# IN NEW BUILDING

The Presbyterians held their first services in their new building Sunday The building is not complete yet and won't be for two or tirree weeks, it is stated, but services will be con ducted and they will make the best of the situation until the completion of the building, at which time they will have their dedicatory services. This Temple of worship is a magnificent structure, beautiful in design and modernly arran ged and equipped.

The Presbyterians deserve much credit in the building of this new church edifice It is a credit to our town community and an honor to God to whom it will be dedicated.

Reverent S P Collins is pastor of this church and he led his people to do a great work in a noble way in the er ection of this splendid church.

### PRECEDING CHAPTERS

Ormerod, proscribed Harry traitor to King George as a Stuart partisan, returning from France to London, rescues Alder-man Robert Juggins from assasman Robert Jugging from assas-sins. Juggins proves to be the grandson of a former steward of Ormerod's father, to whom Juggins feels himself indebted. Ormerod tells Juggins he has abandoned the Stuart cause. Juggins informs him of a Jaco-bite plot in the American colo-nies to weaken England by for-warding French interests. At its warding French Interests. At its head is Andrew Murray, a Scots-man, and a Frenchman, De Veulle, deadly enemy of Or-merod. The two are in London furthering their schemes. An-ticipating the plotters' return to American Lunging arranges for America, Juggins arranges for Ormerod to go there with letters Governor Burnet, friend of Juggins, and work to foll Mur-ray. Disguised as Juggins' serv-ant, Ormerod takes passage to America. On the ship he meets America. On the ship he meets a girl, Murray's daughter, ardent Jacobite, who believes him to be loyal to the Stuarts. De Veulle recognizes Ormerod and exposes him Taker, by survives Or him. Taken by surprise, Or-merod is thrown overboard by the negro, Tom, but regains the deck in safety. He accuses Murray of inciting Tom to murder him, but of course can prove nothing. A truce is declared until the vessel reaches New York.

#### **CHAPTER IV**—Continued -9-

"That is true," I assented.

"There is somewhat I would venture to observe upon, if you will permit me," he continued detachedly. "You are a youth of boldness and courage. You possess intelligence. You may go far in the provinces, always supposing you do not succeed in winning a pardon. I opine that a pardon might be won if you went about it in the right way. There are gentlemen at Whitehall, who-"

His hesitation was eloquent.

"And you would suggest?" I asked him, faintly amused as I perceived the drift of his intention.

"Think well before you commit yourself to this venture. You cannot hope to overcome me. Why, the governor of this province, with all the semiregal powers at his command, has failed to balk me in my plans. My influence is no less in London. If you continue as you have begun you will end, I fear, in an early grave. I say it not as a threat. 'Tis merely a pre-

"An ugly knave," I commented. But the citizen only eyed me askance, and I walked on. I was passing through Bridge street, with the leafing tree-boughs overhead and the walls of Fort George before me, when another and smaller crowd rounded the corner from the Broad-Way, a street which formed the principal thoroughfare of the town and took its name from the wide space between the house-walls.

In the lead came an Indian. He was the first of his race I chanced to see, and sure, 'tis strange that we were destined to be friends-aye, more than friends, brethren of the same clan. He was a large man, six feet in his moccasins, and of about the same age as myself. He stalked along, arms swinging easily at his side, wholly impervious to the rabble of small boys who tagged behind, yelling and shrieking at him.

He was naked from the waist up, and on his massive chest was painted in yellow and red pigments the head

of a wolf. He wore no other paint. and he was weaponless, except for the tomahawk and knife which hung at his belt.

The children danced around him so many little animals. They never touched him, but some of the more venturesome hurled pebbles from the walk at his brawny shoulders. I cannot repeat the catch-calls and rhymes which they employed, some of them too disgusting for print. I looked to see some citizen intervene, but several who sat on their doorsteps or lounged in front of shops, smoking the inevitable pipe, viewed faction in the province, who strove to the spectacle with indifference or open clinch the control of the fur trade in amusement.

## THE CROSS PLAINS REVIEW

Your kindness was the greater be cause you obeyed it by instinct." I regarded him with increasing

amazement. Who was this savage whe talked like a London courtier?" "I helped you," I said, "because you were a stranger in a strange city, and

by the laws of hospitality your comfort should be assured." "That is the law of the Indian, Eng-

lishman," he answered pleasantly; "but it is not the law of the white man."

