O'DONNELL, LYNN COUNTY, TEXAS, APRIL 23, 1926

No. 31

O'Donnell Country Receives Baptism of Good Old Sky Juice

New Rural Routes to Give Service Daily

Postmaster Hal Singleton announces that the newly designated Rural Mail Route No. 3 will start serving the people on May 1st. This will give the patrons of the route mail six times a week, serving the communities of T Bar, Wells, Slash L and Newmoore. Ben Moore has been appointed temporary carrier.

Those being served by this route must put up boxes of approved pattern and have them ready to receive mail by the first of May.

Route A has been abolished and Route 2 substituted in its stead, there being only a slight change in the route. R. C. Willis, the accommodating carrier of Route A will continue in the service on Route 2.

Beginning May 1st, mail will be delivered on this route daily except Sunday.

The two routes will serve around 300 families and will prove a great convenience to them. Both the carriers ask the cooperation of the patrons in helping make both routes serve the purposes for which they were intended.

Postmaster Singleton deserves much credit for his untiring energy in securing the routes. Owing to the retrenchment policy of the administration, very few rural routes have been established in the United States during the past year.

Odd Fellows Anniversary At Methodist Church Sunday

Next Sunday will be Anniversary day with the O'Donnell Odd Fellows. They will meet at the local hall and march to the Methodist church in a body where the anniversary sermon will be preached by Rev. J. Wood Parker. The church will be decorated for the occasion and there will be a special song service for the occasion. A cordial invitation is extended everyone to attend the services.

On Monday night the Odd Fellows will entertain their wives and sweethearts at a banquet at the hall which will complete the anniversary program.

How can they ever expect to stop crime when even our judges hold up decisions.

VOTE BONDS AND CONSTRUCT WATERWORKS

O'Donnell needs a system of waterworks and it must provide ways and means for securing this if we are to advance.

Abundance of water is not a luxury, but an absolute necessity. Should a fire get under headway, where would we be? What would become of our places of business and our homes? Luckily, we have had no fires of consequence, but one may come at any moment and wipe out the entire town.

With a system of waterworks property would become more valuable, our insurance rate diminished, the town could be made beautiful with trees and flowers and outside capital would have no hesitancy in making investments, and should a fire break out we would have the only chance at our command to combat it.

Of course, it will cost some money, but nothing worth while is ever obtained without cost of money. Just how much money this will cost, the writer does not know, but he does know that it can be obtained on forty years time at five per cent interest. This money expended here on this needed improvement would be kept at home and the home folks receive the benefit of it. It would give employment during the summer months to a number of people who may be forced to go away to seek a livelihood.

Let's have the City Council order an election and vote bonds to build a system of water works.

School Bonds Approved by Attorney General

A dispatch from the Attorney General's office at Austin states that the O'Donnell Independent School District Bonds had been approved, and since the bonds have been sold there remains only the letting of the contract for the erection of the High School building.

This will be done on April 26. The Board of Trustees announce that on this date bids for the construction of the building will be received.

It is planned to have the building ready for occupancy by the opening of the fall term.

The construction of this building means advancement for O'Donnell's school interests. No town can advance faster than its schools. Schools form the foundation of all civilization.

O'Donnell people are laying the foundation of a town that will advance. Now watch O'Donnell grow.

South Plains Never in Better Condition At This Season

With 90 per cent of the land in cultivation ready for planting, good old sky juice began to fall Tuesday morning. First it came so gently that the thirsty earth soaked it up like a sponge. As the day waned it began to come down in torrents, reaching a climax at about 4 o'clock in the afternoon when the earth was flooded. Spasmodic showers fell during the evening and shortly after midnight another outburst came down and put the finishing touches on the best season the country has seen at this time of year for a long time.

The precipitation varied from seven inches reported from sections of the T Bar country on the north-west of town to one and a half inches at Tredway. Those who had out improvised rainguages say that two and three-quarters inches fell in O'Donnell. Lakes and tanks are full and it is water, water everywhere.

Press dispatches say that the rain covered all of west Texas and in places amounting to waterspouts. East Texas also received a baptism which was detrimental to crops.

The O'Donnell country was never in better shape at this time of the year and prospects flattering for a bumper crop.

Loads of seed and farming implements are being hauled out to the farms and merchants report a stimulation in business since the rain.

Now watch O'Donnell country jump.

Siren Calls Out Fire Boys in Short Order

At 12 o'clock last Thursday night the fire alarm sounded and the city council which was in session at that hour timed the volunteers to see how quickly they would respond. Within six minutes every member was present rearing to go, but they didn't go, as the alarm had been turned in primarily to test the big electric siren and also to see how the boys would act in response to the call. Some of the boys were on hand in three minutes. This was a wonderful showing for the department and our citizens are proud to know that the boys can be depended upon to respond instantly to the sound of the siren.

Many of our citizens thought that a fire had broken out and promptly responded to help the volunteers should they need it, but when they found the cause of the alarm and noted the presence of all the firemen, all went home thankful that the training the boys had received was evidenced by their preparedness for an emergency.

Doak Makes Weather Predictions for Season

That the spring and summer months will have sufficient rain to keep crops growing is the prediction of C. H. Doak. Mr. Doak has spent all his life in West Texas and he has been a close observer of weather conditions and his predictions published in the Index the past two years hit the storm periods closely. Following are his predictions:

- May 2nd, storm period with rain on 4th or 5th.
- May 16th, local showers.
- July 25th, cloudy.
- July 27th, heavy rain.
- August 24th, thunder showers.
- September will be dry, with the exception of showers around the 10th, when considerable hail will fall.

Mr. Doak says that on account of the dry periods during the summer months, early crops will do much better than the late crops.

Take your calendar and mark Mr. Doak's predictions and see how near he comes to hitting the mark on the weather for this year.

Editor's Father Celebrates One Hundredth Birthday

Judge J. N. Kellis celebrated his one hundredth birthday at his home in Sterling City Tuesday and his baby son, who is also editor of the Index, and no baby chicken in age, attempted to be with his parents on this occasion, but as Chevys were not made to float in water, he was forced to turn back at Ackerly after having spent Monday night in the middle of the road. It is seldom that a man has an invitation to attend his father's hundredth birthday and it was a sore disappointment that we could not be present.

Chirping Chicks Will Soon Grow to Cacklers

The chirp of the chicks at the post office after the arrival of each mail will give one the impression of being in a hatchery. Thousands of baby chicks have been received this spring and more are coming each day. Mr. and Mrs. Joe T. Moore were in Saturday to receive a shipment for themselves and a lot for Lon Light. When these babies grow into cacklers there will be no egg famine in the O'Donnell country.

Rev. W. B. Hicks reports that there were twenty-four additions to the Methodist church at the meeting closed Monday night of last week. Rev. Hicks was appointed a delegate to represent the church at the General Conference to convene at Memphis, Tenn., on May 10. Funds for the delegate's expenses were raised by voluntary subscription.

New Parking Regulations Passed by City Council

The City Council at its last session passed ordinances regulating the parking of cars, turning of corners and jaywalking, all of which can be found in the ordinances published in this issue of the Index, and to save the embarrassment of facing the city court everyone should carefully read the ordinances.

