Troop #366 Attends Camp For Scouts

On Saturday, April 16, Brownie Troop #366 attended the Brownie-Come-Along at Camp Rio Blanco near Crosbyton. The girls earned their "Movers" badge by making a wind wheel, helicopter flier, circle glider, and balloon rocket. Leader Linda Stark demonstrated her own version of a "Diet Coke rocket" during lunch by accident! They also learned about different clouds and their various formations.

The girls really got a kick out of walking across the suspension bridge. A light drizzle prevailed over most of the outdoor activities and plastic garbage bags were suddenly transformed into emergency raincoats and bonnets. There were 631 Brownies in attendance; those who went from our troop were: Wynter Smith, Katrina Stewart, Jessica Ortiz, Amy Stark, Trai Ham, Hollie McKay, Linda Stark and Laura Stewart.

Russian Wheat Aphid Appearing in Briscoe

by Curtis Preston

By now most of you know the Russian Wheat Aphid has again appeared in Briscoe county wheat fields. Several acres of wheat have already been treated and some fields may require a second application. The most important factor is to make sure the aphid does not attack the flag leaf of the plant which would decrease production severely. To confirm the Russian wheat Aphid, look for tightly curled leaves that have purple to white streaks running down the leaf. The purple discoloration is due to a toxin the aphid produces. The female aphid gives birth to live young so heavy

infestation can occur rapidly. Control is recommended when 10% of the field is infested.

Several systemic insecticides are labeled for control. A few wheat fields have been attacked by the Wheat Streak Mosaic Virus. This virus causes yellowish streaking and mottling of the leaves, as the plant matures the leaves turn brown and die. This virus is spread by the wheat curl mite. The mite feeds near the margin of the leaves causing them to curl upward and inward. The virus is most severe in dry warm weather. Cultural practices are the only control for the virus, minimize the sources of mites by destroying volunteer wheat and delaying planting of new crop wheat. For further assistance, contact me at the County Extension Office.

- FOREVER DIETING -
 - Anonymous

Dear Forever Dieting,
 Who isn't? This prayer has been around ever since they invented three-way mirrors. And here it is:
 Calorie Counter's Prayer
 The Lord is my shepherd,
 I shall not want.
 He maketh me lie down and do push-ups,
 He giveth me sodium-free bread.
 He restoreth my waistline.
 He leaeth me past the refrigerator for mine own sake.
 He maketh me to partake of green beans instead of potatoes.
 He leaeth me past the pizzeria.
 Yea, though I walk through the bakery,
 I shall not falter, for thou art with me;

Thou preparest a diet for me in the presence of mine enemies,
 Thou anointest my lettuce with low-cal oil.
 My cup will not overflow.
 Surely Ry Krisp and D-Zerta shall follow me all the days of my life.
 And I will live with pains of hunger forever. Amen.
 (This article was Mrs. Willis Walker's roll call at the Nuevo Study Club last Thursday. She is the wife of the late Willis Walker, the Editor of the Turkey Enterprise.)

The Rev. Bob Layman of Hawkins officiated.
 Hill, 71, died at 7:50 p.m. Wednesday, April 6, at the U.T. Health Center in Tyler.

Born Oct. 16, 1916, in Turkey, he had lived in Pecos since March of 1953. He was a farmer and a Baptist.

Survivors include his wife, Audrey Hill of Pecos; four daughters, Mrs. Bobby Rogers of Pecos, Mrs. John Shirley and Mrs. Jim Foster, both of Hawkins, and Mrs. David Patillo of Monahans.

Hill is also survived by 13 grandchildren and 10 great-grandchildren.

Other survivors include two brothers, Otis Hill and Herbert Hill, both of Amarillo; and four sisters, Mildred Hill of Amarillo, Leola Nelson of Waco, Pauline Cobb of Lancaster and Geraldine McCra-frey of Garland.

Lorenia Barton

Memorial services for Lorenia Hanna Barton, 73, of Van Horn, Texas, were held in the Kaster Maxon Funeral Home Chapel in El Paso on Thursday, April 14, 1988, at 4:00 p.m.

Lorenia was a daughter of the late Welch and Vera Mae Hanna and shortly after her mother's death she came to the Turkey area with her father in 1924. She was married to Hokie Graves and he died in 1951. She was married to Weldon Barton in 1952 and they had made their home in El Paso and Van Horn for the last 20 years.