"It is the law our religion teaches," I remonstrated. "I go now to Governor Burnet. I shall ask him to make a law that Indians shall be as safe from mockery as from violence in New York."

"Governor Burnet is a good man. My brother will speak to friendly ears.'

"You call me brother," I said. "I have no friends in this land. May 1 call you brother?"

That wonderful expression of burning intelligence lighted his face again.

"My brother has befriended Ta-wanne-ars. Ta-wan-ne-ars is his friend and brother. Ta-wan-ne-ars will not forget.'

He raised his right hand arm high in the gesture of greeting or farewell, and we separated.

## CHAPTER V

The Governor in Council Where Garden street crosses the Broad-Way I met the town bellringer brandishing his bell. I approached him with a request for the location of Captain van Horne's house.

"Do you but follow your nose straight before you," he directed me, "until you come to the red-brick mansion with the yellow-brick walk this side of the Green lane. That is his." The negro servant who answered my knock admitted that the governor was within.

"But Massa Burnet done hab de gen'lemen ob de council wid him jus' now, sal;" he added doubtfully.

"I am this minute landed with letters for the governor from London," I said.

"Oh, bery well, sah. Dat be a dif. runt matter. Massa Burnet be plume glad to see yo'. Dis way, please." He ushered me into the wide hall way and knocked on the door of the first room on the right.

"Enter," roared a jovial bass voice. The negro threw open a leaf of the door and stood aside.

"Dis gen'lemun done jus' lan' f'om London wif letters fo' yo' excellency," he announced.

I saw before me a group of eight men gathered around a dinner-table, which was spread with maps and papers in place of eatables. At the head sat the man of the bass voice, ruddyfaced, comfortable in girth, with the high forehead of the thinker and the square jaw of the man of action. "I am Governor Burnet, sir," he

said. "Who are you?" "These letters will explain, your ex-

cellency," I replied. I tendered them to him. "Hah, from Master Juggins !" he exclaimed with heightened interest, "You

sailed on the New Venture?" "Yes, your excellency-with Master Murray.

"That is well. Be seated, sir; be seated," ordered the governor as he slit the packet.

## Children Enlisted in

Fire-Prevention Work Many cities have taken part in the fire-prevention movement. It has been found that good results come from instructing the school children concerning fire prevention. They take a pride in knowing about fire hazards and doing away with them whenever possible. The Baltimore Evening Sun has organized what is called the Baltimore junior fire department. Each boy who becomes a member pledges himself to help the fire-prevention bureau "by collecting all waste paper, trash, greasy rags, loose matches and other inflammable material in my home. By placing such stuff in the proper receptacles, where it will be collected by the street-cleaning department. By using care in handling oils and other dangerous materials, cigars and cigarettes that I see. By urging my friends and neighbors to do all these things. And by keeping my home free from unnecessary inflammables in the future." The boy signs this pledge with the approval of his parent and the parent's signature also is appended. After the pledge is taken he delivers it to the office of the newspaper, where he is presented with a badge as a fireman,

and a card showing that he is a member of the junior department. Most people have heard fire warnings so often that safety talk seems to make little impression on them. With the children, the work of preventing fires comes as something new. They are especially interested in making good records for their schools and their homes. Too much credit hardly can be given the children for what they are doing in this way .- Indianapolis

## Fence Adds to Beauty

News.

of Home Surroundings In winter or summer, fall or spring, an attractive fence, like a sundial or a blue roof, will contribute beauty to a landscape. And, more often than not, the well-designed enclosure will promote even neighborly admiration and approval, rather than an offended, shut-out feeling. Primarily, fences were used solely to prevent trespasses, but as people advanced in art and culture fences assumed a double purpose, that of decorating or enhancing the grounds they guarded. Consequently, fences of really exquisite design are appearing with increasing fre-

quency. A fence which will add and not detract beauty from the grounds it guards need not be so elaborate as to be prohibitive in price to the average home owner or even to those of slimmer purses. For comparatively few dollars can be erected an enclosure which will not only courteously perform the police duty of a "keep-off" sign, but which will add a final touch of nicety to a yard or garden. And furthermore, the task of building such frequently lima fence is far from difficult. The home carpenter can easily do the work ited, yet it is posin a short time. sible with careful

## What Is a **Diuretic?**

People Are Learning the Value of Occasional Use.

