O'DONNELL INDEX PRESS

32nd year: No. 21

O'DONNELL, LYNN COUNTY, TEXAS, Wednesday, Jan. 5, 1955

\$1.50 PER YEAR

'55 Expected To Be A Good Year Here

An informal survey of 30 or so farmers and merchants showed the opinion that 1955 would be an excellent business year (depending, of course, on near normal or above normal moisture conditions.)

All but three men believe that the Great Drouth is on the way out. But to play safe, more irrigation wells are being drilled than at any time in history of this area. One driller said he had a backlog of drilling to last into the spring.

GOP Fear Is Gone
The farmers' initial fear of the Republican farm program is gone, and Democratic control of the Congress is another cheerful factor for the South. The rigid price support on cotton and various grains is a decided asset.

Bankers and farmers acknowledge that financial conditions are the best in three years and there will be only a normal amount of carry-over of debts. However, locally it is now a buyer's market and a buyer can now call his tune. New cars are selling nicely locally and fully 3-4 lbs of the families of this area have T.V. sets. Building is expected back after the drouth-enforced vacation. Although land is down \$15 to \$25 acre over 1949, good land is only rarely offered for sale.

Ah, What About The Drouth?
Certain factors indicate that the weather is edging into the wet cycle. The dry, sunny Mexican high pressure cell which made a health resort of O'Donnell in 1952-53, is NOT edging out of Southern Arizona. The normal traveling low pressure cells of the Pacific Northwest are again moving eastward and south thru the great interior bringing a welcomed circulation of moist Gulf air. Wet northers of snow, ice and bitter weather are signs of a normal trend instead of the summer in the winter seasons of last three years. Old timers will tell you that winters on these baldies were a fright 30 and 40 years ago.

(Clip this and run as fast as you can to Printer Smith and tell him that Printer Smith said your loan was o. k. according to our weather lore -- which calls for tubs galore in '55)

Mr. and Mrs. Charles Pickens of Ft. Worth visited his parents here recently.

TAKE TIME TO TAKE STOCK OF YOUR HEALTH

If you have not had an audit made recently of your physical assets and liabilities, go to your doctor now and have it done in the advice of the State Health Officer to all grown-ups in Texas. It is quite as important to check up on your physical resources as it is to look into the state of your financial possessions. By regular care under your physician's direction, you can conserve your physical assets and avoid the accumulation of destructive liabilities. Each of us starts with a certain amount of physical capital. Merely as a business proposition, it is worthwhile to conserve it to the best of our ability. In infancy and childhood our physical resources, as a rule, are safeguarded for us. As we grow older, the responsibility for doing so rests upon the individual. The critical period may come in middle life with the sudden realization that the physical capital is yielding diminishing returns in the way of physical well being. A large number of the deaths reported each year in Texas is due to the degenerative diseases of middle age. Nearly all of these diseases have slow beginnings, and their onset can often be recognized in the course of a thorough physical examination before they have gained serious headway. In the majority, early detection of menacing conditions with a readjustment of physical expenditures and a better budgeting of activities, under a physician's direction, will help to shift the balance from unfavorable to the favorable side of the ledger.

Farmers' May Retire

In a previous article in this series we told you about farm workers and self-employed farmers coming under social security many for the first time--on January 1, 1955. Beginning then earnings for farmers and farm hands will be counted under Social Security. But no doubt many of you are wondering what you are "buying" when you pay your social security taxes. You are buying old-age and survivors insurance; that is, when your earnings stop because of your death or because of your retirement at age 65 or later, payments will be made from the fund you helped build up, and will be made to you and your dependents, or to your survivors. Here are the types of benefits:

- RETIREMENT PAYMENTS
 - Monthly payments to you as a retired farm hand or farmer.
 - And monthly payments to your--
 - Wife, age 65 or over.
 - Child under 18.
 - Wife, regardless of age, if caring for child entitled to benefits.
 - Dependent husband.
- SURVIVORS' OR DEATH PAYMENTS
 - Monthly payments to your--
 - Widow, age 65 or over.
 - Widow, regardless of age, if caring for child entitled to benefits.
 - Child under 18.
 - Dependent widower, age 65 or over.
 - Dependent parent, age 65 or over.
 - Lump-sum payment to your--
 - Widow or widower, or
 - To the person who paid burial expenses.

Benefits for a retired worker run from \$30.00 per month to \$108.50 per month, depending on the amount of your past earnings from employment of self-employment covered by the Social Security Act. Family benefits may run as high as \$200.00 per month. For more information about social security for farm families, write to the Lubbock Social Security Administration office and ask for "Facts for Farm Families".

Facts from Can Manufacturers Institute

Q. Is it possible for two veterans to take Korean GI Bill farm training on the same farm? Or must each veteran-trafnee have his own farm?

A. Generally, each farm trainee is expected to train on a farm he owns or manages. However, two veterans may train on a single farm if conditions are favorable enough to insure successful training and eventual self employment for each.

Q. I am entitled to 36 months of training under the Korean GI Bill. Does that mean my GI on-the-farm training course can last for 36 months?

A. Not necessarily. The length of your farm training program will depend on how long it will take you to reach your objective. Your program is tailor-made to fit your own needs and experience; it may be shortened to take advantage of the training you already know.

Q. May I take on-the-farm training on a part time basis under the Korean GI Bill?

A. No. Under the law, GI farm training must be taken on a full time basis.

Q. I am taking Korean GI farm training. My school has just informed me that it has extended the length of the course beyond that which has been approved by VA. Will I get GI allowance payments for the extension?

A. No. GI allowances, under the law, may not be authorized for extensions beyond the period required to complete your approved training program.

Baby, It's Cold Inside!

THE AIR MAY BE HOT, the sun may bake—but inside that fishing basket it's co-o-o-ld! The fish will stay fresh for hours. A revolutionary container gives off as much cold as a 15-pound cake of ice. It's dripless, meltless and everlasting. Put it back in the "frig" and the zero cold is renewed for 24 hours. Wonderful for picnic baskets, too. It's called "Frigee-Freeze."

For sale: Higari bundles, also please return my row markers I loaned out. JIM STOKES