She is survived by her husband, Weldon of Van Horn; two daughters, Vera Lee James of Adrian, and Lola Dean Johnson of El Paso; three sisters, Opal Cooper of Pima, AZ, Retha Freeman, Needles, CA, and Laura Belle Trener of Amarillo; three brothers, Buster Hanna of Turkey; Clifton Hanna of Wichita, KS, and Lowell Hanna of Shreveport, LA.

Dear Editor:

I strongly protest to the article written in "All Around The Town" in the April 14, 1988 edition of the Briscoe County News. The article suggested that Commissioners Long, Eddleman, and Chandler conspired to keep industry out of Briscoe county by manipulating the grant deadline date. It stated that Silverton "sends a message to Austin that Briscoe County is not interested in this project." I find this type of journalism very unprofessional and unfair since what you suggest is simply not true.

I know you will feel that I am biased since I am the son of Beryl Long. I must say that I am biased on this issue. I know what my father stands for. This is why I am so outraged at your accusations. I know that these accusations are simply not true. I've talked to Bryant, Eddleman and Jack Chandler. All three of these good

people only want the best for Silverton's growth and development. They are up against a very difficult economic situation with no easy answers.

A politician who promises an increase in your standard of living and then fails to deliver has two choices; confess that he or she could not deliver as promised or shift the blame to someone else. My father and the other two commissioners were victims of the latter choice.

Sincerely,
 Michael D. Long

SOCIAL SECURITY NEWS

By Terry J. Clements

If you work in Social Security covered employment or self-employment, you should occasionally check to see that your earnings have been credited under your name and Social Security number.

It is very easy to get a Statement of Earnings. All you have to do is ask for a Form 7004PC (Request for Statement of Earnings) at any Social Security office. After you complete this form and mail it back to Social Security, you will receive a summary statement of earnings. It takes a few weeks to receive the statement, and the service is free of charge.

Under the law, an earnings record can be corrected within 3 years, 3 months, and 15 days after the year in which the wages were paid or self-employment income was earned. For instance, the time to correct the earnings record for the calendar year 1985 is 11/186 through 4/15/89.

Nuevo Study Club

The Turkey Nuevo Study Club met in the home of Mrs. Sabra Setliff April 14.

Mrs. Lurline Walker opened the program as the presiding president. Mrs. Kathleen Green read the minutes of the previous meeting, and they were approved as read. Mrs. Virginia Degan gave the treasurers report. She also announced her Standing Committees for the coming Club year as she will be the new president.

Named on committees were: Arrangements: Wilma Wedge, Dessie Robertson, and Ella Colvin; Social: Marjorie Bain, Ella Colvin, and Sabra Setliff; Library: Nadine

Baisden, Sabra Setliff and Judy Gafford; and Gifts: Louise Meacham and Lurline Walker.

Mrs. Robertson brought the program, consisting of letters from Congressman Beau Boulter of the 13th District and Congressman Henry J. Hyde of the Sixth District of Illinois. The letters pertained to questions she had requested answers to about Lt. Colonel Oliver North of the Iran-Contra hearings, and Admiral John Poindexter. Discussion followed. Mrs. Robertson then concluded her program with a question about Red Barns which have been a rural tradition for many years but is now beginning to change the trend to various new and brighter colors.

Each member present answered the roll call with a short interesting topic.

At the conclusion of the program, the hostess, Mrs. Setliff, served a delicious chess pie with coffee or punch to the following guests: Mmes. Nadine Baisden, Virginia Degan, Ella Colvin, Kathleen Green, Louise Meacham, Dessie Robertson, Lurline Walker and Wilma Wedge.

Temperatures Critical For Cotton Survival

Spring rains and temperature variations make it critical that cotton farmers pay close attention to the five-day weather forecast, says cotton agronomist with the Texas Agricultural Extension Service.

Proper moisture, aeration and temperature conditions are essential for good germination and emergence of cotton, said Dr. James Supak, Extension cotton specialist.

If fields are too dry at planting, it hinders germination and seedling development; if they are too wet, it restricts the oxygen needed for germinating seed, Supak noted. And cottonseed are highly vulnerable to chilling injury for approximately five days after planting, he stressed.

"Ideally, soil moisture levels at planting are at or near field capacity," Supak said. "This not only assures adequate moisture for seed hydration, but also sufficient oxygen to support the germination."

