Odd Bits Salvaged

"Long after communism and socialism have become museum pieces, our flag will be waving."

So said Dr. James H. Jauncey, scientist, minister and psychologist, who spoke on "Communism on the Run" at Friday morning's meeting of the Panhandle Press Association in Amarillo.

Dr. Jauncey, who is minister of the First Christian Church in El Paso, said he was speaking as a scientist and using only facts in describing great advances of human freedoms throughout the world. "In the next decade," he said, "the last vestiges of colonialism will disappear. By and large these people are coming on the side of freedom."

He said that in the period of 1945-50 it seemed that the prophecies of Karl Marx would be fulfilled and communism might become the major power by 1960.

"But the economic security offered by communism has not attracted people," he continued. The best example of this is East Germany. More than 3 1/2 million people who had economic security of communism had slipped into West Germany. This has bewildered the Communists."

He pointed out that the Communists have had to make great concessions to human freedom, even in Russia. "They now allow tourists from other countries and magazines and radio broadcasts from throughout the world. People are even allowed to criticize the government when drunk!"

He said it looks like communism and socialism are dying powers. "In fact," he said, "communism is the most colossal failure in history. Not one nation has come under communism on its own free will."

Dr. Jauncey said Americans have lived in freedom so long that they do not realize its importance.

"Our country was built on the supposition that an American man can build his life without help from the government. Even though economic security is not promised in this country, we have the best living standards and economic security to be found."

"But we are in danger of giving up freedom for a mess of pottage. The emergency of the depression, followed by the emergency of World War II, called for special government powers. And these powers have lingered."

"There is just one place to place the blame and that is on the people. Everyone wants the government out of his hair, but wants to keep the handouts. We must be able to make sacrifices to have freedom."

Jauncey pointed out that America still remains the strongest nation in the world. "Mr. Khrushchev knows that, even though he should strike the first blow, we would still be able to blast Russia off the face of the earth."

He said the latest Communist tactic is to win over the United States by destroying its morale. "I had to work with Communists during the war and I know how they think. After traveling throughout this country, I can say that America has fewer Communists than any country in the world."

Dr. Jauncey is a native of Australia. He was reared in the "brush country," the oldest of 18 children and has "pulled himself up by his bootstraps," having attained some six or eight degrees.

Our trip to Amarillo revealed the area just about as dry as we were here and those who were equipped to irrigate from the natural lakes will have to seek other means unless it rains. Many of those lakes in the Amarillo, Panhandle and White Deer area are dry—the others just mere puddles. And they didn't get as much rain there last week as we did here.

HIGHWAY SAFETY SENSE

A deluge of ghoulish guessing and bloodthirsty reporting has obscured the very real progress that has been made in automotive highway safety.

From a high of 11.5 deaths per 100 million vehicle miles in 1945, the rate was slashed to 5.3 in 1960. In 1961, it was reduced even more, with a record low of 5.1 posted in the first 11 months. This outstanding progress was made during the decade and a half since World War II when the number of cars, trucks and buses on America's streets and highways soared from a little over 31 million to more than 74 million.

With the automotive safety record constantly improving, it's time to stop screaming death and destruction. It's time to call a halt to creating the impression that the only safe place for the family car is home in the garage.

There's no minimizing the importance of highway safety—and nobody wants to—but sensational reports of widespread carnage, instead of making drivers safer and more competent, can make them more tense, more nervous and more accident-prone.

What makes better drivers is not horror but help; not scares but suggestions; not terror but teaching. Safe driving is a skill which, once mastered and remembered, provides great pleasure. America's automotive safety record can be improved still more, without horror and hysteria, by the conscientious application of the principles of safe driving.

LET THE CONSTITUTION PREVAIL

Certain legislative proposals should be opposed on broad questions of principle.

Two such proposals are now current. One would give the President the authority to raise or lower the individual income tax, in order to deal with possible inflationary or deflationary developments. The other would give him carte blanche to launch public works projects costing as much as two billion if he thinks it necessary to help prevent a recession or depression.

There is no sound argument, under our system, vested in Congress. It is no reflection on Mr. Kennedy or any other President to say that one man's judgement is much more likely to falter than the collective judgements of hundreds of members of Congress.

It is argued that giving such vast and unprecedented powers to the President would make possible instantaneous action. But Congress can act in such matters, if action is needed, with only brief delay. And if Congress surrenders the power of the purse to the Executive Branch, the

systems of checks and balances established by the Constitution will be weakened to the point of impotence.

