Mexican Baptist Mission Opens Easter Sunday

Sunday, April 17 the new Mexican Baptist Mission will be opened for their first services. This is Easter Sunday and a large attendance is expected. There will be an all-day meeting scheduled with a noon meal being served. The new building will be open Sunday afternoon for inspection by any and all who would like to see it. Deterioration of the embryo roots within cottonseeds is probably the major cause of nuroot — a condition which can reduce cotton yields by 25 percent. In some years this condition results in big losses for Texas producers. USDA findings show the importance of finding adequate tests for determining the degree of deterioration of seeds as a means of improving stands in cotton.

Poultry Diagnostic Laboratories are maintained and operated by the Texas Agricultural Experiment Station at College Station, Center and Gonzales. A fourth is scheduled to open in Stephenville in October. Poultrymen with disease problems may secure assistance by contacting one of the laboratories.

Let's not forget, in our study of new theories, that the dollars that are spent in O'Donnell are the dollars that make business here.

A new water repellency treatment for cotton, developed by USDA chemists, produces an unusual finish that keeps water out but lets air thru. Instead of coating the fabric and thus sealing off the tiny open spaces in the weave, as some water proof finishes do, the chemicals in the new finish penetrate the fibers and make them so highly water repellent that the fabric sheds rain. Although the treatment is not yet being used commercially, it looks promising because it is not costly and can be used with the same equipment used in applying other textile finishes. It can also be applied along with flame resistant and crease resistant treatments.

CHEVY! YOU CAN'T BUY ANY CAR FOR LESS ... UNLESS IT'S A LOT LESS CAR!

Anyone who's looked around knows the majority of Chevrolet models—6's and V8's together—list for less than comparable models of other low-priced cars. But the price tag alone is only one of a whole raft of reasons a Chevy does better by your dollars.

Nothing near Chevy's size and price can match the Full Coil cushioning of its ride, or the fine, finished workmanship of its Body by Fisher. That even applies to some cars that cost a lot more. You're up in the higher price brackets before you find a car that moves as quietly as a Chevrolet or offers the inner space that Chevrolet does.

Or look at the extras Chevy gives you — at no extra cost — that others in its class can't offer at any price. Shock-cushioned steering. Safety Glass in every window. Keyless locking of all doors. Crank-operated vent windows. Chevrolet offers the widest choice of power teams, too. Drive a Chevy just once. You'll have a tough time settling for anything less.

Years ahead in style... that's why Ford is far ahead in sales!

The "bug" bites thousands of people every week. They've been driving high-priced cars year after year. But suddenly they sprout out in 1960 Ford Galaxies, pleased and proud as punch. They're switching to Galaxy because they want that years-ahead Thunderbird look, with a glamour and grace that won't ever wear thin. They want that Thunderbird engine—that Thunderbird eagerness—those undistilled Thunderbird thrills.

They're going for Galaxy because Galaxy gives them—in look and in deed—an elegance denied to all but costlier cars. And Galaxy gives them all this for far less than what they've paid in the past ... plus a high resale value! And these selfsame values are crafted into every car we sell—from Thunderbird to new Ford Falcon! Come let us prove it!

the elegant best is *Galaxy* by FORD
