PEOPLE OF COUNTY HEAR ROAD BOND SPEAKERS AT BAIRD

The largest crowd of people that have ever composed one assembly in Callahan county gathered at Baird last Monday to witness the laying of the corner stone in the new court house, and to otherwise enjoy the big barbecue and unlimited hospitality of the good and progressive people of the county seat. The crowd of visitors was variously estimated at about 5,000. The barbecue was a bounteous feast and the appetite of all seemed amply satisfied, with lots of good eats left over.

Together with the interesting ceremonies in connection with the corner stone laying, a part of the day's program was devoted to speeches favoring the forthcoming road bond election by prominent speakers of this and adjoining counties, including Judge Ely of the State Highway Commission. The people of the county should now be fairly well familiar with merits

(Continued on Page 3)

Mrs. Frank Green was hostess to the bridge club Tuesday. The next meeting will be with Mrs. Ben Garner. Mrs. Green entertained club members and Mmes. Ross Newton, T. S. Holden, H. A. Dubey, J. M. Sides of Cisco, and Claude Ayers of Vernon. Prizes were presented Mmes. Bill Lowe, H. A. Dubey and Rennerick Clark.

J. H. Blount and son, H. J. Blount, of Philadelphia, Miss., are visiting with Mr. Blount's sisters, Mrs. C. B. McGee west of town, Mrs. C. C. Ayers of Baird, and a brother, W. A. Blount of Paducah. It has been 37 years since they last met.

Albert Stone of Cross Cut was a Cross Plains visitor Tuesday.

J. P. Newton of Brownwood was in Cross Plains Tuesday, attending directors meeting of the First State Bank.

M. A. Martin and H. B. Houghton of Oklahoma City, president of the National Aid Life Association, left latter part of week for South Texas where they will hunt Deer and Turkey.

MANY LOCAL CITIZENS ENDORSE ROAD BOND ISSUE

WE, The undersigned citizens of Callahan County, Texas, are going to vote for the Road Bonds at the election to be held in Callahan County, Texas, on November 23rd, 1929, for the following reasons:

First: Because we have the assurance that if this election carries Highway No. 22, which runs from Southeast Texas to Northwest Texas, will be designated through Callahan County, by way of Cross Plains and Baird and that our \$400,000.00 will be matched with a like amount by the State, Commissioner W. R. Ely, of the Highway Commission, our Native Son, of whom we are proud, has promised us that this will be done and he has stated that he will give us a letter to that effect, which we are positive he will do. And we do not doubt that if we vote the bonds, the highway will be built as described above. Cross Plains will be on a first class highway which connects two great sections of Texas, and there will be a great stream of tourist travel through our town and country which will benefit us all. There will be a through bus line connecting these sections. We will have a fine road to our county seat and our new court house, which we have not now, and we will have a direct paved highway to The Capital City of our State and the big cities of south and southeast Texas.

Second: Because, if we pass this election, we have the assurance, which we have every reason to believe will be carried out, that our No. 23 highway will be completed to the Coleman County line. In fact No. 22 and No. 23 will leave town together and will fork immediately north of Lacy's Filling Station, No. 23 being paved to said filling station and connecting there with the road that is already paved, and No. 22 running on in a north westerly direction to Baird.

Third: Because, if we pass the election and issue the bonds, we will have \$2000.00 per mile to improve the roads coming into Cross Plains, as follows: from the points on the Brown County and Callahan County line where the gravel road which will be built from Brownwood intersects said line to Cross Plains; From Cross Plains North to Putnam; from Cottonwood to this Cross Plains-Putnam road; From Atwell to the Cross Plains-Putnam Road and from Cottonwood South to the No. 22 Highway. The resolution passed by the Commissioners Court has stated that these roads will be built, costing in the neighborhood of \$50,000.00, in our precinct. The Commissioners Court will keep its word to us. In fact we believe we can enjoy them from spend-

THREE MEMBERS OF RENFRO FAMILIES DIE

Following the recent death of Mrs. Martin, daughter of L. W. Renfro, living a few miles northwest of town, another daughter, about 14 years of age, passed away at the Santa Anna Hospital on Thursday of last week and was buried in the Cross Plains cemetery Friday afternoon.

Robert Gordon Renfro, age 20 years, son of J. T. Renfro and a cousin of the deceased girls, died at his home in Cross Plains last Monday afternoon and was buried in the local cemetery at 3:00 P. M., Tuesday. He is a son-in-law of Mrs. Mack Smith and is survived by his wife. Funeral services were conducted at the Baptist church, Rev. Harvie Dennis and Rev. Collins conducting the services.

The three deaths in the Renfro families were caused by typhoid fever, and occurring within such short intervals of each other, have created unusual sadness among the people of the entire community, who greatly sympathize with the bereaved families.

Belva Tabor, 17 years of age, died at the home of her grand-mother, Mrs. Jennings, in the south part of town, Monday afternoon, and was buried Tuesday evening in the Howell cemetery near Burkett, Elder Harlow of Cross Plains conducting the funeral services.

GENERAL INFORMATION ON CITY LAKE

That all concerned may have advantage of all facts connected with the new water supply, and cast iron supply line, for the city of Cross Plains, the following information is given from the report and estimate of the Municipal Engineering Co., of Dallas, Texas:

General—Amount of water required:

Five years ago we were using 15,000 to 20,000 gallons per day, whereas, the present rate of consumption is about 150,000 gallons per day.

To produce this water from wells and deliver it to the people is costing \$7,000 per year more than it would cost if we had a gravity system.

Each year new wells have to be dug and old ones cleaned out.

Pumps and motors are a constant source of expense for repairs, labor, and electric current.

The new supply will be higher than our water tower and directly connected to it and to the water mains by an 8-inch cast iron pipe. This will result in a saving of all expenses of operation except occasional repairs to pipes and fire hydrants and collection of revenues.

The average annual rainfall will produce on the area drained to the new lake 254,000,000 gallons, while the reservoir will hold ninety-nine million gallons or 600 days supply.

The water level in the dam when full is 47 feet higher than the top of the tank and tower, thus insuring continuous flow at fire fighting pressure at all times.

The fire insurance key rate of Cross Plains will be reduced 10c.

The project also includes the location of 8 inch crosses at the streets where the line from the lake crosses streets. These are for future connection if such lines are needed in the future.

