

LARRY WARTES WEDS AT LUBBOCK

Miss Lora Joyce Hale, daughter of Mr and Mrs J. L. Hale of Lubbock, became the bride of Larry Van Wartes on Wednesday.

Kenneth Line Claimed At Brownfield

Funeral services were held for Kenneth Line, 7-year-old son of Mr and Mrs Martin Line of Brownfield.

Club News

Mrs Buster Phipps was hostess of the Wells H. D. Club March 20.

Each member agreed to send \$2.00 to the bake sale to be held at Lubbock March 24th.

The T H D A will meet at 8 p.m. on April 28th and the Chest X Ray in Bryan County will be among subjects discussed.

The next meeting will be in the home of Mrs W. F. McLaurin April 3rd.

Mrs Owen Egger and children of Lubbock visited Mr and Mrs J. J. Soudette over week end.

Johnny Saleh and Mr and Mrs Charles Pickens of University of Texas spent Easter at home.

Saturday there was an Easter egg hunt at the Methodist church at 2:30 p. m.; many children attended.

J. W. Gardenhire, Ervin Jones, and Johnny Vermillion attended a pep meet. at Ft. Worth last week.

Mr and Mrs Chas. Cathey spent Easter with her folks at Florence, Colo.

Mrs Maggie Floyd has been ill and is improved now.

Felix Jones, Preston Stokes, Mack Blocker and Rev. John Johns, W. L. Gilliam and Earl Greenlee are fishing at Possum Kingdom this week.

FFA Boys Sell Project Livestock

At the close of the South Plains Junior Fair stock show at Lubbock the FFA boys sold their livestock.

Table listing livestock sales: Bobbie Barnett, 1 pig \$33; Bobby James 2 calves \$504; Sunny Clark 1 calf \$326.25; Bonnie Gass 1 calf \$278.38; Cecil Kizer 1 lamb \$54; Egerman 1 lamb \$35.70; Norman Ledbetter 3 pigs \$144.74; Wendell Edwards, 1 lamb and 2 calves \$796.83; Lyle Gass 1 calf \$315.40; Kenneth Smith 1 calf \$337.76; Billy Ingle 1 calf \$358.55; Harold Hohn 2 calves \$636.24.

Army Boys To Ft Sill

Camp Chaffee, Ark. Three enlisted men of O'Donnell have been transferred to the Field Artillery Placement Training Center at Ft. Sill, Okla. after completing six weeks basic training with the 5th armored division here.

They are Pvt. James L. Rushing, a son of Mrs Florence E. Rushing, of route 1, Pvt. Floyd E. Davis, Jr., son of Lloyd E. Davis, Jr. of route 2, and Mrs Wm. A. Ledbetter, son of Mrs Wm. A. Ledbetter, of route 3 at Ft. Sill.

Also transferred was Pvt. Bob Clark, route C, Lamesa.

CARD OF THANKS

We wish to thank everyone who helped in our time of sorrow. We especially thank those who helped with the flowers, pallbearers, for those kind words of sympathy and helped in anyway.

Winnie Fairley, Mrs and Mrs J. D. Fairley and Mrs T. H. Dawson and Mrs Roy G. Cole and Mrs Joe Thompson and Mrs Chas. Nunnally and Mrs J. N. Line spent Easter with her sons and families at Dallas.

Wildcat Set For Area

On Star Section Near New Moore

Humble Oil and Refining Co. has scheduled a 11,500 foot well to be drilled in the Wells-Newmoore area.

The proposed venture is the No. 1 Laura Thomas, Drill site is 12 miles northeast of the Corrigan-Fussell man pool across the line in Terry County.

The well is 11,500 feet deep and is set to be drilled in the fall. The Magnolia No. 1 Caswell has been called a dry hole and capped after more than nine months of drilling and testing.

The No. 1 Carraway near draw is set to make a DST as well as the No. 1 Smith one well field west of town.

Breaks Arm

R. C. Fannon, who farms just east of town, suffered a fracture of his arm last Wednesday while cranking his tractor.

Week end guests of Mrs Rosa Gibbs and Mr and Mrs Joe Schooler were Mr and Mrs J. G. Schooler of Goldthwaite, Mr and Mrs Cecil Brown of San Saba, Mrs F. E. Norton of Dallas, Mr and Mrs Brad Gilbert and Stacey Jane of Lamesa.

Mr and Mrs Ernest Witte and son Raymond spent Easter in San Antonio.

Mr and Mrs W. L. Barton and Gerald visited at Ramonville over the week end.

School Briefs

Mrs Reeves and Mrs Hatter took the bookkeeping classes thru the Draughton's Business college at Lubbock recently.

The Senior Class lost a popular student last week when Sharon Oneal moved to Anson.

The boys were defeated recently when the next year's team took them 35 to 6. Leroy Gass scored the only T. D. for the Senators.

Another satisfied crowd of almost 300 attended the repeat performance of the senior play. The plays were as much as the first performance.

Meet A Senior

We now introduce another one of our seniors: Fern Simpson, daughter of Mr and Mrs Dick Simpson of Berry Flatt Community.

Subject: Short hand; teachers Mrs Line and Mrs Reaves; sport basketball, flower, white roses, food catfish; song: "It Is No Secret"; color: red; Pet peeve: BOYS.

The class enjoyed a skating party at Tahoka March 22nd.

Mr and Mrs Carl Coeherham of Morton are proud parents of a fine baby boy named Kem born in a Lamesa hospital.

Mr and Mrs Charlie Pryon spent week end at Anson visiting Mrs Pryon's brother and friends there.

Jack Walker, son of Mr and Mrs J. O. Walker of here, recently entered the Army.

Methodist Revival Starts April 8th

The Methodist Spring Revival will begin on Sunday April 8th and continue thru the 15th.

Dr. Kirby will be available for special services as the need may arise.

H A Longino, Pastor

The Senior class of Lamesa Hi School will present George Arnold's "Rhythm on Ice" at the Lamesa High School Gym.

Mr and Mrs Isaac Uedbetter and boys spent Easter at Colorado City.

Mr and Mrs E. C. Pace received painful injuries to her arm last week when her arm became caught in a springer at her home while she was washing.

Mr and Mrs E. C. Pace received painful injuries to her arm last week when her arm became caught in a springer at her home while she was washing.

CHAPEL PROGRAM GIVEN

Mrs. C A Doss 6th grade class had charge of the chapel program Thursday morning.

Visiting their parents Mr and Mrs W. E. Simmons and attending the funeral of their nephew, Kenneth and Irvin Simmons of Denver, Colo., Mrs Jessie Williams and children of San Angelo, Mr and Mrs Andy Simmons of San Antonio, Mr and Mrs Roy Lee Debusk and family.

Mr and Mrs Dick Harris and daughter visited in Lubbock Friday.

Mr and Mrs Roy Line home moved into their live room home on 8th street.

Mrs Glendon Stokes visited her parents Mr and Mrs R. G. Baggett at Ft. Worth Easter.

Mrs E. J. Tredway left Monday to visit her daughter, the M. L. Isaacs at Anton.

Mrs G. D. Phipps returned Friday to her home in San Antonio after spending several days here.

Leonard M. Miles Jr., seaman apprentice USN, son of Mr and Mrs L. M. Miles and Walter R. Billings, airman recruit, USN, son of Mr and Mrs Earl Billings, of here recently completed recruit training at the Naval Training center, San Diego, Calif.