E VERYONE knows that a lax-L ative stimulates the bowels. A diuretic performs a similar function to the kidneys. Under the strain of our modern life, our organs are apt to become sluggish and require assistance. More and more people are learning to use Doan's Pills, occasionally, to insure good elimination which is so essential to good health. More than 50,000 grateful users have given Doan's signed recommendations. Scarcely a community but has its representation. Ask your neighbor!

# Mothers, Do This-

When the children cough, rub Musterole on their throats and chests. No telling how soon the symptoms may de-velop into croup, or worse. And then's when you're glad you have a jar of Musterole at hand to give prompt relief. As first aid, Musterole is excellent. Keep a jar ready for instant use.

It is the remedy for adults, too. Relieves sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheu-matism, lumbago, pains and aches of back or joints, sprains, sore muscles, chilblains, frosted feet and colds of the chest (it may prevent pneumonia)

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

"I fear me I should lose your good opinion did I take your advice," I replied.

He looked me straight in the eyes. "You would," he said curtly, and he turned on his heel and left me.

Three hours later we lay at anchor in the East river under the lee of Nutten island, which some called the Governor's because it was a part of his official estate. Small boats landed us at a wharf on a canal which ran up into the town along the middle of Broad street. From here I had my baggage carried by a waterman to the George tavern in Queen street, which he recommended as being fawored by the gentry.

Murray's party I overheard giving directions for the conduct of their effects to Cawston's tavern in Hanover square.

After a meal I inquired of Master Kurt van Dam, the proprietor of the George, where I might find Governor Burnet. Van Dam was a broad-bodied, square-headed Dutchman. He sat in the ordinary, smoking a long clay pipe. "Der gofernor is at Cabtain van

Horne's," he said, and immediately replaced his pipe in his month.

"And where is Captain van Horne's house?" I asked.

"In the Broad-Vay not far oop from der fort. You valk across through Hanofer square."

I thanked him and walked forth.

In Hanover square, which was only a few steps distant, there was a crowd collected about the entrance to Cawston's tavern. Murray was standing in the doorway, Tom on one side of him, and a huge, red-haired giant in buckskin, with knife and tomahawk at his belt on the other. I stared at the red-haired man, for he was the first woodsman I had seen, observing with curiosity his shaggy locks and fur cap and the brutal ferocity of his face.

I stared so long that I attracted the attention of Murray, who broke off his conversation with the group surrounding him, and with a pale smile pointed me out to his buckskin retainer. The man scowled at me, and one hand went to his knife-hilt.

I spoke to the citizen nearest me. "Pray, sir, who is the tall fellow in buckskin on the steps?"

The man edged away from me suspiciously.

"I am a stranger in your town," I added. 'Tis a frontiersman," he replied re-

luctantly; "one called 'Red Lok' Boll-

My wrath boiled over, and I charged down upon the tormentors. "Be off," I shouted. "Have you no

proper play to occupy your time?" They fled hilariously, pleased rather than outraged by the attack, after the perverse habit of children who prefer always to be noticed instead of ignored, and I was proceeding on my way when I was dumfounded by hearing

the Indian address me. "Hold, brother," he said in perfect English, but with a certain thick guttural accent. "Ta-wan-ne-ars would thank you."

" You speak English !" I exclaimed. A light of amusement gleamed in his eyes, although his face remained expressionless as a mask.

"You do not think of the Indian as these ignorant little ones do?" he asked curiously.

"I-I know nothing of your people," I stammered. "I am but this day landed here.'

"My brother is an Englishman?" he questioned, not idly but with the courteous interest of a gentleman. "I am."

"Ta-wan-ne-ars thanks you, Englishman." He extended his hand.

When gratitude, I heard another

its bonds. This is only another man-

was quenched."

I found a chair by the fireplace, and watched in silence whilst he read through the close-writ pages, with an occasional word or interjection to the others, who had risen from their places and were clustered about him. They were, as I afterward learned, the most prominent men of the governor's

English hands. "So! Humph!"

The governor laid down the covering letter which accompanied the detailed report of the operations of Mur ray in London.

"You are Master-"

He examined the letter again. "Humph! Yes."

He turned from me to his councilors. "It is apparent from what Master Juggins has writ that Murray has triumphed, gentlemen, even if not so absolutely as he would have our citizens believe. However, we know the worst and we may prepare for it. If I may have your indulgence, I would crave an adjournment of our meeting to enable me to discuss some aspects of the situation more intimately with Master Juggins' messenger."