There is also included 6-inch lines to the school house and to the business district, together with 8 additional hydrants.

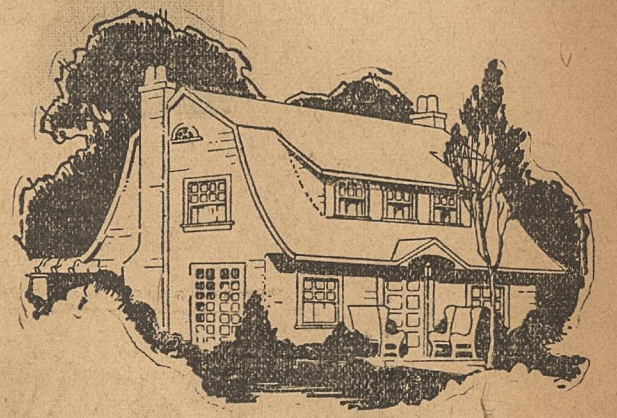

The total cost of this improvement is \$107,000.00.

The specifications for this proposed improvement are complete in every detail. They are very lengthy and

(Continued on Page 3)

COPY OF REVIEW IN CORNER STONE

A copy of last week's issue of the Cross Plains Review, sealed in an envelope of special fiber that will preserve it for ages, was placed in the corner stone of Callahan County's new court house last Monday. The names of many people and business concerns in Cross Plains and this community are contained in that copy of the Review, which will doubtless be fondly recalled by some of their posterity. But unless decadence of the fine edifice is hastened by catastrophe it is not reasonable that any of the people mentioned will be living when the distant future reveals the contents of the corner stone. Among other important and interesting mentions which its opening will reveal is the special article about Cross Plains which appeared in a recent industrial edition of the El Paso Herald, reproduced in the Review. Among the millions of civic organizations that may be in existence at that time Cross Plains will have the distinction of being the home of the Century Club of the Lions organization. Mention is also made of the contract being signed for the construction of the railroad from Cross Plains to Abilene, which on the date of the corner stone opening may be a great trunk line, with heavy freight and passenger trains thundering over it day and night. The Lotief's Dry Goods Co., of Cross Plains, has the largest individual item contained in the corner stone, a double page advertisement in the Review.

Be proud of your home

Perhaps your house needs a coat or two of good paint. Maybe a change in the color scheme would improve it, too. If so, see us.

Cross Plains Lumber Co.

MOTHER AND BABE INJURED IN AUTO CRASH

Last Tuesday morning a car occupied by Mrs. Orvil Pentecost and baby, in attempting to make the turn on South Main street, crashed into an electric light post. The mother and babe both received painful injuries, but of a nature not believed to be serious. They were taken from the scene of the crash to the Robertson Drug Store, where their injuries were treated by Dr. I. M. Howard. They then returned to their home at Cross Cut.

Eastern Star Memorial Service

The Eastern Star will conduct memorial services in memory of the departed, at the Masonic Hall, on Monday evening, Nov. 18th.

Mrs. A. G. Crabb and Mrs. Joe Weiler spent the past week in Waco, visiting with Mrs. J. H. Moragne and attending the Cotton Palace. Mrs. Moragne formerly lived in Cross Plains, her husband, J. H. Moragne being a passenger conductor on the Cross Plains-DeLeon branch of the Katy for many years preceding his death.

Turkey Money

Now is the time of year that the turkey raisers are cashing in on their crop. The two to three hundred dollars which the average turkey raisers crop will bring will help to pay his losses on his cotton crop this year. The more "money crops" you raise, the less chance you take on losing money on your year's work.

Take stock of yourself and your work. Look back over the past few years. Have you made money and been able to meet your obligations without worry? If you have not, now would be a good time to plan for better condition in 1930. Raising turkeys will help.

Rivers Diverted From
 Beds by Fields of Ice

It is a long way from present-day floods along the Mississippi river back to the great Ice age, but happenings of the latter period have considerable bearing on the trials and tribulations of the valley dwellers.

Before the great fields of ice worked their way down from the north, at least two rivers, the upper Missouri and the Yellowstone, flowed northeast and emptied into Hudson bay. With the advent of the sheets of ice, however, these two rivers were forced to run to the south, and their combined waters cut the gorge now followed by the Missouri through the Dakotas.

At the same time the Red river became a huge pond called glacial Lake Agassiz, with an outlet to the Minnesota river valley. Part of the watershed of the Red river became a permanent source of water for a river flowing to the south and the original head of the Missouri river. This river is now known as the James river. With the melting of the great ice dam, the Red river resumed its normal flow to the north, but the others continued to the south.—Exchange.

Stream in Venezuela
 Explorers Call Unique

What is called the Casiquiare "canal" in southern Venezuela is not a canal at all, but a natural stream which connects two rivers which are flowing in different directions, and it is said to be the only river which acts in this manner. There is said to be a very small stream in the Rocky mountains which divides itself and part of its waters find its way into the Pacific while the remainder finally gets to the Atlantic. Many writers who have had occasion to refer to the erratic behavior of the Casiquiare state that it flows one way at times and in another direction at other times, but recent investigations have proven that this is not so and the waters of the Casiquiare invariably flow in one direction from the Orinoco to the Rio Negro, which is a branch of the Amazon. The mouths of these two streams are separated by thousands of miles.

Beating Trouble To The Draw

Poultry Raisers Find That the Least Expensive Trouble is That Which is Never Allowed to Hoppen—Preventive Measures Cost Little Compared With What They Save.

Editor's Note—This is another story in a series of 52 stories on poultry raising written by the well known national poultry authority, Dr. L. D. LeGear, V. S., of St. Louis. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

In the roistering days of the old Wild West, the fellow who was quickest at getting his gun into action had the best chance for long life. Consequently, it was not surprising that men spent hours practicing the art of beating the other fellow to the draw. Their lives might some day depend on it. Today, far less effort invested in preventive measures would save the lives of thousands of fowls that now are sacrificed annually.

For one thing, too little attention is often paid to weeding out the unfit. Chicks that are obviously deformed or hopeless weaklings should be killed at once. Weaklings contract diseases that healthy, well developed chicks would throw off easily, thus making easy the spread of trouble among the rest of the flock. It is most certainly false economy or none at all to save some of the fowls, one often sees in flocks otherwise fairly well cared for.

