Burlington to Close Postex Plant

By WES BURNETT

What has been rumored and suspected by many for several months was made official Monday afternoon by Burlington Industries officials.

Burlington will close its Postex Plant, with phasing out to take from five to eight months.

Some employees will continue working through to the final day...others will begin getting their final checks within the next few weeks.

During the past year, Burlington Industries has operated the muslin producing Post plant at about one-half time, and the 1982 annual payroll was approximately \$4 million to an estimated 350 employees.

A task force is being formed through the Post Chamber of Commerce to formulate methods to locate new industries and to find ways to help affected workers at the plant.

The Post Dispatch will provide accurate and timely information in its Sunday and Wednesday editions concerning community efforts.

Here is the official Burlington Industries Inc. statement:

Burlington Industries has announced that it will close its Post, Texas plant because of reduced demand for muslin sheeting fabric manufactured at the Post facility. Production will be phased out over the next several months.

The Post plant manufactures muslin sheets and pillowcases, once commonly used in American homes but now used mainly by hospitals and other institutions. "The reduced demand for this product will continue to be supplied by other Burlington plants," according to Plant Manager Jim Brown.

"We have been on a curtailed operating schedule at the Post plant for some time," Brown said, "and during this period we have without success made exhaustive studies and given consideration to the possibility of other

products and types of operations.

"The textile business, including sheeting, is extremely competitive and as foreign imports continue to increase, competitive pressures will intensify. In light of these conditions, and the fact that we cannot find another viable use of the Post facility, the closing is an economic necessity.

"Our employees at Post have been very hardworking and loyal," said Brown, "and we very much regret the need to close the facility." Brown said about 350 employees will be affected.

A team of personnel representatives will be at Post beginning Tuesday, January 18, to personally interview employees about job run-out and benefits. Those affected will receive severance pay, profit sharing, retirement and other benefits for which they qualify.

"We are working with our own real estate department, and with city, county and state agencies to find another tenant for the plant," Brown said.

Burlington is also working with the Town of Post on a mutually satisfactory arrangement for continued operation of the waste treatment plant here, which is owned by the company but which treats waste from the manufacturing plant and the town.

"This system is a real asset to the community, for its own use and for possible use by any other industry which might decide to locate here," Brown added. The waste treatment plant was built in the early 1970s. Its lagoons have a combined capacity of 56 million gallons. The plant operates under federal and state environmental control permits obtained by Burlington.

Burlington has operated the Post manufacturing plant since 1955 when it acquired the facility from Ely and Walker. The Post plant is a unit of the Burlington Domestics division, which also operates facilities at Sherman, Texas; and in North and South Carolina and Virginia.

Petroleum Edition Deadline Thursday

The deadline is approaching fast for the 1983 Petroleum Industry Salute, a special edition to The Post Dispatch.

The tabloid publication will be a supplement to the Wednesday, Jan. 26 edition of the Dispatch, with a Thursday, Jan. 20 deadline for stories and photos.

"We have been contacting local petroleum industry businesses," Dispatch publisher Wes Burnett explains, "offering space in the publication to tell their stories about services and products offered in the oilfield."

Time to Move Toward the Future!

or we can join hands together in a unified "can-do" spirit and take a dive into the future.
 This is a great time to remember the past...take a page out of C. W. Post's vision for his town...and look at what can be done when the right kind of folks decide it can be done.
 People laughed at C. W. Post when he came out to this barren country and started building a town...for absolutely nothing...and even had the vision to create a vertically integrated industry.
 Okay...so he couldn't see into the future

Jesse Milton Cornell

Memorial services for Jesse Milton Cornell, 63, a longtime resident of Post, were held at 11 a.m. Tuesday in the First Christian Church in Post, with the minister, Steven Traw officiating.
 Burial was in Terrace Cemetery under the direction of Hudman Funeral Home.
 Cornell died January 16, in Garza Memorial Hospital following a lengthy illness.
 Born April 2, 1919 in Grayson, County, Texas, he was married to the former Sue Davis of Post. He was a member of the First