Inadequate moisture slows the germination and seedling development and may even be fatal to stands if fields "dry out" too rapidly, the Extension agronomist said. "Waterlogged conditions on the other hand, restrict free air movement to germinating seed and the lack of oxygen may also cause stand failure," he noted.

The ideal temperatures for cotton germination are around 75 to 80 degrees Fahrenheit. Because of the short growing season on the Texas High Plains, Supak said, most cotton is planted into much cooler soil.

"The earliest recommended date for planting occurs when the

10-day average of the minimum soil temperature at the eight-inch soil depth reaches 60 degrees Fahrenheit," Supak said. Cottonseed requires about 100 hours with temperature above 64 degrees at seed level for germination and initial emergence.

For about five days after planting, cottonseed are highly vulnerable to chilling injury, the Extension specialist emphasized. This vulnerable period usually has two phases: the hydration phase, which may last up to 48 hours after planting, and the enzyme activation period, which can occur from 48 to about 120 hours after planting.

"During the hydration phase, seed zone temperatures of 40 degrees or less for as few as four hours can be fatal, and exposure for two hours can damage developing tap roots," Supak said. Other symptoms of chilling injury include delayed emergence and low seedling vigor.

Seed zone temperatures of 50 degrees Fahrenheit or less aren't uncommon in late April and early May, Supak warned.

"Delaying planting until the 10-day average minimum temperature at eight inches reaches 60 degrees Fahrenheit provides some

assurance that temperatures in the seed zone won't drop to these critical levels," he said. To minimize chilling injury, the agronomist urged producers to also consider extended weather forecasts when selecting a planting date, keeping in mind that the five days after planting are critical.

Jaelyn Tay (Jackie) Cannon, nine-year-old daughter of Monte and Kerri Cannon, was crowned Junior Miss Tulia 1988 at the Tulia High School Auditorium March 31. The Junior Miss Division consisted of a field of 27 young

ladies in the fourth, fifth and sixth grades. Jackie Tay is the granddaughter of Fred and Vivone Arnold of Tulia and Lewis Cannon and Rosella Cannon of Tulia. She is the great-granddaughter of Mrs. James Monk of Flomot.

Nothing lifts the spirit of everybody in West Texas as does rainfall... the thing we need the most and get the least of, especially when we need it real bad. It's sad that we must have a tornado watch every time we have a prospect of rain, but that seems to be the standard procedure. We well know the results of many of these storms, but it's something that we have to live with in these parts. No clouds at all can also be a disaster... we've seen that too. It's that time of year, so we'd better keep the "fraydy-hole" in shape!

TV commercials teach us a lot, but have you really ever had a headache that screamed for Excedrin?!

Today is the birthday of Rome, Italy, founded in the year of 753 BC. We often wonder what this part of the country looked like 2741 years ago!

Wonder if they ever thought about moving the Panama Canal to Pease River? We probably wouldn't have half as much trouble as they have with it now!

The four most valuable firms in the U.S. at the present time are said to be IBM - 69 billion, Exxon, 52.6 billion; General Electric at 39.8 billion, and AT&T, 29 billion. All four together would almost pay the interest on the National Debt!

People with pacemakers are not eligible to join the "Lonely Hearts Club"!

When you can touch your toes with your hands and haven't ben over, something's wrong!

Notice where a guy crossed a rabbit with a Xerox machine and got a reproducing reproducer!

Did you know there is an organization that can exercise your mind as well as your body, meet your need to be part of a group, give you leadership development opportunities, link you with a state-wide network of supporters, and help you develop your personal strengths all for the low, low price of \$2 per year?

There are similar opportunities that are absolutely FREE! In this day of rising prices, that's a "mega-bargain!"

All this comes to you through your County Extension Office as a member of a home economics group.

There are several ways to enjoy these benefits. One option is a Study Group which is a group which wants to meet for informal education meetings but does not choose to be an organized club. They normally appoint only a chairman and may meet as few as four times a year. There are no dues.

Lines from Lynda

A group of new mothers might want to organize a study group to learn more about child development. Employed women might have a study group for their particular concerns - time management, wardrobe coordination, child care of meal preparation.

Retired homemakers or widows might organize a study group to share their concerns and have special programs of interest to them.

Individuals with special diet needs might start a study group to learn more about food preparation and meal management for their special diet.

My role is to serve as an advisor to these groups and to conduct the programs you select or help you find a speaker. There is no cost for my work with a group. Call me at 823-2131, Ext. 12 if you are interested. Next week: Extension Homemaker Clubs.