City Marshal Winberly and Mayor Kibbe set concrete turning posts in the center of each of the business streets and marked the line in the center of the streets where cars should be parked Thursday and in a short time had all cars lined up in fine shape.

Everyone pronounced the new arrangement an improvement over the former method of parking against the curb.

Read the new laws.

Banquet Given Highway Officials At Lamesa

A delegation consisting of Ben T. Brown, C. E. Kelley, E. M. Wilder, B. J. Boyd and Dr. C. T. Kibbe attended a banquet at Lamesa last Monday night at which John Cage, State Highway Commissioner, and other road officials were entertained. The object of the get-together meeting was to ascertain the needs of the people served by the highways through this section and put them before the State Highway Commission.

A number of speeches were made and state aid was pledged by Mr. Cage. There were about fifty plates laid at the banquet.

Mrs. A. D. Brown Entertains Entre Nous Club

The Entre Nous Club met with Mrs. A. D. Brown last Saturday afternoon and bridge was enjoyed from 3 to 5. At the conclusion of the games it was found that high score went to Mrs. D. A. Baggett. Refreshments were served to Mesdames H. E. Brewer, A. W. Gibbs, V. E. Bonham, B. L. Cowden, D. A. Baggett, W. H. Crunk, B. J. Boyd and Miss Willie Schooler, member of the club, and guests, Mesdames J. R. Sanders, Ben T. Brown, C. T. Kibbe and H. E. Gillespie.

In the composition of the Index the report of the previous meeting of the club was lost after it had been given the society editor by the club's reporter.

TREDWAY NEWS

Another week has passed without rain. It is getting so dry feed will not come up.

Misses Thelma and Velma Glaston of Big Spring, visited friends Sunday.

Bill Stephens and Henry Stuart attended the singing convention at Hancock Sunday.

Mesquite won first game of baseball over Plainview Friday. This was the best game the Mesquite team had played. On the first half of the first inning, we had three men on bases when Hugh Sparkman came to bat and knocked the ball far over right field and scored the only home run made.

Mr. Falkner and family of Tahoka, were visiting in this community Sunday.

O. R. Davis of O'Donnell, was here visiting his brother Sunday.

A large crowd attended the party at Ned Smith's Saturday night and everyone had a good time.

A singing was held at the Mesquite church Sunday night which was greatly enjoyed.

Chair Round

O'Donnell Ball Team Makes Good Record

The O'Donnell base ball team has started off winning and the members are firm in their belief that they will wind up the season winning. The first game was played with Lamesa in which the local team won, but that was some time ago, and does not count, but it gave Lamesa boys to understand that they had a job on hand to defeat the O'Donnell boys. Three games were won last week.

The game with Tahoka could hardly be called a game but it gave our boys a chance for practice. Tahoka's pitchers, there were three, all went up in smoke, and so did the other players. Dallas Vaughn, pitcher for O'Donnell, had the Tahoka players' heads a swimming and they were afraid to go up to the plate. The batting average of our boys was good and Dallas Vaughn got two homers. Thady Gardenhire stole everything but home and he would stolen that only the coach told him not to. The line-up was, Estes Beaton, catcher, Dallas Vaughn, pitcher; Martin Lines, 1st base; Shaw Jones, 2nd base; Thady Gardenhire, short stop; Ray Lines 3rd base; Desmond Yandell, left field. The final score in this game was 18 to 3 in our favor.

There was a conflict in the Wilson game, the coach forgetting that he had a game with O'Donnell, naturally being a little excited over O'Donnell's record. After a five-inning game with Post, Wilson was left to our mercy. In five innings we played, our boys scored three runs to Wilson's one.

We appreciate the backing of our home people and we hope to see more take an interest in the next game.

HOME PRODUCTS FEED 250, TAHOKA

Women Serve Food Raised and Prepared in Lynn County

Food raised and prepared at the homes of the members of Lynn county home demonstration clubs was served to 250 at a banquet given Friday night at Tahoka by the clubs to the Phoebe Warner and the Kiwanis clubs of the county in recognition of the aid which the civic organizations have rendered the farm housewives. The dinner was of food, canned by the women themselves. Only the gelatin in which the desert was congealed, the coffee and sugar which went in it, were foreign products.

President "Happy" Smith of the Kiwanis club presided. Mrs. Galloway had charge of the serving. She is president of the Wilson home demonstration club. Miss Milly Halsey is home demonstration agent, whose teachings were responsible for the home preparation of the food.

Every guest registered, being furnished with a card and a pencil and asked to write his name, occupation, and residence.

County Judge Cain introduced the "official family" of Lynn county to the diners. The superintendent of the O'Donnell, Wilson and Tahoka schools were introduced and the editors of the newspapers of the county as well as the president of the Phebe K. Warner club and the mayor of Tahoka, and Mrs. W. B. Price of Lubbock, president of the seventh district T. F. W. C. Miss Blanche Bean, Miss Hazel Hammer and Mrs. J. V. Conner of Lubbock were guests.

Will Give Recital Wednesday Night

On Wednesday night of next week Mrs. W. A. Kercheville and Mrs. D. A. Baggett will present their pupils, Miss Roxie Hancock, reader, and Miss Sue Gates, pianist, in a duet recital at the State Theatre. In addition to the recital the Theatre will show the picture, "The Snob Buster", and there will be no raise in the price of admission.

The young ladies are popular with O'Donnell audiences and no doubt will draw a full house. Following

stop that
**CARBON
KNOCK**

CARBON KNOCK or motor detonation aside from being annoying greatly reduces power efficiency—combustion taking place before the complete rise of the piston. The mechanical method of correcting such knocks is to retard the spark which again reduces power efficiency.

Many gasoline mixtures have been devised which in a way might eliminate the knock but oftentimes the remedy is worse than the ailment.

In **NO-NOX Motor Fuel** we have the remedy without a single harmful feature—it positively takes the carbon knock out of the motor, and any motorist knows that this means easier and quicker acceleration, smoother running motor and More Power, less gear shifts and generally a more satisfactory operation of the car at a lower repair cost.

The ORANGE gas
at the sign of the **ORANGE DISC**

NO-NOX is Non-Noxious, Non-Poisonous and no more harmful to man or motor than ordinary gasoline. We ask you to try it, after that be your own judge.

NO-NOX is priced only three cents per gallon higher than *That Good Gulf Gasoline*.

GULF REFINING COMPANY

**Letter From Miller
Brothers 101 Ranch**

We have received the following letter from Miller Brothers 101 Ranch, Marland, Oklahoma.

"Mr. C. C. French, of the Fort Worth Stock Yards Company, was here last week and inspected our large herd of Duroc hogs, and advised us that you are in need of one or more carloads of bred gilts.

We have on hand at this time 300 head of bred gilts (pure bred non-registered), ready for shipment. These gilts will average in weight 200 to 225 pounds. They are bred from our very finest boars and sows and are of the same quality of stock for which we formerly received \$250 to \$300 per head at our public sales.

We have now decided to offer these gilts in carload lots only, 50 head or more, at \$50 each and allow the freight to your county. We will also pay the personal expense and railroad fare of your county agent to come here and make inspection and selection of the carload.

