Munday, Texas, Thursday, June 4, 1931.

Number 6.

Rhineland Lets Munday Down Hard; Score 10-2

"Sheney" Rayburn, who by every ordinary line of reasoning should be in Munday's line-up, but by reason of prior claim is included in Rhineland's roster, pitched his team-mates to victory Sunday in one of the most one-sided games in which the local aggregation has participated this season, the final count being 10 to 2 in favor of the visitors.

Vernon Melton, to whom has fallen the task of pitching most of Munday's games, just wasn't going good Sunday afternoon and the Rhineland huskies were in a hitting mood, especially after Rayburn poked out a home-run in the first frame, and the game was Rhineland's from there on out.

The box score for the game follows:

RHINELAND		MUNDAY	
Ab	H O A	Ab	H O A
Alb. Loran, ss.	4 2 1 6	Ballenger, 1b.	4 1 12 0

SUMMARY: Runs—Alb. Loran, Rayburn, McGlothlin 2, Leo Kuehler 2, L. Kuehler, Wilde 2, Albus, Bowley, Killian. Two-base hits—McGlothlin, L. Kuehler, Albus, McGraw, Bowden. Three-base hits—Leo Kuehler, Bowden. Home runs Rayburn, Leo Kuehler. Runs and hits—off V. Melton 7 and 9 in 5; off Dennis 1 and 2 in 2; struck out by Rayburn 6; V. Melton 4. Bases on balls—V. Melton 1; Dennis 1; C. Melton 2. Stolen bases—Alb. Loran, Leo Kuehler 2, Aug. Loran. Losing pitcher—V. Melton. Errors—Alb. Loran, A. Kuehler, L. Kuehler, Bowley, Killian, Roden. Earned runs—Rhineland 7, Munday 0. Double play—Bowley to Ballenger. Left on bases—Rhineland 6, Munday 6. Time 1:55. Umpires—McCord and Barnes.

Lambeth Pitches Goree To 12-7 Win Over Weinert

Lambeth, Goree's rookie pitcher, stepped out Sunday afternoon and pitched his team-mates to a 7-12 victory over Weinert's vast array of pitching talent, all of whom seemed easy for the slugging Goree outfit to connect with. He held them down to 7 hits and 5 runs in seven innings, when he was relieved by Blankenship, who allowed 3 hits which netted two runs in the two final innings.

The box score for the game follows:

GOREE		WEINERT

SUMMARY: Runs—Hutchens, Couch 4, Moore, Hilbre, West.

S. R. Wells Buys Big Bankrupt Stock at Jayton

The S. R. Wells Dry Goods Company of this city is announcing a big bankrupt sale to begin on Friday of this week and continue for ten days.

Mr. Wells has recently purchased the \$20,000 stock of the Mayfield Mercantile Company of Jayton, Texas, which he is moving to Munday and consolidating with the stock of the Tennessee Store, which he purchased some time ago, and he is offering the merchandise of both of these stores at ridiculously low prices, having purchased them at less than 50 cents on the dollar.

Mr. Wells and Mr. White have been in Jayton this week packing the goods and shipping them to Munday, and the consolidated stocks represent more than \$50,000 worth of merchandise, which is being thrown on the market to close out within a period of ten days, and Mr. Wells realizes that it will take exceptional bargains to move this big stock in so short a time, and is making reductions accordingly. See his ad in this paper, or better still, go to this big store and avail yourself of some of the bargains offered.

Green 2, Force, Wheatley, King, Leonard, Patterson, Tanner. Two-base hits—Couch 2, Green. Three-base hits—Patterson. Home runs—L. Force. Hits and runs—off Lambeth, 7 and 5 in 7 innings; off Blankenship, 3 and 2 in 2 innings; off Leonard 10 and 6 in 6 2-3 innings; off Patterson 1 hit in 1-3 innings; of Leonard 2 and 3 in 2 innings. Time 2:10. Winning pitcher—Lambeth; Losing pitcher—Lewellen. Left on bases, Goree 10, Weinert 7.