Ormerod is to get an inkling of the power an unscrupulous man can wield by the employment of superstition to influence an ignorant people and attain leadership.

(TO BE CONTINUED.)

Excess of Gratitude Not a Common Fault

strong and secret desire for further though appearing in the dictionary, is favors. I believe it was Goethe who could never be found in the hearts .-Frank Hanson, in Los Angeles Times wrote: "He who is not grateful for a favor may be likened to one who muddies the spring from which his thirst

tected soldiers during the World war were pressed into service by a crew of workers in London while hunting leaks in the city gas mains. The hazard of the job was increased by the necessity of working in deep trenches where vapors had insufficient chance to escape in case flows of considerable pressure were encountered. small outlay. In cold weather there should always be a hot course, either soup or a hot

entree with cold meat, potato chips, pickles, rolls, jelly and a dessert. One may serve a fruit cup, sliced smoked tongue, scalloped potatoes, rolls, jelly, olives and dessert. For hot dishes, baked beans, macaroni and cheese, celery cooked and served with cheese sauce, candied sweet potatoes-any one goes nicely with sliced cold meat tongue or meat loaf or with hot frankfurters. If the meal starts with a cupful of good broth a heavy nourishing salad will take the place of meat, then follow with dessert. The following are a few quantity recipes which will assist in preparing a menu for

California Salad Dressing .- Take three-fourths of a cupful of orange juice, one-fourth cupful of lemon juice, one-half teaspoonful of salt, one cupful of sugar, three eggs and two cupfuls of cream. Heat the fruit juices, add salt and sugar and eggs lightly beaten, stirring and cooking in a double boiler. When thick, cool, and just before serving add the cream whipped until stiff. This recipe makes one quart of dressing.

Sunflower Salad .- Peel eighteen oranges and separate into sections. Stone fifty dates and chop with onehalf cupful of nut meats. Arrange the orange sections petalwise on lettuce, using three heads ordinary size; place a ball of the date mixture in the center of each flower. Use the mayonnaise or any desired salad dressing. This amount serves twenty-five.

Fruit Salad .- Take eight oranges, six bananas, three apples and one can of pineapple. Cut and mix as usual with the above dressing, Serves twenty-five. -

Cottage cheese and pear, pear and tomato, stuffed dates with cottage cheese, canned pineapple and pear, all make delicious salads.

A molded vegetable or meat salad is always welcome and when molded always looks well and serves easily and in uniform portions. It may be molded in one large receptacle or mold and cut into uniform sizes.

## City's Best Advertisement

No city needs press agents. It needs only an honest and fearless press, which faithfully and accurately reports the activities of the municipality and intelligently interprets them. Beyond that, a city's own good works are its best advertisement. If its public and private affairs are ably and honestly conducted for the benefit of its citizens, the world will know of it and honor and prosperity will be its portion. If its government becomes corrupt, or weak or dishonest public servants permit the lawless element to gain the upper hand in its affairs. the world will hear of that, too, and no amount of ballyhooing by hired or self-appointed press agents will prevent it .- Detroit News.

### Avoiding Damage to Sewer

The location of trees-those already lanted or those intended for the yard -should be taken into consideration in placing sewers, cisterns, or drains, advises a reader who contributes a letter to the series on home building in Liberty. "Tree roots can press against tile and cistern walls with strength enough to break them," he points out, "and the damage is often difficult and expensive to undo. Some trees have a tendency to twine roots into any interstice they can find. Poplars have a bad reputation in this respect."

### Away With Rubbish Heaps

Cleanliness and good order are the best safeguards against fire. If there is no trash to ignite, the carelessly thrown match or cigarette will find no fuel. It may be impossible to train every person to be scrupulously careful about matches or smokes, but the first rule of safety should be learned by all who are responsible for business and domestic premises, to keep them free from fire-making materials exposed to chance ignition.

## Need for Co-Operation

It is necessary for the betterment and prosperity of any town for the citizens to co-operate and work together as a well-trained team in their effort to push the town onward and upward in the business world .- Crenshaw County (Ala.) News.

J.Pierpont Morgan with all his millions would not be as acceptable to Cross Plains credit men as John Smith, a \$30.00 a week salaried man, if Mr. Morgan was "slow pay" and Mr. Smith met his obligations promptly.

