Stevenson Visits Four Great Sections of Texas This Week

Austin.—Four great sections of Texas were visited in four days this week by Coke Stevenson in his campaign for Lieutenant-Governor. Beginning the week at Marquis in East Texas, he visited Taylor the same day; Brenham and Cuero Monday; Stamford Tuesday and Brady Wednesday. At Stamford he rode in the parade staged in connection with the Cowboy Review. In several addresses Stevenson said that as presiding officer of the Senate, the Lieutenant-Governor is somewhat like a judge and ought to keep himself in a frame of mind to give fair consideration to all matters of legislation proposed for every section of the State. As a member of the House Stevenson wrote the law creating the office of State Auditor. In its original form his bill provided for the appointment of the Auditor by the Legislature. He also wrote the laws modernizing the Comptroller's office and the State Treasurer's office, and was the author of the measure under which one-fourth of the gasoline tax is now this place and J. C. Levell were united in marriage in Jacksboro Sunday night. Mrs. Levell is a daughter of Mr. and Mrs. R. C. Huntley of this place. They will make their home in K. M. A. where Mr. Levell has a position. They visited a while Monday in the Huntley home. The largest crowd that has been in Thalia in a long time, attended the candidate speaking here Saturday night. The Methodist ladies made \$46.00 from the sale of a quilt and ice cream, cake and lemonade. Mr. and Mrs. Raymond Britt of North Hollywood, Calif., and Mr. and Mrs. H. R. Randolph of Vernon visited Lee Sims and family here Tuesday.

being used to pay off county bonds issued for building new highways. He was joint author of the present State Budget Law, also author of the bill authorizing farm market roads, and several bills to suppress crime and improve methods in criminal trial. A bill offered by him in the Legislature provided for a Board of three members, to be chosen from the State Board of Education to handle sales and leases of public school lands. This bill fixed the school royalties to be paid the State at the customary one-eighth of sulphur. It allowed the Board to require higher royalties at its discretion. In his campaign Stevenson frankly states his opposition to a proposal for a unicameral legislature which, he declares, would abolish the House of Representatives and transform the nature of the state government. Blessed is the man that endureth temptation, for when he hath been approved, he shall receive the crown of life which the Lord promised to them that love Him.—James 1:12.

Remember when ice cream cones first made their appearance? When a customer for a cone arrived the proprietor of the cone shop did not pick one ready baked from a box. He stirred up a pitcher of batter not unlike waffle batter, poured it on an iron not unlike a waffle iron, baked it a couple of minutes, rolled the sheet of crisp waffle up into a cone, filled it with ice cream and sent his customer rejoicing on his way. Few vendors baked them up ahead of those days but waited until a customer appeared. Think of such procedure today when a dozen or twenty cones are sold in the space of five minutes. The world moves faster today even in the ice cream cone business that it did when all cones were made to measure and to order.

According to Charles F. Kettering of General Motors—when you were born everybody in the world was older than you. When you were one year old there were two million persons in the United States who were younger than you. When you reach the age of 25, half the people in the world are younger than you. When you are 50 you are older than nine-tenths of your fellow human beings.

Six children have been kidnapped in this country since the Lindbergh kidnaping. In the four cases in which the ransom money was paid the kidnapers were caught. In the two cases in which no ransom money was paid the kidnapers were not caught. In the two latter instances the kidnapers evidently became afraid to go on and complete the effort.

George H. Davis, president of the United States Chamber of Commerce, in an address before a large group of business men recently said: The next year will be a critical time for business. Either we will sell the people the idea that our traditionally economic system is the correct one or we will have regimentation.

The most disillusioned person these days is one who thinks he can pick up and leave anytime, seeking new fields and stop into steady employment. If you can't find a job where you are, after looking for it several months, it is foolish to think one can be picked up at a moment's notice somewhere else.

It is reported by English newspapers that Dr. Sigmund Freud, 82-year-old father of psychoanalysis, escaped to England from Austria only after friends paid a ransom to the German government of \$50,000.

Because its mints are in the hands of the Japanese, the United States mint at San Francisco was called upon recently to coin a considerable quantity of Chinese money for the Chinese government.

Immune Serum May Prevent Infantile Paralysis Attack

Austin. — "Infantile paralysis can be expected to occur more frequently during the next three or four months," predicts Dr. Geo. W. Cox, State Health Officer. "This disease is always more frequent during the hot months."