Sunset Pounds Knox City Off League Pinnacle

It remained for the fast Sunset aggregation to administer the initial defeat of the season to the Knox City team, and they did it up brown Sunday afternoon when they sent Uncle Ed Shaver's outfit back home with the small end of a 8-13 score, thereby bringing the cheery league leaders down on a par with Goree.

The box score for the Sunset-Knox City game follows:

SUNSET		KNOX CITY	
Ab	H O A	Ab	H O A
Lawrence, lf.	5 1 3 0	Allred, ss.	6 1 0 3
Busby, 2b.	5 1 3 2	Smith, lf.	4 0 0 0

THINKING OUT LOUD

BY JAKE N. NEDY

Occasionally when a fellow goes out to play a game of golf the little balls seem to do just what you want them to do—or nearly so.

And that's just the way the little ball was acting for Frank Goree one day recently when he was out getting in trim for the tournament. On 13 holes he was hovering around par, with a hole-in-one to his credit, and plenty of reliable witnesses to substantiate his claim.

But when he went out to play his match the little ball wouldn't behave like that, and as a consequence Frank was eliminated.

One of the interesting matches that was played during the tournament was that between E. J. Roberts, Sr., and E. J. Roberts, Jr. This father-son affair came about when both won their early matches and came to the quarter-finals.

TOL was matched to play Bill Moore in the tournament, but due to pressing business he was unable to get out and play and was forced to default. Bill, likewise, was too contrary to default, so substitutes were made in this bracket.

Bill has been playing golf now for some three years and hasn't been able to ascertain positively whether he is right-handed or left-handed.

From reports reaching us it seems that Skipper Burton out at Sunset made the Knox City fans sit up and take notice Sunday afternoon. Here's hoping the boys get that out of their system before Sunday, when they come to Munday.

Speaking about the thrill that comes once in a lifetime. Our little son, William Gayle (better known as Bill), made a hole in one at Lee Hayes' miniature golf course the other evening, and he's still talking about it. And we would too.

Knox City and Goree now occupy the same position in the percentage table in the Brazos Valley League, and we predict a warm chase between these two teams for the remainder of the season, with the possibility that Rhineland may also get mixed up in the melee.

If Munday should cut much too in the league the boys must begin hitting at a better clip than they have so far. Their game is on a par with that of the other teams in the league, but they have so far failed to connect with the ball with sufficient consistency to win many games. Let's hope the boys come out of their hitting slump.

Mitt Billingsley is all set to win this golf tournament and told us confidentially that he proposed to use some psychology to do it, whatever that is. Evidently he gave Loveless and Ballenger a dose of it.

Now that we've got the gas bills off our hands it's beginning to look like the ice man is going to have his day.

Gov. Sterling refused to interest himself in getting Tex Guinan in to France, saying that so far as he was concerned, she was a citizen of New York. Tex states that she was very foolish in going all the way to France just to get in jail when there were hundreds of jails in this country waiting for her.

Mrs. Garland McMahan of McMahan, Texas, has been here visiting relatives and friends. Mrs. McMahan will be remembered here as Miss Ola Chamberlain. She has many friends here who are all ways glad to see her.

Miss Mary Burns went to Nocona Thursday to take a position as Western Union operator. She will be at Nocona about two weeks and from there will go to Bowie where she will do the same kind of work.

One of the most destructive winds that has ever hit this section passed this way late Monday evening. While it will be impossible to estimate the damage, it is known to be great. The wind came with a cloud late in the afternoon, but this section received no rain. The fact that the wind was straight is all that saved the buildings. Even as it was, many small out buildings were moved and unroofed. Windmills were blown down and fences and all kinds of trellises about the homes were destroyed. Gardens and trees suffered heavily about town and reports from the farms indicate that much of the cotton and young feed was covered and cut off by moving sand.

At a recent meeting of the school board Lester Lindsey of Denton, Texas, was elected to teach history

and social sciences in the Goree high school next session and serve as assistant athletic coach. Mr. Lindsey is highly recommended by his superintendent, the county superintendent, the president of his board of trustees, and his college instructors. He has had three years experience. Both senior and junior basketball teams under his coaching won the county championship of Hardeman county.

