NUMBER 3

## Forty-Prizes Will Be Given Away Free On Next Tuesday

### Arrangements Being Made To Entertain Hundreds of People

Friday is Trades Day again and the merchants will give away forty-five prizes among the visitors that are expected during the day. The management committee has the past week arranging a program for the day which is going to press is yet but everything will be ready for a day which includes entertainment, games and prizes, and the secretary of the Chamber of Commerce.

Prizes will be awarded morning and afternoon and the prizes, which will probably total \$300.00.

The forty-five prizes and program that is being arranged for the day for the entertainment of the many visitors, there will be a number of prizes, which will be placed on many special days. This alone will be time to take the day off.

### Coming in at 125 Bales Daily

Cotton crop is beginning to move rapidly the past week to the fair weather over the weeks. However, there is a scarcity of pickers in the area which is retarding the movement.

Wednesday afternoon 125 bales of this year's crop were ginned by the seven city 1808 bales of this year. This is an increase of over 800 bales from our report, and is approximately the same as a year ago. The 125 bales daily at present is a fair weather continues to be increased.

On Wednesday of this week include any ginnings community gins which will swell the report five per cent.

### Well Eagles Hold to a Low Score

Unsprayed and unsung, the Eagles from High brought the biggest team to a standstill with a score of 24-0. The outwashed, outlasted and outplayed by a hundred points, the Eagles surprised the South Plains by their play.

The Eagles cross the line of the Antelopes, a team has done this year.

These Eagles were not very much, but on defense they were glorious. There were several stars, the entire team.

The Eagles engaged part of the team on the local field and it was the last home year.

### Success of O'Donnell is attributed to help the winning column.

Behind them O'Donnell, the boys and are worthy support. They need you.

Success has given as the up for Thursday's game.

Left End, Left Tackle, Left Guard, Left Center, Right Guard, Right Tackle, Right End, Quarterback, Left Half, Right Half, Fullback.

### PIK BOLLWORM QUARANTINE REGULATIONS ARE AMENDED

Secretary Arthur M. Hyde of the U. S. Department of Agriculture announced on October 2 that the regulations under the pink bollworm quarantine have been amended to modify the conditions under which cottonseed oil mills may ship second-cut linters originating in the area regulated on account of the pink bollworm.

In 1928 the Department of Agriculture found that the oil mills located in the counties in west central Texas involved in the pink bollworm outbreak which was discovered in that area at that time, were inadequate in number and size to crush the cottonseed produced in the area. Accordingly, provision was made for the authorization of oil mills located outside of but in the vicinity of regulated areas, to crush cottonseed originating in such areas upon determination by the Plant Quarantine and Control Administration that reasonable necessity existed for such action. The linters cut from such seed were required to be returned to the regulated area for compression and fumigation. Since that plan was worked out, investigations have indicated that by the use of a special type of equipment, the second-cut linters can be passed through rollers under such pressure that all cottonseed with any larvae which might be contained therein will be so crushed as to prevent any infestation.

The new amendment, effective on October 1, 1929, authorizes the issuance of permits for the interstate movement of second-cut linters passed through the new type of roller equipment when the proper safeguards against contamination are provided. This authorization does not apply to first-class linters which must be returned to the regulated area for compression and fumigation as heretofore.

The department points out that the amendment relates to which this second-cut linters are not only pressed within the rollers sufficiently to crush any cottonseed which may be contained therein, but that the seed itself is already given a heat treatment at the gins before it is shipped to the oil mill concerned. It is felt, therefore, says the department, that the present action does not involve risk of spread of pink bollworm to points outside the regulated areas.

### City Grocery Install - ing Meat Market

The City Grocery makes the announcement this week that they are installing a first class meat market.

Mr. Chas. McConal, well known to O'Donnell folks, has purchased a half interest in the firm and Messrs E. D. Holman and Chas. McConal are planning on adding every modern convenience for their customers. They have just recently added a cream and produce station and are this week busy installing first class market fixtures. Mr. Slim McGill will be in charge of the market department. He is well known to the people of O'Donnell and his management will insure the best in service.

Read their announcement elsewhere in this issue of the Index.

### MRS. ALBERT KOENIGER IS HOSTESS TO THURSDAY CLUB

On last Thursday afternoon Mrs. Albert Koeniger was hostess to the Thursday Club, in her lovely new home. Everything was so pretty and attractive. Four tables of Forty-two were enjoyed throughout the afternoon, after which lovely refreshments consisting of Pineapple and cheese salad, garnished with olives, Tuna Fish Sandwiches, and Iced Tea were served to the following guests.

Mesdames Garner, Brown, Stark, Campbell, Sorrels, Earls, Gibson, Hardy, Wells, Cowden, Shook, Allen, House, and Misses Laynette Smith, Willie Schooler.

### County Wins Fair Honors

Exhibit Takes Fourth Place At The South Plains Fair; Women Win 21 First Places

Lynn County won fourth place at the Panhandle South Plains Fair which is being held in Lubbock this week. Garza County won the first prize of \$200.00, Lamb county second prize of \$175.00, Bailey County third prize of \$125.00, Lynn County fourth prize of \$100.00, Dawson county fifth prize of \$100.00, Swisher county sixth prize of \$75.00, Gaines seventh, Martin eighth and Hockley ninth with \$50.00 each.

Lynn County exhibitors also won five blue ribbons on poultry and several red ribbons, according to Chamber of Commerce Secretary C. C. Williams.

J. A. Jaynes of the New Lynn won first and second place on maize.

Miss Thelma Greenwade is rejoicing because the woman and girls of Lynn County demonstration clubs won 21 first prizes at the fair and brought back \$15.50 in cash.

There may have been other winners which we have failed to get—Lynn County News.

### MR. HERMAN BREWER AND MISS BEATRICE WARREN WED

Mr. Herman Brewer and Miss Beatrice Warren were married last Friday evening by Justice of the Peace J. P. Aylor. These young people reside in the Joe Bailey community and are very popular among their set. They have a host of friends who wish for them a very prosperous life.

### Beauty Specialist Is Coming to Corner Drug

Mrs. R. L. Frye, representing Dorothy Perkins Toiletries, will be at the Corner Drug Store next week.

Mrs. Frye is a graduate beauty specialist, and has wide experience in beauty culture.

A private booth has been installed in the store where ladies may go for consultation with the specialist and for treatments if it is desired. She will gladly make telephone appointments with any one who desires to consult her.

No charge is made for these consultations. Mr. Boyd having made special arrangements whereby customers and users of the Dorothy Perkins toilet articles may be given expert advice without cost, and where others may be made acquainted with the excellent and wide range of variety of the Dorothy Perkins line.

A cordial invitation is extended to all who wish to avail themselves of the opportunity to consult with a competent specialist as to their peculiar cosmetic and beauty culture needs.