"The germ responsible for infantile paralysis is so small that it escapes detection even with the most powerful microscopes. The first symptoms are usually vomiting, headache, fever, stiffness of the neck, pain in the legs, irritability and drowsiness. Complete recovery may follow such an illness. In the more severe cases, the germ penetrates the nervous system, resulting in paralysis of nerves controlling one or more groups of muscles. Some remarkable recoveries have been noted. "Flies or other insects have not been demonstrated to play a part in the spread of this disease. Infection spreads from person to person with the droplets transmitted by coughing and sneezing. Children and grown people that are healthy may be carriers of the germs. When present in epidemic form, about one child in each hundred is apt to suffer an attack. "Early recognition and diagnosis are essential. The use of immune serum may be a factor in preventing paralysis. A period of complete rest is essential for muscles that are affected. If parents note any symptoms of illness in their children, the family doctor should be consulted at once."

NOBODY'S BUSINESS BY JULIAN CAPERS JR.

Austin.—W. Lee O'Daniel, the Fort Worth flour broker, and his hill-billy band, still held the center of the political stage in Texas this week continuing his trek through South Texas, and drawing extraordinary large crowds. O'Daniel, demonstrating his sound knowledge of advertising methods, has worked out a routine that gets people out to hear him, and he shrewdly lets it ride, making virtually no changes in his speech or his program. He has borrowed from the technique of the old-time tent evangelist. He works his crowd up to a high emotional pitch by tricks that are familiar to students of psychology, and even his severest critics admit that he is a master showman. His stunt of circulating his children through the audience with miniature flour barrels, in which his listeners are asked to throw in nickels and dimes to "help finance his campaign," is clever use of the old principle that if you sell a man a little interest in a movement, he becomes a convert. Also, his clever sarcasm, when he creates a symbolical figure of the old age pension inspector, and the professional politician, and then literally demolishes them before his audience's eyes, while the crowd howls, is reminiscent of the evangelist casting the symbolical figure of the devil back into the sulphurous pit. And when O'Daniel calls for a show of hands on who is going to vote for him, it reminds the political analyst of Aimee Semple McPherson, in her palmist days, calling for those who have "the true faith" to stand up.

He Could Go Far Opinion among the experts here is divided. Many, including some of the shrewdest political thinkers in Texas, believe that a fire that burns as fiercely as the O'Daniel flame must burn itself out before election time. Others suspect that a fire that hot may set the political woods afire and land the flour broker in first or second place. Attorney General McCraw, whose campaign, according to best reports here has been most seriously crippled by the defection of voters to O'Daniel, shifted his campaign headquarters to Dallas, attacked O'Daniel fiercely, and dropped everything that faintly resembled a wisecrack or a joke from his speeches. But the effect of O'Daniel's showmanship, which has made McCraw's efforts in this direction look very feeble, indeed, has apparently made heavy inroads into McCraw strength.

Thompson, playing what the politicians regard as good strategy, has kept his line of campaigning intact. He continues to advocate aid for farmers, economy in government, better administration of pension laws, and a policy of industrial development that will "keep open the door of opportunity" for Texas children. He vigorously denounces chain stores,

Terrell Hopes to Be Re-Elected on His Past Record

Austin.—Following his highly successful West Texas tour, C. V. Terrell, chairman of the Texas Railroad Commission, will take his drive for re-election into the Rio Grande valley and Southwest Texas Monday, July 11, when he goes to Brownsville.

His schedule calls for him to spend Monday in Brownsville, San Benito and the smaller Valley towns in that area, Tuesday at Harlingen, McAllen and Weslaco and Edinburg. At Harlingen he will address the Kiwanis Club.

On his West Texas tour, Judge Terrell continued his policy of letting his record do his campaigning for him, citing to crowds in Big Spring, Pecos, Stamford, Abilene and other West Texas cities among other things that in his 14 years on the railroad commission freight rates have been drastically reduced, helping every shipper, producer and consumer in the state, that the state's oil and gas wealth has been conserved making millions of dollars for the schools of Texas, and that he has issued orders recently designed to bring down the gas rates of the state. Orders already issued mean saving of \$2,000,000 annually for consumers of gas in Texas homes and factories, and this work has only been started, Judge Terrell said.