Miss Inez Newton, who has been teaching school at Big Spring is at home with her parents, Mr. and Mrs. J. N. Newton, two miles south of town.

Miss Ruth Hammock, who has attended Texas Woman's College this year, is soon to enroll for the summer work at A. and M. College Station.

Mr. and Mrs. Otis Cash and Miss Eva Page Hutton of this city, Mrs. C. W. Hutton and Dean Hutton of Truscott will leave here the first of next week for Canyon, where they will attend West Texas State Teachers College.

A. E. Propps and family visited in the home of his brother in Gilliland last Sunday. Mr. Propps and social sciences in the Goree high school next session and serve as assistant athletic coach.

DANGER IN OLD CARS
Old, worn-out automobiles constitute a menace when operated on the highways, not only to the occupants but to other people as well. It is not surprising therefore that the suggestion is being made at there should be a systematic inspection of automobiles by officials who should have the power to order out of service obsolete cars that are dangerous to other vehicles and pedestrians. The number of accidents on our highways amount to an alarming total each year and every means should be adopted which might reduce the toll of life and accidents. To bar all rambling wrecks and to have them repaired would probably help.

THE POPE AND LABOR
Announcing the views of the Catholic Church, the Pope champions the right of a man to earn enough to keep his family. In a recent announcement he condemns the present economic life as "hard, cruel and relentless in ghastly measure." He also deprecates the degradation of the state by moneyed interests. To improve the present economic conditions the Pope recommends five principles, as follows: One—A living wage which enables a man to keep his family and have a portion of his income. Two—Better distribution of wealth. Three—Limiting live competition and still more economic domination. Four—A partnership arrangement where-

by workers share in business profits. Five—Determination of mutual arrangements between capital and labor according to the laws of strictest justice supported by Christian charity.

This program is, in its essentials, fair and wise. Its application may present many difficulties, but, on the other hand, to successfully bring it about means to eliminate much of the evil of our present social order.

MAGNIFICENT SCIENTIFIC EXPLOIT

That was a rather remarkable balloon trip made by Prof. August Picard and his assistant, who ascended high above the atmosphere of the earth to make observations of the cosmic rays.

For a day and a half the world waited anxiously to hear of the fate of the brave men, while occasionally somebody wondered why men risk their lives investigating such things as cosmic rays.

Yet, few Americans wonder at the automobile drivers who risked death in the great speck of Indianapolis.

FACING THE PRESENT

The Munday Times does not aspire to become a chronicle of pessimism, but neither does it wish to be considered a chirper of senseless chatter about how good times are just around the corner.

Truth to tell, many eminent observers of things economic say so, and they are backed up by gentlemen of political learning, and they may be right, but all we can advise, at this time, is to look carefully to his or her future.

There is no reason why the United States should be in the midst of a great economic depression. We have in this country ample gold, and considerable surplus of commodities. The men who produced the wealth of the past have not departed. The "makings" of good times are in our midst.

In the present era the wise man does not become dependent, because he knows that things could be much worse, but he does not become foolish and kid himself about the facts. Everyone of us should strive to do as much work as we can and keep out of additional debt while we try to pay what we owe.

LIGHT AND HEALTH

Electric lamps of the future will be health-giving as well as light-giving, declares an engineering publication. It is well known that quartz mercury lamps which radiate the beneficial ultra-violet rays have been used by physicians for some time. But these have re-

quired expert and careful handling. Now, it appears, lamps giving off these healthful rays have been developed for us in general lighting, thus performing a double duty. In fact, such lamps are already available, but so far their use has been restricted principally to home treatment of diseases in which sunlight or its equivalent is necessary.

When the new lamps are adopted for general use, as it is believed they eventually will be, it is expected that they will be of immense benefit, especially to indoor workers who have little contact with health-giving rays of natural sunlight.

GUARD THE CHILD'S EYES

Many persons become blind, or go through life with impaired vision because of neglect of the most ordinary precautions, according to Dr. Steadman, Iowa's health commissioner, who gives some good advice in a recent article.