FHA PLANS ASSEMBLY, TEA AND STYLE SHOW

The F. H. A Council met recently to complete plans for the rest of the year.

Mrs Connie Kast (a teacher in grade school) brother passed away Sunday evening; they had been at the bedside and had just returned when the message came.

Bond Issue Defeated

The \$200,000 Lynn County bond issue was defeated Saturday by a vote of approximately 6 to 1.

Elton Childress recently enlisted in the Navy; his address is: S. R. Elton L. Childress, Co. 51, 357 U. S. N. T. C., San Diego, 33 Calif.; you will want to write him.

Aunt Silly To Play Here Mar. 30, 31

To Play At Auditorium Church Of Christ Is Redecorating Interior

A treat to the community which comes only once in a blue moon is the Lions Club presentation of "Aunt Silly" here in the school auditorium Friday and Saturday.

Parade Is Excellent

Saturday afternoon there was an excellent parade advertising the program under the able direction of John Ellis and Tom Brewer.

Baby Contest Running

In the baby contest are the following children: Carolyn Barton, Vickie Bradley, Elaine Clayton, Vicki Cross, Kathleen Presley, James Henry Gibson, Richard Mansell, James G. Reed, Randy Shoemaker, Sidney Smith and Jimmy Todd.

"Aunt Silly" is built for fun! As suspected Aunt Silly is no lady at all.

The Easter Parade was enacted and sung by members of the class. The girls were dressed in their lovely formal and the boys in their Sunday's Best.

The high school band will play as well as the string band, a square dance and many other numbers.

A woman and her small son were looking into a dentist's showcase. The boy pointed and said: "You know, mom, if I had to wear false teeth, I'd take that pair."

Bank To Enlarge And Add Fixtures

In the air castle stage is the plan of the First National Bank to enlarge their building north taking in several office spaces now in the bank's building.

Negro Is Shot Here

Last Thursday night Lonzo Cole a local negro in his mid thirties, was shot in the hip and leg by pistol fire in a rear room of a building in the Flats.

The F. H. A Council met recently to complete plans for the rest of the year.

Mrs G. D. Phipps returned Friday to her home in San Antonio after spending several days here.

Leonard M. Miles Jr., seaman apprentice USN, son of Mr and Mrs L. M. Miles and Walter R. Billings, airman recruit, USN, son of Mr and Mrs Earl Billings, of here recently completed recruit training at the Naval Training center, San Diego, Calif.

FHA PLANS ASSEMBLY, TEA AND STYLE SHOW

The F. H. A Council met recently to complete plans for the rest of the year.

Mrs Connie Kast (a teacher in grade school) brother passed away Sunday evening; they had been at the bedside and had just returned when the message came.

Bond Issue Defeated

The \$200,000 Lynn County bond issue was defeated Saturday by a vote of approximately 6 to 1.

Work was started recently on the redecoration of the interior of the local Church of Christ building according to Roy Mills, an official of the Church.

GOOD NEIGHBORS MEET WITH MRS LANDERS

The Good Neighbors Club met with Mrs Tom Landers last Thursday and voted to piece quilts for Girls Town.

Mr and Mrs James Bowlin of the Rio Grande valley, are visiting here.

Tipiti To Move To Tahoka

Mr and Mrs Pete Tippit are moving their stock of groceries and store fixtures to Tahoka at the close of business Saturday.

Mr and Mrs Pete Tippit are moving their stock of groceries and store fixtures to Tahoka at the close of business Saturday.

Don'ts In Kite Flying

Five "don'ts" for boys and girls who fly kites were outlined this week by James Crumley, manager for Texas Electric Service Co here, in anticipation of the opening of the 1951 kite flying season.

First, don't fly kites near electric lines.

Second, don't use wire or metal cord for kite strings.

Third, don't use wire or metal in the kite frame.

Fourth, don't fly kites in the rain as even wet cotton string could become a conductor of electricity.

Fifth, don't attempt to remove a kite from electric poles or wires should it become entangled.

Local youngsters who fly kites have been very careful in the past about where and when they flew their kites.

THE READER'S DATE BOOK  
**Seventh Annual Sunday School Week Scheduled for April 9-15**

One of the most important observances for the home towns of America during the coming month will be the observance of National Non-Sectarian Sunday School Week, April 9-15. Sen. Styles Bridges of New Hampshire will serve as chairman of the 1951 observance.

The acceptance of Senator Bridges to be chairman during the week of the observance which is designed to increase by hundreds of thousands the regular attendance of children in Sunday schools of all faiths, was made public by Dr. Alfred P. Haake, chairman of the layman's national committee, a non-sectarian, non-profit organization, sponsoring the activities for the seventh year.

Senator Bridges in accepting the post of chairman said: "Ever since its inception, the National Non-Sectarian Sunday School Week has been a growing movement. It has the single objective in mind of impressing upon every American man, woman and child his responsibility to God and country.

"America was founded upon the principle that every nation's ultimate trust must be in God. "Today, in face of the world situation, I am more convinced than ever that that faith which was so much a part of the lives of the founding fathers of our country, must find a rebirth. In the minds of those who are trying to build a sane and peaceful world our nation and the other free nations of the world today are committed to a life and death struggle with atheistic communism. This battle can never be won alone by force of arms or diplomacy. The ultimate strength which America brings to this struggle must come from a people consecrated to the principle that spirituality is the final reality.

"I believe, without hesitation, that the layman's national committee, through the National Non-Sectarian Sunday School Week, can make a much needed contribution to the strengthening of the spiritual life of our nation.

"I have agreed to serve as chairman of this very important movement. Our task this year is to form a 'committee of 100,' consisting of 100 outstanding executives, representative of 100 different industries to serve as honorary vice chairmen."

People in all walks of life, in the home towns and cross roads of the nation, will be encouraged by proclamations and statements of their governors and mayors to make this week a major one in their communities. Veteran groups, industrial organizations, labor unions, civic and fraternal organizations, women's clubs, youth movements, chambers of commerce, and other organizations have been asked for personal participation.

Gen. Dwight D. Eisenhower, in a statement read at the recent convention of the American association of school administrators, expressed one of the purposes of the observance when he declared the development of integrity and civic responsibility in all American youths is an essential element in the defense of the American system of government and democratic life.

**RURAL ELECTRIFICATION**  
**Efficient Use of Electricity Is Vital in Time of National Crisis**

BY CLAUDE R. WICKARD  
Rural Electrification Administrator

Adequate supply and efficient use of electricity on the farm in time of national crisis can well spell the difference between ample production for wartime needs and serious shortages.

In the last decade and a half, electricity has proved itself an effective tool in producing more food with less human labor. The nation consequently has much to be thankful for because there are 3,000,000 more farms now than at the time of Pearl Harbor wired and ready to use the power of electricity.

An increasing number of farmers know what electricity can do for them. This is shown by how quickly they put this new power to more and more farm tasks once service is available.

Farm labor already is hard to find, and many materials important to the farmer will increase in scarcity. Electricity provides a means of offsetting these shortages because it enables the farmer to do more with less.

With nine out of ten farms already connected to the high-

This is the official poster to be used during the seventh annual observance of National Non-Sectarian Sunday School Week, April 9-15, 1951. It has already been posted throughout the nation.

**MODERN HEATING**  
**Dirt-Free Home for the Average American Rapidly Approaching**

The dawn of the dirt-free, dust-free home for the home owners of the nation, which will relieve the average housewife of endless hours of drudgery, is rapidly approaching.