Christian Church.
 He was a veteran of the 8th Air Force in World War II.
 Survivors include his wife of Post; three sons, Dr. Michael Cornell of San Angelo, Lee Douglas Cornell of Dallas and Donald Davis Cornell of Amarillo; four sisters, one brother, four grandsons and one granddaughter.
 Honorary pallbearers were A. C. Cash, Bryan Williams, Robert Palmer, Andy Stelzer, Mike Mitchell, Giles McCrary and Carl Starkey.
 The family requests any memorials to be made to the American Heart Association.

that someday his cotton mill would be allowed to slip into a technologically inferior position in the market place.
 No matter that the dream he had for Post, Texas has temporarily suffered a setback.
 His example of sheer dedication to a cause can be an inspiration to us to chart a course for our city with the same determination and driving spirit and set the stage for the next generation.
 We've got what it takes...
 Plenty of inexpensive water, and the promise of more in the future.
 Lots of hard working, ready to work people.
 Good schools, teachers and administrators.
 Great climate.
 Railroads and highways for transportation needs.
 Diversified economy...thanks to the petroleum, ranching and farming industries.
 And most important, an attitude that is lacking in most parts of the nation today...we're not afraid to roll up our sleeves and get the job done.
 We could take a lot of time citing all the reasons Burlington decided to close the Postex Plant...but none of that discussion would help get us past the "woe is me" stage.
 We are confident that Burlington's decision is a corporate economic necessity, but is not an indication of our failure.
 We're going to find an industry, which is producing a product in demand, and wants to locate where people are happy to be at work and not on welfare.
 And when we find that industry, they'll be looking to the future and will share in the great visions we have for our city...and C. W. Post, if he is watching, can smile at our imitation of his spirit.

Culture Club Hears Social Security Program

The Woman's Culture Club met Jan. 12, in the club house with Mrs. C. R. Wilson and Mrs. Lewis Earl serving as hostesses. Mrs. Linda Malouf, president, opened the meeting with a reading on January, the beginning of a beautiful future, her wish for the Womans Culture Club.

The president reported on the progress of the plans for the luncheon of the District Convention.

Mrs. Lois Williams led the members in the club collect.

Beuna Bouchier gave a report on Federation, stressing the importance of using your safety belts each time you drive your car. You might save alive and it could be your own.

Mrs. Earl, program leader for the day, gave the following topics for discussion: Social Security and Immigration.

Mrs. Earl presented the present and future problems of the Social Security, such as the lack of funds and the misuse of the funds that we have. These

problems are of great importance to each of us. Bringing out the thought that so many of our elderly retired people are trying to live on their SS check. At this time no one has come up with a plan that can correct this condition.

Lewis Earl spoke on immigration.

Touching on the restrictions of the aliens of the countries of Western Asia, which could cause bad relationships with the foreign countries.

Then there is the illegal alien who comes to this country and works much cheaper, therefore they are able to get most of the jobs.

Of the millions of unemployed, one out of every four that gets a job is an alien.

What is the answer to this problem? There are several suggestions but as of now, none have been successful. Mr. Lewis concluded his talk with a question and answer period.

Those enjoying the social hour were Buena Bouchier, Sue Chun, Catherine

Cathcart, Ruby Kirkpatrick, Doll Haire, Ruth Duckworth, Estelle Davis, Peggy Ellis, Opal Pennell, Lois Williams, Doris Wilson, Nita Burress, Linda Malouf, Maxine Marks and guest Lewis Earl.

AN EXPLANATION

to the People of Garza County

On January 13, 1983, the undersigned were asked to come to Greensboro, N. C., to the Burlington Headquarters. We met with the chief executives of Burlington concerning the Postex Plant.

Before Burlington would talk to us about the outcome of Monday's announcement, we had to give our word that we would not divulge the results of the meeting until the Burlington executives had time to come to Post to announce it to their employees. Upon our return, there were many inquiries as to what transpired at the Burlington meeting and we wish now to apologize for the evasive and half-answers we had to give to anyone inquiring about the meeting. Due to our commitment to Burlington we had no other choice. So again, if we offended anyone we are sorry but these are the circumstances that required our action.

