Waldrip family of Abilene were: Mr. and Mrs. W. F. Waldrip, Miss M. V. Waldrip, Mr. and Mrs. Ansel Waldrip, Ford Waldrip and family, Miss Mary Beth Waldrip, Mrs. James Dutton and son, all of Knox City, Mr. and Mrs. D. H. Craddock of O'Brien, Miss Annette Webb of Munday, J. K. Morgaa and family of Haskell, E. D. Weaver and family of Rule, Miss LeVerne Weaver of Abilene.

The H. B. Lewis family, and Mr. and Mrs. R. V. Wyatt spent the weekend at Lake Kemp fishing.

has led and is leading the inflation parade. As this letter is written the railroads threaten to strike, notwithstanding the government's taking them over. Apparently the government has lost all prestige and power in dealing with management-labor difficulties. More than four years ago on the House floor I predicted that the President's labor policies would become the Achilles heel of his administration. The chickens seem to have come home to roost in a big way.

Mr. and Mrs. Charles George of Wichita Falls spent Sunday here with her parents, Mr. and Mrs. J. W. Hamm.

Dr. Rainey Talks To Baptists Here

Dr. Homer Price Rainey made a short talk to the congregation at the Knox City Baptist Church last Sunday, enroute to Benjamin where he delivered the baccalaureate address for the Benjamin high school graduating class.

Dr. Rainey spent Saturday night here, on a speaking tour to high school graduates in this section of the State.

He would not concede definitely that he was a candidate for governor of the State, but intimated he would make the race. Friends have already filed his name for the place and paid the filing fee.

His address at the local church was highly enjoyed by those present.

DDT Spray Proves Effective In Tests On Stored Grain

New uses of DDT spray in barns and grain bins are proving very effective in the control of the granary weevil, and especially the barn fly. The League Ranch is using the DDT spray mixed in the ratio of one pound of DDT to 20 gallons of water, and have found it very effective when sprayed on the walls and ceilings of the barns in controlling barn flies and thousands of the dead weevils and mealy bugs were found in the granary where the solution was used.

The eradication of these insects will in a great degree control other grain pests that will damage grain after storage, it is believed, says Jack Idol, manager of the League Ranch.

The above formula is a very cheap spray material and 20 gallons of water will spray approximately 2500 square feet of walls and ceilings, or floor. Another advantage of use of the spray before the storage of grain is that it does not injure the stored wheat for milling purposes since there is such a small amount of the DDT material remaining on the walls of the granary after the water in the spray evaporates.

DDT is finding many uses in Knox County since the results of the horn fly control on beef cattle, as many ranchmen were amazed with its effectiveness after seeing the results on the League Ranch last Tuesday when 68 cows and 78 calves were treated for the second time, and only approximately 5 to 12 flies per animal were noticed on the cattle at that time. Ranchmen think it will mean much to their profit and loss records, especially in the heavy fly season, during the summer months.

Results of recent experiments indicate that DDT-sulphur mixture is more effective against adult cotton flea hoppers and for the control of heavy infestations than sulphur alone. However, sulphur alone will give economical control of light to medium infestation and the DDT-sulphur mixture which is more expensive, is only recommended for heavy infestation, where it is necessary to reduce the insect population below the damaging point as quickly as possible, according to R. O. Dunkle, county agent.

Tests have shown that a mixture of 5% DDT with sulphur gave good control of the cotton flea hopper. The DDT, when mixed with sulphur, was also effective in reducing the population of beneficial insects. Caution should be exercised in applying the solution early in the season for the reason that it will kill the insect that lives upon the cotton aphids; therefore, all DDT dusts should be applied later in the season. DDT is not effective against the boll weevil and should not be used when both hoppers and weevils are causing damage at the same time. A calcium arsenate-sulphur mixture is effective against both the flea hopper and the boll weevil.

For the economical control of the flea hopper it is essential to examine cotton to ascertain the number of flea hoppers present. When from 15 to 25 hoppers are found on 100 cotton terminals, then the infestation is heavy enough to justify the first application of sulphur, which should be applied at the rate of 12 to 15 pounds per acre. If the infestation rapidly increases due to the adult migrating in, or if it reaches high numbers before being discovered the DDT-sulphur mixture should be used to stop the damage as quickly as possible.