"I'm not forced to depend on promises," he said. "The best assurance for the future is the record a man has made in the past. I am proud of my record, and know I will win my re-election easily if the good people of the state are shown what results I have obtained in my 14-year service on the commission."

Ernest O. Thompson to Speak at Wichita Falls Friday Night

Ernest O. Thompson of Amarillo, candidate for Governor, will speak on the lawn of the Municipal Auditorium in Wichita Falls Friday night at 8 o'clock, according to an announcement made here Wednesday.

Bands and delegations from surrounding towns have been invited to be in Wichita Falls for this occasion, and many towns in this section have definitely promised to name representatives present. The rally in Wichita Falls will be Thompson's first major engagement in Northwest Texas since the campaign settled down to an intensive warfare two weeks ago. The railroad commissioner-candidate will reach Wichita Falls Friday.

monopoly, special interests, and utilities and declares they are supporting his opponents. He has let O'Daniel strictly alone, which, in view of the possibility of the flour broker being in position to deliver a substantial vote in the runoff—if he isn't in it himself—is regarded here as smart strategy. The lack of a poll tax payment by O'Daniel, who has educated his three children at the expense of the taxpayers and hasn't contributed the \$1 a year that goes to schools from the poll-tax has been the toughest circumstance that O'Daniel has tried to laugh off so far. His frank admission, too, that he doesn't know a thing about running the State government, has also set some voters to thinking.

Other Races Warming Up There is every prospect of an interesting runoff election this year, with second choice contests in view for several major races besides that of Governor. The list of possibilities includes Lieutenant Governor, where Coke Stevenson and Senator G. H. Nelson appear now to be leading contenders; Attorney General, with Walter Woodul and Jerry Mann as the best prospects for a second heat; Land Commissioner, where Bascom Giles has been gaining strongly, and may get into a runoff with Commissioner Bill McDonald. In the Railroad Commissioner's race, Chairman C. V. Terrell is virtually sure of a second campaign, with John Woods and Bob Stuart both pushing hard for a place in it. Stuart has been speeding his campaign vigorously recently, having made 54 speeches in seven days on one foray into West Texas.

Wise Cracks The O'Daniel boom has brought on a crop of wise cracks around the Austin lobbies and headquarters. Bob Barker, general secretary of the Senate, started a fad of putting an "O" before everybody's name. He introduces himself as "Bob O'Barker," and half the people in Austin were putting the "O" before their names. Will Pace, Tyler's able Senator, brought a new one from East Texas. He sized up the situation there by declaring it is: "Ernest O' Thompson, Lee O. Daniels, and Oh, Oh, McCraw."

When Joe Lewis knocked out Schmeling in short order, the politicians went around cracking that "it looked like Schmeling didn't have any poll tax."

No Session Seen Likelihood of a special session of the Legislature this fall seemed small, as Claude Teer of the Board of Control, issued figures to show that the present scale of old age pension payments could probably be maintained until January 1 without additional state financing. Incidentally, Teer dropped a warning, pointing out that candidates who promise \$30 a month for everybody are promising something that would deprive the State of Federal contributions, and on which even the State's \$15 payment would total around 45 million dollars a year—which is over four times the present State revenue available for pensions.

WHAT WE THINK (By Frank Dixon)

There is a town not far from where I live that has accomplished what, to me, is an outstanding piece of work from the standpoint of community interest, progress and development. This town is located in the midst of an agricultural area in which the chief industry is farming, stock raising, corn, hogs, cattle and dairying.

A few of the far visioned leaders conceived the idea that the town, due to its distance from market, its unfavorable freight rates, and its lack of highly specialized workers, would never attract labor-emplying industry to any extent.

They realized that it would always be an agricultural community. With this thought in mind the leaders of the town set out to direct their efforts toward community development along the lines that would best fit in with the interests of agriculture and those living in the territory about the town engaged in it.

After considerable study and many interviews and many visits to other towns they settled upon a rural community center. The plan decided upon consisted of a building two hundred and fifty feet square in which were provided facilities for every kind of an indoor event that should be held under cover.

There was splendid facilities for the annual 4-H Club fair, including ample room for the display of fine stock and club projects. There was also a fine, large room for the display of textiles, canned goods, grains and 4-H booths. There was a show ring under cover that would seat three thousand spectators and a auditorium that would seat six thousand persons. There was a dance floor nine thousand feet in area, a large kitchen, a completely equipped stage and facilities for every event of a community nature.