The building industry reports that home builders in all parts of the country are not only installing air purifying devices to remove dust particles, but also are concealing the heating pipes and radiators in walls, ceilings and floors.

It's a far cry from the days of the 1870's when great-grandfather first installed a central heating system and gave up his attempt to heat his home with fireplaces.

Today the American home builder is taking cognizance of old Roman methods and is using hot water to heat his house and is burying the pipes out of sight and sound.

The Greeks may have had a word for it, but the Romans were the ones who pioneered heating practice. Their fabulous baths at Pompeii and Caracalla contained steam rooms, "hot rooms," and "cold rooms," all of which precluded a knowledge of the three basic heating means known today—hot water, steam and warm air—

and, of course, a smattering of air conditioning.

What is it for which heating experts have been searching all this time since the fall of Rome? To tell the truth, nobody was doing much searching at all in the thousand years immediately after Rome's eclipse. The fireplace served quite well, with all the functions of the home being done in, over or in front of it until the middle of the 18th century when Benjamin Franklin invented his stove.

This stove, a very neat invention at the time, was the forerunner of the modern warm air plant. It also was the grand-daddy of all dust dispensers and dehumidifiers. It used a large amount of fuel and gave off a minimum amount of heat.

**DURING THIS TIME**, the use of steam as a heating means also was evolved, first in England then in the United States. It's use followed, naturally enough, the development of the boiler and the radiator.

Hot water heating had its start in the chicken coop of one M. Bonnemain in the France of 1777. Mr. Bonnemain used a crude hot water loop to spur the incubation of chicks. Hot water, off to such a promising start, did not do well in competition with steam, however, until about 1920.

Today's homes are no longer uncertain compromises between heat and dirt, heat and health, and heat and cold. With radiant panels, or with radiators recessed or concealed in walls or baseboards, the full use of the space of the room is available. The air remains cool and sensibly moist, whatever the room temperature desired.

Proof of the economy and performance of modern hot water heating is its exclusive use in large developments like Levittown on Long Island, perhaps the largest heating installation in the world. Here, forced hot water systems supply heat to the radiant panel floors, and serve year round by furnishing the domestic hot water for baths, kitchens and laundries from the same boilers that heat the homes.

The perfection of radiant heating to the installations in general use today, leaves only one uncertainty—what now in heating? Where to go, short of atom heat? Home builders will have to wait and see, but whatever it is it will be good.

**STAGE-SCREEN-RADIO**  
By INEZ GERHARD

ALAN YOUNG is sitting pretty, with two picture assignments in his pocket—"Aaron Slick from Punkin Crick" and "Clarence"—and his own television show on CBS. But blond, mild-mannered Alan was just about ready to quit show busi-

ALAN YOUNG

ness not long ago; it had caved out from under him. He'd long been a radio star, had done fine in his only film, "Margie," but there was no demand for him. He was just about ready to take his family home to Toronto and tackle something else. Then one night he auditioned his television show—a sponsor grabbed it instantly for the west coast, east coast rights were sold soon afterward. Just what he deserved!

Marvin Miller, the radio announcer, seems typed for Oriental characterizations in movies. He played Ghengis Khan in "The Golden Horde," now is slated for the role of a Chinese black market operator in "Peking Express."

Anne Sargent's latest picture, "Three Guys Named Mike," opened in New York the same week that she stepped into the important role of Jocelyn McLeod in "The Road of Life" and began discussing new television assignments.

**GRASSROOTS**  
**Chinese Reds Laughed at MacArthur Across River**

By Wright A. Patterson

**HOW UTTERLY FUTILE** would be any United Nations armed force in preventing the suppressing acts of aggression was amply demonstrated by the Korean debacle. It was not any lack of ability on the part of MacArthur that caused that result; it was not any lack of valor on the part of United Nations' armed forces—it was the delay and lack of decision on the part of an international debating society. It was a case of "too many cooks spoiling the broth." It could not change its instructions to its field commander without debate.

The first instance of the inability to decide came when the United Nations forces reach the 38th parallel. MacArthur had instructions not to go beyond that line. It took better than a week to get those instructions changed. That more than a week of delay gave the North Koreans time to reorganize their shattered divisions; to get new arms and munitions from the Red Chinese army on the Manchurian border.

It prevented the total destruction of the North Korean army in North Korea. The job had to be done all over again, and before the Manchurian border was reached. The next stopping point was the Yalu river.

Just north of the Yalu river in Manchuria, a vast army of Red Chinese was being assembled. Into its camp was being poured vast numbers of transport vehicles and tanks. Great munition dumps were

being erected. There was no slightest question as to the purpose of it all.

The United Nations had an adequate supply of airplanes and bombs. Those planes and bombs could have destroyed the transport vehicles and tanks. They could have blown up the ammunition dumps and scattered the million men the camps contained. But MacArthur's instructions would not permit the firing of so much as a rifle across that river.

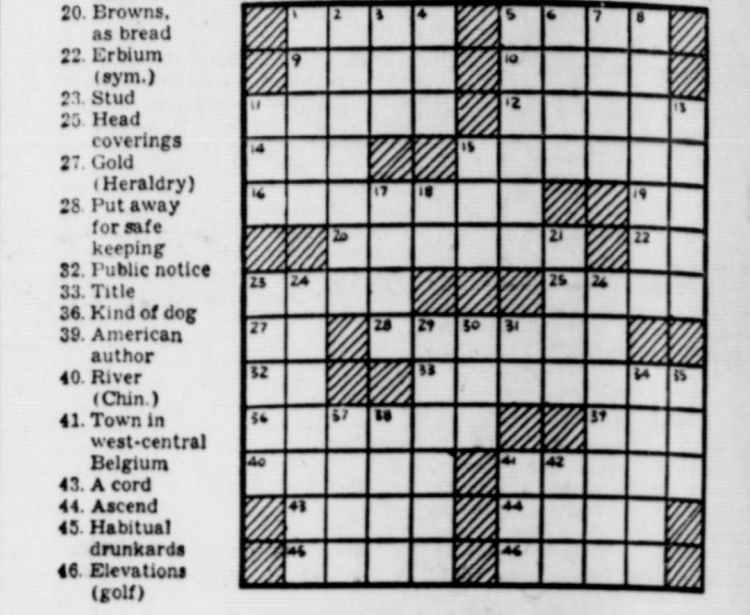

The planes at his command could neither fly beyond the south bank of the Yalu or drop so much as a fire cracker on the amounts of military supplies. But the North Koreans and the Red Chinese could stand on the north bank of that dividing stream and thumb their noses at the impatient United Nations troops on the south bank. Nothing could be done about that situation unless and until MacArthur received new instructions.

He waited, as he was ordered to do, while the discussion went on and on, and then came the attack. That Red army, with its transport vehicles, its tanks, its munitions crossed the Yalu, the debating society had talked too long, and the United Nations' forces in Korea paid the penalty for that delay.

What happened in Korea would be the inevitable result in any case where the activities of a United Nations force came under the orders and di-

**THE FICTION CORNER** COMPLETE WITH GADGETS

By Richard H. Wilkinson

DANA BRIDGES is a printer by trade, but every one says he should be a salesman. He has a very competent and confident manner. His choice of words is vivid, his gestures impressive, his delivery powerful.

Back in 1934 Dana bought a Northland Special Six. As every one knows the Northland is one of the most expensive cars on the market. Dana's income was not large, but he is the type of man who likes the best or nothing.