### Real Estate Changed Hands Recently

M. A. Scott, local real estate dealer reports that real estate has been changing hands more rapidly the past three weeks than it has during the past three years. Mr. Scott reports having closed deals amounting to \$32,000.00 the past week, and two weeks previous to that, a total of \$44,000.00 dollars, bringing his total sales the past three weeks up to \$76,000.00.

This is evidence that the O'Donnell country is gradually getting in better shape financially. Looks like that prosperity is just around the corner.

### Mr. Will Chriswell of Lamesa visited friends and relatives in this city last week.

Messrs A. B. and Bert Holman of Athens, Texas, visited the brother and sister of E. L. Holman of this city a few days of last week.

Mr. and Mrs. A. B. Fortner of Levelland are here visiting his son and daughter, Mrs. Jno. Campbell and Boyd Fortner of this city.

### Valuations in County Is Now Larger

Increase Totals \$324,000 Over Last Year; Slight Change In Tahoka Valuations

(Lynn County News)

The taxable property valuations of Lynn County show an increase of \$324,000 over last year, according to the tax rolls recently made up by the assessor, J. S. Weatherford. The valuations this year are \$6,529,144 against \$6,205,104 last year.

The tax rate this year is 68 cents on each \$100 property valuation for the State and 74 cents for the county, making a total of \$1.42.

In the city of Tahoka the increase in city valuations has not been so marked, according to figures furnished us by Mrs. J. E. Walker, the city assessor. The city valuations this year amount to about \$1,358,000 which is approximately the same as last year, notwithstanding the fact that many residences have been built here during the year. The city tax rate has been fixed at \$1.28 as against \$1.30 last year.

The increase in the Tahoka Independent School District amounts to about \$70,000. The valuations last year were approximately \$3,313,000 while this year they are approximately \$3,200,000. This is hardly as large an increase as was expected in view of the fact that many new buildings have been constructed in the city and the district and valuations on many pieces of property were also raised. The rate of taxation is \$1.00 per \$100.00.

There are 562,503 acres of land on the tax rolls of the county, valued at \$3,635,190; while all towns lots in the county and the buildings thereon are valued at \$4,6725; the total value of all real estate in the county, exclusive of railway property, being \$4,581,915.

Mr. Weatherford's rolls also show the following kinds and number of livestock listed for taxation:

Cattle	10,445
Horses and mules	8,225
Hogs	5,078
Sheep	365
Jacks	1

The Senior B. Y. P. U. will render a program which will take up the preaching hour at the Baptist Church Sunday evening, October 13. The program is as follows:

Song—by the congregation.

Prayer—

Solo—To be arranged.

Scripture Lessons—Miss Harville, Consecrated Bible Characters—Mrs. Martin.

Consecration an Element in the life of young people—Miss Clarie Ruth Nichols.

Pageant

The Challenge of the Cross, with the following characters, Miss Irene Martin, Alta Lee Payne, Ruth Howard, Lois Nelson, Verdia Ballew, and Francis Scott.

Everybody has a special invitation to attend Sunday evening, October 13, at 8 o'clock.

### J. W. NICHOLS BRINGS IN GOOD OKRA FROM GARDEN

Mr. J. W. Nichols, who lives in the north part of town again visited the Index office, this time bringing with him some good home grown okra, which he left in the editor's desk, for which he has our thanks. The editor doesn't eat the vegetable, but the wife and baby were very appreciative of the gift and claims it was fine.

### MR. CHARLES HENDRICKS AND MISS CLEO SEELY MARRIED

On last Saturday afternoon Mr. Charles Hendricks and Miss Cleo Seely accompanied by Mr. and Mrs. Clyde Woods drove to Tahoka and were married by Bro. Korchville. The wedding ceremony took place about 2:30 p. m. They will reside on the Palmer place about four miles northwest of town. The Index joins in wishing them the best of prosperity throughout life.

Misses Eula Belle (Sally) and Lois (Liza) Miles were Lubbock Fair visitors last week.

## Texas Electric Service Announces Rate Cut

### First to Register For Big Convention

EL PASO, Texas.—To Judge H. C. Williams and George W. McClure of Sierra Blanca, Texas, goes the honor of being first delegates to register for the eleventh annual convention of the West Texas Chamber of Commerce to be held here, October 24-25-26. Throughout West Texas great interest is being shown in the registration of delegates and before the time comes for the convention, it is expected at least one thousand West Texas business men will have registered as delegates, entitling them to take part in the business sessions of the convention. These sessions will be held each forenoon, while the afternoons will be given over to entertainment. Chambers of Commerce, affiliated with the West Texas Chamber of Commerce have been asked to elect their delegates and register them so that they may have part in the business discussions.

The registration badge entitles the holder to a ticket to the football game between the College of Mines, this city, and Wayland College of Plainview, to the bull fight in Juarez and free use of the golf links at the Country Club and the Municipal Club grounds. It will also entitle the holder to many other entertainment features. The registration fee is \$2.50, the same as at all former conventions, but only those accredited delegates from the respective Chambers of Commerce are being asked to register.

President-Manager A. M. Bourland is at this time developing the business program which will call for a discussion on many subjects relating to future developments of West Texas. It is expected that all Chambers affiliated with the West Texas organization will send registered delegates, one for each ten memberships carried by their city in the West Texas organization.

### Dairy Cattle Will Be Brought to County

Plans have been perfected by the Dairy Committee of the Tahoka Chamber of Commerce for the importation of at least one car load of first class dairy cows, heifers and registered bulls about the first of November.

Recent investigations have revealed the fact that there are quite a number of milk cows being fed in Lynn county which are not paying a profit because they do not produce sufficient butter fat. It is the purpose of the Chamber of Commerce to aid the farmers to get good dairy stock at the least possible cost that they may realize the greatest profit possible from their cows. A good producing cow requires no more feed and care than a sorry one, so why not get rid of those which are not profitable and secure better producers.

The committee consisting of Ray Shaver, county agent, chairman, A. L. Lockwood, Dr. E. E. Calloway and R. H. King met Monday morning and perfected plans whereby Mr. Shaver will select the best dairy animals to be had for the money and will put them to the farmers at exactly what they cost him.

Any one desiring to add a few good animals to his dairy herd is invited to see Mr. Shaver within the next few weeks.

### GOVERNMENT ESTIMATES OF COTTON CROP RAISED TO NINETY THOUSAND BALES

WASHINGTON, Oct. 8.—Condition of the cotton crop on October 1, was 55 per cent of normal, indicating a 1929 production of 14,015,000 bales, the agriculture department announced today.

The indicated yield of lint cotton was estimated at 153.2 pounds per acre for harvest, by the agriculture department.

Carl S. Bloomfield, district manager of the Texas Electric Service Co., announces that beginning with the November 1st bills, a new and reduced rate will apply to all residential and commercial users of electricity.