He declares that the putting of a drop or two of silver solution into the eyes of an infant at birth is a most important matter, as five or six different kinds of germs which may cause partial or complete blindness are liable to gain access to the infant's eyes at that time.

It is also important to keep sharp or pointed instruments, such as scissors, pencils and dangerously shaped toys, away from very young children, and any foreign body which happens to get into the eyes should be given immediate attention. No inflammation of the eyes, however slight, should ever be neglected.

With respect to cross-eyes Dr. Steadman advises that steps be taken to correct this condition very early, and he declares that a child no more than a year old may be taught to wear glasses for straightening the squint, which will in most cases effect a permanent correction. He warns against the use of ten-cent store glasses as any glasses not prescribed after

expert examination of the eyes. Reading in a poor light or in a bad position strains the eyes unduly, while glare is also harmful and should be avoided as much as possible.

Considering what a handicap poor eyesight places upon the individual, it is really strange that the simple precautions recommended by health authorities are so frequently neglected.

A CRITIC'S ERROR

That minor personal habits have no important bearing upon one's ability is illustrated by a little joke that the late General Goethals, builder of the Panama Canal, was fond of telling on himself.

Long before the now ubiquitous "coffin nails" became popular, or even respectable, the general became an inveterate cigarette smoker. He also parted his hair in the middle.

When Goethals, then a major, was assigned the difficult task of building the canal in 1907, after other eminent engineers had failed, a Washington newspaper editor commented unfavorably on his selection for the job. After recounting the failures of others to accomplish the task, the newspaper said:

"And what in heaven's name can we expect of a man who parts his hair in the middle and smokes cigarettes?"

Yet Goethals did build the canal, although he continued to part his hair in the middle and smoke cigarettes as long as he lived.

SOME VERY GOOD ADVICE

Our past extravagance is partly responsible for the present hard times says J. S. Love, superintendent of Mississippi banks, who offers some very sound advice to all of us, as follows:

"We in America have been for the past dozen years deluding ourselves into believing that we are living within our incomes when we know that such is not the case; or

that our banks and our business houses are making a net profit when we know that proper provision has not been made for losses and depreciation.

"Self delusion is the only possible explanation of the riddle of depression in the midst of apparently permanent, stable business. None of our Nation's wealth has disappeared mysteriously; it is still with us. There are as many able bodied people in the United States today as there were 15 months ago.

The wage earners and salaried employees, with few exceptions, are earning the same wages and salaries as in 1929 until the last six months, at least. There were as many men and women employed in the beginning of the decline as there were a year before. We are eating just as much, wearing just as much as we did then.

"But we are not spending so much. This is as it should be. We are gradually adjusting our business to the present-day basis of economy and thrift. We are living more economically; more prudently; and using more sound, common sense in personal affairs and in the operation of our business and the management of our banks.

"We are gradually getting away from the habit of buying right and left—spending tomorrow's and day after tomorrow's salaries. Tomorrow and the day after have caught up with us. We have suddenly discovered there is no profit to be had from deluding ourselves.

"And, because we have discovered it and returned to more normal basis of buying, America surely is returning once more to prosperity. If we can keep our heads up we can keep our heads up."

"Our greatest need today is to get out of debt. We cannot have permanent prosperity when there is a load of debt around our necks. Surely debt is the basic cause of the present depression.

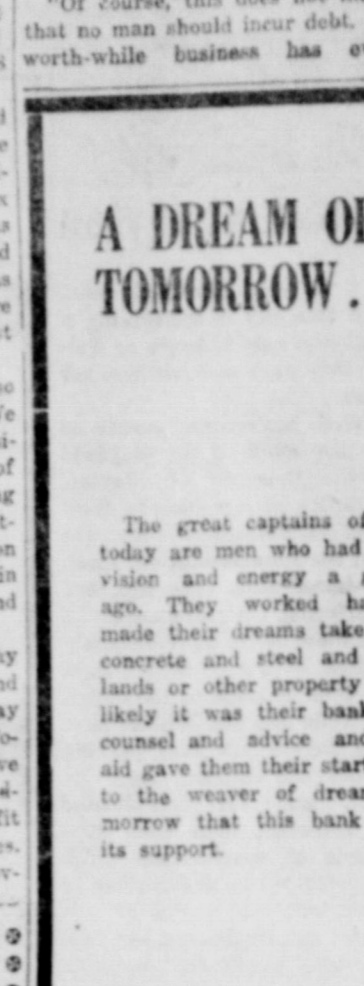

"Of course, this does not mean that no man should incur debt. No worth-while business has ever been built or carried on successfully without borrowing money at some time in its career.