3 Minute Fiction

Dana was a painstaking type person and kept the machine in perfect order. The paint looked like new.

"In the long run a Northland is the best buy," he told his wife. "It will outlive three smaller and cheaper cars."

Rachael, Dana's wife, knew by experience that Dana usually knew what he was talking about.

So when Dana stated they ought to own a Northland she nodded and smiled and felt confident that everything would be all right. She didn't, however, anticipate owning and driving the same car for 16 years. Not that she minded too much. The Northland, as the world knows, is expensive enough so that the manufacturers don't have to change the design too radically each year. Fundamentally the 1934 Northland had the same lines that the new 1950 Super Special possessed.

"Why," Dana demanded when she hinted at such an idea. "The old hack's doing all right. No engine trouble. Looks good. Why swap her in?"

Moreover, Dana being a painstaking type of person, kept the machine in perfect order.

Nevertheless, it was an ancient hack and the neighbors used to giggle when the Bridges' drove by, and Rachael felt embarrassed and wished that they could have a new car.

After the Bridges' had owned their Northland seven years a salesman tried hard to sell Dana a new car. Dana listened to his talk and then asked what he'd offer for the 1934 model. The salesman named a figure so low that Dana got mad and kicked him off the place. And Rachael decided, with a sigh, that now their chances of buying a new automobile was remote indeed.

Not so flattering . . . Roscoe from group of Harvard Lampoon editors designating her "least successful actress of 1950."

She was right. For 16 years the Bridges' kept their Northland Special Six, and after awhile the neighbors stopped laughing and some of them began to think that maybe Dana was pretty smart.

IN THE SPRING of 1950 Dana drove his Northland Special down to the Northland salesroom and told the floorman he wanted to buy a new Super Special Eight, complete with radio, heater, clock and any other gadgets they had.

"Have you a car to trade in?" the salesman asked.

"Sure," Dana said. "It's a pip, too. A 1934 model."

"You mean, of course, a 1944 model," the salesman said politely.

"No," said Dana. "I mean 1934."

The salesman coughed. "I'm afraid we can't allow you very much on a car as old as that."

Dana waved an airy hand. "Take me to the president of this outfit. I can't be bothered with underlings." He glared at the salesman.

So a few minutes later Dana was ushered into the president's office. "Commer," he said to the president, beckoning him to the window. "See that shiny, good looking car out there? It's a Northland 1934 model. It's been driven over 200,000 miles. It runs as good as new. Looks as good as new, doesn't it? Now, look, Mr. President, would it or would it not be a good advertisement for you if you stuck that car in your show window and put a sign on it, saying it was 16 years old and has gone 200,000 miles and doesn't take that prove that a Northland can take the gaff?"

The president got his hat and went out and looked at Dana's car. "H. Drove it around the block. What kind of trade do you want?" he asked Dana.

"You mean, of course, a 1944 model," the salesman said politely.

"I'll swap you even," said Dana. "for a 1950 Super Special, complete with gadgets."

The president smiled, then sobered, then figured on the back of an envelope, then looked at Dana's car again, then nodded. "It's a deal," he said.

And now poor Rachael is wondering if she will have to wait another 16 years before she gets a new car.

**Careful Washing, Storage Can**  
**Add Years to Life of Glassware**

By Erta Haley

**G**LASSWARE ADDS beauty and grace to the table, but I find it needs replacing so often," sighs one homemaker. "I have a lot of odd glasses in my cupboard, the result of several sets," says another.

A bride, selecting her first goblets of fine American handmade glassware, or a homemaker with a cherished collection of beautiful pieces, can certainly add years of wear to the glass by following a few simple do's and don'ts in caring for it.

Many is the mother who can pass on to her daughter a set of beautiful glassware in perfect condition. Is it the glass, and how made? No, it's simply a matter of care.

Like fine china or even more durable silverware, glassware must have loving care and protection when stored. Fine glassware needs care when it's washed; it also rates adequate storage space.

If you pile stemware in a glass bowl, stack tumblers or crowd the pieces in a small space, you may expect them to get broken. If you stack them amidst china and silverware preparatory to washing, or try to wash several pieces all at one time, and then crack them against an unprotected sink, the glassware will reflect your careless handling.

You can make adequate space for glassware, if you'll re-organize the

**Polish Your Glassware**

Wash glassware a piece at a time so there is no chance of striking one piece against another. After a thorough rinsing, leave the glassware to dry alone, or dry immediately with a lint-free towel. Then polish carefully with a clean, dry towel to make the surface sparkle and gleam.

on drying glassware. One holds that glasses should be dried as quickly as they're rinsed with a lint-free towel. The other believes that glassware should be thoroughly rinsed in warm water, and left to dry alone. In either case, a final polish with a clean, dry towel makes the glasses gleam and sparkle.

Handmade glass vases, bowls and condiment pieces can be kept brilliantly clear by loosening sediment deposits with a solution of ammonia and water, or tea leaves soaked in vinegar. Always rinse the glasses carefully after this treatment.

Most of the delicate handmade glassware are thoroughly treated so they will not be affected by ordinary temperature changes. You need not worry about the house suddenly getting cold, after it's been warm, for example, and causing glasses to crack.

Glasses, when in use, however, should not be subjected to extreme temperatures. Before pouring a very hot liquid, such as coffee or tea into a glass, place a silver spoon in the glass or cup. Silver absorbs heat quickly, and thus prevents the glass from breaking.

If cups and plates have hot food on them, keep them away from cold metal, enamel or porcelain surfaces.

**Store Glassware In Adequate Space**  
A collection of fine glassware deserves adequate storage space not only to show it off properly, but to prevent accidents to the glass while it's stored.

Cups, glasses and stemware should be placed on shelves with enough room between them to prevent rubbing together, as this may well scratch the delicate surfaces. Place the glasses rim side up. If you line the shelves with a ribbed, rubber cushion, glassware is specially protected from knocks against the hard surface of a metal or wood cabinet.

Rubber storage racks are excellent for keeping glass plate and cups in an orderly and safe arrangement on shelves, especially those which are in danger of crowding.

Decorative glassware such as vases, bowls and candlesticks need not be stored in the kitchen, for there may be more room in living or dining rooms where they can add a note of beauty to the decorative scheme.

Cherished pieces which are used only occasionally can be stored away from daily activities. Use a high shelf in the kitchen, or a special section of a cabinet, where there is no danger of contact with other dishes and equipment.

When storing glasses, do not stack into each other. Edges are easily nicked in this way. If you do have two of them stuck together, fill the inner glass with cold water while immersing the outer in warm water to separate easily.

**Use These Tips For Easy Care**

If you're removing glasses from shelves that are hard to reach, use a steady ladder. You can set a tray, with a towel folded on the tray on top of the step ladder, and use this for placing several glasses on it, thus saving getting down for each glass.

This tray trick is good, too, for transporting glasses from kitchen to dining room, or back, as well as to the cabinets, after they're washed.

Never try to do the glassware without adequate towels. Linen or starched cotton toweling is best because it's lint-free. Hold glasses toward light to make certain they're clean and bright.

If, through careless handling, shallow nicks and rough edges occur, smooth these with a piece of 00 emery paper. It'll take persistence, but will produce results. Polish the edge with a little polishing rouge on a leather strap.

**Controlled Economy**

**R**APIDLY THE NATION is approaching a controlled economy and by June will be operating under a controlled materials plan. There are some who scoff at the necessity of such absolute control and the possibility of war with Russia.