Recent visitors in the A. P. Denton home were Mr. and Mrs. Frank Moreland and family of Portland, Oregon; Mrs. J. L. Gordon and daughter, of Santa Monica, Calif., and Mr. and Mrs. W. P. Dowdle and son of Gilliland.

RECRUITING OFFICER HERE WEDNESDAYS

Sgt. Allen Halford of the U. S. Army Recruiting Station, Childress, will be in the Knox City postoffice every Wednesday, according to a bulletin from the Childress office.

Mr. and Mrs. L. W. Graham and son, Dale, spent the weekend in Clarendon with Rev. and Mrs. Bedford Smith.

Benjamin Plans Further Test of New Water Source

The Benjamin Chamber of Commerce held its regular meeting in the District court room, Tuesday, May 14, with 42 present.

Mr. Ball, mayor of Benjamin discussed before the group the activity of the City Council toward securing a flow test on the water well which is located two miles east of Benjamin on the O. D. Propps farm. Noah Gilentine, owner and operator of the Benjamin laundry gave a demonstration to the group as to how the different washing powders would lather in the new prospective water. Three different jars were used in which a small amount of the washing powders were placed and from this demonstration it was easy to determine that the new water was somewhat softer than that now being used.

The Chamber of Commerce voted to cooperate with the Santa Rosa Roundup boosters when they come to Benjamin for the purpose of advertising the show to be held at Vernon. Collins Moorhouse, City Council member, made the statement that an effort was being made to secure a water test flow on the prospective city water supply east of town. Mr. Isbell, engineer for the Isbell Engineering Company of Brownfield, is to notify the City Council as to where they might secure services of some drilling company who can make the water well test.

The next meeting of the Chamber of Commerce will be Tuesday, May 28, at which time more information will be known concerning the water supply, and as an entertaining feature, the Magnolia Petroleum Company will present a moving picture entitled "The Southwest Challenge." Members and all others living in and around Benjamin are invited to attend.

SUNDAY SINGING AT W. F. WALDRIP HOME

The next regular Sunday afternoon singing bee will be held in the W. F. Waldrip home next Sunday.

Everyone invited to come out and help in singing the good old songs.

Mr. and Mrs. J. N. Cook and family of Tishomingo, Okla., are here visiting her sister, Mrs. C. M. Paul and Mr. Paul.

First Oil Well In County Occasion for Celebration At Site of Discovery

Rhineland Pastor's Mother Passes

Mrs. Magdelene Buegler, 82, mother of Rev. Thomas Buegler, pastor of St. Joseph's church at Rhineland, died recently at Fort Smith, Arkansas, and was buried April 15 from St. Boniface church there.

Mrs. Buegler was a nurse for thirty years, doing extensive social work, and was a member of St. Boniface parish for nearly 56 years.

Five children survive: Joseph and Martin C. Buegler, Fort Smith, Ark., Mrs. John Bauer, Ratcliff, Ark., Miss Gertrude Buegler, superintendent of nurses at Colonial Hospital, Ft. Smith, and Father Thomas of Rhineland.

Prof. Edwards Addresses Lions

Prof. A. F. Edwards of Wichita Falls was guest speaker at today's Lion Club luncheon at the Methodist Church.

Prof. Edwards, always a welcome speaker at the club, was in fine form and brought the Lions and a group of visitors a good message, spun out of home philosophy and a wide knowledge of national and international affairs.

Visitors include County Judge Carl Patterson, Doyle Thomas, and R. O. Dunkle, of Benjamin, Pete Loran of Rhineland, Rev. Overton of Haskell, Rev. Floyd McClure, Knox City Foursquare pastor, and Alton Leach.

Lion President Holcomb appointed a nominating committee to select candidates for offices in the Lion organization, the election to be held before July 1st.

Cotton Congress Set for July 8-9

Early out-of-state reservations for the Seventh Annual Cotton Research Congress at Dallas, July 8-9, indicate widespread interest in the meeting throughout the Cotton Belt, according to Walter B. Moore, chairman, public relations committee.

Sponsored by the Statewide Cotton Committee of Texas, with Burris C. Jackson, Hillsboro, as general chairman, the Congress will discuss the theme "Cotton, a World Force", and have numerous exhibits of mechanical cotton equipment, cotton and cottonseed products, and research developments.

Representatives of newspapers, agricultural and cotton trade publications, agricultural experiment stations and extension services, and cotton organizations from Mississippi, Oklahoma, Tennessee, New Mexico, Georgia and other Cotton States have already made reservations for the meeting, Moore said.