"Few families would ever own homes if they were compelled to pay the full price in cash on the date of purchase. The automobile industry would still be struggling to replace the horse and buggy. Few radios would be in use. Development of many other necessities, as well as luxuries, would be not nearly so far advanced."

A DREAM OF TOMORROW . . .

The great captains of industry today are men who had merely a vision and energy a generation ago. They worked hard, they made their dreams take shape in concrete and steel and glass—in lands or other property. Most likely it was their banker whose counsel and advice and financial aid gave them their start. It is to the weaver of dreams of tomorrow that this bank dedicates its support.

THE FIRST NATIONAL BANK

FEDERAL LAND BANK LOANS
5 1/2 -- Per Cent -- 5 1/2

A long term loan with the option to pay at any interest rate, provided the payment to be made is out of one's own funds. And contrary to the general belief, THIS LOAN DOES NOT CARRY ANY LIABILITY ON YOUR FARM, OTHER THAN YOUR OWN LOAN.

This loan offers a saving of \$10.00 on the \$1,000.00 over any loan offered by any Loan company in Texas.

The Munday National Farm Loan Association

Munday, Texas

Old-Fashioned "Ironing Day" Has Been Eliminated

That back-breaking, time-consuming agony of old-fashioned "ironing day"—made more intense by a frantic desire to get through—is but an unhappy memory to progressive Home-managers who have profited by the purchase of a modern and efficient Electric Ironer.

Comfortably seated before a table-height ironer, merely guiding the pieces through smooth-running rollers, these wise housewives complete their ironing in but one-third the time and with but a fraction of the work and nervous strain required by old-fashioned methods. Offering these important time and labor-saving advantages, don't you think a modern Fedeco Ironer a wise investment—especially when the finished work is far superior?

Ask a salesman to arrange a demonstration for you in your own home. The purchase price is unusually low, and operating costs amount to but a few pennies a week! Call him today!

SEE "A TRIP THROUGH THE FORD PLANT"

THOUSANDS of people from all over the world visit the Ford plant every year. See what they see! Hear what they hear! You'll say this is an unusually entertaining and instructive picture.

SEE ACTUAL FORD CAR SAWED IN TWO

Women as well as men show great interest in this revelation of vital mechanical parts that are seldom seen. Shows valves, pistons, cylinders—fuel, cooling, ignition and lubrication systems—how the body, seats and upholstery are made—how the different layers of paint are put on. There's also a cut-away Ford truck chassis. Many things you have always wanted to know clearly explained.

ALSO SEE

- First complete showing of all the new Ford cars in this vicinity. Includes the smart new De Luxe Bodies—Ford trucks and delivery cars.
- The Triplex shatter-proof glass wind-shield that will not fly when broken.
- How Rustless Steel exterior parts are made, from the sheet metal to the ever-gleaming finished products.
- Why Ford steel-spoke wheels are so strong and sturdy—how the wheel is welded in one piece.
- How the Houdaille double-acting hydraulic shock absorbers cushion against hard shocks and why they are called double-acting.
- How the crankshaft and camshaft are made—from the original steel bar to final machining and polishing.
- And many other features which make this free show well worth your time.

Mrs. J. D. Kethley Hostess to As You Like It Club

Mrs. J. D. Kethley was hostess to the As You Like It club Thursday afternoon, when three tables were placed for bride. Following the games a salad course was served. Misses: R. D. Atkinson, J. C. Berden, M. F. Billingsley, E. Duval, Tom Haney, L. E. Loveless, F. L. Decker, Florence Williams, U. R. Houser, H. T. Maples, S. E. McStay, and Mrs. Avis Maples of Streetman, Texas.