President Truman, who wears the cloak of responsibility of the national welfare, is walking a tightrope of public opinion. If war does come, it is his responsibility to see that we have something more than a broom-stick army with which to wage that war. If it does not come, it is his responsibility to see that the civilian economy is kept on an even keel. The President's board of economic advisors believe, and apparently the President also believes, that this country is big enough and productive enough to have our cake and eat it. In other words if production is high enough and national income is great enough, then we can at one and the same time produce the armament necessary and still produce the civilian goods necessary to keep our standard of living on a high plane. That is the objective toward which those officials in control of the nation's mobilization efforts are working.

In one decade, from 1940 to 1950, the national income of the country rose from \$81,000,000,000 to \$250,000,000,000. In the same period taxes rose from \$2,600,000,000 to \$26,000,000,000. Profits on American business in 1950 exceeded all previous levels, increasing from \$9,300,000,000 in 1940 to \$48,000,000,000 before taxes in 1950. The estimated national income for 1952 is \$270,000,000,000. To pay for federal expenditures for the calendar year 1951 will require approximately 27 percent of that income. This percentage, plus state and local taxes, will reach 36 percent, which economists say is a heavy load, but not unbearable.

Inevitably in the process of keeping the economy on an even keel, some folks and some business will be hurt. And there will be the usual gripes and criticisms, characteristically American. However, if estimates come true, the future does not look too black.

**Investment Pays Off**

Back in the 1930's the federal government undertook another of those rescue operations called "socialistic" by many. To save the building, loan and savings institutions, the federal government invested \$125,000,000 in the capital stock of the Federal Home Loan Banks. Since January \$46,000,000 has been repaid the government and by July two of the eleven district banks will be owned entirely by their member banks. And on the investment the government has collected more than \$26,000,000 in dividends.

**Washington Silhouettes**

Alongside the Declaration of Independence and other important state papers in the Library of Congress, now reposes a collection of the great voices in music, including Caruso, McCormack, Schumann-Heink and others. At the presentation of RCA Victor were Rosa Ponselle and the widows of McCormack and Caruso. . . . Someone inquired for senator Kefauver in the senate foreign relations committee, to which Sen. Tom Connally of Texas drawled, "He ain't here, he's out chasing craps-shooters." Senator Kefauver is chairman of the committee investigating gambling. . . . The peaceful white-columned, yellow-walled St. John Episcopal church where many presidents have worshipped at 18th and H streets, across Lafayette park from the White House. . . . The district covered by the Mall from Washington monument to Lincoln Memorial was once known as "foggy bottoms" and from the top of Florida avenue hill on 13th street on some of these early spring mornings the entire area is covered by fog, sweeping in from the Potomac.

**RFC Probe Hot**

The senate committee headed by Senator Fulbright of Arkansas got hold of a hot one in the probe of the Reconstruction Finance Corporation. The committee charged some men on the White House staff used this influence to get loans for folks back home. But it turns out that there are on record some 900 letters from members of the congress, including Senator Fulbright himself, who have gone to bat for constituents back home to get RFC loans. Looks like the Arkansas senator threw a boomerang.

**VA Reports**

The veterans administration has just issued a report showing the tremendous volume of business done by that agency in behalf of the 18,904,000 living veterans under its charge and reported a sharp reduction in operating costs. But Dr. Robert L. Johnson, national chairman of the citizens committee for the Hoover report, has just issued another blast at VA, red tape and waste.

**Good Again**

**HADACOL Supplies Vitamins B1, B2, Niacin and Iron Which His System Lacked**

When a man works hard all day, he has to get a good night's sleep in order to keep going. Take Mr. Tony Wesalick of 1010 Tabor St., Houston, Texas, for example. Up until a few months ago Mr. Wesalick just couldn't sleep, had no appetite, and was bothered with indigestion. Then he heard about HADACOL and started taking it. A painter by profession, Mr. Wesalick says that now he gets up in the morning feeling so rested, and so full of energy that he's almost never tired any more. He eats everything he wants without being troubled with indigestion, and has a wonderful appetite since HADACOL helped overcome his deficiencies of Vitamins B1, B2, Niacin and Iron.

Here is Mr. Wesalick's own statement: "I was run-down and I would get up in the morning feeling as if I hadn't slept at all. My appetite was bad, and I just didn't feel like eating, and when I did eat I had terrible indigestion. After a bottle and a half of HADACOL I felt much better. I have now taken about five more bottles of HADACOL and can eat and enjoy everything I want to eat. I sleep much better and feel more rested. HADACOL has done this for me." If your druggist does not have HADACOL, order direct from The LeBlanc Corporation, Lafayette, Louisiana. Send no money. Just your name and address on a penny post card. Pay postman. State whether you want the \$3.50 hospital economy size or \$1.25 trial size. Remember, money cheerfully refunded unless you are 100% satisfied. —Adv. © 1950, The LeBlanc Corporation.

**666**  
LIQUID OR TABLETS  
**IS YOUR ANSWER TO**  
**COLDS' MISERIES**  
Here's why 666 is time tested. It's different. Try 666 yourself.

**DO YOU HATE**  
**CHANGE**  
**OF LIFE?**  
and  
**HOT FLUSHES?**

Do you suffer from hot flushes, nervous tension, upset emotions due to functional 'change of life' (38-52 years)—that period when fertility ebbs away, when embarrassing symptoms of this nature may betray your age? Then start taking Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. No other medicine of this type for women has such a long record of success. Taken regularly, Pinkham's Compound helps build up resistance against this annoying middle-age distress. Truly the woman's friend! Note: Or you may prefer Lydia E. Pinkham's TABLETS with added iron. Any druggist.

## Farm Efficiency, Assets Are Highest in History

Financially and physically, American agriculture is in the strongest position in its history to meet the production demands involved in the free world's rearmament effort, department of agriculture figures reveal.

One of the significant elements of agriculture's current strength is the growth of farmers' savings over the past decade combined with the relatively small rise in their aggregate debt. At the beginning of this year, farmers as a group held nearly \$22 billions in bank deposits, currency, U.S. savings bonds, and investments in cooperatives. This was more than four times the \$5 billion total of such liquid assets at the start of 1940. These figures do not include other savings such as life insurance. Farmers are known to have greatly increased their life insurance protection in recent years.

Aggregate farm debt at the beginning of this year was estimated at just under \$13 billions, as against \$10 billion on January 1, 1940. All this increase has been in the non-real estate category, a large part of it due to government crop loans.

### Big Freeze

The January cold wave that reached down into normally sunny Florida brought the worst disaster in the cattle raising history of the Okeechobee area. Thousands of cattle died when driving rain combined with freezing weather. The estimated livestock loss was near the million dollar mark. The picture above shows a few steers too weak to get on their feet. Many of them died before the freeze was over.

## "AUNT SILLY" TO PUAY HERE FRIDAY AND SATURDAY

Miss Helen C. Thomas, a professional dramatic coach, arrived in O'Donnell recently to assist the Lions Club in presenting the famous three act comedy success "AUNT SILLY" which will be presented on Friday and Saturday, March 30th and 31st at the O'Donnell High School Auditorium for the benefit of Underprivileged Children.

"Aunt Silly" is a gay comedy account of the hilarious experiences of a solid citizen who finds himself reluctantly impersonating a lady named Aunt Silly. The Silly antics of Aunt Silly will create a never to be forgotten evening of fun and laughter for all, says Miss Thomas.