The farmers clubs, the 4-H, the granges were all invited to make use of the building. In addition to

this the schools of the county for district school events, county district meets and tournaments. Once each year the farmers of the community were all invited to a huge basket dinner following which there was an interesting program of entertainment. This came an outstanding community event that was looked forward to and enthusiastically participated in by the farmers and their families.

Perhaps the chief value of the building was the fact that it presented to the farmers of the community the interest of the had in the farm industry and constituted one of the finest gestures of good will.

The splendid facilities, program, as they did, ample accommodations for every conceivable of community activity, brought together in a social way every interest in the county and the incidentally, it was the best preparation for the creation of good will that has ever been that town and already demonstrated are being realized from its most substantial way.

Christian Science Church
Sunday School at 10 a. m.
Sunday services at 11 a. m.
Wednesday evening services at 8 o'clock.
The public is cordially invited. Sunday, July 10. Subject, "Sacrament."

Christian Science Services

"Sacrament" is the subject of the Lesson-Sermon which will be read in all Church of Christ, Scientist, on Sunday, July 10.

The Golden Text is: "Let us keep the feast, not with old leaven, neither with the leaven of malice and wickedness; but with the unleavened bread of sincerity and truth" (1 Corinthians 5:8).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Create in me a clean heart, O God; and renew a right spirit within me" (Psalms 51:10).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "The baptism of Spirit, washing the body of all the impurities of flesh, signifies that the pure in heart see God and are approaching spiritual Life and its demonstration" (page 241).

Two Minute Sermon

(By Thomas Hastwell)

The Symbol of Life and Liberty. The American flag is the symbol of liberty and of freedom. It is the symbol of the right of the ruled to say who shall rule them and with what laws they shall be ruled. It is the symbol of the right of free speech, of a free press, of the right to worship as the individual chooses. These liberties were not secured without struggle and sacrifice and bloodshed. It is the sacrifice and the struggle and the bloodshed that have given to the flag of this nation its meaning, that have made it the symbol of liberty, of tolerance, of free speech, of a free press and equal human rights, that have made it a living symbol of the things Americans hold most dear. In like manner is the cross a symbol. It is the symbol of the sacrifice of the Christ to redeem a world lost in sin and to open up to erring man the way of approach to his God. When the world realizes that until the death of Christ on the cross there was no escape for man from his sin, when it realizes that Christ's sacrifice was a voluntary act, born of great and fathomless love for mankind, then will it begin to understand the full meaning of symbol of cross, then cross will cease to be a lifeless object of wood or stone and become a living symbol of life, and freedom from sin, commanding the respect, the honor, and the worship of all mankind everywhere.

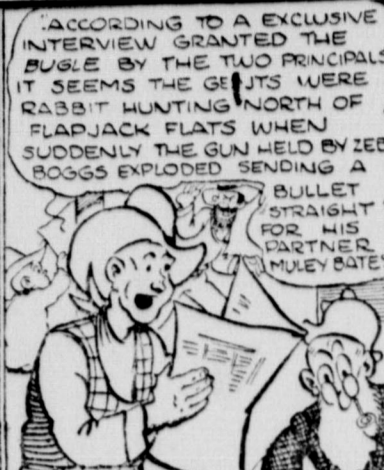

ered by Control Nos. 106-9-2, 106-2-7, 98-3-7, and 98-4-10, in Dickens, Foard and Knox Counties, will be received at the State Highway Department, Austin, until 9:00 A. M., July 15, 1938, and then publicly opened and read. Texas Drivers Urged To Study and Obey State Traffic Laws

Austin.—State police today urged drivers to study laws relating to right of way after analysis of 721 recent accidents showed that one or more vehicles involved in 123 or 16 per cent of the crashes were not in their rightful positions.

Unless intersections are controlled by local regulations, police pointed out, vehicles approaching from each driver's right have the privilege of entering the intersection first.

Drinking on the part of a driver or pedestrian was listed as the cause of 101 of the 771 accidents, with speed ranking third. Fifty-four collisions were caused when automobiles moved too close to the center of the highway or were driven on the wrong side.

Other facts revealed in the study showed that 48 accidents were caused by pedestrians running into paths of vehicles, 40 by improper left turn, 31 by disregard of traffic control signals, 30 because drivers did not signal intentions of making turns or stops, 27 by improper passing, and 19 by drivers' lack of attention.