"STRAIGHT TALK"

Following are a few bull's-eye shots by Tom Anderson, publisher of the Mississippi Farmer:

"The good old days: Back when the only thing your wife owed was a cup of sugar, to the next door neighbor.

"Parity: A government program to make every farmer as poor as his neighbor; return to serfdom with the government as the master.

"Capital punishment: The government taxes you get capital to go into competition with you and then taxes the profits on your business in order to pay the losses on . . . government businesses.

"Dictionary: The only place where success comes ahead of work.

"Perpetual: Duration of any government handout program, once begun.

"Mother hen: A symbol of the federal government—formerly known as the eagle."

HELPER, UTAH, JOURNAL: "The conflict between Communism and freedom is the problem of our time. It over shadows all other problems, this conflict mirror our age, its toils, its tension, its troubles, and its tasks, on the outcome of this conflict depends the future of Mankind."

It is a question today, whether sufficient resistance can be maintained by private enterprise and opponents of socialism to prevent it from engulfing our country in the coming generation as Khrushchev predicts.

A NEWBORN'S HERITAGE

"The first child born in 1961 will owe \$1,603," says the Chamber of Commerce of the United States. "So will every other child born during the year. That figure is the per capita share of the public debt. Let's not make it bigger.

"The dollar, 100 cents purchasing power at the beginning of this century, has 28 cents today (the two bit dollar is almost at hand). If inflation continues at the rate since the Korean War, the dollar will rot to 16.2 cents at the end of this century.

"The federal debt and guaranteed obligations of the federal government, \$295 billion, surpass by \$42 billion all the debts of all the other countries in the world." And Congress is faced with proposals to increase the debt and annual federal spending by billions.

Clipping The Bible

Once a gentleman took his Bible around to his minister and said: "That is your Bible." "Why do you call it my Bible?" said the minister. "Well," replied the gentleman, "I have been setting under your preaching for five years; and when you said that a thing in the Bible was not authentic, I CUT IT OUT." He had about a third of the Bible cut out. The preacher wanted him to leave the Bible with him; he did not want the rest of the congregation to see it. But the man said: "Oh, no! I have the covers left, and I will hold on to them." That is the trouble with many "Bible clippers" today. They go on reading the Bible with a pair of good "clippers," clipping out any part of the scripture that does not fit in with their theory of salvation. Now if I have a right to cut out REJECT a certain portion of the scripture, I do not know why you should not have the same right to cut out REJECT another part, and so on. We would have a queer kind of Bible if everybody cut out that which does not suit him. Every murderer would cut out everything about murder; every liar would cut out everything about lying; every infidel would cut out everything believing. A WARNING: "And if any man shall take away from the words of the book this prophecy, God shall take away his part out of the book of life, and out of the holy city, and from the things which are written in this book." (Rev. 22:19.)

Weekly Health LETTER

Issued by the State Health Department

AUSTIN — Tularemia — alias "rabbit fever"—increased in Texas last year compared to 1960. The actual number of cases, 13 during 1961 as against nine for 1960, is not startling, but is of concern to victims and to people engaged in communicable disease control.

The figures are tallied each week by the Texas State Department of Health from reports gathered throughout the State. In all probability there were actually more cases than were reported.

Tularemia is caused by an oval-shaped organism called Pasteurella tularensis in dubious honor of Tulare County, California, where it was first discovered as an infection of wild rabbits and squirrels.

The disease is transmitted to humans by the bite of an infected fly or tick, or when the germ is accidentally introduced into the body during the process of dressing wild game. It can also be acquired by eating insufficiently cooked meat from an infected game bird or animal. The death rate of untreated cases is usually about five percent.

The infection has been and is still known all over Texas, but is reported most often from the eastern section of the State. Outdoorsmen are more susceptible than the general population because of a greater chance for exposure.

According to the best authorities, on a nationwide basis 90 percent of human cases are acquired from rabbits, chiefly wild cottontails. Other susceptible native animals are coyotes, opossums, skunks, deer and some species of snakes.

As for domestic animals, natural infections have been found in cats, dogs, hogs, and sheep. Among susceptible wild birds are quail, chicken hawks, and horned owls—all native to Texas.

There is no truth in the belief that rodents are tularemia-free in winter, health authorities advise. Cases occur every month of the year, but mostly in April, May and June, the months of greatest tick activity.

The danger of contracting tularemia is another reason for not drinking raw creek or lake water. The organism can live in water where the disease prevails in wildlife.

