those interested, and the regular tourney play open Saturday. Players may get in their games any time during the two days.

"We have our goal set for 40 teams in the tournament," President Smith said, "and with the interest manifested this far, this is very likely. With local players entering this week, the list should swell to near the goal."

MRS. JAMES AUSTIN CAUGHNAN  
..formerly Amanda Peggram

### Local's Grandson Is Married Recently In Lubbock Church

Miss Amanda Peggram and James Austin Caughnan were united in marriage at 10:00 A. M. on May 1st, 1976 in the Sanctuary of Oakwood United Methodist Church in Lubbock. The Rev. Lyman P. Wood, pastor, who married Miss Peggram's parents 22 years ago, officiated the double-ring ceremony.

Parents of the couple are Mr. and Mrs. Robert A. Peggram of 4705 45th Street, and Mr. and Mrs. M. B. Caughnan of 4003 46th Street, both in Lubbock. The church was decorated with a large cross back of the altar, entwined with English Ivy and white lilies of the valley. In front of it was the white satin-covered altar with a white Bible. On either side of the altar were candelabrum of brass entwined with English Ivy and holding cathedral tapers of blue. The bridal aisles were marked by white satin bows. On one side of the lectern on a small table was a white milk glass container, given the groom's parents by Mrs. J. A. Caughnan of Munday, grandmother of the groom. In the container were blue and white carnations, daisies, white stock and gladiolas with lemon leaves. On the opposite side of the table stood a large white wedding candle used by the groom's sister 2 years ago in her wedding. The wedding took place before the altar using the white Bible. Mrs. Omega Hayhurst played traditional wedding music and accompanied Miss Linda Jackson, Tech senior, as she sang "If" and the "Lord's Prayer" as the couple knelt on the white prayer peau.

The bride, given in marriage by her father, was radiant in a formal gown of white sheerganza tulle with a fitted bodice and a square neckline softly edged in cantilace at neck and sleeves. Her skirt of ruffled tulle was banded by cantilace inserts down the full length of it. Her veil of sheer illusion was held in place by a headpiece of pearl roses and leaves. The illusion capelet falling over her shoulders to fingertips was edged in cantilace and flowing down the entire

**TEXAS TALK**  
By Tommie Harper

It takes a lot of soybeans to build a Datsun ... American soybeans. Although Russia seems to get all the publicity, the number one customer for the American export market is, by far, Japan. And not just for soybeans. Last year the Land of the Rising Sun was number one in purchases of feed grains, cotton, tobacco and livestock products as well as soybeans. Just how important is number one? For each of the past three years purchases have ranged from three to three-and-a-half billion dollars. Or, in terms of acreage, they bought the production of 14 million American acres, that's about the same as all the crop land in the three West Coast states. And, considering current buying projections, the best consumer is going to become even better ... good news for the world's best producer ... the American farmer.

## Sister Philippa Marie Feted As A Fifty Year Franciscan

On Saturday, May 29, 1976, at 11 a. m., in order to celebrate the 50th anniversary of Sister Philippa Marie Albus as a Franciscan Sister, a Mass was celebrated in Saint Joseph's Church in Rhineland by Father Malcolm Neyland of Spur and Father Bartholomew Landwermeyer of Rhineland. Father Neyland delivered an appropriate homily during the Mass. Sister's great-nephews, Steven, Kevin and Bryan Kuehler were acolytes. A. J. Kuehler was the lector. Her great nieces, Leona Grisham, Ann Prestidge and Macey Grisham brought the offerings for the Mass to the altar.

Father Ron Krisman from Christ the King in Lubbock played the organ and conducted the Saint Joseph's choir and the congregation in the singing of parts of the Mass. He also assisted Mary Denise Zeissel and Danny Brown in playing of their trumpets, all of which added great solemnity to the Mass.

Sister Philippa wore a beautiful golden orchid corsage.

More than one hundred relatives from the Texas areas, Waco, Austin, Fort Worth, Pep, Lubbock, Amarillo, Slaton, Hereford, Seymour, Rhineland and Munday, as well as from Paris, Ark., Wichita, Kans., and Chicago, Ill. came to honor Sister on this special occasion.

After the Mass a catered Dutch meal from Underwoods in Wichita Falls, arranged by Sister's sister, Mrs. Leona Michels, who also furnished the beautiful

SISTER PHILIPPA ALBUS

gold and white floral arrangement on the altar, and the planning committee, was served in the Knights of Columbus Hall in Rhineland. The decorations of the hall were done by the Sister's nieces, Dayle Kuehler, Janice Albus and Janice Vacek. This meal was served in connection with a family reunion, the first get-together of this kind since 1968.

Punch and cake, made by nieces, Joyce Prestidge, Suzanne Michels and Kathleen Grisham were served from 2 to 5 p. m. to friends who came to visit.

During the course of the afternoon, guests left for their homes agreeing that they had spent an enjoyable day together.

### Bill's Blabbin

By Bill Bowley

We are getting too old we guess, or else we try to live it up when we have our little ones with us. Joey, Diane and their three little ones from Fort Worth drove in Tuesday night for a few days visit.

Blab

Then Wednesday night, Butch, Polly and Sam drove in to visit until Saturday with us. We know we have the cutest great-grandchildren in this world, of course our grandsons and their mates are great too, but our favorites are the little ones.

Blab

We expect we'd get a bit of argument from Callie Ann because she has her one and only grandchild with her a few days this week. Grudgingly we'll have to admit she is a little doll and she is sure the apple of Don and Callie Ann.

Blab

But then when we get to thinking of grandparents and great-grandparents we'll just have to agree with them that "our little ones" are all the most adorable "critters" in this world.