The above company has been serving O'Donnell with electricity since 1924 and this is the fourth reduction in rates. When the high line first reached O'Donnell, users were charged 18c per kilowatt hour. The fourth reduction in rates which will be effective with the November bills will bring the local rate to the low mark of approximately 11c. Officials of the company claim this is as low a rate as is given any town in West Texas, and is a reduction of approximately 25 per cent over the past year.

"The new residential rate has a flat charge and two energy steps of 7 cents a kilowatt-hour," Mr. Bloomfield declares. The 7-cent rate applies to the first four kilowatt-hours per month, and the 5-cent rate applies on all additional kilowatt-hours used per month. The flat charge is based upon the number of rooms in a house. The customary method of counting room is used, under which alcoves, unfurnished attics, bathrooms, cellars, hallways, landries, closets, pantries, open porches, garages, barns and all uninhabited outbuildings are not counted as rooms. Premises with four rooms, or less than four rooms, are classed as four room homes and those with ten rooms or more are classed as ten room homes. The flat charge for a four room house is 85 cents per month, with an additional 10 cents a room up to ten rooms.

"The new commercial rate is similar in form, with a flat charge based on the maximum demand for electric service and a meter rate with two steps of 7 cents and 5 cents a kilowatt-hour, but with an additional low step of 3 cents a kilowatt-hour. This rate applies to commercial customers, which class includes hotels, recognized rooming and boarding houses, schools, lodges, churches, of fices, warehouses, hospitals, shops and stores, and covers use of current for lighting and the usual appliances.

"These new rates were worked out by engineers of the Texas Electric Service Company after thorough and careful study to provide an economical schedule of charges for use of electricity in Texas homes and business houses. Many new appliances have come into use in the modern home and progressive stores are making a great use of electricity for lighting, fans and other small power uses. The new rates encourage the use of more electricity at very little additional cost. Both rates are optional.

"These new rates are made possible by the operating economies which result from increased use of electricity power by communities as a whole and because of a system of efficient management under which a number of towns are grouped and directed by a centrally located organization, as well as by producing electricity in large, centrally located generating stations and distributing it through transmission lines. The Texas Electric Service Company has pioneered this class of service until today its modern system of transmission lines serves large and small communities with continuing economies."

### MR. AND MRS. SANDERSON CELEBRATE 50TH ANNIVERSARY

Mr. and Mrs. W. R. Sanderson celebrated their 50th wedding anniversary on last Tuesday, October 8th. Mr. Sanderson sincerely states that they are still on speaking terms. They were remembered by their eight children who are all still living. Each remembered them with beautiful and useful presents.

Mr. Sanderson believes that since they are still on speaking terms after 50 years of wedded life they are good for fifty more.

RAISED 98 PER CENT OF THEIR CHICKS

Big Spring—Charline and Lenora Bruton, 4-H club girls at Elbow, county, have raised 98 fowls from 100 White Leghorn baby chicks. One was killed by a rooster, one was smothered, 28 cockerels were sold for \$16.50, 10 cocker's kept, and 60 pullets are on hand ready to lay, the girls have reported to Mrs. Loucille Allgood, home demonstration agent.

The chicks cost \$5 and the feed bill has been \$16. The girls have followed good feeding and housing and management practices throughout the demonstration, and for completing it are to be given 100 cockerels by the local chapter of commerce.

HELPING TO BUILD TEXAS

Conservative estimates of the Texas wheat crop for 1929 range from 40 to 45 million bushels, putting an equal number of millions of dollars into Texas banks, Frank Kell of Wichita Falls ten years ago was quoted as predicting that Texas would be a rival of Kansas as a producer of wheat and Texas this year has probably gone past Oklahoma in wheat production.

Nacogdoches has a storage battery factory that started this year with one man and now employs three regularly with orders ahead of deliveries. Texas towns are learning that from just such nuclei as this grow big industrial plants, and that not always it is wise or profitable to try to start out in a big way with a heavy capital investment. In the industrial sections of the United States many of the large factories of today were one and two-man establishments in the beginning—a good idea, backed by small capital and much energy and ambition to grow.

Farmers in the Medina Valley and the Winter Garden District are advantaging from the construction of a new canning plant at Natalia, 30 miles southwest of San Antonio, which will have a daily capacity of 16,000 cans of vegetables and fruits.

The Lindale canning plant, which handles fruits and vegetables in season, cans pumpkins, citron melons and meats in the fall and winter so as to keep busy practically every month in the year.

San Angelo shipped 14,500,000 pounds of wool of the 1929 crop, representing more than one-third of the 40,000,000 pounds which Texas sheep produced. The fall clip will start moving in September and is expected to total about 7,000,000 pounds against 6,000,000 last fall.

Rice growers and exporters of Tex-

as and Louisiana have organized a big rice export association with headquarters at Lake Charles, La., and have filed declaration of purpose to export rice, rice products and rice by-products.

The Western Carbon Co has filed application for permit to construct a carbon black plant in Gray County to burn 10,000,000 cubic feet of residue cashewhead gas daily in the manufacture of carbon black.

The Texas Tanning & Manufacturing Co., of Yoakum has recently increased its capital stock to \$240,000 and with its enlargement is employing 100 persons.

One of the largest fertilizer plants west of the Mississippi River is to be established at Taxarkana by the International Agricultural Association, the twenty-seventh unit in that company.

KNOW TEXAS

Sixty thousand square miles of lignite underlie Texas

In wages alone (exclusive of salaries) the printing industry in Texas (including newspaper and job printing plants) in 1927 expended \$9,282,298.

In 1927 there were 116,763 industrial wage earners in Texas who drew in wages \$116,535,880.

Five hundred and seventy-two Texas towns have newspapers. Texas has 121 daily, one tri-weekly, 29 semi-weekly and 617 weekly newspapers with a total of 944 publications of all kinds. Two hundred and twenty of the 254 county seats in Texas have newspapers.

LABOR COUNCIL ENDORSES STREET CAR FARE BOOST

The Portland, Ore., Central Labor

Council unanimously endorsed the petition of the street railway company for an increase from 8c to 10c fare.

FREIGHT SUBWAY MAY BE CHICAGO SUBWAY NUCLEUS

Some Chicagoans believe that in the little-known freight subway is the nucleus for the passenger subway that inevitably must come to meet the transportation demands of the Western metropolis.

Few even of the frequent visitors to Chicago know that well under the street line exists an extensive system of freight tunnels handling a heavy traffic volume between railroad terminals, docks and business houses and relieving the surface thoroughfares of over 5,000 motor truck movements daily.

The tunnels extend 62 miles, using 3,300 cars of two-foot gauge and 150 electric locomotives in the handling of 300 trains daily. A queer by-product is that air from the tunnels, cooled by its 40-foot depth in the earth, is used to ventilate and cool buildings and theatres, its temperature summer and winter staying at 55 degrees Fahrenheit.