Freshmen Boys Win Again

Coach Jay Kennedy's freshmen boys edged out Idalou here Monday night, January 17, 38 to 35 in the finale of a triple

bill. After scoring only six points in the first period to eight for Idalou, the Frosh had a big second period hitting for 18 to only seven for the visitors. Tracy Price led the freshmen in scoring with 10 followed by Greg Storie with seven, Danny Foster had

six, Greg Adams four, Lance Fredricks three, Joel Kirkpatrick, David Shults and Keith Craig each had two and Sammy Hardin and Bruce Crenshaw each had one. The team will play in the Wilson Tournament against Smyer at 11 a.m. Thursday morning.

did you know?

Keeping the customer's fuel adjustment cost down is my primary responsibility. I, along with Karen Roberts, Grafton Clarke, Barry Smith, and others, purchase fuels—coal, natural gas, oil—at the lowest possible prices. We negotiate with fuels suppliers to modify on-going contracts so the total cost to SPS customers for fuel is again minimized. And we plan ways to shift the production load among Southwestern's 27 generating units so that the fuel cost to our customers is made as low as possible.

Morris Rantz, fuel administration manager, Amarillo.

Computerized equipment helps SPS battle the costs of fuel. Every 10 seconds, we run a computer scan of all of our power generating units. The scan checks each unit's efficiency of operation, and calculates each unit's per-kilowatt-hour cost at that given moment. Then—for the sake of economy—we may immediately increase the generation at one unit, and decrease generation at one or more of the others. Our objective: At any instant in time to be producing electricity at the lowest possible fuel cost.

John H. Evans, manager electrical operations, Amarillo.

A new SPS ally is helping you manage electricity costs. Coal-fired Tolk Station, an efficient 561,000-kilowatt power plant near Muleshoe, Texas, began commercial production in August. We predict that the fuel cost adjustment our customers pay will be significantly lower over the life of Tolk Station than it would be if Tolk had never been built. In fact, Tolk Station for the next 35 years should save SPS customers about \$50 million per year.