There is a great deal of music, plus gay and interesting dancing choruses by O'Donnell talent. The Toyland Revue in which many small children will take part will be presented in the first scene just as the curtain opens. Many civic and business leaders will participate in the businessmen's chorus. They will give hilarious portrayals of many different characters while dressed as women.

### PUBLIC NOTICE

The City of O'Donnell is preparing its Tax Roll for 1950. Please call at the City office and render your taxes. Please attend this before May 1st  
L. T. BREWER  
City Secretary

In the pages of this report is the story of Southwestern Life's growth in Size, Strength and Service...

None of the assets owned by Southwestern Life is carried in the balance sheet at more than current market value. On December 31, 1950, the market value of the Company's bonds and stocks exceeded their book value shown in the Statement of Condition by more than \$1,000,000. A list of the bonds and stocks owned by the Company will be forwarded to policyowners who request it.

Year	Death Benefits Paid to Beneficiaries	Other Benefits Paid to Living Policyowners	Total
1935	\$ 1,842,094	\$ 2,975,688	\$ 4,817,782
1940	2,532,407	2,662,512	5,194,919
1945	3,246,134	2,669,038	5,915,172
1950	4,346,418	5,943,138	10,289,556

### For the Security and Welfare of Texans

Sales of new insurance and gain in insurance in force in 1950 were the greatest in the history of Southwestern Life Insurance Company. Texans purchased from the company more than \$115,000,000 of new life insurance. At the close of the year, \$829,222,742 of Southwestern Life Insurance was providing financial protection and personal security for more than a quarter of a million Texans and their dependents.

In 1950 Southwestern Life paid to 1,263 beneficiaries \$4,346,418 in death benefits. The deceased policyowners who had thus made provision for the continued welfare of these beneficiaries had been insured an average of 15 years and had lived to an average age of 55. Living policyowners who had saved for their own security were paid a total of \$5,943,138 or an average of \$23,398 for each business day in the year.

## Starter Fertilizing Insufficient for Crop Use of Fertilizer Alone Won't Build Corn Yields

One reason why some farmers swear at and not by fertilizer, is that they don't use enough plant food, the middle west soil improvement committee points out. Adding a small amount of "starter" fertilizer at planting time may get corn off to a quick start. But scanty applications often fail to

Well-fertilized deep-rooted legumes grown in rotation will build a reserve of plant food in soil and increase corn yields.

provide sufficient nourishment to carry the crop through the season on low fertility soils.

Without a reserve of plant food in the soil, the corn crop will starve in midsummer and not have enough nourishment to make ears.

The use of fertilizer alone will build corn yields on most farms. But for maximum yields, the farmer needs to build the soil's tilth structure and organic matter supply. When well-fertilized deep-rooted legumes are grown regularly in the rotation, the soil is mellowed and conditioned for high corn yields. There are extra reserves of crop-feeding organic matter available.

## Iowa Factories in 1950 Outproduced Iowa Farms

For the first time in 11 years, Iowa factories outproduced Iowa farms.

As of January it was estimated that Iowa factories turned out 2½ billion dollars' worth of food products, machinery, chemicals, drugs, printed matter and other goods. Sales of farm products in 1950 were estimated at more than \$2 billion, but no estimate was as high as \$2½ billion, even including the value of produce eaten and used on the farm.

Factory products frequently nosed farm products out of the number one spot in Iowa's economy between 1924 and 1939, although it usually was a close race.

In 1924, for instance, cash receipts from farm marketings totaled \$666,533,000 and manufactured products sold for \$685,276,088.

Farm production is expected to increase in Iowa during 1951, as elsewhere in the nation, but with the increased rearmament program in full swing, factory production will also increase.

Clip Dairy Cows—Care of the dairy herd includes clipping. Clipping helps produce clean milk, reduces labor needed in care of the herd, helps control cattle lice, and improves appearances of the cattle.

**Policemen  
Seen as Symbols**

By Lawrence Gould

May a law-abiding person hate policemen?

Answer: Yes. And the less contact he has had with them as human beings, the stronger the hatred may be. For the "officer" is much more than a person—he's a symbol, and this is one reason why he wears a uniform instead of being dressed like anyone else. He is the embodiment of the restrictions which society's requirements put on the natural onward. The more harshly our parents imposed these restrictions on us, the more we shall tend to see the man who is a symbol of them as one to be feared and hated.

Can music express humor?

Is an "understanding" person at a disadvantage?

Answer: On the surface, it may seem so. If you understand why someone is in a bad humor, which you know he would not make for you, and you may be tempted to resent the fact that you "have to do all the adjusting." But what you

are really envying is the other fellow's appearing to get away with being childish, even though your knowledge that childishness never is to anyone's advantage is what keeps you from acting as he does. Take the "long view" and you'll realize that the advantage is yours.

**LOOKING AT RELIGION**

HORSES WERE FIRST BROUGHT INTO USE IN ISRAEL AS A RESULT OF SOLOMON'S RELATIONS WITH EGYPT. HIS STABLES, BUILT OF MARBLE WERE CAPABLE OF ACCOMMODATING 2,000 HORSES. SOLOMON WAS THE FIRST TO RIDE IN A CHARIOT THROUGH THE STREETS OF JERUSALEM.

**KEEPING HEALTHY**

**Units for Studying Common Cold**

By Dr. James W. Barton

WE HAVE ALL HEARD of cancer units—groups of research laboratory workers, practicing physicians and chemists whose entire efforts are devoted to investigating the cause of cancer so that humanity may escape this terrible scourge. On the same pattern, cold units have been established, to learn more about the common cold which, while not fatal in itself, nevertheless is the cause of much suffering and loss of time from work. It is, as well, forerunner of such dangerous diseases as pneumonia, bronchopneumonia and tuberculosis. The findings of the Common Cold Research Unit, Harvard Hospital, Salisbury, Wilts, England, set up by the Medical Research Council and the Ministry of Health in 1946, are reported by Dr. C. H. Andrews in the British Lancet. The primary object of this cold unit was to try to find a laboratory technique with which colds could be conveniently studied. This object has not yet been reached. All attempts to cultivate a virus (the tiny organism believed causing colds) in fertile eggs or to infect by inoculation any laboratory animal other than the chimpanzee, failed. Notwithstanding the failure of this unit to cultivate the virus and learn more about colds, some important information about colds was obtained by a study of injections into the nose of substances causing infection, into 899 human volunteers over a period of two and one-half years. Volunteers were isolated in pairs for 10 days of which the first three days was the quarantine period. Inoculations were made on the fourth day, test and control material being identified by serial numbers so that during the course of each experiment neither observers nor volunteers knew which material had been injected. In a test of the efficacy of the quarantine period and isolation precautions, 47 volunteers receiving sterile injections (no organisms in the broth injections) only 2 developed doubtful mild colds and 45 had no symptoms whatever. Of those receiving injections of cold organisms, 60 per cent had symptoms of disease.

**HEALTH NOTES**

It is comforting to know that in so many instances nature provides extracts from animals to replace man's needs. Emotional ill health causes most lost time in industry. A thorough physical examination of the neurotic patient is most important. Removal of a clot in a portion of the brain has restored normal movement of the body and restored normal mental behavior. Mixing with others helps us to keep normal in our mental development. All gallstone patients are not overweight.

# CLASSIFIED DEPARTMENT

**AUTOS, TRUCKS & ACCESS.**  
TRUCK and moving van with moving permit in Texas, New Mexico, and Oklahoma. O. N. ALCORN, Station, Texas.

