And so are the victories that have been won against diseases during this century of medical know-how. We are justly proud of our scientists who have vanguished so many one-time killers since 1900 and added 22 years to our life expectancy. But let's be proud of our share in this achievement, because we are the ones who gave our scientists the tools they needed for their great research projects. butions. Here in America we give - - time or money - - because we want to. And it pays off. Fresh in memory is the fight against polio. The American peo-ple bought and paid for the vic-tory against polio. We contribu-ted almost half a billion dollars over eighteen years. That's a lot of money, but can anyone doubt it was worth the return of the Salk Vaccine? Let's go back a few years and remember diabetes and tubercu-losis and thyphold and pneu-monia - just to mention a few other diseases that no longer take a heavy toll of mankind. And then let's give sober thou-git to the fact that April is Can-cer Corrol Month, and that can-cer is the number two disease killer in the United States today! The American Cancer Society believes science can and will find the tools for research. Let's keep this in mind when we hear a knock and open the door to a Cancer Crusader. The national goal is \$30,000,000. And multiply the Crusared by two million! That's the number of ACS volunteers who will visit their friends and neighbors to ask them to "fight cancer with a checkup and a check." Wouldn't you rather drive a clean, squeak-free car?

Of course you would. And it costs so little, takes so little time to have your car washed and properly lubricated at our Humble sign. Trained men do both jobs under careful supervision.

Let us wash your car every time it gets dirty; be <u>sure</u> to let us lubricate it after each 1000 miles of driving.

Call and we'll send for your car, br stop by and let us take you home or to the office. Your ear will be ready at the agreed-on time.

The bartender ran out with a quart of good red whiskey and the race was on as soon as he stepped clear. Down the Main Street to the first left hand road and then they turned east. Ten miles down the Leon River if they made it in time, lay a very stump and broke the pole, Doc intended to make it. The snow was not so bad until they star-ted down hill beyond the Cham-bers place and there the poles dropped to a trot, and the wheels ker, Tom Fox, Ed Ward, or Jun-ior had it happen to them. She was then an American army doctor. What she saw there, she told a reporter from the Portland Oregonian, was "en-ough to give you nightmares." Russia has gone "missile mad" she said. There was grim deter-mination on the part of students at Moscow university, with none in certain fields of science