Another way to beat trouble to the draw is to adopt every possible means for eliminating vermin of every description. Lice, mites, ticks and all other such pests sap the vitality of fowls to a point where they easily become prey to all sorts of diseases. Constant vigilance is needed to guard fowls against these tiny enemies. They should be inspected periodically and dusted with a good Lice Powder if there are any parasites on their bodies. Lice Powder should be added to the dust bath and let the hens use this at will. Their quarters should be thoroughly cleaned out at frequent intervals and every nook and cranny should be sprayed with a strong solution of dip and disinfectant. White-wash is another preventive that is not used nearly so much as it should be. It is well to apply it at least twice a year and put it on hot. If two or three ounces of dip and disinfectant is mixed in each gallon of whitewash it will be very effective in killing mites and other insects. It should be forcibly sprayed on if possible, so that will drive it into every crack and crevice where parasites might find a hiding place.

Tainted foods, too, can cause no end of trouble. Mouldy grains are particularly dangerous. Damaged or cheap inferior feeds of any kind should not be fed at all. Cheap feed is dear at any price. Limberneck, bowel disorders and other troubles are caused by eating spoiled feed. Feed of the best quality only should be fed.

In plain everyday cleanliness, however, comes the greatest protection against the possible invasion of disease. House should be so constructed that they can easily be kept clean, and have either solid board or concrete floors that will permit of easy cleaning and disinfecting. Clean quarters cannot very well harbor disease germs. Special care should be exercised in disposing of the droppings. Noxious gases arising from droppings are very harmful to the fowls. Furthermore, the droppings harbor disease germs without number, and intestinal worms besides. Droppings should be removed frequently and used for fertilizer away from the flock. Dead birds should be burned or buried deeply, and a regular cleanup program should be carried out often. This, with the regular use of a good coal tar dip and disinfectant, will prove very effective in preventing many diseases and insect pests.

Of course, disease may take its toll of any flock, no matter how carefully cared for. As a rule, however, any extra effort invested in such preventive as those described above will pay big dividends. Strong, healthy fowls, protected as much as possible from the various sources of disease, will resist epidemics that would wipe out others. They are also more vigorous and productive in every way.

Mmes. Walter Seward and Eloise Rogers of Brownwood were in Cross Plains Sunday evening.

General Information
On City Lake
Continued from page 1

are omitted for lack of space but may be inspected by request to any alderman or the mayor.

The contractors who propose to finance and build this improvement are very reliable people and can carry out their contract to the letter. They financed and built our Sewer System. Their work was very satisfactory. The system is perfect and a money maker. It has never cost the city a penny of taxation and never will. Besides it has furnished considerable funds to help gravel and improve our streets during the last two years. They also engineered our street paving job, and that work was very satisfactory.

The contract for this improvement is now under advisement and in all probability will be carried through to completion unless the City Council shall be enjoined from so doing before work on same shall begin, so if there is serious objection to this proposition and contract such objections should be filed at once in the form of a petition to the City Council or by filing an injunction against the City of Cross Plains from carrying out this contract.

This is not a bond issue proposition. This project is to be built on the faith that investors have in its revenue and it is figured out to be logical and feasible by a very competent financier. It is said to be lawful and correct according to our statutes by Mr. W. P. Dumas, attorney of Dallas, Texas. It is a kind of contract that can be entered into by cities without a vote of the taxpayers because the bonds are to be paid solely from revenues.

Some say that this new improvement will raise the water and sewerage rate, but on the contrary it is the opinion of the City Council that they can gradually lower the rates of both, and they are anxious for the time when they can do so, for it means more satisfied citizens, and as the town grows so will the revenues from these utilities grow and the whole combination will become more interdependent and more mutual and independent and it is predicted that all will be right when they did it.

The present water system shows to have been making a saving of more than \$7000.00 per year which has mostly been invested in extensions and improvements, etc. This expense can be curtailed if the new plan can be executed, thereby having that amount to pay on the new indebtedness, and it is estimated that the new supply will save another \$7,000.00, which is now going for operating expenses, which can then be left off, which makes a total revenue of more than \$14,000.00 which will more than pay the entire indebtedness, as it shall mature and will give Cross Plains an adequate water supply, whereas at present we are only hoping that we may have water and very few people know how closely our water supply was used up every day during the summer months just passed.

It should be understood that revenue bonds cannot be paid by taxation. The law clearly states that these obligations can never be paid by money raised or to be raised by taxation, and the contract for financing in the second paragraph reads:

"Each Revenue Bond shall have printed on its face the following clause: 'The holder hereof shall never have the right to demand payment of this obligation out of any funds raised or to be raised by taxation.'"

It therefore appears to those who have studied this matter closely, that Cross Plains seriously needs a better and cheaper water supply.

It should be built at once so that spring rains may fill the reservoir.

A gravity water supply is an ideal condition. The plan of financing is one which will not increase our taxes, but the improvements will save us yearly more than enough to retire the debt.

The bankers financing this project have fully satisfied themselves on this point, as well as having inspected the plans and site of the proposed work, that they might know their loan was safe.

Mr. and Mrs. Fred Cutbirth and daughter were in Baird over the Armistice holiday.

People of County
Hear Road Bond
Speakers at Baird
Continued from page 1

and every detail of the road bond proposition. However, as the election is near at hand, in order to refresh their minds on the more essential provisions of the project, the Review publishes the following resolution by the commissioners, covering the guaranteed routing of the roads amount to be expended on each section, and other important details in connection with the matter:

Whereas, the Commissioners Court has this day upon a legal petition duly presented to this Court, ordered a county wide road bond election to be held to determine whether or not the bonds of said county in the amount of One Million Dollars (\$1,000,000.00) shall be issued for the construction of a system of public roads in said county, and retiring outstanding road bonds in Road Districts Nos. One and Four, and

Whereas, it is contemplated that in event said election is favorable to the issuance of said bonds, that Four Hundred Thousand Dollars (\$400,000.00) of said amount shall be used for the construction of a hard surfaced road through said county, beginning at Cross Plains at a junction of State Highway No. 23, and running thence in a general Northwesterly direction to the Baird and Coleman Public road, and thence North to the Shackelford County line, if being understood that the State Highway department will expend the like amount, Four Hundred Thousand Dollars (\$400,000.00) for the completion of said road; and that approximately the sum of Three Hundred and Thirty-Three Thousand Dollars (\$333,000.00), shall be used to retire the outstanding bonds in said road districts Nos. 1 & 4, and that the remainder of said bond issue shall be used in the construction of all weather graveled roads in the various parts of the county as per the designations hereinafter set out.