SELF-APPLIED FARM RELIEF

The Rusk County News tells of a Rusk County Farmer who is making his own farm-relief in the story of W. A. White, who seven years ago paid \$600 for a 50-acre farm. "This

COMING? The Egyptian Queen The marvelous trait of the Egyptian wife of King Solomon, who to protect the life of her husband, drank the poisoned glass which had been prepared by her countrymen for his destruction. This calendar will be out about Nov. 20. Will try to hold one of the home calendars for each of our customers, but would advise that you call for them as early as possible. Sorrels Lumber Co. E. L. SORRELS, Manager

year," says the News, "he planted two acres to tomatoes from which he realized \$1,200 at an expense of some \$25 per acre which included 700 pounds of fertilizer to the acre. He has twenty-seven acres in cotton yet to realize from. He has 500 chickens and four cows from which he realizes \$10 to \$12 a week. More than enough hogs to supply his own demand. This man is making a success of farming."

RESIDENTIAL USERS TAKE 9 PER CENT OF CURRENT

Of all the electric power sold, residential customers consume about 9 per cent; commercial customers 10; power customers 56; municipalities 4; street railways 9; all others 12. Of all the power generated, only about 82 per cent is actually sold, the remainder being lost in transmission or

used by the companies themselves, according to the Electrical World.

19,380,000 TELEPHONES IN U. S. 31,000,000 IN WORLD

On December 31, 1928, there were approximately 19,380,000 telephones in the United States, according to

Telephony, with an annual million conversations a day on through them. There are 31,000,000 telephones in the world. Overloading a young man cause balkiness. Publishing something he can not do have the same result.

Dozen club is meeting at 8 p. m. with Mrs. W. H. Trice of street.

Club members are meeting with Mrs. Allen S. Stewart at 16th street.

WOMEN PAY DIVIDEND

Station—It pays to feed the summer months according to the records of 204 poultry flocks reported by the Extension Service. Produced by some 30,000 flocks for 12 cents per egg during June and July. A number of eggs laid per hen was about 14, but per hen above feed little more than 22 cents per month.

Gain will come this fall however, for the well then be producing when in price, whereas hens last summer will probably laying until spring," E. Extension poultry explains.

point brought out in the records is the fact production per hen was less than 100 birds really higher. The feed per hen was about the laying hens in the were charged with the large numbers of grow-

GETS BIG CORN CROP

Mr. Mayfield, Cherokee boy, has gathered 52 corn from his club acre. Fertilized with 200 pounds of fertilizer and was side dressed with 100 pounds of soda. He is said to have had with the big yield. It is Johnson county white brought from a club boy for seed. Mr. Mayfield says best money yet spent on farming operations.

LAND FERTILITY

Beacher Newman of Community in Harrison showed three acres of oats and 40 bushels of oats to 60 years. He then planted and harvested two tons of oats. This demonstration was in cooperation with agent on the nine-acre Mr. Newman and his five years ago in the content. They are still in and peas, cotton, oats and. The productivity of said to have increased 100 the five years.

SAM NOW SHOWING SURPLUS

INGTON, Sept. 27.—Governor showed a surplus of \$290 for the first time this on Sept. 26, on the basis issued Monday by the department. Close of business on that Government income since was \$921,287,506, while expenditures for the amount to \$891,900, the same period last year amount collected \$802,299, out \$912,481,568, leaving \$110,290,026.

condition of the Government this year was due increase in customs collection income tax receipts and miscellaneous tax collection.

Practically every field not treated for smut in last year was so it drew a dock at local

elevators of from three to twenty cents per bushel, according to E. R. Duke, county agent. Not a single case of smut was reported by farmers who used the copper carbamate method of treatment recommended.

Floresville—Dairymen in Wilson county who failed to provide sufficient planted pastures for their cows have complained that their cows failed in milk flow in late summer. J. L. Donaho's cows were failing too, until he turned them into a patch of peas and then milk production increased ten gallons a day.

The following "don'ts" are given by the U. S. Department of Agriculture to avoid hog cholera on the farm. Unless hogs have been immunized against the disease, don't allow them to run on free range or highways, or to have access to canals and irrigation ditches. If a neighbor has hog cholera on his farm, don't visit him. Don't drive into hog lots after driving on public highways, or use the lots for yarding wagons and implements. Keep new stock away from the herd for at least three weeks. If hog cholera appears in the neighborhood, don't let your dog roam around. All dead animals and offal from slaughtered livestock should be completely burned, or covered with quicklime and buried deep. Although outbreaks of hog cholera may appear in the South at any time of the year, they are more prevalent in the Middle West in October and November than in other months.

TROLLEY BUSES SUPPLANT CARS ON SALT LAKE LINE

The old trolley line on Ninth St., East, Salt Lake City, has been torn

up under permission from the authorities and the trolley cars supplanted by trolley buses, which can maneuver eight or nine feet either way from the overhead trolley line supplying power.

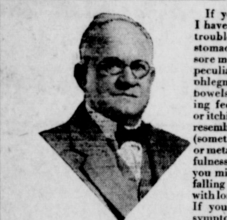

The dairy cow will be less likely to get milk fever at calving time if she is given plenty of water and salt and fed a minimum quantity of concentrated feed for several days before and after calving.

Cockerels intended for roosters should be kept on free range and made to grow as large frames as possible. Pump birds are in greatest demand, and there may be a difference of 5 cents or more a pound between thin and plump birds.

Johnson grass meadows in the South are more productive if they are plowed up every third or fourth year. Unless the land is cultivated occasionally, other grasses invade the meadows and reduce the yield so much that hay production becomes unprofitable.

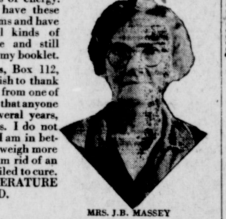

Shoes worn while working with lime, Portland cement, lye, and other alkaline substances than ruin leather will last much longer if kept well greased. Among the best materials for greasing leather are neat's-foot, cod, and castor oils, tallow, and wool grease.

DR. FERRELL FARRINGTON Dentist X-Ray Diagnosis Office Phone No. 9 O'Donnell, Texas Offices in First National Bank Building

W. C. ROUNTREE, M. D.

If you have any of the following symptoms, I have the remedy no matter what your trouble has been diagnosed: Nervousness, stomach trouble, loss of weight, loss of sleep, sore mouth, pains in the back and shoulders, peculiar swimming in the head, frothy like sputum in throat, passing mucous from the bowels, especially after taking purgative, burning feet, brown, rough or yellow skin, burning or itching skin, rash on the hands, face and arms resembling sunburn, habitual constipation, (sometimes alternating with diarrhoea) copper or metallic taste, skin sensitive to sunheat, forgetfulness, despondency and thoughts that you might lose your mind, gums a fiery red and falling away from the teeth, general weakness with loss of energy.