National news and business publications, hardware and implement journals and other publications will have correspondents at the meeting, because of the nation-wide economic importance of cotton and cottonseed and significant new developments in cotton mechanization that will be exhibited, he said.

President Gibb Gilchrist of Texas A. & M. College is chairman of the program committee; L. T. Killough, Texas Experiment Station, College Station, exhibits chairman.

Mr. and Mrs. Joe Couch of Vernon were here the first of the week to see his sister, Mrs. J. R. Bradberry, who has been seriously ill at the hospital recently.

Mrs. J. M. Bradberry was in Dallas and Fort Worth the first of this week on business.

Long a stamping ground for the oil production industry, all the way from leasing to drilling dry holes, Knox County finally rang the bell with the first well of commercial possibilities, recently completed in the northwest part of the county by Dr. H. B. Beavers of Benjamin.

A "die-hard" when it comes to believing in the oil possibilities of the county, Dr. Beavers kept up the fight and was finally rewarded for his efforts with a well, while still under tests, has definitely been pronounced "a good well."

The well, located about 20 miles north of Knox City, is located on the northwest corner of Section 163, Block 44, H&TC Survey. It is known as Beavers No. 1.

Making good a promise provided the well came in a producer, Dr. Beavers served his many friends a picnic at the well site recently. A description of the affair follows.

DR. BEAVERS KEEPS PROMISE GOOD

Dr. and Mrs. H. B. Beavers of Benjamin were hosts to a large number of their Knox County friends, and the employees of the City Service Oil Co., and their families at a picnic barbecue, Friday, May 17.

The occasion was the celebration of the "bringing in" of Knox County's first producing oil well. Dr. Beavers had said during the process of drilling the well, that if the well made a producer, he would treat his friends and the employees to an old-fashioned barbecue with all the trimmings, including the drinks. The well having been brought in (with real oil as evidenced a few days before, Dr. Beavers made good his promise last Friday afternoon.

By five o'clock, friends had arrived from all over the county. The company employees and their families were there. Dr. and Mrs. Beavers' son, Dr. Herbert Beavers, had driven up from Fort Worth in honor of the occasion. And out on the open prairie in the shade of THE OIL WELL, was spread a most sumptuous feast, consisting of barbecue, gravy, beans, potatoes, hominy, dough-nuts, coffee, candy, and cold drinks of all kinds—even beer, for those who chose. Although most everyone went back for a second help, there was lots and lots of food left.

Dr. and Mrs. Beavers are numbered among our pioneer families. They came to Benjamin before there was a Knox City, when this country consisted of prairie-dog towns, sage brush and wide-open spaces. They have watched the county grow from that wild, untilled expanse into one of the richest agricultural sections of the state. It is, therefore, only fitting that the county's first commercial oil well be brought in on their land.

Just before the crowd began to leave, Judge Lewis Williams, using a truck bed for a platform, called the crowd to attention and gave a few words of welcome and appreciation in behalf of the Beavers family. Then speaking for the visitors, he expressed their happiness and gratitude for the occasion.

Upon leaving, the many friends congratulated Dr. and Mrs. Beavers upon this latest success, and wished them many more active years in which to enjoy it—as well as many more oil wells.

History and Objectives of The Brazos River Project

(An address delivered by Josh D. McCall of Dallas, on April 15, 1946, at a dinner given to the board of directors of the Brazos River Conservation and Reclamation District, of which B. B. Campbell of Knox City is a board member).

On August 17, 1821, Stephen F. Austin obtained permission from the Governor of Texas and Coahuila to explore the country on the Brazos River and to sound the entrances and harbors lying adjacent to the mouth of the stream. With nine of his men he made those explorations sufficiently to satisfy himself as to the great fertility of the land along the river. Immediately, he returned to Louisiana preparatory to the

execution of his colonization scheme. In December, 1821, he arrived on the Brazos with his settlers, where the La Bahia (Goliad) road crosses the river. On a frosty New Year's eve he encamped on the Brazos. A few days later Andy Robinson established the first permanent home where the Village of Old Washington now stands.

Probably it was not long before Mr. Robinson and his good neighbors learned that the Brazos River was not an unmixed blessing. We do know that as early as 1837 the settlers were gravely concerned with Brazos overflows. From about 1850 until 1915 the record is fairly complete. Leaders of thought and action in the Lower Brazos Valley had frequent conferences and meetings seeking to do something which would prevent or lessen the flood of ravages of the river.