State safety officials warned drivers of motor vehicles to use more courtesy at intersections and places where other vehicles or pedestrians may possibly move into their line of travel. Through courtesy, they explained, hundreds of crashes can be prevented each year and many lives may be saved.

Aside from the continued heavy death toll on Texas highways the safety officials were encouraged by the continued reduction in violent traffic fatalities. A general nine per cent decrease has been reported for the first five months of this year, despite a nine per cent increase in travel.

Primary causes of accidents as reflected by information on accident reports received by the Department of Public Safety follow:

- May 1938
- Did not have right of way, 123;
- Driver (or pedestrian) had been drinking, 101;
- driving too fast for conditions, 79;
- driving too near center or on wrong side, 54;
- pedestrian ran into path of vehicle, 48;
- improper left turn, 40;
- disregard of traffic control sign or signal, 31;
- driver did not signal, 30;
- driver asleep, 30;
- improper passing, 27;
- tire blow out, 23;
- driver's lack of attention, 19;
- defective brakes, 18;
- blinding lights, 16;
- stopped on pavement, 13;
- R. R. grade crossing, 12;
- entering highway from side (improper entry), 12;
- defective steering mechanism, 10;
- livestock on road, 10;
- fell from vehicle, 9;
- skidded on wet pavement, 8;
- miscellaneous mechanical defect, 8;
- pedestrian ran into side of vehicle, 7;
- inefficient driver, 7;
- no lights or no tail light, 7;
- improper backing, 7;
- improper right turn, 5;
- weather conditions, 4;
- no clearance lights, 2;
- disregard hand signal, 2;
- physical defect, 2;
- failed to stop for school bus, 2;
- defective lights, 2;
- trailer broke loose, 1;
- trailer swaying, 1;
- no flares, 1;
- Total, 761.

NEARING COMPLETION

The opening of the Galveston Causeway drew a step nearer with final acceptance by the Highway Commission of work on the substructure, super-structure and approaches. Completion of the contract for installation of the drawspan is all that remains before the big structure, that will provide more adequate traffic facilities between Galveston Island and the mainland, will be opened to the public. The Galveston Causeway is one of the largest bridge projects ever undertaken by the Highway Department.

Spending Plans of Industry to Boost Business

Dallas.—A summary of the actual spending plans of eight basic industries for the balance of 1938, running to \$4,450,950,000, (billions) for expansion and production, is termed in a report of the All-South Development Council one of the most encouraging recession-fighting indices on the business horizon.

The flood of money put into circulation by these major industries to purchase new machines and equipment, raw materials for new buildings, and maintenance or increase of production must naturally find its way into new pockets, creating new business for hundreds of tributary industries and businesses, the report says, stimulating spending power over wide-spread areas.

As the "greatest spender" for raw and finished materials the world has known, the automobile industry, even in these times, will set the pace. According to the Forbes magazine survey, this industry will pour out nearly \$1,000,000,000 (billion) for materials, tools, equipment, dies, parts and accessories during the last half of the year. An additional \$140,000,000 will go for factory equipment alone.

Steel, though producing most of its own raw materials, is spending \$165,000,000 for construction.

Misunderstanding of Importation of Cotton

College Station.—Recent publicity given to a shipment of cotton from Calcutta, India, to a North Carolina mill has led to a great deal of misunderstanding about the importation of cotton to this country, according to E. A. Miller, agronomist of the Extension Service of Texas A. & M. College.

Many people received the impression that spinners had suddenly started importing cheap cotton from foreign countries to compete with cotton produced here.

This is not the case at all, Miller observed. Manufacturers in the United States have been importing some long and fine staple cotton, such as Egyptian, and the rough varieties of India and China for years.

The India cotton imported in this case had a harsh, tinkly fiber. It does not compete with ordinary cotton but is better suited for mixing with wool in cotton-wool blankets and kinds of part-wool cloth than cotton produced in the United States.

Miller explained that in 1926 this country produced a crop of 18 million bales and imported a total of 400,000 bales. The annual average of imports from 1923 to 1932 was 273,000 bales, and this average dropped to 163,000 bales for the 4-year period 1933-36.

For the first 8 months of the current marketing year, imports total only 80,000 bales as compared with 139,000 bales for the same period last year, Miller said.