It is better to keep dirt out of milk than to strain it out. Small-top milk pails are a great help in doing this. They are easy to use, cost little more than ordinary pails, and keep a large part of the falling hair and dirt from the cows out of the milk.

The profitable pig is the one that is kept growing continuously from farrowing until marketing time.

**H. W. CALAWAY OF TAHOKA  
BELIEVES INDEX EDITOR  
MADE RASH STATEMENT**

Since the editor of the Index had  
something to say regarding the domi-  
no tournament that was supposed to  
have taken place in this city between  
Tahoka and O'Donnell citizens a few  
weeks ago, our statements seemed to  
have been doubted by one H. W. Cal-  
away of Tahoka and Editor Hill of  
the Lynn County News. The follow-  
ing article appeared in the last week's  
News:

**SAYS IT'S ALL A MISTAKE**

The O'Donnell Index of last week,  
after quoting our story about the  
Tahoka bunch of domino experts  
cleaning up on the O'Donnell agree-  
ment, issues the following general  
denial, winding up with a bold chal-  
lenge to the Tahoka braggers to  
meet 'em again. Just listen to the  
Index editor.

"Since reading the above article  
published in the Lynn County News  
of last week, the editor of the Index  
has made a complete survey of the

champion domino players of O'Don-  
nell and surrounding territory which  
include T. J. Yandell, E. T. Wells, D.  
H. McDaniel, Geo. Lightfoot, J. M.  
Payne and many others, and to our  
surprise we failed to learn of any  
defeat among the O'Donnell players  
by the Tahoka delegation. To the  
editor of the Index the O'Donnell  
players boasted of how they made a  
clean sweep of the series of games  
between the Tahoka and O'Donnell  
players.

"So in order to correct the above  
statement there will have to be an-  
other tournament arranged between  
the players at which time an official  
score keeper will preside who will  
check the losses and victories, thus  
eliminating all doubts as to who is  
the best. O'Donnell folks have issued  
such a challenge.

Now, H. W. Calaway of this city  
is a fairly truthful man, especially  
on the subject of fishing and domi-  
nos. We don't believe he would tell  
a lie about the number or size of fish  
he caught or about the result of a  
domino game in which he participat-  
ed for his strong right arm. And  
Calaway boldly and defiantly charges  
that on Tuesday on or about Septem-  
ber 17, 1929, he and one Guy Sher-  
rod, high constable of justice pre-  
cinct No. 1, engaged in a domino  
game in the city of O'Donnell in  
Lynn County, Texas, with one T. J.  
Yandell, an honored member of the  
commissioners court of Lynn County,  
from the O'Donnell Precinct, and one  
J. W. Roberts, alleged editor of said  
O'Donnell Index, and that said Cal-  
away and Sherrod just licked the  
socks off of said Yandell and Rob-  
erts, all of which he stands ready,  
willing and able to verify.

Calaway says, however, that his  
O'Donnell victims want another  
chance, he and Guy will try to ac-  
commodate them some time when they,  
Calaway and Sherrod, can find the  
time to take from their other duties,  
Calaway intimated, however that he  
didn't have much time to fool away  
on punk players.

The editor of the Index has been  
called down many times before and

this is not the first time our state-  
ments have been denied or called  
false, but as far back as we are able  
to remember it is the first time "the  
laws" of our home county together  
with prominent citizens such as H.  
W. Calaway and Editor Hill of Tahoka  
have dared to be so bold and un-  
neighborly as to brand our statement  
as false. Our statement regarding  
the recent clash between Tahoka  
domino players still stands. Of course,  
there is no one who doubts the truth  
of H. W. Calaway's statement and  
we feel sure Editor Hill is too modest  
to print an untruth or anything that  
would reflect upon the reputation of  
one H. W. Calaway, we fear this said  
H. W. Calaway has a bad memory or  
else suffered a relapse of memory  
for the time being at least. The  
writer admits playing as a partner to  
on most truthful and beloved county  
commissioner T. J. Yandell, and takes  
all the blame for the one game loss to  
Messrs Calaway and Sherrod and to  
prove our knowledge of the game  
withdrew from the battle field allow-  
ing Mr. Yandell to choose a partner  
with some knowledge on the finer  
points of the game, who in turn suc-  
ceeded in taking six consecutive

games without a loss to the sorrow  
of two Tahoka champion domino play-  
ers. We withhold their names for  
fear of humiliating them. Mr. Yan-  
dell is authority for this statement.  
Now, Mr. Yandell is known through-  
out this section of the country as a  
man of truth, one who, under no cir-  
cumstances would bare false witness  
to his neighbors. Of course, rather  
than injure Judge Calaway's pride by  
recalling to his memory the losses  
sustained by the Tahoka delegation,  
we will allow our challenge to stand  
as made and have our champions meet  
the Tahoka champions in an official  
match with a duly sworn and bonded  
score keeper.

As we were about to close our re-  
marks, we were told that the chal-  
lenge has been accepted by the Tahoka  
delegation and hostilities will be  
resumed some time next week.

**TEXAS ELECTRIC SERVICE  
GIVES RATE REDUCTION**

The Texas Electric Service Co.,  
who serves O'Donnell with electricity  
for lighting and power has granted a  
fourth reduction since entering the  
field in 1924. This is in keeping

with the company's policy. The re-  
duction came voluntary and is wel-  
comed by the users of electricity in  
O'Donnell. O'Donnell now has, as  
low a rate as any town in this section  
of the state. The latest reduction  
places the rate at approximately 11c  
per kilowatt hour which is seven cents  
lower than was charged when the  
company first entered the field.

(We Save for Those We Serve)

# Keeping Apace With O'Donnell

We wish to announce to the public that Mr. Chas. McConal has purchased a half interest in the City Grocery and in order to keep apace with the progress of the city we are modernizing our store, placing it in three departments.

We have always maintained a complete grocery department and just recently we added a cream and produce station. This week we are installing a first class meat market.

We invite our friends and customers and the people of the O'Donnell trade territory to inspect our grocery, meat market and produce department. We will appreciate a liberal share of your patronage.

## Grocery Department

E. D. Holman will be general manager of this department and his motto will be to "please you at all Times." If it is not right he will make it right. This department will always be found complete in every detail. Fresh vegetables, staple and fancy groceries of all kinds will be found here at all times. It will pay you to trade with us.

## MARKET DEPARTMENT

The old reliable, Smiling "Slim" McGill, will have charge of this department, and believe me, Guy knows just what kind of a cut you want, and he knows just how to round it out. Slim always does his best to please. So just come down to the City Grocery Market to get those juicy cuts.

