Patriots Advance To Regional Tournament

The Valley Patriots took a hard-fought win at the bi-district championship in Plainview Thursday night over the Happy Cowboys with a five-point margin, 39-34.

The Cowboy coach, Jim Kneipp, stated that their failure

to hit the bucket in the first three minutes of the last quarter was the difference in the game. The Valley fans see a different side to this situation. If the Patriots had played up to par, they could have won the game by several extra points.

The teams were tied 4-4 at the first stop, 12-12 at halftime, then the Patriots were ahead two points, 26-24, at the beginning of the third quarter.

Tommy Williams got off a beautiful shot off-the-rim, straight down the bucket. Then Brett Cheatham tipped in a 14-foot jumper off a feed from Jerry McNary to Randy Fuston, and the Patriots were ahead 32-24 with 4:45 still to play. The Cowboys rallied to 34-39, but the Patriots have an advantage in defense when not hitting. They stopped the Cowboys.

The Patriots played Jayton Tuesday night at Ralls. Valley went into the playoff trying for a Region I tournament berth with a 25-4 season record to Jayton's 18-10.

THEY DID IT AGAIN!! The Valley Patriots won the Area game and are headed for the Regional Tournament at Levelland for the third year in a row. They will play Vega at 2:30 Friday afternoon.

In Tuesday night's game with Jayton played at Ralls, the Patriots started off with 12-8 at the end of the first quarter, and at halftime still lead 22-18. At the end of three periods, the Patriots led 31-24, but at the final bell the score was tied 43-43. The Patriots pulled out a 49-46 overtime victory.

Will Williams took scoring honors with 18 points. This young man is just a freshman, so Coach Steve Adams has some prospects to take the place of the seniors he will be losing this year.

Brett Cheatham scored 12 points, Randy Fuston, 10, Tommy Williams, seven, and Billy Shannon, two points.

All Valley fans are urged to go to Levelland this weekend. LET'S GO ALL THE WAY TO STATE!

NEWS

For Senior Citizens

Many of America's approximately 25 million people who are over 65 are asking Congress to repeal a tax bill that could affect them particularly.

The new rule requires savings institutions, banks, corporations, money market mutual funds and others that pay taxable interest or dividends to withhold ten percent of all taxable interest and dividend payments before paying them out to investors.

This is especially hard on senior citizens and retirees. Many will be entitled to exemptions—but will have to file with each payer of interest or dividends to get them, disclosing sensitive information about their incomes and ages.

Some people will be too ill to file for exemption or refunds of tax that should not have been withheld.

People whose income from other sources falls during the year they retire will not be able to file for an exemption if their taxable income was relatively high in the previous year. Senior citizens are also likely to suffer under this new rule, as the rest of the

country does, from its effect on the recession. Withholding will be a disincentive to save, at a time when the economy is trying to pull out of a recession and savings are needed to finance home buyers and industrial revitalization. It removes savings that would otherwise be on deposit, point out the experts at the United States League of Savings Institutions.

What's more it will not bring in nearly as much revenue as the Treasury claims it will, the League has determined. An increasing number of senior citizens are joining other taxpayers asking Congress to repeal this rule. They are writing to the House of Representatives, Washington, D.C. 20515 and the U.S. Senate, Washington, D.C. 20510.

Assistance Offered To Taxpayers

State Comptroller Bob Bullock has announced that Kay Doggett from his Lubbock Field Office will be at the Briscoe County Courthouse on Thursday, March 10, 1983, from 2:00 until 4:00 p.m. to assist local residents with state tax problems.

A Comptroller's representative is available to assist residents at the courthouse the second Tuesday of each month.

Bullock urges anyone with problems or questions concerning state taxes to contact Ms. Doggett at the courthouse in person or call the Lubbock Field Office at 806-795-0691. A toll-free number, 1-800-252-5555, is also available to assist Texas taxpayers.

EMPHASIS PLACED ON APPEARANCE WHEN SELECTING EMPLOYEE

Recent research shows that the more contact with clients is required by a job, the more emphasis is placed on appearance in the hiring decision, says Nancy Brown, a clothing specialist with the Texas Agricultural Extension Service.

"A study of hiring agents shows they judge appearance primarily by neatness, ornamentation or jewelry, and the design, cut and color of clothing," says Ms. Brown. Both employers and employees emphasize that appearance is only one factor in the hiring decision. But clothing and appearance is one thing that the job applicant has control over in the hiring situation, notes Ms. Brown.