Should it be necessary to have time in which to place these hogs among your farmers and get their notes into the bank, where they are sold on credit, we will allow thirty days time, provided the payment of same is guaranteed by some bank.

All breeding stock is double immuned against cholera, tested for tuberculosis, dipped, and the car disinfected before leaving here and we would not allow any to be shipped that are not first class breeding stock.

Should you desire any number of the enclosed circulars for distribution among your farmers we will be pleased to send you as many as you can use. Kindly let us hear from you."

We believe these are responsible people and if any of your people are interested in thoroughbreds, this would be a good place to get them.

Respectfully,
Porter A. Whaley
Manager

**Baldrige Trades
Home For Land**

H. E. Baldrige of this city has made a deal whereby he becomes the owner of five additional sections of land near Clovis, N. M. The other party to the contract is Mrs. Alice B. Keenen of Clovis. As part consideration for the land Mr. Baldrige conveys his Tahoka home to Mrs. Keenen. This means that the Baldrige family will soon remove from Tahoka, temporarily at least. Two of the boys are already on the land making improvements. The Baldriges are old-time citizens of Tahoka and have had a prominent part in the development of the city and the surrounding country and it is to be hoped that the change of residence will not be permanent. The family are hopeful that the change will be beneficial to Mrs. Baldrige's health as she has been quite unwell for the past several months.

The Keenen family will not remove to Tahoka. We have not learned who will occupy the splendid Baldrige residence which figures in this deal. —Lynn County News.

NO NEED OF PRECAUTION

Dub—I'm going to marry a girl who can take a joke.

RED CROSS ENABLES MOTHERS TO ATTEND TEXAS STATE FAIR

The "Greatest Mother" Cares for Babies While Their Mothers See the Sights.

Women who never before had found it possible to attend the state fair were present at the West Texas Fair at Abilene, Texas, this year, according to reports received from that city at the division headquarters of the Southwestern Division, American Red Cross, in St. Louis. This was because the Red Cross of Abilene was on the job to assist the mothers in the care of their children and to give them an opportunity for resting when the sight-seeing of the fair became too strenuous.

"I never would have thought of coming to the fair," said one mother in expressing her appreciation of the care given her baby at the Red Cross tent during one day, "if I had not known that the Red Cross would be here to help me take care of my baby."

Babies of all sizes and ages were cared for in this day nursery and during the hour of the races there were 65 babies under the charge of the Red Cross nurse and volunteer helpers while their mothers cheered on the running horses, sharing the pleasure of their husbands in this "sport of kings."

Miss Mary Kennedy, Red Cross Advisory Nurse for Texas, for the Southwestern Division of the American Red Cross, was present and in charge of the tent. The Red Cross tent and First Aid station was set up by the Abilene Chapter and members of that chapter took turns in the management and conduct of its various departments.

The mothers who were able to enjoy the outing of this fair were unstinted in their praises of the courtesy, kindness and unfailing consideration of the Red Cross people who were in charge of the tent.

SOUTHWESTERN DIVISION ORIGINATES SYSTEM

Red Cross in Seven States Has Traveling Nutrition Teachers.

The Southwestern Division, American Red Cross, has originated a new form of nutrition instruction which is being copied by other divisions throughout the United States. The Southwestern Division embraces the states of Arkansas, Colorado, Kansas, Missouri, New Mexico, Oklahoma and Texas.

This plan is that of the itinerant nutrition worker. Three years ago two such workers were put into the field by the division. Last year the number was increased to seven and now there are twenty, with a constantly growing demand for more.

The itinerant nutrition worker is the worker who goes from chapter to chapter instructing classes in nutrition, talking to schools on proper food values, addressing Mothers' Clubs and other organizations on the importance of proper diet to correct the results of malnutrition among American children.

Here is the way the itinerant worker organizes her work, according to the Director of Nutrition Service in St. Louis: Under the advice of local physicians who made a school examination, she plans a program for the children suffering from malnutrition. This program consists of instruction to all school children, with special instruction to underweights under the advice of physicians, to mothers of children of pre-school age where these mothers are made to realize the relation of food to growth, to health, to bone development, teeth development and the relation of food to blood, even to heart action. In this mothers are shown pictures of animal experimentation, where growth is stunted from the absence of enough milk in diet, where legs become paralyzed when certain foods containing essential vitamins are kept from diet. Mothers also are given pre-natal instruction in relation of food to the development of the unborn child.

Home visits play a large part in the reaching of mothers and children. The itinerant worker remains in a chapter from two to six months in order to reach the entire community with this instruction. She also instructs local teachers in elementary nutrition and plans with them on how to carry on the work after she has gone. The following year she returns for another short period, checking up on the results of her former visit and then opening new classes.

In the states of the Southwestern Division the itinerant workers serve eleven chapters in Arkansas, three in Kansas, twelve in Missouri, six in Oklahoma and twenty-two in Texas.

In utility also there is strength. The Democrats are now preparing to build a scaffold out of the unused planks in the Republican platform. As to who will hang, sweeten

TRAFFIC ORDINANCE

At a special meeting of the City Council of the City of O'Donnell, Texas, a quorum being present, the following ordinance was passed:

Be it ordained by the City Council of O'Donnell, Texas, that who ever shall operate or drive any motor or other vehicle within the corporate limits of the City of O'Donnell at a greater rate of speed than 20 miles per hour shall be fined not less than \$5.00 nor more than \$200.00.

Who ever shall operate or drive any motor or other vehicle in a reckless manner within the corporate limits of the City of O'Donnell shall be fined not less than \$5.00 nor more than \$200.00.

Any person who operates within the corporate limits of the City of O'Donnell a motor vehicle not provided with adequate brakes kept in good working order, or any person having control or charge of a motor vehicle who shall allow such vehicle

to stand in any public street unattended without first effectively setting the brakes and stopping the motor thereon, shall be fined in any sum not exceeding \$100.00.

1. Every motor vehicle shall be equipped with a ball, gong, horn, whistle or other device, in good working order, capable of emitting an abrupt sound, adequate in volume to give warning of the approach of such motor vehicle to pedestrians and to driver or drivers of animals or other vehicles.

2. Every person operating a motor vehicle shall sound such bell, gong, horn, whistle or other device whenever necessary as a warning of danger but not at other times as would disturb the peace.

3. Every motor vehicle operated upon the streets within the incorporated limits of the City of O'Donnell, at night shall carry at the front at least two lighted lamps showing white lights and shall also carry at the rear one lighted lamp showing a red light.

4. Any person approaching an intersection upon the public streets of the City of O'Donnell with the intention of turning thereat, shall in turning keep to the right of the right of the center of such intersection; and in turning to the left shall run beyond the center of such intersection, passing to the right before turning such vehicle to the left.

5. Any person desiring to turn, stop, or change the course of such vehicle, shall give plainly visible signal, of such change by extending the left arm at right angle to the body when turning to the left, and when turning to the right the arm shall be extended upward, and upon stopping the arm shall be extended downward.

6. Fire engines in all cases will have the right-of-way with due regards to the safety of the public; provided that this provision shall not protect the driver or operator of any such vehicle or his employe or principal from the consequences of the arbitrary exercise of this right to the injury of another.