Now Therefore, be it resolved by this Court, that in the event said election results in favor of the issuance of said bonds, and said bonds are issued, we, the undersigned County Judge and Commissioners of the respective precincts in said County do pledge that said commissioners court will set aside and use not exceeding Four Hundred Thousand Dollars (\$400,000.00) of said bond issue for the construction of said hard surfaced road, and will retire the outstanding road bonds in the approximate amount of Three Hundred and Thirty-three Thousand Dollars, and will expend the balance of said bond issue, being approximately Two Hundred and Sixty-seven Thousand Dollars (\$267,000.00), in the construction of all weather graveled roads upon the following designated routes, agreeing to build on said routes the highest type road possible for the money available, making all of said roads as uniform in value as possible. Said routes being particularly designated as follows:

Oplin West to County line on Lawn Road, Oplin East to Coleman road; Oplin North to Denton; Denton North to Denton cemetery; Cemetery West to North-east corner Carpenter's farm; Carpenter's Northeast corner North to precinct line; Old Denton cemetery East 2 miles; Then North to Precinct line; Dudley store East one mile; S. W. corner of Mollie Gardner Place 1 mile North; then West 1/2 mile to Taylor County line.

Rowden to State highway to be constructed. From Precinct line at N. E. corner B. E. B. & C. R. R. Co., Survey No. 28, through Eula to Bankhead Highway; From N. E. corner Section No. 8 North to Bayou by Lone Oak School to Clyde; Eula West 1 mile, then South 1 mile, then West to County line; Clyde North 3 miles to Klepper road, then West to Clyde and Hamby road, then by Fairview School to Hemby; From W. H. Bryant's S. W. corner North to Bankhead Highway, Union School to Bankhead Highway at Humble Station. Putnam North to site of old Hart School, then to Union School; then East to State Highway No. 23; Putnam South on Cross Plains road to Precinct line; Seranton to Cross Plains and Putnam road; Admiral North to Bankhead Highway; approximately 3 miles on mail route in M. R. Surles et al neighborhood near Putnam; Coleman and Baird road from Coleman County line North to intercept hard surfaced road, Cross Plains North on Putnam road to Precinct line; Cross Plains South-east to Brown County line; Cottonwood East to Cross Plains & Putnam road; Atwell West to Cross Plains and Putnam road.

Cottonwood West by G. W. Coates

to intersect with Cross Plains Highway Gap, Admiral road Thence in southeasterly direction passing J. A. Moore place and running nearly south to intersect with hard surfaced highway West of Cross Plains.

All persons who are legally qualified voters of the State of Texas and County of Callahan, and who are residents, property taxpayers of said County shall be entitled to vote at said election.

The ballots for said election shall have written or printed thereon the following:

"FOR THE ISSUANCE OF THE BONDS AND THE LEVYING OF THE TAX IN PAYMENT THEREOF"

"AGAINST THE ISSUANCE OF THE BONDS AND THE LEVYING OF THE TAX IN PAYMENT THEREOF"

The voter shall mark out with black ink or with black pencil one of said expressions, thus leaving the other as indicating his vote on the proposition.

The polling place and presiding officer at Cross Plains and the surrounding precinct are as follows: Cross Plains, Chevrolet Building, Taylor Bond, presiding officer.

Cottonwood; M. R. Lovell, presiding officer.

Admiral; Ed Davis, presiding officer.

Dressy; Raymond Steele, presiding officer.

Caddo Peak; J. A. Moore, presiding officer.

Atwell; W. R. Rouse, presiding officer.

Oplin; Chas. Allen, presiding officer.

Rowden (Pilgrim) N. B. Holloway, presiding officer.

The election will be held on Saturday, Nov. 23, and the adoption of the bond issue requires a two-thirds majority.

License fees for 1930 will range from one-half to two-thirds this year's cost. Light cars will run just half, with a sliding scale based wholly on weight, ranging up to two-thirds the old fees on the heaviest passenger cars.

The reductions will average \$10 each on the 1,100,000 cars to be registered.

Registration cannot start until Jan. 1, the attorney general's department has ruled, and must be finished before midnight of Feb. 1.

Present combined weight and horse power basis for fixing the license fees has been abolished, and weight alone will govern the fees in 1930. A scale of weights and costs has been prepared, by which the owner of a car may figure out for himself what his new number plates will cost him. Weight of his car can be ascertained from his present registration slip. To this 100 pounds for water, gasoline and oil will be added.

Following is the table of charges on the various weight brackets:

Weight—	Cts. per 100 Lbs
Up to 2000	28
2001-3500	36
3501-4500	48
4501 up	50

Comparison Of Charges.

Comparisons on this year and next year's registration costs on representative models are given below:

Car—Model—	Present	1930
Ford, T	\$11.20	\$ 5.04
Ford, A, sedan	17.20	9.30
Ford, A, coupe	16.20	8.64
Chevrolet 6, coach	16.50	9.00
Whippet, sedan, 4	16.00	8.64
Whippet, touring, 4	14.50	7.56
Whippet, 6, sedan	17.03	9.36
Plymouth, touring	16.00	8.64
Plymouth, sedan	17.00	9.00
Chrysler, 65, sedan	19.53	10.80
Chrysler, 80, sedan	30.88	21.12
Dodge, 6, sedan	19.22	10.44
Studebaker, 6, sedan	21.72	12.24
Studebaker, 8, sedan	32.02	20.16
Buick, light sedan	27.70	18.24
Buick, heavy sedan	32.35	21.12
Cadillac, sedan	40.67	23.50

These cars are closely comparable in weights with other makes in the various ranges, so that they give a close indication of the costs of registering each car in January.

She's Alive, Heart's Not in Right Place

Kirkville, Mo., Nov. 5.—Mrs. William W. Wilson's heart is not in the right place. She owes her life to that fact.

Mrs. Williams was in an automobile which police commandeered to follow two fleeing thieves. A gun battle occurred. Mrs. Williams was shot through the spot where her heart was presumed to be. But she lived.