- SPECIALS FOR SATURDAY**
- Beef roast, any cut, lb., spec. **21c**
  - Salt Pork, best grade, lb. **19c**
  - Pure Pork Sausage, lb. **22c**
  - Armour's Star Hams, whole or half per pound **27c**

## Cream & Produce Department

Honest Cream Testing Charlie will have charge of this department, and Mr. McConal will at all times give you the highest cream test possible and pay you top prices for your cream, eggs and poultry. He invites you to give him a trial the very next time you have anything to sell in this line.

**HONEST WEIGHTS, HIGHEST PRICES AND COURTEOUS TREATMENT.**

### TONIGHT ROBINSON HOME

of a series of silver by the Comrades Methodist Church will be (Thursday) at the Mrs. L. E. Robinson will be the evening's several couples have all her boasts as to how they will win.

the class members bubbling over with plans and enthusiasm, they are anticipating the most interesting and worthwhile year since the class began. Most of their work will be directed along social service channels, so that their motto, "All for one and one for all" is most appropriate. All young people not already affiliated with some other class are cordially invited to attend this class. Remember the silver tea tonight at the L. E. Robinson home.

### WELLS NEWS

Mr. D. G. Phipps of Wells Community took third place with his fine Poland China hog.

Mr. M. L. Taylor also took six

first places and three second places on farm products.

Some of the people of this community who attended the fair at Lubbock last week are: Mr. and Mrs. Tyler and children, Mr. and Mrs. Bolch and children, Mr. and Mrs. Phipps and children, Mr. Taylor, Mr. and Mrs. Allen, Mr. and Mrs. Prendie, Mr. and Mrs. Showalter and children, Mr. Andrew Jordan, and Woodroe McLauren.

Wells community needs a number of cotton pickers, one third of a bale per acre.

The pupils of the seventh and 8th grades sponsored by Mr. Scott, their teacher, entertained chapel with a program Friday morning. There were two readings given but the chief feature of the program was the impersonation of the faculty members.

Mrs. Showalter and Mrs. Goodin and her daughter were visitors at the program.

The pupils of the first and second grades will entertain chapel next Friday morning. The program contains the following:

- Song by all.
  - Good Morning to You.
  - See my Paper Boots Sailing.
  - Happy Little Children.
  - Story—Little Red Riding Hood—Helen Margaret Balch.
  - Reading: Come Little Leaves—Cleatus Askew.
- The following have neither been absent nor tardy during the first month of school.

**Primer**  
Wanda Ash, Elsie Jewell Scott, Dorothy Gene Yarbrough, Harnady McLauren.

**First Grade**  
Junior Yarbrough.

**Third Grade**  
Winifred Tucker.  
Leata Jones.

**Fourth Grade**  
Opal Goodin, Lulu Mae Yarbrough, Wayne Showalter, John D. Yarbrough, Arnie Todd, Hal Smith.

**Fifth Grade**  
Loree Barnes, Wilma Brendle.

**Seventh Grade**  
Thelma Brendle, Sybil Balch, Ruby Goodin, Sybil Showalter, Bertie Askew, Jessie Balch, Kyle Jones.

**Eighth Grade**  
Temkie Balch, Andrew Jordan, Wilson McLauren, Bill Tucker.

### B. P. U. ANNOUNCEMENT

All B. Y. P. U. work will begin promptly at seven. Last Sunday the

subject under discussion was, "Christian Service Examination." We had six who passed the Examination for Christian Service and we feel like they are qualified for this service. Next Sunday we will study the Sin Question, with Mrs. Martin leading the program. She has a new plan. Come and see. Come and see what

we are doing and we will try to do these good.

### SENIOR B. Y. P. U. PROGRAM

Subject—The Sin Question.

1. David's Gerat Sin—Miss Effie Vaughn.
2. David Confesses his sin—Lyle Pugh.

3. David's joy in the sense of Pardon—Miss Irene Martin.

4. Cleansing from sin a preparation for service—Miss Grace Harville.

5. Sins that threaten young christians today—Led by Group Captain.

6. How to avoid sin—V. B. Hohn.

### WITH OUR COMPLIMENTS

## Ladies

ightful \$3.00 "Facial" and scientific Advice without charge.

ave arranged at considerable expense to bring to our city, October 14th to Mrs. R. L. Frye one of the professional beauty specialists. She is a state in her art, capable of rendering scientific service. It will be our desire to have her give you without one "Dorothy Perkins" Facial.

desire it she will advise you on permanent beauty problems. We will have a booth in our store.

## CORNER DRUG STORE

We have suits that will surprise you.

The kind that you find in the cities, but our prices are low.

We also have suits for the boys.

# Tucker Dry Goods Co

O'Donnell, Texas

**FEEDING FOR EGG PRODUCTION PAID THEM**

Waxahachie—After keeping chickens 18 years without paying much attention to proper feeding, Mrs. R. L. Parr and her husband decided to try Extension Service poultry feeding methods advocated through home demonstration clubs.

In spite of losing 185 of their flock of 354 English White Leghorns by theft, Mrs. Parr recently told Ellis county home demonstration club members that an average profit above feed cost of \$58.33 per month had been made from January to July inclusive. The total profit above feed was \$350.00 for the six months, with January the least profitable month and March the most profitable.

The cost of feed was \$234. The first two months the mash was home mixed but after that a commercial mixture was cheaper. It consisted of corn, maize, oats, wheat bran, and cottonseed meal ground together and fed with charcoal and oyster shell. The flock had constant access to green pasture consisting of Bermuda grass, wheat and oats.

**MONUMENTS OF PRIVATE INITIATIVE**

Individual prosperity and attainment must always come before general progress. It is the aggregate results of private initiative and enterprise in many fields that has made our modern industrial age possible.

The great progressive movements in this country have been started and given momentum by individuals—not by government. When the government goes into business, forcing out the private citizen, the result is economic and social paralysis.

We had an instance of political domination during the war when the railroads were taken over by the government. The tremendous losses sustained and the retrogression of standards of service are well remembered by our citizens.

Our telephone, railroad and electric facilities are supreme and give the best service at the lowest rates. They are a living testimonial to the public regulation rather than ownership and operation of business by the government.

**THE SUGAR SITUATION**

Growing of sugar beets is a valuable industry to the farmers of many states. Sugar companies have spent thousands of dollars building factories and preparing a place in the market for their product, working against odds of high taxation and high labor costs.

The point has now been reached when a slight increase in the tariff seems essential to take up the slack between cost of production in foreign countries with low standards of living and cheap labor, and cost of production in our own country.

The tariff has nothing to do with it. If we wish to retain our present standards of living we cannot let our markets be flooded with cheaply produced foreign products to the exclusion of domestic commodities.

**DEEP PLOWING PAYS HIM**

Loveland—Land that T. M. Hester plowed from 10 to 12 inches deep three years ago on his farm near Cobeland, Heckley county, made twice as much corn per acre this year as land plowed shallow at that time. The land has been handled the same and has grown the same crops since that time, W. T. Magee, county agent, states.