7. All pedestrians shall, upon hearing the fire engine approach shall stand on the side walks and all vehicles, then in motion, upon hearing the fire engine approach, shall be placed against the curb.

Any person operating a motor vehicle within the incorporated limits of the City of O'Donnell in violation with any of the seven preceding paragraphs shall be fined in any sum not to exceed \$100.00.

Parking

All vehicles shall be parked in the following manner, within the business district of the City of O'Donnell:

On Doak street between 8th street and 9th street, and on 8th street, between Doak street, and Baldrige street, and on Baldrige street, between 8th street, and 9th street, all vehicles shall be parked in the middle of said street.

All vehicles shall be parked as nearly as possible crossways of the street, and upon leaving such parking place shall head out (not back out). All vehicles parked on Doak street between 7th street, and 8th street, shall be parked on the west side of said street and headed into the curb at about 45 degrees angle. All vehicles parked on 9th street between Doak street and Baldrige street, may be parked on either side of the street, and headed into the curb at about 45 degrees angle.

Parking motor or other vehicles along side of curb on streets where center streets parking is established, will be permitted for not longer than 5 minutes.

The operator or driver of all vehicles, when desiring to change the course of such vehicle on streets where center parking is established may drive into the center of such street, come to a complete stop, then head out, turning to the left.

Whoever shall violate any of the parking rules herein set out shall be fined in any sum not exceeding \$100.00.

Any pedestrian who shall "jay" walk in the business section of the City of O'Donnell, on 8th street, at the intersections of Doak or Baldrige streets and on 9th street, at the intersection of Doak street, by crossing said streets other than upon the customary crosswalks at the intersections of said streets shall be fined in any sum not less than \$1.00 nor more than \$10.00.

Any person who shall in driving through a filling station without coming to a full stop therein shall be fined in any sum not exceeding \$10.00.

Any and all ordinances and parts of ordinances in conflict with the provisions of this ordinance are hereby repealed.

That the Charter rule requiring that all ordinances be read at two separate meetings be suspended, and the same is hereby suspended and this ordinance in view of the fact that an emergency exists, shall be in full force and effect from and after its passage and publication as required by law.

Passed and approved this the 19 day of April, A. D. 1926.

C. T. Kibbe, Mayor

(Attest:) E. S. Scrimshire, Sec'y

THE DAWSON COUNTY SINGING CONVENTION

The Semi-annual Singing Convention of Dawson County met at Hancock Saturday evening and Sunday. The attendance record of all previous conventions of this county was broken. Different persons estimated the number at 1500 persons. The Lubbock quartette, with Brooks and Burleson starring, was enjoyed by all and we hope these gentlemen will favor us often with their visits. Lamesa, O'Donnell and Klondyke also had splendid quartets. In passing, we feel that Mr.

and Mrs. W. W. Beeman of Klondyke deserve special mention. They are real musicians. President Kenison showed marked ability in arranging the mammoth audience in a way to get the best results. All officers of the convention were re-elected without opposition. Wilson won out in the race for the honor of entertaining the next convention, with Fairview and Key as strong contenders.

Even if red flannel underwear does come back it won't be safe for the modern girl to walk thru a bull pen.

"Concentration"

Thus is the old axiom, that reads—"IN UNITY THERE IS STRENGTH." An early Indian Chieftian demonstrated this by breaking sticks separately; yet collectively, they could not be broken.

In the war of 1864, the separation of the States was settled for all time. In the late World war, CONCENTRATION on the Western Front was all important.

CONCENTRATION of your banking business with a strong, safe friendly bank is equally advantageous to your personal or business affairs. It concentrates your funds for any immediate use and builds important reserve.

DIVERSITY SOUGHT BY POWER COMPANIES

The electric light and power companies have learned what the farmer is learning—and that is, that the success of their business depends upon diversity. They have found that diversity is important both in generation and in use of his power. If the power company can serve many different power users in the community it finds that it can serve them all with much less investment than if each tried to serve himself, says the Texas Public Service Information Bureau.

If one were to run a single elevator, he would require a generator and motor of a capacity able to lift the elevator with its load, but that generator will only work half the time—that is, when the elevator is going up. It will be idle when the elevator is coming down.

If one were to run a bank of twelve elevators, it is probable that he would only require generator cap a city sufficient for six, because it is fair to assume that only half of them would be going up at once—the other six would be coming down. Therefore, the motors and generators might be working all the time, and the cost of investment service would be cut in two.

This is the reason why the power companies are seeking diversity of application, and that is why they are seeking diversity in generation. Great Plants, economically located are tied together in one great transmission system. Similarly, cities having different time of application are all tied together in these great power systems in order to get the maximum service from the maximum investment.

City is tied with city now, instead of each being served by its local plant and electric lines reach out through the country for the purpose of making this economical network of power supply.

WHERE IS THE BLIND BABY?

Laws that care for the blind in the State of Texas do not include the child from the day of blindness, though that be at birth.

A special budget should be provided for these children to give them the care, maintenance and education in kindergartens—hospitals and homes combined, provided for them. If the mother will realize that the baby needs immediate care, she will report her blind baby, that it may have the hospital care especially, before the little body becomes twisted and deformed.

The present budget does not provide for babies and young and backward children. One family in Marfa, Texas, has four blind children, all too young to attend the State School. Where are the other children who should be in school? Report such blind children to Mrs. Francis Baugh Sunshine State Organizer in Blind Work, 4928 Live Oak, Dallas.

An effort is being made by the Texas ladies to make a census of the blind babies in the state—then the next step will be to appeal to the Legislature to provide for their immediate care in any institution with in or without the State equipped for them.

Other States pay \$1.50 a day for each child so appointed, and it graduates when old enough, to the State Schools or State classes for the blind, where it gets the higher education. Delay in sending the baby early often means its deterioration into a helpless and backward blind child.

To err is human; but to err again is supine.

"I AM JUST A POOR FARMER"

How many of you have heard the expression "I am just a poor farmer?" Isn't it just about time the farmer of this country quit demeaning their own occupation and took a little pride in it? Who ever heard of a merchant, a doctor, a lawyer or a brick mason talk about his job as though he were ashamed of it? Successful men and many who have not yet attained success, are proud of their occupation, trade or profession—all but the farmer—and not one of them has as much to be proud of as a farmer who successfully combats insects and variable weather and help feed and clothe the world.

When a man walks into a bank to borrow a little money he should go in with head up and talk business with the banker as one business man to another. If he is worthy of credit or has security, he will get his money, for that is what banks are for. If he goes with his hat in his hand and a hang dog appearance, the banker won't have much use for him "the bank is not putting out money just now", or "money is tight." So it is with farming. If farmers would spunk up and quit belittling their own job, they would find dealing with business men a real pleasure. Just so long as farmers make out that they are ignorant and occupy a lowly position in life, just so long will other people deal with them on that basis.—Farm & Ranch.

A will, written on a petticoat, disposing of a \$250,000 estate, recently was upheld in a Los Angeles court; thus proving again the power of a woman's skirt.

MAKING FARM RECORDS TALK

By D. H. OTIS
Agricultural Director,
American Bankers Association.

Any one who has driven an automobile in a new country knows the value of a good road map. Farm accounts, properly kept, are a reliable road map to aid the farmer in directing the business management of his farm.