**BUSINESS & INVEST. OPPOR.**  
ELECTRICAL Contracting and Motor Repair Shop in Las Vegas, New Mexico, with established business. Yearly income \$12,000. Equipment materials, contracts and trucks. Write or phone BILE, Adams, N. Mex.

**FOR SALE—Farm machinery, business.** One of the best with plenty of territory to work. Location close to good fishing and hunting. If interested write to Box 274, Sutter, N. Mex.

**FOR SALE—Washeteria, 500-hp. machines.** New 30 model Maytags, food steam boiler, good business. 400 Ninth Prairieville St., Athens, Texas. Phone 5905.

**FOR SALE—Investor, \$100 or more; Locktau SMALL.** Investor at Detroit. 12% interest. Investment may be withdrawn anytime. POLY, 200 Michigan, Detroit 10 Michigan.

**FOR SALE—Nearest exit between Fort Worth and Waco, on Highway 81, center town, nice volume, sets to 36. Living quarters, double garage. Reason for selling, returning to defense construction work. N. A. PATTERSON, Roundup Cafe, Waco, Texas.**

**DOGS, CATS, PETS, ETC.**  
WEIMARANER puppies for sale, AKC registered, whelped May 8, 1950 from hunting dogs, reasonable prices. C. T. WILLIAMS, Heavener, Okla.

Amazing plastic reliner. Apply it only once... makes plates fit tight for years. Safe. Sure. Comes ready-to-apply strips. For uppers or lowers. In all drug counters. Satisfaction Guaranteed or Money Back

## HOUSEHOLD MEMOS... by Lynn Chambers

**Let Lunch Boxes Reflect Inspiration**  
(See Recipes Below)

**Adequate Lunch Boxes**  
IF YOU'VE BEEN packing lunches without respite for several months, chances are that both the lunch and you have fallen into a deadly sort of routine. It's easy to make the familiar things, but then it's not very interesting, either to pack or eat, is it?

Those boxes or packages opened at noon to furnish a meal are important to nutrition and well being. A great deal more than just a snack must go into them. It's essential they have the right amount of sustaining food value, energy units and vitamins, in addition to surprises so they'll do the right kind of job.

Smartly planned lunch boxes will also leave you with enough good things for the stay-at-home members of the family, so no planning is really necessary for an extra meal. You'll be getting two meals with variety and sound nutrition, for the effort it takes to plan one. Isn't it worth it?

Lunch in a box will be a real adventure if it is specially delicious and varied from day to day. Little extra surprises tucked into corners may include cookies, peanuts, dates and raisins. Be sure to include at least one-third of the day's food needs and try to have variety and texture, color and flavors.

**A LUNCH BOX plan** may include a thermos of hot soup for cool days, or milk or iced tea or hot coffee when the thermos is not in use. Milk should always be included in a child's lunch, while the other beverages may go into an adult lunch.

Give them a large, nourishing sandwich, and include pickles or relishes, a deviled egg, or a salad in a covered carton or plastic container. Fruit, cookies, cake, or even puddings in covered containers are excellent for dessert.

**Celery and Green Pepper Sandwich**  
1 1/2 cups shredded American cheese  
1/4 cup chopped celery  
1/4 cup chopped green pepper  
1/4 cup salad dressing  
Whole wheat bread  
Combine the cheese, celery, green pepper and salad dressing. Spread between slices of bread.  
**Sandwich Filling Ideas**  
**Cabbage and Peanut:** Combine 1/2 cup chopped cabbage, 1/2 cup chopped peanuts, 3 tablespoons mayonnaise.  
**Cream Cheese and Dried Beef:** Combine 1 3-ounce package cream cheese, 1/4 cup chopped dried beef, 2 tablespoons cream, 1 teaspoon grated onion, and 1/4 teaspoon Worcestershire sauce; blend well.  
**Cottage Cheese and Green Pepper:** Combine 1 1/2 cups well-drained cottage cheese, 3 tablespoons chopped green pepper, 2 tablespoons chopped green onion, and 1/2 teaspoon salt.  
**Bacon and Egg:** Combine 2 hard-cooked eggs, diced, with 4 slices bacon, fried crisp and chopped. Add 1/4 teaspoon salt and 1 1/2 tablespoons mayonnaise.

**LYNN SAYS:**  
Perk up Those Lunches With these Ideas  
Don't leave those corners of the lunch box empty. Fill them with munchy surprises such as cheese balls rolled in nuts, bags of peanuts or other nuts, cheese-stuffed celery, small bunches of grapes or clusters of seasonal berries.  
When sandwiches get tiring, have an occasional lunch with a fried chicken and potato salad combination; or meat salad and crackers as the mainstay.

**LYNN CHAMBERS' MENU**  
Consomme with Noodles  
Frankfurters with Sauerkraut  
Green Peas  
Skillet-Fried Potatoes  
Pear-Apricot Salad  
Hard Rolls Beverage  
Creamy Rice Pudding  
Recipe Given

**Vegetable Salad**  
Raw Julienned carrots  
Shredded raw cabbage  
Cooked peas  
Salad dressing  
Salt, pepper  
Toss all ingredients together, using salad dressing to moisten well, and salt and pepper to taste. For each lunch put a portion of the salad in a dixie-type cup, with cover.

**Banana Cup Cakes**  
(Makes 14 large cup cakes)  
1 1/2 cups sifted all-purpose flour  
1 teaspoon baking powder  
1/2 teaspoon soda  
1/2 teaspoon salt  
1/2 teaspoon cinnamon  
1/4 teaspoon nutmeg  
1/4 teaspoon cloves  
1/2 cup shortening  
1 teaspoon vanilla  
1/2 cup sugar  
1 egg, unbeaten  
1/2 cup mashed bananas  
Sift flour with baking powder, soda, salt and spices three times. Cream shortening and vanilla, adding sugar gradually, until light and fluffy. Add egg, beat well. Add flour mixture and banana pulp. Beat until well blended. Fill paper baking cups or greased muffin pans 2/3 full. Bake in a moderate oven (375°) until cake springs back when lightly touched, about 20 minutes. Cool. Frost if desired.

**\*Creamy Rice Pudding**  
(Serves 6)  
4 cups milk  
1/4 cup rice, washed  
1/2 teaspoon salt  
2 eggs, beaten slightly  
1/4 cup sugar  
1 cup seedless raisins, washed  
1 teaspoon vanilla, optional  
1/4 teaspoon nutmeg  
Combine milk, rice and salt in top of a double boiler, and cook over hot water until rice is tender stirring occasionally. Beat eggs slightly and add a part of the hot rice mixture, stirring to blend. Add egg-rice mixture to the remaining rice in double boiler. Add ingredients; stir well and pour into a well-buttered 1 1/2-quart casserole; place in pan of hot water and bake in a moderate oven (350°) for 45 to 60 minutes, or until a clean knife inserted in the center comes out clean. Stir rice a few times, inserting spoon near edge of dish without disturbing top brown skin. For individual puddings, pour into individual custard cups and bake in a pan of hot water.

**Peach Polly Pudding**  
(Serves 6)  
1 quart peaches  
1/2 cup minute tapioca  
1 tablespoon lemon juice  
1/4 cup sugar  
1 tablespoon butter  
Arrange a layer of peaches in a buttered baking dish. Pour over the top the juice from the peaches to which has been added, lemon juice, sugar, and tapioca. Dot with butter. Bake at 375° to 400° for about 1 hour.