At a hospital an X-ray picture disclosed that her heart was on the right side of her body. She will probably recover.

"Com' on Jim Let's Light Up and Talk Over Old Times."

JUST let two old pals get together and you're certain to hear, "Com'on Jim, let's light up and talk over old times."

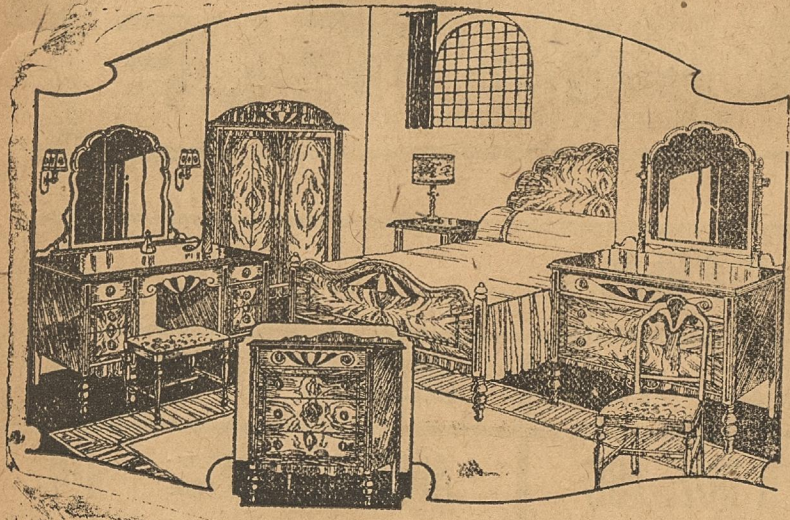

—Perhaps they have been separated for years, yet upon their meeting they talk of "other days," recalling the happenings of long ago amid the lingering aroma of burned tobacco.

—How things have changed since their last meeting. When youngsters' conveniences were few, but the average family spends about \$28.89 annually for electric service. ELECTRICITY is the greatest necessity of all. . . . It is cheaper than one can imagine. . . . Use More of it!

MAKES REMARKABLE CENTURY FORECAST

Making predictions on events to occur within the next 100 years is, in a sense, a task comparatively free of danger since one would not be alive to hear taunts over errors.

But indite forecasts so accurately that more than half of them have come true within a half century is nothing short of magic and such was the record of an anonymous writer in a St. Louis newspaper in 1886.

In dismantling an old home here the clipping bearing the predictions of "E. P. P." the otherwise anonymous St. Louis writer, came to light. It was from a newspaper published February 19, 1886.

E. P. P. started out as follows: "I shall take the liberty of transporting you 100 years into the future. It is January, 1886."

And then—well, here is what he predicted.

Formation of a League of Nations, which he called by that very name.

Formation of a World Court for settlements of international disputes.

Machines in which man would fly with ease carrying heavy weights and freight.

Perfection of the "Photophone," by means of which the world's news would be broadcast by sound and picture.

General knowledge of world events on the day they occur.

Reformation rather than penalization of criminals.

Increases in the span of human life. So much for the predictions which already have come partly true, at least, 43 years after they were made.

E. P. P. has still 57 years for his following predictions to materialize.

Roads to be given over to cultivation, having been made unnecessary by air transportation.

Abandonment of post offices with aerial mail delivery at each person's door by parachute.

A new United States, stretching from Panama to Alaska, comprised of 94 states.

Complete abolition of standing

armies. Congressional sessions only once in each ten years and the passage of no laws which cannot immediately be repealed.

Houses built of paper and equipped with aluminum and glass.

Powerful stations for the distribution of photophone news.

Easy communication with other planets.

Education by individuals rather than by platoons.

Extension of human life to an average span of eighty years; one out of every 200 persons to reach 125 years; one out of 1,000 to reach 150, and extraordinary cases 200 or more years.

Evolution of animals so that dogs may be made to think.

Elimination of vagabondage by everyone contributing to society.

Segregation of criminals and sterilization of the unfit.

Ablene, Texas, Nov. 5.—The construction of approximately 70 miles of major power transmission lines has been approved recently and work is either under way or will begin within the next two weeks. The construction of these units takes place in and around 10 towns over the properties served by the West Texas Utilities Company.

Work has begun on the construction of a 132 Kv transmission line to be insulated at present for 66 Kv operation. The line approximately 28 miles long as to extend southeast from Sonora to the Sutton-Edwards County line. At this point, the high line will interconnect with one being built north from Uvalde via Camp Wood and Rock Springs by the Central Power and Light Company. This interconnection is being made for the purpose of interchanging power between the two systems and which will supply three-way service to the company property south of San Angelo.

To serve the water wells and pumps of the city of Childress, a 2,300 volt line is to be built within the next few days from the Estelline substation, a distance of four miles. 127,00 feet of 2,300 volt line is being constructed through the new oil section of Bakersfield. Approximately 9 miles of high

through Fisher County to serve oil line has recently been completed well drillings and the Humble Pipe Line pump station. Within a few days a 4,000 volt line is to be built to the Joe B. Mathew's Ranch near Albany. This line nearly two miles long is to serve his residence and large dairy. Construction will begin within the next few weeks on a 3,500 ft. line in the Williams addition, east of Abilene, to serve the T. & P. Ry. Company dispatcher's office and the Lone Star Gas Company.

Approximately 5,000 feet of power lines are being built in stretches of from 100 feet to 1,000 feet in Menard, Winters, Memphis and Clarendon for the purpose of improving the lines already and of extending lines to the steadily increasing list of customers.

LIFE IN A COUNTRY VILLAGE

(By JOE SAPPINGTON)

It is simply wonderful how many interesting things can happen in a country village in a short space of time. The first three days I was in this village I recall the following pleasant incidents: Bill Hodge's mule died suddenly; Wash Spradden's baby swallowed a nickel; Jeff Smith's team ran away with his wagon and broke both his legs; Grandpa Bivins was stricken with paralysis; Jim Hawkin's dog went mad and bit thirty-seven dogs before he was killed; Uncle Abner Kelley and Gabe Withers had a fist fight over a discussion of the proper mode of baptism; thieves broke into Frank Haine's smoke house and at the dead hours of night stole a middling, two hams, a sausage mill and Frank's brand new mineral rod; Jim Meadows had a fight at Bill Lee's blacksmith shop; lightning struck the west gable of of Mace Hall's barn and killed a calf and two pigs; Dick Parsons was hypnotized and made believe he was a wild horse.