Wheat on the deep plowed land was six inches taller and much heavier than that on ordinary land. Mr. Hester follows the practice of listing his land early, from 10 to 12 inches deep the first time, and then plants in the middles after busting rather shallow. Such fields have withstood the drought very well.

**LEARNS FROM OLD HOME FARM**

San Angelo—Because land terraced ten years ago on the old home place is now worth \$70 an acre compared to \$15 or \$16 an acre for unterraced land on the same farm, N. E. Lester has asked help from County Agent W. L. Marshall in protecting his farm with terraces.

"The oldest and most eroded part of the old home farm in another county my father gave to one of my brothers ten years ago," Mr. Lester says. "My brother terraced it. Two years later the rest of the farm went to other brothers who did not terrace and who soon sold it. On a recent visit my brother told me he had just been offered \$70 per acre for his place and that I could purchase the part sold by my brothers for \$15 or \$16 an acre. That's why I'm terracing all my Tom Green county acreage."

Seagraves—Skim milk is a good poultry feed, the demonstration record of Mrs. E. S. Caffey here in

Gaines county show. Her flock of 52 Barred Plymouth Rocks laid an average of more than 16 eggs per hen in July on a ration of skim milk and corn and milo maize. The feed cost was 6 1-2 cents for each hen for the month.

**UNBALANCED DIET COST 75 TURKEYS**

Matador—It cost a farmer in Motley county \$200 recently to learn to feed his flock of 200 turkeys a balanced ration, according to M. P. Leaning, county agent. They were well housed in a lot containing two acres, had abundant grain and water before them at all times, and apparently everything was going well. Thinking that the birds needed more exercise the boys herded them in the open for a couple of days.

An abundance of blister bugs were discovered by the turkeys and being starved or animal food they cleaned up the insects. The next morning the young turkeys were sick and droopy and within a week more than 75 per cent had died. The remainder were put on a balanced diet, vaccinated against possible infection during their weakened condition, and most of them recovered.

The next time the turkeys need bugs I'll buy meat scrap," the owner says.

Madisonville—Woodrow Magness, local 4-H club boy has produced five times as much corn to the acre as his dad. We flat broke the land early, disked it to improve tilth, fertilized with 100 pounds of a 9-6-3 mixture, and side dressed with 100 pounds nitrate of soda. In spite of having to plant a second time and then having half of it drowned out he gathered 25 bushels of good heavy corn to the acre while his father produced only five bushels per acre in his 10-acre field.

**MORE CORN AND COTTON ON TERRACED LAND**

Cure—Terracing has increased the corn yield 25 bushels per acre in Dewitt county. Two years ago the says he made only 10 bushels of nubbins on an acre on this field but that this year all the ears are big and that the yield will be at least 35 bushels an acre. Before the field was terraced the only big ears grew down in the flat but now they grow just as big on the hillside he states. He plans to finish terracing his farm this fall and winter.

Trigg Peebles, another local farmer whose terracing is reported by the county agent, declares that before his land was terraced nine years ago he got only 13 bushels of corn to the

acre where he now gets 35 bushels. His cotton yields have been doubled also.

**FATHER COPIES SON**

Colorado—The method of feeding hogs in 4-H club work used by Geo. Draper of Lone Star (Mitchell county) proved to be such a success that his father now is feeding two hogs ground threshed maize and tankage in a self feeder. They gained 44 and 53 pounds each in the first 30 days on feed, and at the end of three months weighed 104 and 109 pounds respectively. The boy's pig weighed 234 pounds at six months of age but Mr. Draper expects his pigs to beat that record a little.

**ACTION ON PRISON PROBLEM EXPECTED BY DECEMBER 25**

Centralization Committee Gets Down To Business In Discussion of Site for Proposed Plant

By R. W. BARRY Associated Press Staff Writer AUSTIN, Sept. 23.—Action of the Texas Prison Centralization commission in getting "down to business" at Temple Saturday in a discussion of a probable site for the new plant, indicates the legislature may dispose of the problem before Christmas.

Overwhelming sentiment in favor of voting to put the modernized central plant in Central Texas in close proximity to Austin, as cropped out at the Temple meeting, would seem to mean there will not be so much friction on this point as was at first feared.

**To Adopt Report**

Belief is growing in semi-official circles that whatever recommendation the centralization commission—composed of the nine members of the prison board, five members of the house of representative and four senators—makes to the legislature those suggestions will be adopted.

With the commission planning to meet next week in Houston to come to a formal agreement on the site of the proposed plant, it seemed probable the official report could be

drawn and adopted within two weeks and the entire proposition put up to the governor not later than November 1. If this should prove to be the case, there would be a disposition on the part of the governor to call a special session of the legislature by November 15 and dispose of the problem.

Unless unforeseen opposition should develop, it is the belief of observers that a 30-day special session could dispose of the prison, concentration matter, correct the troublesome confederate pension law to give all entitled to help some monetary relief and settle the boundary dispute between Texas and Oklahoma, three outstanding matters awaiting attention.

Governor Moody said last week that like the man who found a \$10 bill in the pocket of a pair of discarded trousers, it was apparent the state would have more money than was anticipated when the tax rate was fixed recently. Remittances from several revenue sources showed a sharp increase, and it is probable there will be sufficient money on hand to start work on the new prison plant.

The commission at Temple planned to recommend an initial appropriation of \$1,000,000 to start the wheels turning and supplement this with \$500,000 annually until the modern plant is completed.

Those who have gone into the

proposition have expressed surprise at the apparent ease and little expense with which the Texas prison situation may be altered. This is accounted for partly by the apparent decision to retain much of the state's farm lands for the purpose of carrying on agricultural and livestock activities supplemental to the industrial plants within the walls.

Many Johnson grass meadows in the South would be more productive if plowed every three or four years, says the U. S. Department of Agriculture. When a heavy tonnage of hay has been removed annually for a period of years, yields are reduced and the hay generally contains a large percentage of weeds and grasses. Some growers of Johnson grass hay plow their meadows in fall and sow them to winter wheat. Another practice is to cultivate the meadow and to sow beans in the spring. This thickens the stand of Johnson grass and a crop of legume hay increases the tonnage of the cuttings of Johnson grass.

### HOW TO SELECT STALK FOR NATIONAL COTTON SHOW

of at least indications of to produce large amounts of product, is the basis of all agricultural fairs. This whether the entries are dairy cows, chickens or field crops, production of quality cotton is the ambition of all cotton growers. The One-Stalk Cotton Show under the auspices of the Buck Agricultural Foundation, National Fertilizer Association with the Mid-South connection will be held at Memphis, the South at Atlanta, and the State at Dallas, was inaugurated to stimulate interest in education of better cotton. The show is a thousand dollar affair.

tain amount of storm resistance is also to be desired.

Seed has been allotted a possible 5 points. Plump, heavy seed, uniform in size and color, are desired.