Blab

Anyway we were worn to a nubbin by Saturday, and to date have not got rested up, but we will, and be just as ready to see them again as we were before. You do know what we mean don't you?

## EARLY SEASON COTTON BOLL WEEVIL CONTROL

It is very possible that two early season cotton boll weevil control applications applied to all Knox County cotton would be very profitable to all producers.

Chemicals that may be used are Azinphosmethyl (Guthion (R))3 (EC or ULV), Carbaryl (Sevin (R))5, Malathion (ULV only)8, or Methyl parathion2. Apply at the first sign of 1/3-grown square stage to prevent egg laying. Where fields are reinfested a second application should be made 5 to 7 days after the first. These insecticides also control thrips and cotton fleahoppers.

The cotton boll weevil started moving out of winter cover areas very slowly the first of May and heavy numbers came out May 11 and have been numerous since, as has been shown by Leggett traps checked by Frank Steinbach north east of Rhineland and another checked by me, located 5 miles north west of Munday and 8 miles north east of Knox City. Frank has removed from 56 to 236 of these pests weekly from his trap for five weeks straight since May 11.

When a high percent of the cotton boll weevil can be killed before they have laid eggs in 1/3 grown or larger squares, cotton has a much greater chance of setting and maturing a profitable crop before the over all population can build back heavy enough to do great economic damage.

Remember when the very few first 1/3 grown squares develop in the field it is time to apply the first control applications. Plan to apply not more than two applications and stop the early season applications.

## FOUNDATION SEED WHEAT OR OATS

Producers interested in obtaining foundation seed wheat or oats should consider placing orders soon.

Many seed dealers order these for customers, or I can turn in orders if you do not have a dealer to work out your needs.

The Texas Foundation Seed Department is showing wheat varieties Caddo, Caprock, Sturdy, Tascosa, Centurk, TAM W-101 and TAM W-103.

Oat varieties listed that may interest growers in this area are Norwin, TAM 0-301 and TAM 0-312.

Foundation seed from the more popular varieties are often booked out early.

## AG LEADER SEES OPPORTUNITIES FOR EXTENSION SERVICE

Many opportunities lie ahead for those of you who are willing to work, a widely known agricultural leader told members of the Texas Agricultural Extension Service at the opening assembly of the State Extension

Conference June 8 at Texas A&M University. William A. Porter of Terrell, on whose father's farm the Extension concept of teaching was born in 1903, emphasized that Extension educational programs have just scratched the surface. He advised Extension workers to be on their toes, to be leaders and to stay close to agriculture--to farming and ranching, 4-H and youth activities, and family living.

## MEAT CONSUMPTION UP

Consumption of red meats in the U. S. is maintaining a relatively high level and may increase even more if the slaughter level keeps up at the present rate. The average American consumed 181 pounds of red meat last year but this was 39 pounds less than the per capita meat consumption in Australia. However, a livestock marketing specialist for the Texas Agricultural Extension Service contends that livestock production restrictions need not be based on consumption levels. Americans will consume all the red meat produced in the U. S. The question is, at what price will they consume it?

# What you don't know about the cost of natural gas can hurt us all.

You know you're paying a lot more for natural gas, but you may not know why. The reason is basically simple:

The average price Lone Star has had to pay its 500 independent suppliers for gas we supply you has risen (about \$166,000,000 more in 1975 than in 1974\*). So we have to charge more.

If Lone Star were not able to recover these increased costs, we could run into some major problems.

First, we wouldn't be able to buy the gas this area needs. Short supplies of natural gas could handcuff industry.

When industry runs short, jobs begin to disappear. Production falls off. The tax base our cities, counties and school districts depend on begins to shrink.

That's why you need to understand how our industry works, why gas bills have to go up, and what Lone Star is doing to keep the increases as small as humanly possible.

### Some important questions.

Here are some important questions and answers about our service.

1. *How do our gas bills compare to other cities?* Our customers pay less for natural gas than most cities, including other cities in Texas.\*\* We feel we're doing a pretty good job of selling natural gas at the most reasonable price possible.

2. *Does gas cost adjustment guarantee profits for Lone Star?* Not at all. In fact, the company has been forced to initially absorb 15 per cent of higher adjustments. This is a serious loss that must eventually be recovered if our cities are to have adequate gas supplies in the future, and if Lone Star is to have a fair return, to which it is entitled by law.

3. *Who checks on Lone Star Gas?* The Texas Railroad Commission, after a thorough investigation, sets our base (or wholesale) cost of gas. They set the rate of return on the pipeline system that brings the gas from the well to your city. They also monitor changes in the monthly gas costs of Lone Star, and this monthly gas cost information is filed with each city we serve in Texas.

4. *How high will gas bills go?* Today, your bill is based on the average cost of gas to Lone Star of a little over one dollar per thousand cubic feet. Gas bills will continue to rise in the years ahead, but probably at a much slower rate than recently. It appears that the field price of gas is leveling out so that increases will be much more gradual.

### It's not all bad news.

Basically, all of those answers say that gas costs more than it used to, and it will continue to cost more.

But there is good news: As long as Lone Star is able to recover its costs, and as long as there is sufficient incentive for producers to drill for new gas supplies, we'll have the gas we need to keep this area moving. All we ask is your understanding, and your cooperation, to make sure that happens.

*If you have a question you'd like answered in an advertisement, write Consumer Information, Lone Star Gas, 301 S. Harwood, Dallas, Texas 75201.*

\*1975 Annual Report filed with the Securities & Exchange Commission.

\*\*U.S. Department of Labor Statistics and recent surveys conducted of major Texas cities by Lone Star Gas Company.