The very next morning after Dick was hypnotized and just as Uncle Abner Kelley and Uncle Gabe Withers had shed their coats to have another fight over some Biblical argument, Uncle Billy Hunter dashed up at full speed with his breeches leg worked up above his knee, riding the old family mare and armed with an old-fashioned cap and ball rifle, and yelling out if anybody had seen Tom Dooley, as he wanted to shoot a big, jagged, rectangular, nine-cornered hole through his bosom for stealing his daughter the night before.

A great crowd soon collected around Uncle Billy and his panting mare and some of the old men tried to reason with him and dissuade him from his rash purpose, but he would not listen to reason and swore he would never stop until he found Tom and shot him into mince meat. All business had come to a standstill as every man and boy in the village had collected around Uncle Billy. While the crowd was at the very height of the excitement Dick Parsons came up in a lope on a

little flea bitten mule and excitedly asked what the trouble was. While some one was explaining to Dick that Tom Doonley had run away with Betty Hunter the night before and that Uncle Billy was searching high and low and proposed to shoot a frazzled hole in Tom's diaphragm on sight, Dick's mule began to kick and snort and run. At the same time Uncle Billy's old family mare became unmanageable and began to kick up and snort, which scattered the crowd in every direction.

Uncle Billy and Dick hollered "woah! woah!" as fast as they could but it had no effect on the frantic beasts and they raced around and around in a circle while the two men held on to the horns of their saddles. Uncle Billy lost his gun in the early part of the engagement and when it struck the ground it went off and tore the west gable end out of Doc Mason's store. He must have had a pound of lead in that old army relic and if he had ever gotten sight of Tom and turned that load loose at him he would have been riddled from head to foot.

The crowd finally surrounded the old filly and succeeded in pulling Billy off, but Dick's mule could not be surrounded and it proceeded to buck, snort and kick while he rode from its head to its tail as it madly dashed around the village. It ran into Bill Lee's blacksmith shop and fell over a wagon wheel, but before Dick could get out of the saddle it was on its feet again and out of the shop. The crowd finally tried to hem it up in a fence corner by throwing rocks at it, but it broke through their ranks and once more made a circuit of the town while Dick squalled for help at every breath.

We finally succeeded in running it into Rufe Potter's drug store and just as it jumped through the prescription case Dick turned loose all holds and fell to the floor. After the mule had demolished the prescription case and most of Rufe's patent medicines, including a fresh shipment of Peruna, it gave up the struggle and suffered itself to be led out of the store.

Luckily neither Dick nor his mule was seriously hurt, having received only a few scratches and bruises. As soon as Dick could get his breath he began to curse Fluke Adams and swore

that he had hot dropped his mule and Uncle Bil's mare. No one had seen him do it, and he protested his innocence, but it was the general opinion of everybody present that he was guilty and had hot-dropped the mule to get even with Dick for kicking him off the stage the night Dick was hypnotized and turned into a horse.

But it is an ill wind that blows nobody good and what big fair to be a tragedy was in all probability turned into a blessing. The old mare during her struggle had got Uncle Billy's spine out of plumb by an inch and a quarter so the doctor said he was compelled to take to his bed for several days. While lying there his heart softened toward Tom and he sent for him and Betty to come back home which they did. If Tom ever wants to know just how near death's door he was the morning after he ran off with Betty all he has to do is to go and view the havoc that old gun Doc Mason's store.

AGAIN AWARDED

FIRST PLACE

Tribute to its leadership as an automobile producer is again paid the Chevrolet Motor Company in the recent announcement by the National Automobile Chamber of Commerce, that Chevrolet has again been awarded first place at the 1929 national automobile shows.

The award is given annually to the member company doing the largest annual volume of business, and is one of the most coveted honors that the automobile industry can bestow on an individual automobile manufacturer.

In addition to the distinctions that goes with the award, Chevrolet is given first choice of exhibition space at the national automobile shows in New York and Chicago.

JOB PRINTING DEPARTMENT

"EVERYBODY'S SIX"

Smart · Smooth · Safe · Dependable—and Priced Within the Reach of All!

THE new Chevrolet was designed and built to bring the advantages of six-cylinder performance within the reach of all those who can afford any automobile. For that reason it has met with sensational success—more than a million two hundred and fifty thousand on the road in less than nine months!

We cordially invite you to come in and see this remarkable car. Its smart Fisher bodies are styled in the latest mode—with tasteful mouldings, concave front pillars and oblong windows. Its great six-cylinder valve-in-head engine

is smooth, powerful and unusually swift in acceleration. It is designed throughout for greater safety and dependability. And its low first cost, combined with its outstanding economy of operation, makes it truly "Everybody's Six."

Come in today for a demonstration!

The Roadster, \$525; The Phaeton, \$525; The Coach, \$595; The Coupe, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$695; The Sedan Delivery, \$595; Light Delivery (Chassis only), \$400; 1½ Ton Truck (Chassis only), \$545; 1½ Ton Truck (Chassis with Cab), \$650. All prices f. o. b. factory. Flint, Michigan.

Consider the delivered price as well as the list (f. o. b.) price when comparing automobile values. Chevrolet delivered prices include only authorized charges for freight and delivery, and the charge for any additional accessories or financing desired.

Buffs Encounter Another Hard Battle

The Cross Plains Buffaloes played the hardest team that they have played this season, last Friday, here on the Murphy Field. The Buffaloes held the Stephenville Yellow Jackets to a score of 6 to 0.

It was a bad day for the game; the field was very wet and muddy. Although it was raining all during the game, the Buffaloes did not fail to hold the heavy Yellow Jackets' line as they plunged it with all the strength of the team.

The first half was a bitter fight with neither goal in danger until the last three minutes of play, when the Stephenville punter got off a good punt and the ball was downed on the Buffaloes' own 20-yard line.

The Buffaloes lined up to kick, with Jack DeBusk back, but on account of the ball being so wet and muddy he failed to get off a good punt. The ball was on the Buffaloes 25-yard line with two minutes to play.

The Yellow Jackets plunged the Buffaloes line for a first down. The Buffaloes begin to stiffen, but the Yellow Jackets insisted on plunging our line until they were less than five yards from the Buffaloes goal line when the whistle blew for the end of the first half.