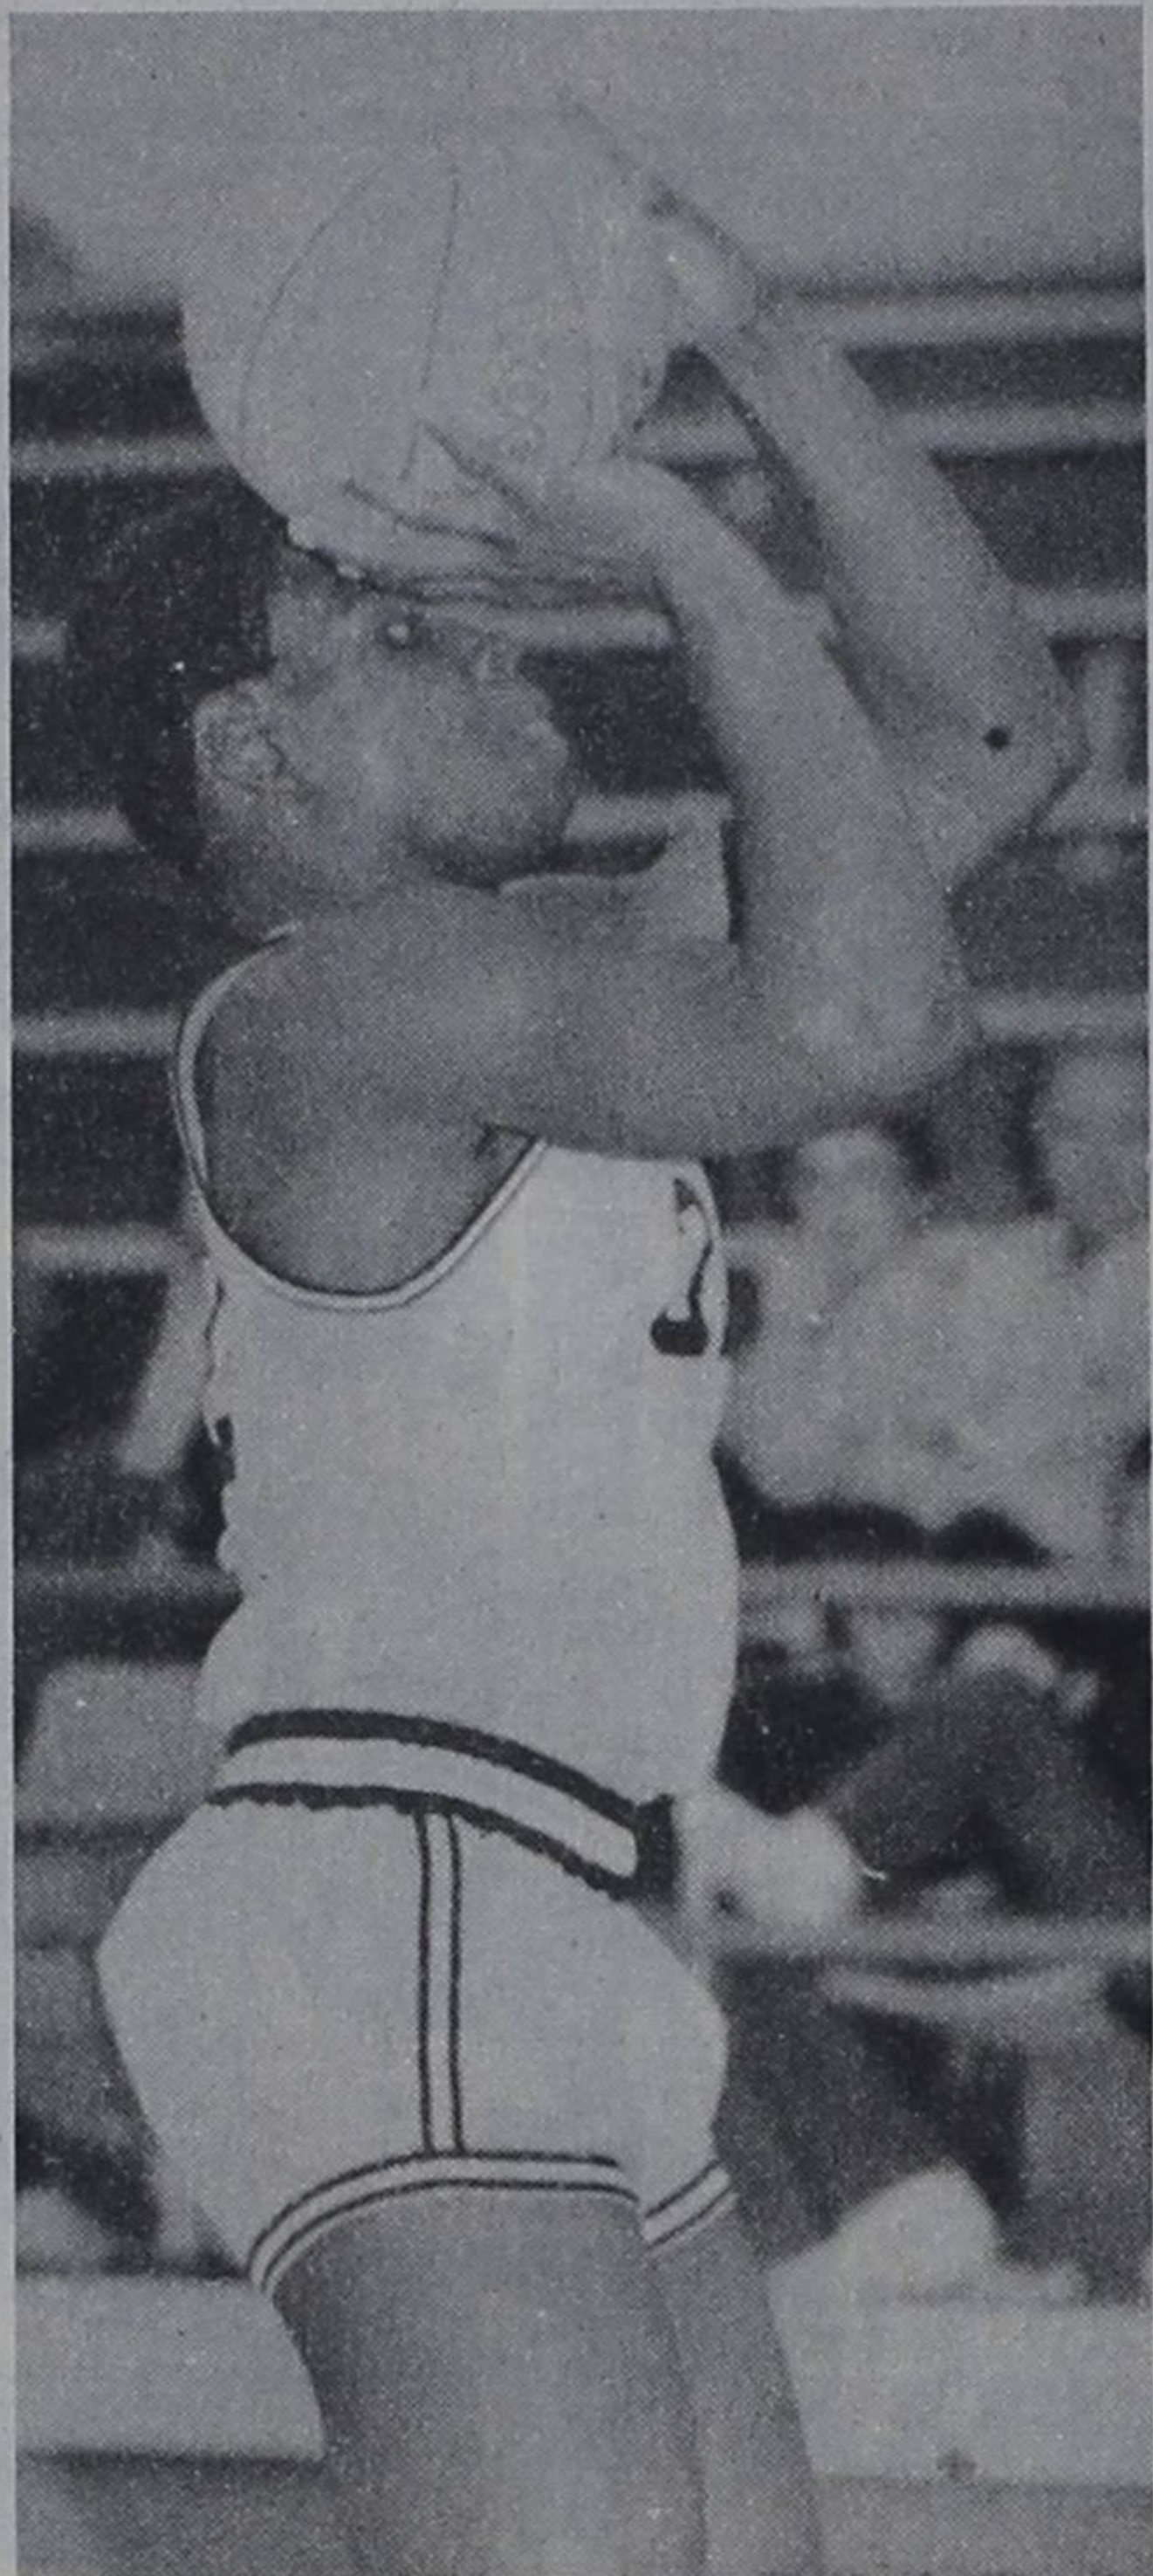

Roy Thomas, vice-president operations, Amarillo.

For answers to your questions, call or write your SPS manager.

You and SPS, partners managing electricity, make the difference.

Tracy Price was the big gun for the freshmen as they won another game Tuesday night. The team has lost only one game this year.

'Lopes Cold at Idalou

Coach Ken Plumlee said of his Bold Gold Antelopes "I can't explain it, the team as a whole has gone into a horrendous shooting slump, not just one or two members of the team, but the team as a whole." Coach Plumlee made the comments following the Bold Gold 'Lopes second district loss to Idalou there Friday night 53 to 46. "The team played a good defensive game, but had a bad offensive game," said Plumlee. The two teams were tied at the end of the first quarter 14 all, with both teams scoring 15 in the second period to tie at half

time 29 all. Idalou came out strong in the third period to again hit for 14 with the Bold Gold going into a slump hitting for seven with both teams hitting for 10 in the final period, but not enough for the 'Lopes to overcome the Wildcat lead. Irvin Price led the 'Lopes in scoring with 25, followed by Will Kirkpatrick with eight, Bill Black had six, James Lee three and Tim Tannehill and Milton Williams each had two. Tannehill and Black both got into early