When the flood of 1913 had laid low all standing crops and much of the wealth in this vicinity, it was apparent that something must be done. Otherwise, this fertile valley might have to be abandoned to the caprice of the river. At that time the Federal government was not interested in flood control work. The Constitution of Texas contained such restrictive provisions that local taxing agencies were powerless to cope with the burden. Spurred by necessity the Brazos Valley people, with the cooperation of those in other watersheds, inaugurated a movement which resulted in the adoption in 1917 of the Conservation Amendment to the Constitution. For the first time the control, preservation and distribution of storm and flood waters became a duty of the State and limitations were removed to permit

local financing of such improvements. About the only improvement possible within the means of local communities even under the amendment to the Constitution was the levee district. Levees were designed to keep the flood waters off the lands in cultivation. The construction of levees with local money was found to be an expensive luxury. Frequently man-made levees were inadequate to hold back the flood torrents of the Brazos River. Everyone realized that the most adequate method of flood control was in the construction of storage reservoirs, but these could not be financed at the expense of local communities.

Again at the behest of Brazos flood-sufferers, a few years after the adoption of the legislative amendment the Legislature of Texas appropriated money for a complete survey of the Brazos River and its tributaries. Insofar as the Brazos River was concerned the survey was designed to determine methods to prevent or to alleviate the damage from recurring floods in the lower reaches and the most economical uses to be made of stored flood and storm waters. Based on information obtained in the comprehensive survey, the Brazos District was created by the Legislature in 1929. This was the first time a sovereign state entrusted to a district the administration of public and private rights to stored flood and storm waters throughout the watershed of a mighty river. The law creating the Brazos District has been the model for so-called authority legislation enacted later by Congress and other states.

The district contains approximately 45,000 sq. miles, substantially all of the area in the watershed and its tributaries. The river has its source about 40 miles northwest of Clovis in New Mexico and extends in a southeasterly direction approximately 1300 river miles to Freeport. Within the boundaries of the District are all or parts of 65 counties. This means about one-sixth of the State of Texas is comprehended within its boundaries; approximately one-fourth of the people of the State of Texas reside in the district. It is governed by 21 directors appointed by the State Board of Water Engineers with the approval of the Governor of the State. The term of a director is six years. Several of our directors have served since the district was created in 1929.

When the 1929 Act had been passed, the district had plenty of authority to construct flood control and conservation dams, and to make the stored water useful to municipalities, irrigation districts, manufacturing enterprises and to develop hydro-electric power from the falling water. But it had no money with which to build or to operate.

Down in this section the planters wanted to keep the water off their lands, to save the lives of their tenants, and prevent damage to their crops and livestock. In the upper reaches of the Brazos watershed, there was a distinct shortage of water. Thus the people in the upper reaches and the people in the lower reaches had common interest in evolving a plan which would store the water for uses where it might be urgently needed, at the same time mitigating the severity of the intermittent floods. Due to the configuration of land in the district, all of the dam sites on the main stem of the river are found in the country north of Waco. That also is the section in which the water shortage is emphasized. The problem would be greatly simplified if by constructing dams in North Texas only we could store all of the waters which cause the floods in the lower reaches. Obviously, the problem is not that simple, but through the construction of such dams we can prevent floods caused by waters falling below Waco by virtue of the fact that the upper dams will be so operated as to hold back waters falling in the upper watershed until the flood waters originating below Waco shall have had an opportunity to reach the Gulf.

The ideal method of conserving the storm waters which fall in the semi-arid or upper part of the district would be to trap each drop of water on the land where it falls. Those are the lands which need the water. To the extent possible, we are trying to do that very thing. We are encouraging terracing, the construction of small tanks and are co-operating with local communities in the actual construction of small municipal reservoirs. The district is co-operating fully with the Soil Conservation Service of the Department of Agriculture and with the Bureau of Reclamation.

(Continued in a later issue)

CPC and Mrs. Harry Brown left Tuesday for Fort Worth to resume his duties at the Naval Base there, after several weeks visit with her parents, Mr. and Mrs. J. C. McGee. In July he will report to New York for reassignment.