Fill the vacuum bottle with milk, cocoa, flavored milk drink or a hot cream soup. For variety add some pudding such as custard to get in the day's quota of milk.  
If you pack lunches, plan a large enough roast on Sunday so you can slice enough for sandwiches on Monday. Jelly or relish spread on the sliced roast makes a delightful sandwich for variety.

Good fillings for sandwiches that are to be frozen include meat, cheese, fish, peanut butter, chicken or chopped eggs (not sliced).

## THE BIBLE SPEAKS

International Uniform Sunday School Lessons  
By DR. KENNETH J. FOREMAN

SCRIPTURE: Genesis 1-2; Psalm 104; John 1:1-9.  
DEVOTIONAL READING: Psalm 19: 1-6.

### God Invented Us

Lesson for April 1, 1951

"GOD INVENTED it," says C. S. Lewis about the universe. It is a 20th-century way of saying what the Bible says about God and the world. There have been whole religious based on the idea that God is good and spirit is good, but anything which is not God or not spirit is bad. If this were true, then our bodies would be bad, and all the physical world about us would be bad; our souls would be prisoners, so to speak, in a vast fortress of evil.

This is not the truth the Bible tells. The story of Creation in Genesis tells us that when God had finished with making the world he saw that it was good, very good. He invented the world, he invented spirit and matter both, he invented us body and soul. Whatever evil is now in the world and in man did not come from God, it is not a mistake of God's. The world, as God invented it and intends it, is good.

**The World Did not Happen**  
THE Christian church has changed some of its ideas about creation, but it has never ceased to believe in creation. Very few churches, if any, now affirm that the world was created in precisely six 24-hour days, and still fewer would be willing to name the dates on which creation took place.

Nevertheless the Christian church has not given up, and will not give up, her belief that God created all things. The doctrine of creation means, first of all, that the one God willed the universe and what is in it. The universe did not happen. It did not make itself. It was not made by different gods working against one another. Zoroastrianism, for instance, teaches that the world was made by two gods, one of light and one of darkness. Whatever the god of light created, the god of darkness would make something exactly opposite. No, Jews and Christians alike say, there is only one Creator, the infinitely wise and good God.

**Nature's Laws**  
NON-RELIGIOUS philosophers have sometimes said that the world explains itself. But Christian philosophers, not to mention Jewish ones as well, have seen that the world does not explain itself. There is too much evidence of purpose and design running through the patterns of the universe. Definite laws can be discovered and to some degree understood.

The same laws which govern matter on this planet, and indeed the very same elements, the "building-blocks of the universe," are to be discovered in the remotest stars. If the universe were an accident it would not be tied together as it is. It would not be a universe of law but one in which nothing could be counted on, nothing expected. It would be no universe but a multiverse, a mad world, indeed no world at all but an infinite confusion.

**Why Are We Here?**  
BUT CREATION means something more personal. It means that we ourselves have been called into existence by the Almighty,—not by a god of mere sheer power, but by the one God of infinite and all-powerful Love. Man is not here on this planet by some trick of blind fate, mankind is not a mere fleck of foam tossed up by the restless ocean of the Infinite soon to be washed away in the ebbing tides. Man—that means also, we ourselves —are God's invention.

We are not now as he intended us, to be sure; sin has changed the picture sadly, as we shall be thinking next week. Why are we here? We are here because God put us here. This means that life has a meaning; but also that we cannot find that meaning without knowing the will of God. His will is for our welfare; only the Creator knows what is best for his creatures. God intended this world to be used by us, not abused. When any man or group of men get the notion that this world belongs to them alone; or when one generation misuses the resources of the lands and the waters, leaving to their descendants a wasted earth, then God's will in creation is being defied. But when we take his will as life's guide, we are on the way to fulfilling his purpose in creation.

## NEEDLEWORK PATTERNS

### Embroider These Towel Designs

**Misses Moses**  
A little four-year-old suddenly lost interest in Sunday school. She had enjoyed so much learning about Moses that her mother could not understand the change of attitude. "Why don't you want to go, daughter?" she asked. "Oh," was the astonishing reply, "I don't like to go to Sunday school since Moses died."

**Good Memory**  
A school teacher who had been telling a class of small pupils the story of the discovery of America by Columbus, ended with: "And all this happened more than 400 years ago." A little boy, his eyes wide open with wonder, said, after a moment's thought: "Gee! What a memory you've got."

**WHAT MAKES BLUE TAG BRAND SEEDS SO GOOD, DAD?**  
WELL, SON, THEY ARE CAREFULLY SELECTED SEEDS, AND MOST KINDS ARE TREATED WITH SPECIAL SEED DISINFECTANTS TO DESTROY DISEASE BACTERIA AND CHECK SEED ROTTING.

### TEXAS COOK FIRST PRIZE WINNER AT 1950 STATE FAIR

One of Texas' leading cooks is Mrs. Ben D. Atwell of Hutchins. Mrs. Atwell's friends and family have always praised her cooking and weren't surprised when she won a big first prize at the 1950 Texas State Fair. Like so many champion cooks, Mrs. Atwell says Fleischmann's New Improved Active Dry Yeast helps her get better results. "It's faster rising," she says. "Easier to use. This New Dry Yeast dissolves in a jiffy!"

Do you know — the world's most delicious treats are made with yeast! The delectable flavor and nourishing goodness of yeast-raised goodies make them everybody's favorite!

When you bake at home—do it with yeast... the best yeast. Fleischmann's New Improved Active Dry Yeast is easier, faster, gives better results. Just add it to warm water and stir it well... it's ready to use! Get several packages today.

## Mother of Two Praises Hadacol

HADACOL Supplies Deficient Systems With Vitamins B<sub>1</sub>, B<sub>2</sub>, Niacin and Iron

Mrs. Elmer Hisel, 3225 2nd Ave., Council Bluffs, Iowa, is a good mother, and like all good mothers she keeps a careful watch for the welfare of her two young children.

And when little four-year-old Lucille Hisel wasn't feeling as her mother knew she should do something about it, Mrs. Hisel gave Lucille HADACOL because she had heard how much it was helping children who had poor appetites and stomach distress caused by deficiencies of Vitamins B<sub>1</sub>, B<sub>2</sub>, Iron and Niacin. It helped her so much that Mrs. Hisel gives HADACOL to both of her children.

Here is what Mrs. Hisel says: "My daughter has taken two bottles of HADACOL and she has been eating more than before and also sleeping better. I think HADACOL is the best thing for children who do not have an appetite. My daughter is four years old. Before taking HADACOL my daughter complained of her stomach hurting her and I got her a bottle of HADACOL and she says her stomach doesn't bother her any more. I think HADACOL is wonderful. I am also giving HADACOL to my three-year-old daughter."

HADACOL is so Effective. An important thing about HADACOL is that you get Vitamins B<sub>1</sub>, B<sub>2</sub>, Niacin and Iron in liquid form, which means that they are quickly absorbed and dispatched to the blood stream, ready to go right to work. HADACOL helps build up the hemoglobin content of the blood (when iron is needed) to carry these precious Vitamins and Minerals to every part of your body.

### OUR THANKS

Effective the Close of Business Saturday nite we are moving our stock and fixtures to our Grocery at Tahoka which has recently become vacant.

At this time we wish to express our thanks to our many customers and friends. Our stay with you has been a happy one.

When in Tahoka drop by and visit with us.

Mr and Mrs Pete Tippit