Your wealth does your merchant or physician or dentist no good unless you pay. Your account on his book is unprofitable to him if you let it drag for months and months.

But the check you give when it is due is a real asset. The merchant uses it to pay his bills with, to buy more goods, to improve his facilities to build up his business.

So he gauges you, not by your wealth, but by the manner in which you pay. If you pay your November accounts on or before the 10th of Dec. you are GOOD; take sixty and ninety days and you are SLOW; drag your payments out over four or five months and your account is UNDESIR-ABLE.

Every member of this association is in a position to know your standing-Good, Slow, Undesirable, according to your habit. Your standing is your rating, and ratings are being scrutinized very closely these days.

Don't flatter yourself into thinking that those you owe are giving you credit upon your wealth. If you are wealthy and "slow" so much the worse.

November accounts, per statements, due and payable on Dec. the first. On the 10th they become delinquent. Pay now, get in the "good" class as quickly as you can and stay there.

# HEADACHE, COLDS, **COSTIVE BOWELS**, **TAKE "CASCARETS"**

To-night! Clean your bowels and end Headaches, Colds, Sour Stomach

Get a 10-cent box now.

You men and women who can't get feeling right-who have headache, coated tongue, bad taste and foul breath, dizziness, can't sleep, are billous, nervous and upset, bothered with a sick, gassy, disordered stomach, or have a bad cold.

Are you keeping your bowels clean with Cascarets, or merely forcing a passageway every few days with salts, cathartic pills or castor oil?

Cascarets work while you sleep; cleanse the stomach, remove the sour, undigested, fermenting food and foul gases; take the excess bile from the liver and carry out of the system all the constipated waste matter and polson in the bowels.

A Cascaret tonight will straighten you out by morning-a 10-cent box from any drug store will keep your stomach sweet; liver and bowels regular, and head clear for months. Don't forget the children. They love Cascarets because they taste good-never gripe or sicken.

## Larch Wood in Demand

Yew was the most important of English trees in Norman times, for yew was needed to make bows; then came oak and elm for shipbuilding, and firs for making masts and spars. When fron supplanted oak in the shipyards, larch, Scot's pine and spruce were planted for the purpose of providing plt props.

Year by year it became plain that larch was the most valuable of the three woods because of its wonderful lasting powers, so more larch plantations were made. At present larch is more popular than ever; it is the best sort of timber for wireless masts.

II. Ruth's Noble Choice (1:16-18).

Much as Naomi loved her daughters-

into this matter blindly. She wished

them to know the seriousness of their

in all our relations in life. In this

respect Jesus is our supreme example.

1. No chance to marry again.

To help neutralize these irritating acids, to help cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful effervescent lithia-water drink.

## **Gun Silencers Used**

on Railroad Engines Oil-electric locomotives for railroad yard use in cities would wake up the neighborhood all night long were it not for gun silencers. These devices, invented for use on firearms for war service, so that gunners might fire silently, have found a new and growing use.

The silencers, unlike automobile exhaust mufflers, do not reduce noise by placing obstructions in the path of the discharged gases, but by passing the exhaust through the peculiarly constructed silencing chamber. Oilelectric engines, designed especially for railroad switching service, generate their power aboard without emitting the smoke and noise.

advanced in person to meet him, and drove the Turks back to their own territory. Then Francis, forming an alliance with Soliman, again invaded Italy. But Charles opposed the allles so successfully that they were soon glad to sign a treaty of peace. The revolt in Spain was put down and the Netherlands for the time appeased, so Charles had at last time to attend to the Reformation, which, under Luther, Melancthon and other teachers, had by ths time swept Ger-many from end to end. The emperor had crushed every military foe

and had humiliated every royal rival; but here, in this new religious movement at home, he found an opponent he could not conquer-a power that throve under persecution.

Council after council was held, scheme after scheme proposed. Compromises were suggested, but found favor with neither party. As if this one setback had undermined his whole edifice of greatness, so the failure of Charles in reconciling the religious sects was followed by a series of new disappointments and misfortunes. He had hoped to bequeath all his power and possessions to his son Philip, but to this the German electors would not agree. So he foresaw that on his death the mighty one-man empire he held would be split up as had those of Alexander and Charlemagne. To add to his worries, Henry II (son of Francis I) of France, backed by other rulers, invaded Germany and captured several important cities. notably Metz. Charles sought to recapture Metz, but failed, and until

1870 it remained in French hands. Charles made one more throw of the dice against fate. He arranged a marriage between his son Philip and Queen Mary of England, thus forming an English alliance to strengthen his own power and that of the Catholic church. But the couple had no children to perpetuate the scheme.