At the beginning of the second half the Buffaloes came out on the muddy field with a new spirit, each player was full of pep. The Buffaloes kicked off to the Yellow Jackets and the fight begun. Line plunges were the chief means of gaining yardage. Stephenville punted and the ball was again downed on about our own 20-yard line.

The Buffaloes made a few line plays and now then an off tackle play until they had the ball on about our own 30-yard line when a pass was intercepted by one of the Stephenville players, who was downed in his tracks. The Yellow Jackets plunged our line for a first down; the Buffaloes held them for two downs when a play got loose for another first down. The heavy Stephenville team plowed our line for a touchdown but failed to gain the extra point.

After the Yellow Jackets made their touchdown the bitter fight started anew. The Buffaloes held the Yellow Jackets near the center of the field, it remained this way with neither goal in danger until the last whistle blew.

There were only two substitutions made during the game: Stanley

Carmichael for Vergal Graves, and Normon Farr for Claude Mayes.

The Buffaloes are training very hard to win the next three games, which are Desdemonia, Clyde, and Rising Star.

"So, 'Come and see us win the game next Friday from Desdemonia and how?"

Orba Booth.

THE SENIORS' PRAYER

And please, God, when I graduate make me a capitalist.

On entering the study hall Tuesday morning, the students noticed that new furniture had been added to the room. In a corner of the room a stand for the dictionaries had been built.

Miss Mayola Garrett a Senior of C. P. H. S., spent the week-end in Abilene with Helen Upton and Ida Mae Little.

Mr. Williams: "I've had this car ten years and haven't had a wreck."
Tom: "You mean you've had this wreck ten years and haven't had a car."

The Seniors are proud of their Scrap Books, but as for their pictures, well, they are great deceivers.

"Marie, aren't you getting too big to play with boys?"
"No mother, the bigger I get the better I like 'em."

Roger: "How do you like this picture?"
Ida Mae: "I'm it might be worse."
Roger: "I hope you will withdraw that statement."

Ida Mae: "Very well; it couldn't be worse."

'ES 'ATS US

When the sun dips in the golden blue,
Buffaloes, remember we are boosting you!
When gray clouds hide the shining sun,
Buffaloes, remember we are yelling some!
When earth and sky seem to have met,
Buffaloes, defeat or victory,
We're with you yet!

— By Willie Smith

Mother: (To son who had just returned from the first term at college) "Did you pass everything, son?"
Hulan: "yes, all but two Buicks and a Hudson, and dern, I believe they must have had aeroplane motors in them."

HOLMES' SUCCESSOR GETS THREAT LETTER

Local officers and rangers at Sten-net last week were trying to trace the source of a threatening letter sent to District Attorney Clem Calhoun in the cases of A. M. Jones and Jim Hodges, charged with murder in the Holmes assassination Sept. 13, at Borger. Undecided whether it was from a crank or written with criminal intent, Calhoun said it was "the sixth or seventh" he had received since being sent to Borger by Governor Moody to clean up the Holmes case.

The letter was postmarked Amarillo last Monday and typewritten badly and incorrectly spelled. It said Holmes' murderer was still at large and would be for some time. It warned Calhoun to release Jones and Hodges and said unless he and other Borger "laws" were careful they would meet Holmes' fate.

Beside the typewritten signature, "The Mysterious Man Who Is on Your Trail," was a freehand drawing in pencil of the "slayer." Officers have studied the picture, but made no announcement.

Elory Hought of Cross Cut was in Cross Plains Monday.

E. D. Priest and Fred Alexander were Baird visitors Monday.

by Arthur Brisbane

Good News, Generally Senator Nye in a Hurry And Hear John D. R. 200 American Dialects

The Federal Reserve bank, realizing suddenly that this is a nation and not a pawn shop, reduced the rediscount rate from 6 to 5 per cent.

Perhaps it will influence professional money lenders to suspend for a while the orgy of usury.

New Jersey, first among the states, has absolutely wiped out the gypsy moth.

Governor Larsen and the state agricultural department are to be congratulated on a fine achievement.

More money than Wall Street could lose in a dozen panics would be saved if science could eliminate agricultural pests, boll weevil, corn borer and the rest of the army.

Excellent news comes from Florida as to the success of that state in dealing with the Mediterranean fruit fly. It has been a costly battle, but worth the money and trouble.

Samuel Insull and other big employers, following the example of Julius Rosenwald, supply money to protect employees from losses in stock speculation.

Henry Ford wouldn't agree with that idea. Two years ago when this writer mentioned certain stocks in which there were bound to be heavy losses, Ford said: "Of course. But that's the only way people can learn."

Whether it is wise not to let nature take its course in gambling as in other things, is questionable.

Senator Nye of North Dakota wants Wall Street and "all speculation sifted." What's more, he wants a remedy ready by February 1.

That's a short time for so big a job.

The Malay, in his breech-clout, bets on cock fights.

The proud red Indian piles up his shirt and blanket, bets them on a pony race, standing in dignified nudity.

Two ways of getting something: one is to work, the other to gamble. Ninety per cent of human beings prefer the gambling way.

That will be changed a good deal later than February 1, 1930.

From Pocantico Hills, where John D. Rockefeller is enjoying life at the age of ninety, came a statement that to the distressed was like a drink of cool water in the middle of Sahara:

"My son and I have, for some days, been purchasing sound common stock. We are continuing, and will continue, our purchases in substantial amounts at levels which we believe represents sound investment values."

Mr. Rockefeller, who has given away \$750,000,000 to science, education and fighting disease, rarely makes any public utterance. His statement about the purchase of stocks by himself and his son is his first public statement on business since 1911. It will do more than anything else could have done to restore confidence.

Those purchases, of course, will probably enable Mr. Rockefeller to give away another hundred millions. Everybody knows that his purchases are based not on a desire for profits, but to restore confidence and prevent unnecessary loss to millions.

Doctor Greet teaches English to girls at Barnard college, and proves, with the phonograph, that there are 200 American dialects between the two oceans, the Great Lakes and the Gulf.

At least, all Americans understand each other.

It is not so in France, where a peasant from Brittany cannot understand another from the Midi.

The number of American dialects reminds you of a beautiful poem about the soldiers each remembering a different name, but "All Sang Annie Laurie."