Mrs. R. E. Davy is Hostess to Wednesday Club

Mrs. R. E. Davy was hostess on Wednesday afternoon to the Wednesday Bridge Club, at which time an enjoyable time was spent with four tables of bridge, in which Mrs. H. A. Pendleton won high score. A delicious ice punch was served during the games to the following members and guests: Misses: E. H. Bauman, T. G. Bengo, Joe Davy, U. R. Houser, H. H. Langford, C. L. Mayes, R. L. Ballenger, Adrian Macon, F. L. Decker, R. H. Neff, John Ed Jones, H. A. Pendleton, Wm. P. Farrington, Dorse Rogers and J. Dee McStay.

Miss Lorena Wilson, who has been teaching in Arizona, is at home for the summer months with her mother, Mrs. E. M. Wilson.

Mrs. L. E. Loveless and children and her mother, Mrs. F. M. Tomlin, went to Knox City on Tuesday to spend the day with their sister, and daughter Mrs. Jimmie Ashcroft.

Misses Mary Ellen Bateman and Elizabeth Mounce visited friends in Westover Sunday.

Miss Maurysse Smith, who has been attending Baylor University at Waco, came in the latter part of last week for the vacation season.

Mr. and Mrs. E. H. Bauman Entertain Highland Club

Mr. and Mrs. E. H. Bauman entertained the Highland club Thursday evening of last week. Vases of roses and sweet peas were used in the entertaining suite. High score was won by Mrs. E. W. McGlothlin, while next high was held by Mr. McGlothlin.

Guests were Messrs and Misses: M. F. Billingsley, T. G. Bengo, R. D. Atkinson, E. S. McCard, E. B. Davy, E. W. McGlothlin and W. H. Chapman.

Miss Frankie Redwine left the latter part of last week for Fort Worth, where she will visit with relatives for several days, and from there she will go to Denton to enter the Texas State Teachers' College for the summer term.

Mesdames John Spann and Erna Mae Lee went to Abilene on Tuesday to accompany their mother, Mrs. A. F. Huskinson, home.

J. C. Nelson, who has been attending a pharmaceutical school in Fort Worth, returned home some days ago, having completed the course.

Mrs. M. O. Burnett has returned from Mineral Wells, where she has been under treatment in a sanatorium for some time.

Miss Vivian Rogers, who has been attending Baylor College at Belton, Texas, returned home Saturday and was accompanied by Mr. and Mrs. Joe Rogers of Fort Worth, who returned home Sunday afternoon.

Miss Annie Matt Tate has returned from Spur, where she has been teaching during the past school year.

Miss Mary Langford, who has been teaching at Sweetwater during the past school year, has returned home to spend the vacation season with her parents, Mr. and Mrs. H. H. Langford.

Mr. Car Owner

Here is what Race Drivers with Life and Victory at Stake have decided about Tires

FOR twenty-one years the Indianapolis two and a half mile circular brick track, surrounded by a concrete wall to keep the cars from dashing off, has been the crucible where at white heat automobiles and tires have been tested. Thousands of men have risked, and some have sacrificed, their lives, and manufacturers have spent millions of dollars to the end of making better automobiles and better tires.

Louis Schneider and mechanic on Saturday won this race in a heavy 8 cylinder car. He made an average speed of 96.629 miles per hour—on the straightaways and in passing cars he touched 140 miles and better. He drove on a board track Firestone High Speed Tires with racing treads. He had no tire trouble.

He used Firestone Tires because Firestone experts and engineers have through twenty-one years taken this race as a challenge to tire making. From this race they have developed these vital improvements which have given to Firestone Tires the world leadership in safety, mileage and endurance.

1. **Cum-Dipping.** Tires had to be stronger and able to stand the heat of a hot red-brick track at high speed. Firestone met this by developing and perfecting the dipping of cords through a rubber solution to insulate each fiber of every cord to overcome heat and give the cord greater strength—and 58% greater flexibility. This is the Patented Gum-Dipping Process used in the making of every Firestone Tire.