Freedom from disease has been given a possible 2 points, making a total of 100 points.

Any farmer, whether landlord or tenant, white or colored, or any one member of his family, will be allowed to enter a single stalk for competition. Only one stalk may be shown from each farm unit.

The stalks exhibited must be grown in 1929.

Stalks must come from a field where at least one acre of cotton was grown in 1929. However, any spacing, fertilization, protection or cultural practice may be used.

Stalks shown must contain the cotton that grew on the stalk. Picking and refilling will not be permitted. Branches must not be cut from stalks exhibited. All leaves must be removed.

The name of the variety must be shown on the stalk.

Exhibitors need not necessarily accompany exhibits, but may ship same, charges prepaid, to the National One-Stalk Cotton Show, in care of the fair in their districts. Entrants living in Virginia, North Carolina, South Carolina, Georgia, Alabama and Florida should enroll by sending their names and address to The National Cotton Show, Atlanta, Ga.; those in Oklahoma and Texas to The National Cotton Show, Dallas, Texas; and those in Tennessee, Mississippi, Arkansas, Louisiana, Missouri and Kentucky to The National Cotton Show, Memphis, Tenn.

The premiums for the best single cotton stalks include \$1,000 as total prize, including sectional award, for the best stalk of cotton in the South. Premiums at the three sectional fairs at Atlanta, Memphis, and Dallas follow: first \$500 at each fair, second \$200 each, third \$200 each, fourth \$100 each, fifth \$50 each, six to tenth inclusive \$25 each, eleventh to twentieth \$10 each.

abundance of laws, our legal technicalities, and the antics of reformers and sub-sisters. The clever criminal who actually sees the inside of a prison is the exception, rather than the rule.

A great body of experts has said that until our laws are simplified and our judicial procedure is based on common sense and not technicalities, we can not hope to successfully cope with the underworld.

The moral is plain. It is time we stopped passing laws to interfere with the rights and lives of the good citizen and turned our attention to the real criminal. It is a sad commentary on legislative intelligence when, with gang murders and robberies going unpunished on every hand, the reformers spend their time trying to devise ways to make it impossible for honest citizens to own guns.

#### IMITATE BUSINESS PRINCIPLES

It is time that government imitated modern business methods.

The great industries of the present are notable for their efficiency, economy and high standards of service. It is an unfortunate fact that local governments, on the other hand, still exist to a great extent in a sort of Dark Age of waste, duplication of effort, and antiquated methods.

Modern successful business might be said to have a general motto: "To give a maximum of service at a minimum of cost." Only through the appreciation of this principle has the great progress of recent years been made.

Business pays good wages for good work, keeps overhead as low as is possible and sells a high grade commodity of service to the public for a fair price. Our local units of government which have grown steadily more expensive in recent years, might adopt the same principles and save taxes for grateful citizens.

TIRES VUNCANIZED at Foster's.

#### OUT OF SWADDLING CLOTHES

Gas house-heating, according to Eugene D. Milener of the American Gas Association, is emerging from its swaddling clothes and is now available in nearly every section of the country.

In many large cities house-heating absorbs as much as 10 per cent of the entire gas production, and the proportion is growing rapidly. Automatic heat, with its economy, efficiency and time and labor saving qualities, has taken the American home by storm.

#### FINANCIAL SPEAKEASIES

In leading a drive against various types of bucket shops in New York, Assistant United States Attorney George J. Minter coined a new phrase — "Financial Speakeasies." "They are exactly that," he said, "Some of them having a doorman and a peep-hole through which to scan visitors before the door is opened."

Bucket shops, tipster sheets and other alleged illegal financial enterprises, according to U. S. Attorney Tuttle, have victimized more persons and caused greater losses than did the recent \$5,000,000 failure of a private New York banking house.

These investment gruards have given rise to the more or less common belief that all purchasing of listed stocks is in the same class with betting on the ponies or buying lottery tickets. They have, in many instances, caused an unfair stigma to be attached to honest and legal transactions and thrown all blame on "Wall Street."

As a matter of fact, no group of people is more interested in stamping out investment frauds than are legitimate brokers and bankers and stock exchanges. Stock and bond issues are rigorously examined before being listed—member brokers are added much in the same fashion as banks—investors are continually

warded against purchasing unsound and unknown issues.

The solution of this problem, as is true of most others, is up to the purchasing public. Bucket shops and tipster sheets must have customers before they can exist and prosper. If every investor, before buying, made it his business to first consult a reputable investment banker or a brokerage house that is a member of

one or more of the large recognized exchanges, the day of investment frauds would rapidly wane.

#### TYPE OF ACCIDENT LEGISLATION

and for unconditional automobile insurance, the famous—or perhaps Massachusetts law, seems inhibited. In its place has been viewpoint which has been in force in New York and a few other states.

These laws provide that in case of an accident where the driver is careless, must be held against him and not the insurance policy. This is not an insurance policy which is not an insurance policy. This is not an insurance policy which is not an insurance policy.

Present day crime thrives on our negligence. Nor should we be held responsible for our own mistakes. Uncompulsory insurance, as provided by the Massachusetts law, overlooked this simple fact immediately to the citizen who drives a car with interest the newer type of accident

#### PUBLIC APPROVAL NECESSARY

A well-known publicist recently spoke of the opposition felt by the people of a great state to a certain law. He then said that this was no reason for repealing the law.

This type of reasoning is typical of many reformers who seem to work on the principal that the best way to do away with crime is to make more of it.

No law can succeed without public approval. If there is public opposition, that part of the public becomes, in theory, criminal.

The anti-pistol laws are a good example. There are unquestionably hundreds of thousands of citizens who own small arms, for protection or sport, in defiance of state and local statutes. The American people have never taken kindly to usurpation of constitutional rights by modern legislators.

## a Policy and a Pledge

### Regarding ELECTRICAL APPLIANCES

**F**OR many years this Company was concerned with only one problem—that of delivering dependable and economical electric energy to the home.

Then the electric appliance—of one type and another—began to play a very important part in electric service to the home. This condition brought a further and deeper responsibility to this Company—that of supplying the proper kind of electric appliances to its customers.

An electric appliance for the home should do certain definite things. First it should be efficient; that is, give the most service for the least cost price. Second, it should use the least amount of electric energy in operation, and should stand up for the longest period of service.

It became necessary, then, for this Company to adopt a very rigid policy in the matter of selecting and offering appliances for sale to its customers. So, throughout the years this Company has maintained a testing laboratory through which each appliance must pass with creditable performance before it is offered to our customers.

You can depend absolutely on the appliances which we offer to you through our stores. Each one is the best of its kind. They have been carefully tested for quality, workmanship, economy of operation and are backed by the reputation of this Company, as well as by the manufacturer of the various appliances. Enjoy the fullest use of electric service with the best of electric appliances.