foul trouble, sitting out a large portion of the game on the bench. The loss put the Bold Gold at 0-2 with Slaton and Idalou 2-0 matching the two teams up Tuesday night. Coach Plumlee said that the 'Lopes are very disappointed with their showing in the district games and have set their goal to win the last eight games of the season. Democratic Caucus the following day, Wednesday. Carriker was the only freshman out of the thirty-four first term Democrats to be nominated to the Executive Committee by returning veteran members. The House Democratic Caucus is the key leadership group for the 114 member Democratic majority. The Caucus meets frequently to discuss Democratic Caucus which Carriker was elected serves as a leadership council composed of seven-teen members of the House of Representatives. Carriker said that he hopes to use this new position "to bring to the attention of the Legislature the pressing problems facing farmers, small businessmen, and the average taxpayer in my district."

PIK Program for Farmers

The payment-kind program announced by the Reagan administration offers a way to reduce excessive stocks of cotton and to strengthen farm income National Cotton Council President Edward Breihan said today.

Breihan said the action should reduce burdensome cotton stocks which are expected to total eight million bales or more by the end of the current season and, in turn, relieve the downward pressure on cotton prices. Praising the early announcement of the PIK program, Breihan said cotton producers can now proceed with their plans for the 1983 crop.

In a recent letter to Agriculture Secretary John Block, the Council president pointed out critical landlord-tenant decisions were imminent across the Cotton Belt and that field operations — already underway in South Texas — have been suspended pending the program announcement. Breihan said the Council's Board of Directors recently passed an eight-point recommendation emphasizing the need to sustain the economies of local communities. It also enlarges upon an existing Council recommendation cal-

ling for reducing carryover stocks to 3 1/2 to 4 million bales as soon as practicable.

Energas Studies

(Continued from Page 1)

The Railroad Commission is the state agency that regulates the oil and gas industry in Texas.

Energas is establishing a program to supplement existing programs of financial aid to people in its service territory who would otherwise not be able to pay their heating bills this winter.

Energas representatives have been involved on national industry committees studying the results of the pilot energy assistance programs.

"The new program is an extension of procedures Energas already has for helping our customers pay their gas bills," Charles K. Vaughan, Energas president, said.

"For years, Energas has offered an individualized deferred payment plan to customers who need help.

Now, on Commissioner Wallace's recommendation, we are adding a program of financial assistance for this heating season."

The program that Energas is devising will rely on seven charitable organizations throughout the company's service territory to receive and distribute money for heating assistance.

Energas will contribute money itself to those organizations for use in the program and will encourage its employees, its customers and the general public to make

contributions.

Energas officials are working with representatives of the seven regional charitable organizations to establish agreements for the operation of the program.

When those agreements have been made, Energas will give a donation to each non-profit organization, based on the number of customers the company has in the region served by the organization.

The company will then publicize the details of the program, so that those needing help will know how the program operates and others will know how to make contributions.

Energas provides natural gas service to a 30,000-square-mile area of West Texas, extending from the Panhandle to south of Odessa.

The gas utility company is a division of Pioneer Corporation, an energy resources corporation headquartered in Amarillo.

Series to Begin at First Christian Church

By Steve Traw
The most common name for the Christian in the New Testament is saint. The Word occurs some sixty times all after Acts chapter one and the beginning of the Church Age with only one exception in all the New Testament. Its root meaning comes from the word meaning holiness. But its true meaning is often hard to conceptualize and communicate to others. It is rather like describing the hues of a West Texas sunset to one born color-blind. Though our description is most commendable, the understanding and the appreciation of the other is lacking.

So too with looking at such attributes found in God, our perception is often lacking. Yet the "Holy One" resided upon earth in a throne room that was called the "holy of holies". Therefore as we study God, we will reveal insights of ourselves as Christians in His image, as saints and

The people who first settled this vast country of West Texas were pioneers of the highest standards. They were Rough, Tough, Determined and Dedicated — Because of their unfailing spirit, carved homes and businesses out of a hard and unyielding frontier.

Post people are descendants of these pioneers and possess the same traits as did our forefathers. Knock us down and we will get up — Tell us we can't and we WILL. Times may be hard but so is our Determination.

The 7 a. m. whistle may be silent for the moment, but the spirit and determination of Post Texas is alive, well and poised to plunge into tomorrow with Faith and A Future.

Grandad would have it no other way.