In farming communities where records have been kept in considerable number it is not uncommon to find differences in net income of \$1,000 per farm between the average and the poorer farms of the community. It is also frequently found that there is a difference of over \$1,000 between the average farm and a few of the better farms of the community. These differences of from \$1,000 to \$2,000 per farm in the net income are of vital concern to any farm in any community.

Where to Get the Facts

Farm records and inventories will reveal the reasons for these differences. The various colleges of agriculture and the United States Department of Agriculture have a collection of records and farm management surveys from which they find it possible to construct standards or guides showing actual attainments under good systems of management. Figures of this kind are available to county agents and farmers who desire to use them. It is also possible to organize farm accounting groups in a community and with the help of the College of Agriculture to develop community standards showing what the average and what the better farms are doing. These standards or examples of what the more successful farms are doing, when handled in such a way as not to divulge the identity of the owners, are a wonderful help in pointing out to the less successful farmers the weak spots in the business management of their farms.

How to Use the Facts

The farmer who keeps a careful record of the factors relating to the business management of his farm is in position to compare his farm with the average and with the best in the volume of business, as number of acres, total investment, number of cows, total receipts and total expenses. He can check on his diversity of income by comparing his income from sale of cows, sale of livestock, livestock products and sales from miscellaneous sources. His quality of business can be studied by comparing such items as income per acre or income per cow, etc.

By such a process the farmer is in position to make his records talk to him and point out the weak and the strong features in his farm operation. There is no tax that we pay today that compares with the tax we pay for our ignorance. This is true on the farm as elsewhere. Farm records, including inventories from which it is easy to form financial statements, will do wonders in reducing the tax of ignorance and placing farm business on a business basis and inspire confidence in the farmer, himself and with all those with whom he deals.

Improvement Made In Chevrolet Coach

Recognizing the intense interest of the motorist in details of automobile construction which are ordinarily visible only during building processes the Chevrolet Motor Company has prepared a coach with both body and chassis cut completely in two.

Real "inside information" regarding the improved features of the new Chevrolet is obtained by a glance at the new cut-away model. Contrary to the practice of the old-time merchants who used to "put the best apples on top" this model exemplifies the policy of the motor car industry in seeing to give as full information as possible to the non-technical motorist who insists on knowing what is underneath the surface.

The interior of the motor and chassis are laid bare in every detail and every feature of the body—upholstering, seat construction, top, windshield and floor have been cut through, presenting a complete picture of materials and methods used

in building the car. How durability and comfort are built into the modern automobile are graphically shown.

Cylinder walls and housings covering various moving parts have been cut open permitting a full view of the new light skeleton pistons, the improved lubrication system, advanced rocker arm mechanism, and added cooling surface afforded by the new cylinder head construction.

The standard Fisher coach body has been ingeniously dissected, exposing the strong construction and artistic fittings of the closed car. Body-building, an art for centuries demanding the highest degree of skilled artisanship since the early days when craftsmen gloried in the title "Coach-builder to the King" is here exemplified in the minutest detail of modern perfection. Ingenuity of the builder is shown to have kept pace with the latest advances in chassis engineering.

The cut-away model is to be shipped to various dealers for display throughout the country.

JUST A SMILE

The thing that goes the farthest toward making life worth while That's worth the most, that costs the least.

Is just a pleasant smile.

'Tis full of worth and goodness, too.

Outlook for Farm Prices

WHOLESALE PRICES INDEX FOR THE CIVIL WAR AND WORLD WAR PERIODS (FOR THE YEAR 1914 TO 1926 INCLUSIVE, AND FOR THE WORLD YEAR 1914 TO 1926 INCLUSIVE)

Will prices go up or down, or remain stationary during the next decade? If you knew the answer to that question and knew how to take advantage of the situation, it would mean money in your pocket, according to the Sears-Roebuck Agricultural Foundation.

Dr. G. F. Warren, agricultural economist of Cornell university, has collected evidence on the price trend to be expected. He finds prices are acting in almost exactly the same way they did following the Civil war. The price level following the Civil war continued to fall for 13 years. Dr. Warren believes price levels in the United States will again act in this way.

The present huge supply of gold has much to do with the situation. Great Britain alone has sent to the United States since the beginning of the war more than \$1,800,000,000 worth of gold—nearly a quarter of all the gold money in the world. Before long, Dr. Warren thinks, Europe will take her gold back. Then prices will go down.

J. W. Briley of Okland, California came in Monday to visit J. D. Lile. Mr. Briley was very favorably impressed with the country and believes it has a great future.

The Birmingham News wants to know if there is any way to padlock a thirst. Yes, forget it.

Great as our inventors are they haven't yet made the Coolidge machine into a talking machine.

AN ORDINANCE

At a special meeting of the city Council of the City of O'Donnell, Texas, held April 19th 1926, a quorum being present, the following ordinance was passed:

Be it ordained by the city council of the city of O'Donnell, Texas, that all toilets now erected or to be erected, within the Corporate limits of the City of O'Donnell, shall not be built or placed over a pit, and where a pit now exists the toilet shall be moved from over the same and the pit shall be filled at once with dirt, except as provided in this ordinance.

Be it further ordained that an opening shall be made at the rear of all toilets of sufficient size to permit the removal of all refuse or accumulation, and that said opening shall be equipped with a covering or screen of sufficient material to prevent flies or other insects or small animals from entering therein.

Be it further ordained that where a vacant house now exists or shall in the future exist, that it shall be the duty of the owner of such property to place a lock upon the door of the toilet to said property to prevent the same from being used or to remove or have removed all refuse or accumulation from the toilet during the time such property is vacant.

Be it further ordained that it shall be the duty of owners or occupants of property within the resident district of the City of O'Donnell, to remove all refuse or accumulation from the toilets upon their premises at least twice each month, and it shall be the duty of all owners or occupants of property within the business district of the City of O'Donnell to remove or have removed all refuse or accumulation from the toilets upon their premises at least once a week.

Provided however, that the above provisions shall not in any manner be applicable to sanitary or acceptic toilets already built or to be built,

when same is built in accordance with the approval of the State Board of Health, except, that same shall be built in such a manner as to prevent flies, or other insects or small animals from entering therein.

That any person or persons violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor and upon conviction in the Corporation Courts of the City shall be fined in any sum not less than \$1.00 nor more than \$10.00 and each days violation shall be deemed and constituted a separate and distinct offense and punishable as such.

That any ordinance, or part thereof now in effect, in conflict with any of the provisions of this or-

dinance be expressly repealed, and the same is repealed and this ordinance in view of the fact that an emergency exists shall be in full force and effect immediately after its passage and publication as required by law.

All occupants of property having outdoor toilets, other than sanitary or acceptic toilets, shall provide lime or some other disinfectant, and shall use same freely each day such toilet is in use.

Any person violating this provision of the ordinance shall be fined in any sum not exceeding \$10.00.

Passed and approved this the 19th day of April 1926.