His most cherished plans set at naught, his own subjects refusing to be guided by him in matters of religion, his health broken, his territory successfully invaded, his son debarred from inheriting his chief possessions-the combination was too much for the old emperor. He gave up his throne and left to others the helm of state which would no longer obey his enfeebled hand.

# How to Get Rid of **Colds and Catarrh**

A Simple, Safe, Inexpensive Method That Clears Out the Head, Nose and Throat.

There are many people suffering from chronic catarrh who would like to know how they can stop catching cold after cold. They realize that sooner or later this may lead to dearness and other serious troubles. Dr. Blosser, for years a specialist in

catarrh, was the discoverer of a pleas-ant, direct method that can be used by women and children as well as men. His remedy is made from medi-cinal herbs, flowers and berries which you smoke in a small pipe or ciga-rette, and inhale the vapor into the air passages of the head, nose, throat and lungs, carrying medicine where sprays, deuches and salves cannot possibly reach. It contains no cubebs, tobacco or habit-forming drugs. Dr. Blosser's Remedy is effective in

all forms of colds, catarrh, catarrhal headaches and ear troubles that may lead to deafness. You will breathe better and feel better after using it. If you suffer from catarrh, catarrhal deafness, asthma, hay fever, bronchial irritations, or, if subject to frequent colds, you should try Dr. Blosser's Remedy. A Madman on a Throne HE momentary elevation of a mad-I man to a throne in 1762 saved the budding empire of the Hohenzollerns and prevented the breaking of a link in the chain of events that was to lead to the great World war of 1914.

The opening of the Seven Years' war in 1756 found Austria and France in arms against Prussia and England. King Frederick, by his gifts as a warrior and diplomat, had raised Prussia from a third rate kingdom to a rival of the Great Powers. He lost no time in seizing Saxony at the outbreak of war, then crossed the mountains to Bohemia. Austrian forces drove him back into his own domain. Then the powers fell upon him. Russia invaded East Prussia, the Swedes entered Brandenburg from the north, the Austrians pressed into Silesia and the French attacked from the west.

Frederick now earned a place among the greatest generals of history. Hemmed in by superior forces, he first drove furiously at the French at Rosbach and beat them badly. Dashing against the Austrians in Silesia, he captured a third of their army and put the rest to flight. Greatly weakened, however, by incessant fighting, he was forced to adopt defensive tactics. The Russians captured Berlin, and Spain entered the was against him. Despite his heroic exploits, King Frederick was facing inevitable ruin.

Then the Tsarina Elizabeth died and was succeeded on the Russian throne by Peter III, a dangerous madman. Peter was an admirer of Frederick. He immediately transferred his effective army from the alliance with Austria to the side of Prussia. Frederick was saved. The mad Peter was dethroned and Catherine II, his successor, promptly withdrew from the war, but Frederick's triumph was already achieved. By the treaty of Hubertusburg (1763) his claim to Silesia was allowed and his right to a place among the powers was established. The might of the Hohenzollerns had arisen, not to fall until the late Kaiser Wilhelm II lost his "place in the sun."

The magic of the great warrior's presence infused new enthusiasm in the wornout troops. "There he is! There he is!" was shouted on all sides as the

The following day Napoleon laid a concentrated artillery fire on the allied center, and sent Ney against the

right and Murat against the left. The allies broke and retreated leaving twenty thousand prisoners. Through out this day Napoleon rode about his lines, his clothing soaked and that night he suffered a slight chill. His spirits had risen, however, and he believed that the tide at last had turned in his favor. General Vandamme, in the enemy's rear, was expected to complete the annihilation of the retreating Russians and Prussians. He failed, partly through his own weak tactics and partly through Napoleon's failure to pursue his advantage. The latter was laid low by an attack of illness, which some attributed to exposure and exhaustion, but which the emperor, himself, said was "nothing but an attack of indigestion caused by a wretched stew seasoned with garlic, which I cannot endure."

The Napoleonic army was cut to pieces in its subsequent retreat and from that time, August, 1813, misfortune dogged the steps of the emperor of the French.