Mr. and Mrs. Vernon Commins and children of Stamford, and Mr. and Mrs. Buster Saunders and girls of Plainview, visited in Knox City last weekend. Laquita Saunders remained for a longer visit with her grandmother, Mrs. L. J. Tidwell.

Mrs. H. P. Arledge and son, William Henry, of Seymour, spent the weekend with Mr. and Mrs. G. T. Hardberger. They were all luncheon guests of Mr. and Mrs. E. O. Jamison Saturday.

Jane Moss spent the weekend in Rotan with her aunt and uncle, Mr. and Mrs. R. T. Williams.

Ft. Worth Air Show To Feature Army's Newest Planes

What is expected to be the largest and most spectacular Air Show ever seen in Texas will be presented to the public at Fort Worth Army Air Field on Sunday, June 2nd, beginning at 1:00 p.m. More than 100 planes, representing nearly 30 types of Army Aircraft, will take the air in demonstrations of combat maneuvers, acrobatics, and low level flying that promise a full afternoon of thrilling entertainment.

Feature of the show will be a whole flight of the Army's sensational new jet-propelled P-80 Shooting Star fighter planes, which will perform acrobatics, formation and low-level flying at speeds in excess of 550 miles per hour. The propellerless Shooting Star is the same plane that recently set a new coast-to-coast speed record of 4 hours, 13 minutes, averaging 584 miles per hour on the flight.

In addition to the breathtaking P-80's, the public will see formations of A-26 attack bombers in a low-level bombing raid, flights of B-29 Superfortresses under fighter attack; Glider pick-up and release by huge C-46 cargo planes; dogfights between P-47 and P-51 fighters; skywriting by a P-47 Thunderbolt, and other aerial spectacles that will keep the sky filled with planes throughout the afternoon.

For the first time, the public is invited to bring cameras, and will be permitted to take photographs and snapshots anywhere on the air field, including photographs of all types of aircraft represented at the show.

Bleacher seats for 25,000 persons will be available at the field.

Large, handsome sepia photographs of the Army's latest bomber and fighter airplanes will be given persons holding lucky numbers on the program folders which will be presented every one entering the gates of Fort Worth Army Air Field. These photographs are 22 x 16 inches in size, and will serve as a valuable souvenir of the occasion.

It is stressed that there is no admission charge, service fee, or tax charge at the Air Show. The public is cordially invited to be the guests of Fort Worth Army Air Field for the afternoon.

Health Officer Lists Precautions In New Epidemic

Dr. Geo. W. Cox, State Health Officer, has issued the following statements and suggestions concerning the control and prevention of poliomyelitis which is now occurring in certain sections of the State.

Until recently it was generally believed that this infection is transmitted by means of discharges from the respiratory tract. It is now believed that poliomyelitis may be another of the several gastrointestinal infections. Therefore, control measures must include clean-up campaigns and improvements in sanitation.

Strict sanitary measures must be observed in all communities. Stringent efforts should be made to eliminate the housefly and to destroy its breeding places. All mosquitoes and mosquito breeding places must be eliminated at once. Every effort should be made to institute approved garbage collection systems immediately. Safe water supplies must be assured. Where adequate municipal sewage disposal systems are not in operation, it is vitally important to promote and maintain sanitary septic tanks and outdoor privies.

All swimming pools should, under rigid supervision, maintain those standards approved by the Texas State Department of Health. This necessarily includes maintenance of proper chlorine level. Where such standards are not maintained, those pools should be closed immediately.

All raw foods and vegetables should be washed thoroughly before use and protected from flies, filth and insects. All eating and food handling establishments should adhere strictly to the State Law concerning the sterilization of dishes and utensils. Those restaurants with insufficient personnel to maintain approved sanitation should close one or two hours a day so that employees can assist in maintaining cleanliness and high sanitary standards.

Every effort should be made to secure approved milk. Rats and mice should be eliminated. Maintain in the home the same sanitary standards that are necessary in community life. Particular attention should be paid to personal hygiene. Excuse from cases and contacts should be handled and disinfected with the same scrupulous care as in typhoid fever or bacillary dysentery.

Over-exertion in children should be avoided. Children should not visit homes where there is illness. Polio cases should be quarantined for 14 days and adults who work in food establishments should be particularly instructed in personal hygiene. It is advisable to reduce to a minimum all human contacts, especially in children during an outbreak of this disease. It is not advocated that schools, churches, and theaters be closed.