SEAGRAVES MAY GET ICE AND LIGHT PLANT

C. C. Jones, of O'Donnell, was in Seagraves Tuesday looking over the situation with a view of putting in a power plant. Mr. Jones was very favorably impressed and with this the third inquiry concerning the matter for the week, the Signal feels that it is not at all impossible that we of Seagraves will soon be enjoying the luxuries of electric lights with plenty of ice to keep us cool for the summer.—Seagraves Signal

It generally takes a car with a lot of fresh paint to attract a fresh girl with a lot of paint.

The annual meeting of the Woman's Societies of Northwest Texas met in Lubbock last week and drew quite a crowd from O'Donnell. Rev. W. E. Hicks, who headed the local delegation, states that there were about 500 delegates present, and in all, it was a very enjoyable affair.

THE BARGAIN HOUSE

When you want bargains in Groceries, The Bargain House is the place to trade. We compete with all reasonable competition. Prices are right every day in the week. Will buy your eggs and pay the best market price.—The Bargain House.

Transforming Steel Bars Into Ring Gears

Transforming a couple of miles of steel bars into ring gears for Ford cars is all in the day's work at the Highland Park Plant of the Ford Motor Company. Here, ingenious machinery which obviates all possibility of human error furnishes an interesting study in efficiency methods characteristic of Ford manufacture.

A mighty important feature is the line of power in this rear axle gear, although not much larger in size than a china saucer. As the principal driving agent between the live shaft and rear axle, it must not only be tough enough to stand strains, but must also be hard enough to resist wear, for a worn ring gear is a sure source of axle noises.

Quality is closely guarded in manufacturing these gears and the steel that goes into them is constantly held to the most rigid specifications. Arriving at the Highland Park Plant in long bars, it is cut to exactly the length required for the finished ring. The steel is heated white hot and in powerful machines, capable of hair's breadth accuracy is formed into a perfect circle. Then, by means of an electric current of tremendous amperage the butts of the ring are trimmed, hardened and gear teeth cut into them and it is interesting to note that at no stage of the development or even in the finished

product is it possible to detect the point where the weld was made.

This method of producing ring gears is doubtly significant in Ford car manufacture. In point of economy, it represents a material saving over stamping the ring out of steel plates—a method by which the disc cut out of the center of the ring and trim are wasted. Then, too, steel not unlike wood, has "grain" and it is obvious that a stamped-out ring must contain a certain amount of crossgrain. The Ford process, on the other hand, produces a ring entirely of long grain, a quality which contributes to the Ford car's freedom from rear axle troubles.

We're expecting at any time to see someone dig up an old blue law that prohibits saying there isn't any Santa Claus.

Dr. J. F. Campbell is in Dallas this week attending the annual meet of the National Medical Society.

Mr. and Mrs. D. R. McVickers of Plainview, spent the past week with their daughter, Mrs. Guy Bradley. They returned home Monday accompanied by their little grandson, Max C. Bradley.

To avoid the idolizing mob, Mary Pickford can't go down town shopping like other women. But look at the signs she saves by not having to look into the store windows at the things she couldn't get if she could go down town shopping.

It's time now to turn our attention from the Riff to the tariff.

A very important thing going on now is spring clothes.

IF INTERESTED IN MILITARY TRAINING APPLY NOW

According to an announcement by Brigadier General Ernest Hinds, Commanding Officer Eighth Corps Area, all interested in attending the Citizens Military Training Camps this summer should apply now.

The General stated that although the enrollment campaign has been in progress for about a month, over 1200 applications have been received. To be sure of receiving consideration before the quota is filled any young man who contemplates attendance, should apply without delay.

Camps will be held this year at Ft. Sam Houston, Texas, July 6 to August 4; Ft. Sill Okla. July 9 to Aug. 7; Ft. Crockett, Texas, July 1 to 30; Ft. Logan, Col., July 1 to 30; Ft. Huachuca, Arizona, July 22 to Aug. 13; Ft. Bliss, Texas July 22 to Aug. 20.

Any young man between the ages of 17 and 31 years interested in becoming a better citizen, improving himself morally and physically, should, unless he wants to be disappointed, write at once to the Chief of Staff, Organized reserves, 90th Division, Ft. Sam Houston, Texas 95th Division at Oklahoma City 103 Division, Denver Colo.; of the C. M. T. C. Officer, Eighth Corps Area, Ft. Sam Houston, Texas, for an application blank and apply for this thirty days of outdoor training as the guest of and at the expense of Uncle Sam.

Jose Gracia Algabeno, millionaire bull fighter, plans to enter the movies. Clever idea. He can then let his press agent do the bull throwing.

Woman's Case Amazes O'Donnell People

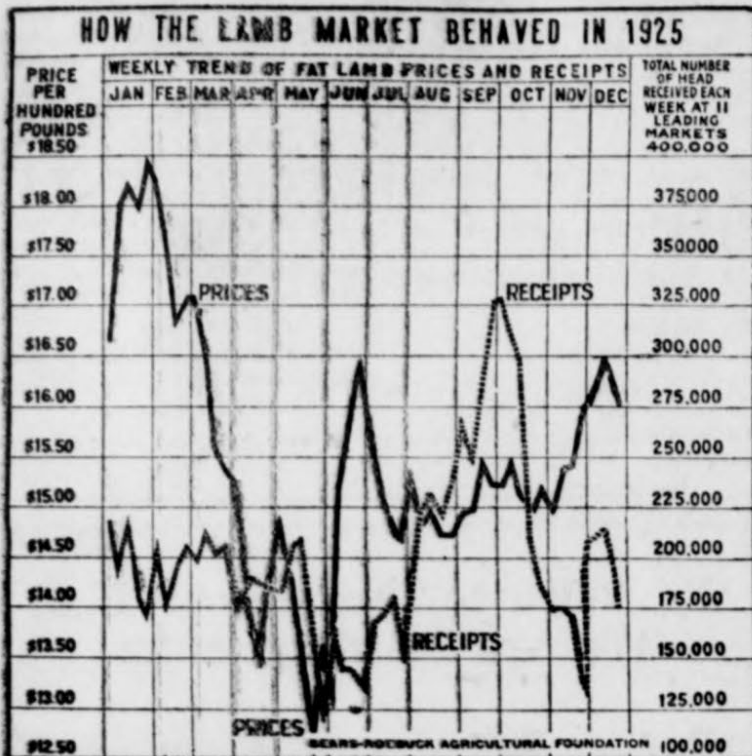

A business man's wife suffered for two years with sore, watery eyes, which pained day and night. Finally she tried camphor, hydrastis, witchhazel, etc., as mixed in Levoptik eye wash. This helped her AT ONCE. One small bottle usually helps ANY CASE of strained or inflamed eyes. Aluminum eye cup FREE. Hanev Drug Company.

LAMESA, TEXAS

PHONE—212

The prices for lamb have been relatively high in 1925, with lamb supplies available for slaughter only slightly below normal figures, according to an analysis of the lamb market by the Sears-Roebuck Agricultural Foundation. In the sheep-producing states pastures and ranges have been good. Conditions in the whole area west of the Rocky mountains are vastly better than they were a year ago.

The sheep industry was much more profitable in 1925 than it was in 1924. Lamb prices in Chicago averaged \$15.35 in November, 1925, as compared with an average of \$6.85 for the same month in the five years from 1909 to 1913. The top price was reached in January, at \$18.50 per hundredweight, and the low price of \$12.50 came in May. Both prices and receipts have fluctuated up and down through the entire season, but efforts to expand production have kept market receipts down because ranchers were retaining their ewe lambs with which to replenish and increase their flocks. The number of ewes slaughtered from July to September in 1925 is the smallest for that same period during the last four years.