Several trial balloons, with reference to increased tax proposals, have been released over the Capitol every day since the Session started on January 11. To date, all have been quickly shot down. One of the most absurd was to raise the license fees of automobiles based on value; some estimates were that registering a new auto would cost up to \$300 per year. This would be an annual fee, in addition to the initial state tax of 4.25 percent, plus a federal tax.

This would be just what it would take to put the auto business back into a tailspin. Gib Lewis, the Speaker, is dead set against a tax raise. Governor Mark White recently made the same commitment. What we need down here is for some straight-thinking, business people to converge on Austin and do a quick study of the Legislative Budget Board's proposals. Then, take a pruning knife to a lot of the items that have been added to the budget, since we started running a surplus in the early seventies. We have been into an easy-come, easy-go spending spree during the surplus seventies. Next week, I will make some specific recommendations where sizable sums could be cut from the budget.

The smoke scent still prevails in the Capitol building from the fire that threatened to destroy the entire building. At this writing, no determination has been made as to the cause of the fire.

The second and third floor levels, in the extreme East end of the Capitol, were extensively damaged. Eight Senators, including Bill Sarpalius, have had to move into a building just to the North of the Capitol. Bill has been doing his telephoning from my office the last several days. The East wing of the Capitol is still out of heat and electricity. The West wing, which houses the offices of the State Representatives, is operating normally. One humorous note came out of the Capitol fire, "A large number of bad bills were destroyed."

A seven-million-dollar appropriation was passed in the Senate for repairs. This does not mean this amount will be spent.

Next week, hearings on the hundreds of bills that have been assigned to committees will begin. This tracks the Constitution which says the second thirty days of the regular session shall be reserved for testimony for or against bills. To date, 694 House bills have been introduced. Two years ago, 920 had been introduced. No doubt the large freshman class this year cut down on the number of bills introduced. To date, the Senate has introduced 388 bills. Two years ago, 464 Senate bills had been introduced at this time.

Our WATT line number: 1-800-692-1389. Those persons residing in Pampa, please use our regular number: 655-3552. For information regarding status of a bill: 1-800-252-9693.

COMPARING U. S., SOVIET AGRICULTURE

Most comparisons between the U. S. and Russia center on military strength, but in the crucial area of agriculture and the capacity of each country to feed its own people, Russia is in deep trouble, says an economist with the Texas Agricultural Extension Service, Texas A&M University System.

While the U. S.'s exportable food surplus is climbing, the Soviet Union's dependence on imported foods is growing. The U. S. with its 2.4 million family farm managers produced twice as much grain the past year as the Soviet Union with its 26 million farm workers. Individual productivity and individual decision-making in the U. S. make all the difference in the world.

America Must Regain Control Of Destiny

by United States Senator
Lloyd Bentsen

America must regain control of its economic destiny. A good place to start is by getting a grip on the staggering federal deficit.

To do that, the Administration must show a willingness to consider responsible alternatives to its tax and defense policies.

Last year, the White House demanded enactment of the Balanced Budget Amendment. This year, it presents us with a \$200 billion deficit. That kind of gap between rhetoric and reality cannot be accepted.

Our economic problems are complex, and a rigid adherence to slogans and ideology will not

solve them.

For example, we agreed to cut taxes by 25 percent over a three-year period at a time when there was widespread agreement that this country's taxes were too high.

But now, during a bitter recession, with a budget deficit that could destroy our economic future, the Administration has refused to compromise on this tax cut. Instead, it proposes a five percent income tax increase and a \$5 levy on every barrel of oil beginning in 1986.

It would make more sense to compromise by reducing the last phase of the existing tax cut from ten to five percent and moving

the effective date forward from July 1 to April 1. That would stimulate the economy with a prompt tax cut, while shaving the projected deficit by \$20 billion over the next two years.

There may be other answers to the deficit problem, but none of them will matter unless the Administration begins to consider alternatives.

A less rigid approach also would be advisable in defense spending. I understand the need for a strong national defense and don't harbor any illusions about the Soviet defense buildup.

I strongly support an increase in defense spending, but it will have to be stretched out over a longer period of time.

There are fewer defense contractors now than during the Vietnam War. We simply cannot spend money as fast as the Administration wants without creating production bottlenecks and risking massive cost overruns.

The President's budget contains \$43 billion in increased spending. More than \$30 billion of that is for defense.

It doesn't make sense to force-feed the Pentagon with a real, after-inflation increase of ten percent while everything else is being cut to the bone.

We may end up with the most powerful military forces in the world, but there might not be anything left to defend.

Resolving our nation's economic problems demands that we work together in a bi-partisan effort to find honest answers to current problems.

All of us, on all sides, must be willing to consider responsible alternatives to our individual proposals.

"A wise man sees as much as he ought, not as much as he can."