Early symptoms of infantile paralysis are headache, fever, vomiting, drowsiness, followed by stiffness in the neck and back. When suspicious symptoms appear, a doctor should be called immediately.

For Lieutenant Governor

ALLAN SHIVERS of Jefferson County

The father of two children, he left the Senate to volunteer in World War II served overseas and now asks promotion to the office of Lieutenant Governor, for which he is qualified, based on service and experience. Address Allan Shivers, Fort Arthur, Texas.

**New Milk Law
Now In Effect**

There is a new law now in effect which concerns every milk producer in the state who sells cream or whole milk to a dairy manufacturing plant.

While the State Health Dept. is charged with the enforcement of all food and drug laws, the A. and M. College Extension Service is trying to help acquaint dairy farmers with the provisions. G. G. Gibson, Extension dairyman, says the requirements aren't as stiff as for producers of Grade A milk.

They do, however, require a milking barn and a milk handling room with screened openings. A small shed type barn with single wall construction is satisfactory. Then the law requires cooling, sanitary methods of handling the milk, and keeping healthy cows. For full details, milk producers can get information from their dairy

manufacturing plants or their county agricultural agents. The new regulations are made necessary by the need for improving the quality of dairy products manufactured in Texas. This is possible only thru improving the supply of milk going into the products. Enforcement of these regulations will mean that there will no longer be a market for low quality milk and cream. The law doesn't apply to sale of bottled milk, which is covered by other regulations. Nor does it apply to the sale of any home-made butter and cheese. It's directed particularly to the farmers who sell the milk or cream which goes into ice cream, powdered milk, and cheese. Naturally, county agricultural agents are not expected to personally inspect the farms of the thousands of milk producers in the state—but they are ready to advise with producers and with plant field men who work with dairy farmers.

N. S. Kilgore, Clerk
District Court,
Knox County, Texas
(Seal) (29-30-31-32)

**Your Merchant Marine
First to Steam Across the Atlantic!**

BOASTING 72 ft and 1/2 the SIZE OF A LIBERTY SHIP, THE SAVANNAH, FIRST STEAMER TO CROSS THE OCEAN, IS ONE OF AMERICA'S MOST FAMOUS SHIPS.

• CALLED A STEAM COFFIN, SHE SAILED FOR EUROPE ON MAY 22, 1839, NOW OBSERVED AS NATIONAL MARITIME DAY OFF IRELAND SHE WAS STOPPED BY A BRITISH CUTTER WHICH THOUGHT SHE WAS ON FIRE. FOR IT WAS DEEMED IMPOSSIBLE FOR A STEAMER TO CROSS THE ATLANTIC.

• A LIVERPOOL PAPER STATED DARKLY THIS STEAM OPERATION MAY IN SOME MANNER BE CONNECTED WITH THE AMBITIOUS VIEWS OF THE U.S.

• SOME THOUGHT SHE WAS GOING TO TRY TO RESCUE NAPOLEON FROM ST. HELENA, TO GET THE REWARD OFFERED BY JEROME BONAPARTE.

• THE KING OF SWEDEN AND THE QUEEN OF DENMARK HAD EACH ORDERED ONE, THE SWEDISH BEING AS A PRIZE FOR THE VICTORY AT BATTLE OF GÖTTENBURG.

• SHE RETURNED TO THE U.S. AND LATER RAN ASHORE OFF LONG ISLAND AFTER HAVING PROVED THAT A STEAMER WAS FEASIBLE IN OCEAN SERVICE.

OIL NO MONOPOLY
Approximately 80% of the fuel oil delivered to the Atlantic coast are made dependent oil markets yet the uninformed are constantly that there is monopoly in the petroleum industry. Actually there are 1000 companies engaged in oil business and the them controls only 8% of the industry.

How to make OLD TRUCKS LOOK NEW

• Here's a way to make old trucks look new—quick. Drive them in and say, "I want an Appearance Reconditioning Job."

And you'll get it, because sheet metal and other materials that were out because of the war, are back. You'll get perfect fitting new International fenders, radiator grilles, hood sheets, doors, glass, hardware, headlights, bumpers, bumper guards, and seat cushions—just what you want to put your trucks in shape.

Next, paint jobs, if the trucks need them.

The cost? Not great.

The result? Marvelous.

Act now. Truck production has increased, but it will take many years to meet the demand. Get your trucks "Appearance Reconditioned" now!

Get These Too!