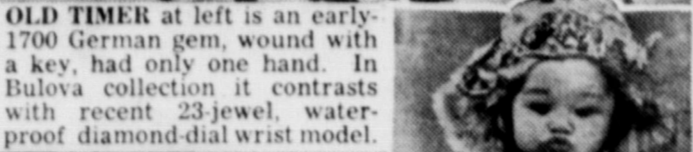

The use of rubber gloves when handling wild game, refraining from drinking raw water, thorough cooking of all game, and prompt disinfection of scratches and insect bites will help prevent tularemia infection.

Fishermen Warned To Buy Licenses

Spring weather has kindled the urge to fish, and fishermen are reminded that a fishing license is required in most instances, ac-

ording to J. B. Phillips, coordinator of law enforcement for the Game and Fish Commission. This applies to both resident and non-resident fishermen, fishing in fresh water or salt water, except for persons fishing within their own county with an ordin-

ary pole and line, or persons under 17 or over 65. Persons fishing within their own county with any type of winding device are required to buy licenses, also. The Texas license fee, at \$2.15, offers an inducement to non-residents, because it is the only fishing license in any state available to non-residents at the same price as to residents. All other states charge additional fees for non-residents.

Existing commercial bay-bait shrimp boat licenses will expire March 1, and a new license covering the boat and trawl must be obtained by that time. New licenses will be effective March 1, and any person commercially taking shrimp for bait in bays must have the license, and it must be bought before the expiration date, March 1. This license costs \$30.00 and is good for one year. Last year, more than 2,500 commercial bay-bait boat licenses were sold by the Game and Fish Commission.

Miss Lennie West visited her brother, W. D. West, and family in Seymour last Sunday.

Mrs. Lynn Erickson of Abilene visited her mother, Mrs. R. C. Partridge, and other relatives over the week end.

Veterans Make Washington Trip

Two bus loads of veterans and auxiliary members from Texas, including Mr. and Mrs. J. E. Reeves of Munday, left Ft. Worth and Dallas on Tuesday, April 3, on a trip to Washington in the interest of veterans' legislation. They arrived in Washington at 10:30 p.m. April 4.

The veterans gave a breakfast for senators and congressmen from Texas at 9 a.m. Thursday in the Congressional Hotel. Each veteran had their respective congressman as guests. Mr. and Mrs. Reeves, only delegates from the 13th district, had Hon. Graham Purcell as their guest. Mr. Purcell extended them every courtesy while in Washington, including lunch at the House of Representatives restaurant, at which Mrs. Purcell and Norman Duncan, Mr. Purcell's administrative assistant, were host and hostess. Mr. Purcell was unable to attend, due to legislative duties.

Mr. Purcell granted Mr. Reeves a conference at 9 a.m. Friday, and assured him that he

Basketball Girls Honor Their Coach

The 8th grade girl's basketball team surprised their coach, O. L. Moore, when they gathered at his home at 7:30 last Tuesday night for a party and presented him and Mrs. Moore with an electric percolator.

Refreshments were served by the girls. Members of the team are Kay Ford, Frieda Pape, Brenda Conwell, Roseann Nelson, Sharon Lain, Judy Lemley, Lila Ann Rhoads, Shirley Richards, Mary Ann Carden, Mary Penick, Gail Wood, Peggy Parker, Stacia Collins and one seventh grader, Mickey King.

VETERANS TO MEET

All Barracks and Auxiliary members of Veterans of World War I are requested to meet in Archer City at 7 p.m. Friday, April 13, at the Lion's Club hall.

Mr. and Mrs. H. F. Jungman were in Dallas over the week end, attending the sports show.

Mrs. Harold Partridge, Mrs. D. G. Griffith, Mrs. Claudia Rogers and Mrs. Jim Cooke were visitors in Wichita Falls last Thursday.

Mrs. Ben Yarbrough, Mrs. John Phillips, Mrs. Nolan Phillips and Mrs. Shelton Phillips were visitors in Wichita Falls last Friday.

An oversupply of rats and mice around the farmstead during the fall months is not necessarily undesirable. It simply means the rodents have come in from the fields as the crops were harvested. What's good about this? This concentration of rodents offers the farmer the best opportunity to control them he has had all year. He can concentrate his control activities in a smaller area, thus getting better coverage.

Former Goree Postmaster, Rural Carrier Retires Near 40 Years Service

One of Goree's best known citizens, veteran postmaster and rural carrier announced his retirement after 39 1/2 years of service at a meeting of the Brazos Valley Postal Employees Association held in Goree Memorial Auditorium Monday night, April 9th with acting postmaster, Jerry Koenig in charge of the meeting.