The number of lambs on feed both in the corn belt and in the Western feeding districts is smaller than last year and some advance in the present price of lamb seems probable from now on. There will probably be a larger lamb crop, however, this spring and a moderately lower level of prices as these lambs come to market during 1926.

Ford

Highest in Quality Lowest in Price

The finest steels available are used in the manufacture of Ford cars. The plate glass for windshields and windows is as perfect as can be made. Upholstery material contains a larger percentage of wool than is ordinarily specified—even for much higher priced cars. The basic features of Ford design have never been improved upon by any manufacturer.

No other car offers greater dependability. The Ford car has won the favor of millions of users under every conceivable motoring condition. Its convenience is known and appreciated the world over; its performance is taken for granted.

Such quality is possible at Ford prices because every operation, from mining of ore to final as-

sembly, is under direct control of the Ford Motor Company.

Iron is taken from Ford mines in Michigan; coal from the Company's mines in Kentucky and West Virginia. Glass comes from Ford glass plants; wood from the Ford timber tracts in the North. Raw materials and finished products are carried over the Company's own transportation routes; coke ovens, blast furnaces, a steel mill, foundries and saw mills—all are part of this complete organization. There are even salvage plants, paper mill, cement plant, etc., to transform waste materials into useful by-products.

In this way every possible economy is effected. Under no other circumstances could Ford quality be had at Ford prices.

TWENTY-TWO YEARS OF LEADERSHIP

Young People Missionary Society Met Monday

The Young Peoples Missionary Society met at the Methodist parsonage Monday afternoon with eleven present. There were two members absent, but three new members enrolled.

Mrs. Hattie Wyatt Biggs, who was delegate to the Annual Conference at Lubbock last week, gave a talk on the night services. The others who attended the day services were asked what was of greatest importance and someone said "Wool-worths". It is true that many of the girls go riding, but we all had a big time, a fine lunch and a god program. Others said the girls' encampment was of most importance. Miss Verma Smith drew a picture of the four roads in life and our president asked for the picture and if there are no objections we will put it in our church.

"Each One, Win One," is our motto. Come and join us. We have a good society if we do say it ourselves, and we intend to do lots of work and have lots of fun, by the help of the Lord.

We have one-half section of good unimproved land for sale on the improvement plan. There is a bargain in this tract. See us at once for particulars. —Frost Land Co.

J. H. Burroughs Killed By Lightning Tuesday

J. H. Burroughs, 60 years old, pioneer pure seed breeder and director of both the State and local Texas Farm Bureau Cotton Association, was struck by lightning early Tuesday morning and instantly killed at his home, about twelve miles west of Lubbock.

The bolt is thought to have hit the top of his head and passed through his body to his right heel, as the top of his cap was burned out and the heel of his right shoe was knocked off. Burroughs was in his granary, 100 yards from the house when struck. He was found by his wife, who had missed him and who had also felt the shock of the lightning bolt. James Burroughs, son, was in another barn, about fifty yards from the one in which his father was struck, and was stunned by the shock for a minute but was not injured.

Mr. Burroughs was well known in O'Donnell. He attended a banquet at the McClung Hotel in February where he made an address to the farmers and business men.

Celebrates Eight Birthday With Party

Little Miss Sydney G. French celebrated her eight birthday with a party to a number of her friends on Tuesday of last week. After playing numbers of games, the children were led into the house where a table was beautifully decorated, the color scheme being green, pink and white. Refreshments were served to the following:

Thelma Williams, Anna Bell Estes Lois and Virginia Littlepage, Jim Ellen Wells, Velma Shumake, Mildred Singleton, Modene McLaurin, Mavis Hart, Margaret and W. B. Hicks, Jr. Perry Cox, Alice Joy Bowlin, Jewell Horn, Clydene Jones, Bertha May Holtzclaw, Mary Francis Northross, Wilton Austin Brown, Minnie Fay Montandon, Collins Scott, George Chelf, Clarinda Mary Sanders, Mary Parker, Fay Tomlinson, Ernestine Scrimshire, Kerry Musick, Julian and Syble Cathlene Veazy, Howard Scott, Kerry Musick, Julian and Syble Pirtle and Francis and Wynett Scott.

Born to Grandpa and Grandma E. J. Tredway on Monday night a fine girl. Mr. and Mrs. Nelson Isaacs are the parents of the little lady and with whom she will make her home, but the Tredway family will keep a close watch on her bringing up as they know just how this job should be done.

J. H. B. Kyle Moves To New Mexico

Just what our friend, J. H. B. Kyle meant by moving to New Mexico we do not understand, but since he is old enough to know his own business we will not complain. The first news we had of his change of location came in a letter from Rogers, N. M., in which he sends greetings to his old friends and says that he will always have a warm spot in his heart for the people of this county. He stated that a three and a half-inch rain had fallen and that everything was in fine shape. O'Donnell lost a fine citizen when Mr. Kyle moved away and his many friends her will always keep the lute string hanging out when he returns.

Mr. and Mrs. L. L. Petty returned first of the week from a trip to Corpus Christi and Rio Grande Valley. They were well pleased with the country visited and are considering moving to that country.

Young People Attend District Conference

The following members of the Junior Missionary Society of the Methodist church in care of their superintendent, Mrs. Harvey Everett went to Lubbock Wednesday to spend the day attending the annual conference which was in session in the city: Alice Busby, Julia Holtzclaw, Ina D. Everett, Beverly Wells, Kattie Mae Garner, Mary V. Shock, Lois Nelson, Margaret Hicks, Alice Joy Bowlin, Mavis Norma Hart, Lois and Eula Priest. One of the most interesting numbers of the day was a song rendered by these little girls.

Uncle Jim Nichols was in from his farm near T Bar Thursday and reported that between four and five inches of rain fell at his place Tuesday, putting the best season in the ground he has had in more than two years. Uncle Jim predicts a great crop for this year.

Mrs. F. M. Cox Passed Away Wednesday

Mrs. F. M. Cox died at the family home near O K school Wednesday morning at 2 o'clock, paralysis being the cause of her death. Mrs. Cox was 57 years, four months and seventeen days of age at her passing and is survived by a husband, and three sons and one daughter.

The funeral services were conducted at the Church of Christ Thursday morning by Elders W. A. Kercheville and T. L. Kimmell. Burial took place at the O'Donnell cemetery immediately following the services at the church. A large number of friends of the family attended both the funeral and burial services.

Deceased had lived here many years, being one of the first members of the local Church of Christ.

I. E. Zaxton and C. M. Udy of Lamesa, will install a windmill repair shop, with quarters at Higginbotham-Bartlett Company's yard.

Record Sales Made By Dodge Brothers In First Quarter

Retail sales of Dodge Brothers Motor Cars and Graham Brothers Trucks by dealers in the United States in the period from January 2 to April 3, 1926, established another phenomenal record with a total of 70,599 units as compared with 51,318, a gain of 19,281, or 37 per cent over the same period in 1925.