2. **The Balloon Tire** was developed by Firestone to permit greater speed with comfort and safety by increasing road grip and absorbing shocks. It was made possible by the added strength and flexibility given by Cum-Dipping. In the 1925 race, some of the drivers tried the then new Firestone Balloons. The others stuck to high-pressure tires. Peter de Paolo on Firestone Balloons made a world's record. All the prize winners came in on Firestone Balloons.—Now the balloon tire is everywhere the standard.

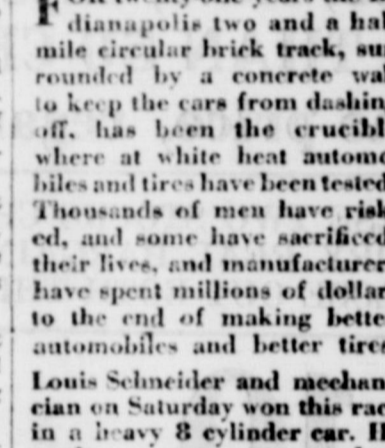

3. **Double Cord Breaker.** The higher-powered cars and the step-up in speed demanded still more tire toughness. At one hundred miles an hour, the circumference of a tire increases by more than 10%, and this, added to the centrifugal force, tends to throw off the tire tread. Firestone met this by developing the Patented Double Cord Breaker which gives a 56% stronger bond between the tread and the tire body and also gives a 26% greater protection against punctures and blowouts.

These are some of the great lessons that Firestone has learned on this racing track. And so the men whose lives and fortunes depend on knowing tires always buy Firestone Patented Gum-Dipped Double Cord Breaker High-Speed Tires.

There were 72 entries. Of these, 40 survived the elimination trials—and every one of them was on Firestone Tires. And every tire was bought and paid for.

We give you the benefit of all the lessons Firestone has learned from these races. You can get from us all the strength and safety in tires that the racing drivers buy.

Take advantage of our liberal trade-in plan. Avoid the risk of blowout, accident or delay. Prices on these World's Record Tires are the lowest in history—Come in Today.

The Gold Standard of Tire Values

World's Records

—Firestone Cum-Dipped Tires hold all world's records on road and track for safety, mileage, speed and endurance.

—For twelve consecutive years they have won the 500-mile Indianapolis Endurance Race.

—were on the winning car in the Pike's Peak Race where a slip meant death.

—were on the C.M.C. Truck, carrying a two-ton load, that hung up the constant endurance record.

—were on the Studbaker car which on a board track in Atlantic City in 1928 went 30,000 miles in 26, 326 minutes.

—on 125 buses of the Washington Electric & Railway Company, ran 3,674,266 bus miles during 1930 with only 13 tire delays.

—on 150 trucks of the Safeway Stores, Inc., ran 1,500,000 miles in one year without one single hour of delay on the road.

WANT ADS

FOR TRADE OR SALE—500 pound capacity, Leonard, cleanable refrigerator. What have you? See Mrs. Jim Lewis, at home.

PRICE TOMATO PLANTS REDUCED—New Stone tomato plants, any size from 3 to 12 inches high, 20 cents per hundred. This is a large smooth red tomato, good bearer.—J. P. Kennedy, Phone 119.

NOTES AND COMMENT

Most vacations are planned, not taken.

Let's be thankful, the experts say that times are getting better.

Our idea of what is not a joy ride was the balloon trip of Prof. Picard.

Advertising is something that develops with faith; you can't tell anything about it until you try it.

Correct this sentence: "That's all right, old man; I don't need the money you owe me; take your time."

Well, as far as we can see, despite the optimistic speeches, the present period of depression is with us yet.

Big appetites are what put the "ent" in death, and explains the saying that men dig their graves with their teeth.

Take it from the agricultural scientists, if you will, when they tell you that a farming section that has plenty of cattle is a well-to-do agricultural section.

The city of Seymour is reducing water rates for the summer to encourage the growing of better lawns and shrubbery. A like reduction has been ordered in Cross Plains.