Miss Koenig presented Mr. Hampton a plaque of honorary recognition from the post office department. Honorary Recognition is accorded to S. G. Hampton for devotion to duty in the course of an honorable career in the United States Postal Service. This citation tendered upon the occasion of retirement from commendation from the Postmaster General and a cordial expression of the esteem from co-workers in the service.

M. E. Trice, postmaster at Rule and president of the association was master of ceremonies. Veteran postal employees paid tribute to Mr. Hampton for his untiring service to the postal department. Postmaster E. B. Britton of Stamford paid special tribute to him as a man and citizen even from boyhood days.

A gift of luggage was presented from the postal association.

Other gifts were presented from his office force and newspaper people, whom he has served for many years.

Sam G. Hampton entered the service as postmaster in Goree October 1, 1922, transferred from postmaster to rural carrier Oct. 14, 1940, transferred to clerk in the Henrietta office, Feb. 17th, 1962, retiring March 31, 1962.

He has never had a serious accident on the route, but has killed a few chickens, hit one dog, been stuck in the mud several times and had numerous types of car trouble.

Mr. Hampton has used several makes of cars including four Jeeps and sometimes made part of the route on foot. He says he well remembers his first trip as a substitute carrier in 1916 when he served the route in a two wheel cart drawn by a mule.

Several people on his route say they could set their clocks by his schedule at their boxes each day. Some of the other things he remembers and appreciated from the patrons are the fresh vegetables, melons, country sausage and Christmas candies and cakes, even home made jellies which he has received.

He is a charter member of the Brazos Valley Postal Employees Association and served as president of the organization. He also attended many state postmasters and rural carriers conventions.

Knox Prairie Philosopher Says Government Economy Some Place Else Is What Most People Want

Editor's note: The Knox Prairie Philosopher on his Johnson grass farm on Miller Creek discusses economy, the United Nations, and a few other things this week.

J. A.

Dear editor: One of the advantages of having a farm problem is the satisfaction you get out of realizing you aren't by yourself, practically every other form of enterprise has its problems too.

Take the United Nations. According to an article I read in a newspaper last night between westerners, the United Nations is financially embarrassed; well it's broke. Hasn't got enough money to finance its activities and is doing the only thing any man or nation in its right mind would do, namely, ask Washington for a loan.

Actually, this shouldn't be embarrassing. It happens all the time. I know a lot of people with fine, beautiful ideas who can't pay their bills.

Now this shouldn't be interpreted as an attack on the United Nations, that outfit has enough troubles worrying about countries all over the globe without being bothered by this Johnson grass farm, and I might point out I know some people

also who can pay their bills whose ideas ain't so fine and beautiful, not according to my notion.

One of the complaints over the financial plight of the United Nations is that some nations vote to send help to some country in trouble, then refuse to pay their share of the assessment. As long as the U.N. is run by people, it might as well expect this sort of thing. Two thirds of the people who clamor for economy in Washington will vote for a Federally-financed project for their own neck of the woods, and I know some big shots from cities whose idea of economy is to make one trip to Washington to appear before some Congressional committee asking for money for their city on one hand and economy for the rest of the country on the other.

What most of us want is one-footed economy. When economy shows up on the other foot too, then's when we holler.

Yours faithfully,
J. A.

Soil Test For Phosphorus Now More Accurate

An improved procedure for determining soil phosphorus is now being used by the soil testing laboratories operated in the state by the Texas Agricultural Extension Service. Extension Soil Chemist W. F. Bennett said the change will give a better indication of the phosphorus status of the soil, particularly the heavy textured kinds.

The new procedure is the result of several years of research work by Texas Agricultural Experiment Station personnel, Bennett said.

Many soils will show higher phosphorus values with the new method. The change results in the removal of certain types of soil phosphorus not extracted by the previously used method, the chemist added.

The higher phosphorus values will tend to occur primarily in the heavy textured soils of the Blacklands, the Coast Prairie, Rio Grande Plain and the Rolling and High Plains. The Houston black clay soils, for example, which have been properly managed and fertilized with phosphorus during the past several years may show levels up to 40 to 60 pounds of phosphorus per acre compared with 10-15 pounds under the previous method of determination. The same will be true of the Pullman clay loams of the High Plains and similar heavy soils.

The use of the new procedure in the soil testing laboratories will permit us to more accurately predict the need for phosphorus fertilizer, Bennett concluded.