This high record was made in the face of bad weather conditions which prevailed throughout all sections of the United States during almost the entire period.

Shipments from the factory in the first three calendar months of

1926 likewise established a new high mark with a total of 86,351 units as compared with 59,378, a gain of 26,975 or 45 per cent over the same period in 1925.

Shipments of Dodge Brothers Motor Cars and Graham Brothers Trucks to satisfy the increasing demand of foreign dealers during the month of March reached the highest point ever recorded in the history of Dodge Brothers, Inc., with a gain of 50 per cent over the corresponding month of 1925. This total was 4460 compared with 2972 in March, 1925.

A substantial increase has been made each week in retail sales of Dodge Brothers Motor Cars and Graham Trucks thus far in 1926, the latest weekly record being established for the period ended April 3, when 9104 units were sold. This was a gain of 2574 or 39 per cent

over the best week in 1925 that ended April 11. Approves of the value of Dodge Brothers Motor Cars and Graham Trucks is strongly indicated by the vast sales record made in the first quarter of 1926 when weather conditions throughout the United States were not propitious.

Even Marion Ballew, Lon Light and Charles Weems admit that it rained. When these farmers say it rained you can put it down that the good old sky juice fell in great gobs.

O.D. Riddle and family left Sunday for Muse, Oklahoma, for a visit with relatives. While away Mr. Riddle will do his annual fishing and when he returns we may expect some big yarns about the ones that got away. Mr. Riddle says they catch big ones in Oklahoma; that is why he prefers to fish in that state.

R. O. Stark is on the limp this week as the result of a chair overturning with him Tuesday morning. He declares he was not asleep and fell out of the chair.

Misses Beverly Wells and Ida D. Everett were elected as delegates by the Junior Missionary Society of the Methodist church to attend the Annual Northwest Texas Conference at Lubbock. They went up Wednesday, returning Sunday with a good report of a splendid meeting.

A challenge has been issued by the filling station men to the candidates for public weigher for a game of base ball to be played at an early date. If played this promises to be an interesting game and it is likely that all business will suspend to witness it.

A horse will pull your car out of a ditch. And very often horse sense will pull you out.

Why is it that moths seldom make the mistake of eating a patch?

Methodist Conference Met At Brownfield

The Lubbock District Conference of the Methodist church convened at Brownfield yesterday and will continue through Sunday. One of the features of the meeting was a debate held on the opening day, the subject being, Resolved: "That Modernism Has Done More to Hinder the Progress of the Church Than Worldliness." The affirmative was represented by Revs. A. D. Jamison of Seagraves, and C. E. Duncan of Meadow; and the negative by Revs. J. W. Watson of Lamesa, and W. H. Hicks of O'Donnell.

Among the delegates representing the O'Donnell church are Rev. W. B. Hicks, Mr. and Mrs. W. H. Veazy, J. L. Schooler and A. F. Hutchison. There are others also attending as delegates by virtue of their official capacity in the local church.

The meeting will be presided over by Presiding Elder B. B. Doak, who will also preach a number of sermons.

Rev. L. C. Allen, field lecturer for the Gregory Orphans Home at Abilene, and his co-worker, P. T. Bedford, were here Wednesday soliciting aid for the home. They stated that they met with splendid success in collections for which they asked this paper to express appreciation to those who contributed. They also announced that the home is ready to take care of the orphan children of the county.

A perfectly appointed tea was given Saturday from 3 to 6 honoring Mrs. Harvey Everett's sister, Mrs. Ira Elkins of Post. The lovely home of Mrs. A. A. House was the setting for this pretty little party. The guest list consisted of the following Mesdames B. J. Boyd, B. F. Cowden, J. R. Sanders, Naymon Everett, E. L. Sorrels, and A. W. Gibbs.

Strikes never break anything but the participants.

If the lambs follow wherever the modern Marys go no wonder they look sheepish.

Rock Island No 126 Two-Row Go-Devil and Cultivator

Time and labor are big items in crop production. By cutting down on these items and still doing the work even better than before, you make more money off of your land.

The Rock Island No. 126 Two-Row Go-Devil and Cultivator is a highly profitable implement in listed corn and cotton, as it combines all the features necessary for successful cultivation at minimum cost. It is simple, effective, easy to operate, and has the necessary strength.

STEEL CONSTRUCTION

The Rock Island No. 126 Go-Devil and Cultivator is built to last. The frame is steel and malleable and is carried on pressed steel bell-shaped wheels with convex edge towards the ridge. The wheels can be adjusted easily to work in various width furrows. They can also be adjusted to lead in at the front, holding the machine in the furrow so that it cannot climb out, and can be reversed to follow the bed for later plowing.

FOUR CONVENIENT LEVERS

There are four levers on the Rock Island No. 126 Go-Devil and Cultivator, all located conveniently for

the operator, there being one shovel disc by means of a square shoulder fitting into the square of the disc and washer, and then cinched up with a heavy bolt. The bolt is kept tight adjusting lever and one raising lever on each side. Double plunger construction on the shovel levers gives fine depth adjustments—twice as fine as on most cultivators or Go-Devils.

Both shovels and discs are controlled by the main lever, which also controls the balance of the machine by rocking the frame on the wheels. The hitch is so arranged that the draft of the machine holds the discs and shovels to their work. The shovel levers allow the depth of the shovels to be regulated entirely independent of the discs. The shovels and discs are both easily adjustable as to width to meet varying conditions. The front or ridge shovels, which are furnished as an extra attachment, are to the side of the carrying wheels so that they work the ridges thoroughly.

Dirt cannot roll back and cover the young corn or cotton—long shields made of heavy sheet metal prevent this. When the discs are raised, the shields also are raised.

The frame of the Rock Island No.

126 Go-Devil and Cultivator is high and clear and does not interfere with the growing crop. The two sections are connected by a steel pipe.

OPERATOR ALWAYS IN CENTER

It makes no difference whether cultivating straight or very crooked rows, the operator is always in the center when riding the No. 126 Go-Devil and Cultivator. This is made possible by the equalizer. The No. 126 is especially adapted to hillside work, for the operator, being held central, gives an equal amount of pressure to either side, holding the machine to its work at all times. In no way can the levers interfere with the operator.

DOUBLE ACTING DISCS

By a simple adjustment of this cultivator the discs can be made to throw the dirt in or out at any desired width or angle.

An all-metal dust-proof bearing is used. It is held securely to the by a substantial lock nut. The bearing is also equipped with a hard oiler. Either large discs or small gang discs can be furnished.

Rock Island No. 162 Lister Cultivator

KNIFE ATTACHMENT

A very substantial all-steel knife attachment is furnished. Ample adjustments are provided for taking care of varying conditions. These long knives are set at the proper angles to cut and shed weeds to the best advantage. The knife attachment destroys the weeds from the bottom of furrow to center of ridges, leaving a fine mulch. These are particularly valuable in controlling the blue-weed and milkweed.

The following attachments also can be furnished:

Center yoke attachment to be used with regular shank in connection with knife attachment for cleaning center of furrow.

Eight-shovel attachment consists four beams and shanks to be used in connection with regular equipment for laying by cotton or corn.

Also can be used in connection with knife attachment.