Americans may speak 200 dialects, but they all understand each other when they talk about the dollar, which is a sort of national "Annie Laurie."

You will be glad to hear that the Federal Reserve board says the Wall Street earthquake is over, public fears calmed.

It may be permissible to remark therefore, while the earthquake is still fresh in many minds, that gambling is dangerous.

And it isn't necessary. There are other, better ways of making a living in the United States. In addition to which gambling is NO WAY to make a living.

It used to be said, "Wise man, take your profits." That has changed to "Wise man, take your losses," meaning, don't sell in a panic and regret at leisure.

Two more great oil fields have been found, one in Texas, one in Kansas and it is called "a misfortune harmful to the price of oil stocks."

It ought to mean general satisfaction, proving the limitless wealth of this country. Unfortunately, oil companies and government combined have not learned to protect oil resources and prevent criminal waste.

JOHN NORTHCUTT SHOT TO DEATH

John Northcutt, known as the "two-gun man from Wink," and accredited with the slaying of many men, was killed at Wink last week, the victim of an amateur gunman who beat him to the draw.

Northcutt fell in front of the post-office, on Wink's main street, killed by five shotgun charges fired by Clarence (Heavy) Bracheen, store-keeper.

Northcutt was a "dead shot." A year ago he entered Bracheen's store and had trouble with a clerk. Bracheen interfered. The feud grew. Northcutt returned here after being acquitted of the murder of a Chinese waiter in Oklahoma City and he and Bracheen met face to face. Bracheen, returning from a hunting trip, whipped his shot-gun to his shoulder and fired.

Northcutt's body was riddled before he could draw his gun.

Texas Ranger Captain Tom Hickman denied today that Northcutt ever was a State ranger.

"When John Northcutt was in Borger he got 'sundown' orders from me and Brig. Gen. Jake Wolters, too," Hickman said.

Northcutt is said to have killed twelve men.

Mr. and Mrs. E. O. Watson and daughter, and Mrs. Sam Long and daughter spent Monday in Baird.

For safe keeping and to keep from freezing bring pot plants, flower pot, to City Floral, plenty storage space at small cost, City Floral Nursery.

The President's Plans Tainted Football Sunshine, Diet, Thought Another Big Airboat

President Hoover's plan for a great system of inland waterways realizes, in prospect, the hope of those that welcomed an able engineer to the White House.

Total expenditures planned will amount to \$525,000,000, and every dollar spent will pay for itself ten times over.

The President observes that the annual increase in expenditures will amount only to the cost of one-half of one battleship.

The President might have added that in modern war the whole of one battleship would be worth less than one-half of 10 cents, since battleships are now merely targets for submarines and airplanes, worth nothing, except to battleship builders.

The Carnegie foundation says college football is "tainted with money." Free teaching and cash bonuses are given to young men that can kick hard, run fast and tackle savagely.

It would be more pleasing if colleges sought great teachers as eagerly as they seek great quarterbacks.

But no great harm is done. The games and great crowds arouse young men's interest in college life and give college education to young men from rolling mills and rear ends of ice wagons, that might otherwise remain uneducated.

Miss Mary Garden, still very young, returns to America weighing only 116 pounds. Her prescription is "diet, thinking and sunshine."

The diet is meager, hardly enough for a few canary birds. Sunshine abundant. Thinking, doubtless, very deep.

To weigh 116 pounds is not important. But if all of us imitated Mary Garden, ate less and thought more, civilization would progress rapidly.

Progress in flying advances rapidly in Europe. A few days ago Germans showed a gigantic hydroplane with twelve engines, flying, carrying 169 passengers and crew.

Great Britain is building a plane of the same size, a triplane instead of a biplane, also with twelve engines, to go faster.

Henry Ford was the first to talk about a 12-engined plane "to carry 100 people, with a machine shop on board."

The Germans and the British build the planes.

The Swiss parliament, elected by a moral and serious nation, proposing a law to punish blasphemy, suggests six months in prison for those that "orally or in writing insult God."

Blasphemy should be punished because it sets a bad example and shows want of respect for the feelings of others.

But is it possible for any two-legged human microbe on this planet "to insult God"?

If the mice proposed to punish any mouse insulting Edison, you would say, "Mice, don't worry, you can't in-

sult Edison." How much less can any man insult the Creator of the Universe?

The nation read with affectionate sympathy of Mr. Edison's visit to Dearborn, where Henry Ford has rebuilt as it was in old days the simple Edison laboratory to which men owe so much.

Mr. Edison was deeply moved when he saw his old tools, the chair in which he sat in his early youth, his primitive paraphernalia reassembled as used fifty years ago when he developed the idea that now lights the world.

Every old man can share Mr. Edison's emotions. The human heart is the same with or without genius to lend it a great name.

A million among those that see this column carry with them memories of youth—a shellbark hickory tree standing alone in the field; a grove of chestnut trees with yellowish green burrs open, showing the brown nuts within; a pond that held "shiners" and catfish; a swimming hole—happy memories of a free life and boundless hope.

Mr. Kingsbury, head of Standard Oil of California, cuts prices he pays for California oil from 50 to 75 cents a barrel, an excellent plan to prevent the reckless outpouring of oil and waste of gas.

Mr. Kingsbury says: "There is being blown into the air in California 800,000,000 cubic feet of gas every day."

The fuel value of this gas equals 132,000 barrels of oil every day.

Reckless squandering of our oil reserves, and waste of gas allowed to escape into the air, are a disgrace to the common sense of this country.

The notorious "Coal Oil Johnny" who bathed in a bathtub full of champagne was a conservative in comparison with some modern oil men.

Poincare and Clemenceau, great Frenchmen, and old, Clemenceau is eighty-eight, amaze their doctors by quick recovery from serious illness.

FANS CAUSE FOOTBALL FIGHT AT GORMAN

(Gorman Progress)

That the boys and girls of Eastland County could secure intoxicating liquor at a number of places of ill repute, was included in the report of finds of the Grand Jury given to Hon. Elvo Been, Judge of the 88th District Court.

Items mentioned in the report included the examination of 205 witnesses, returning of 128 indictments (all felonies) and the commendation of various branches of law enforcement in the county.

The Grand Jury was in session four days in the month of September and returned 18 indictments; the second division of the session having convened Monday morning October 21 and adjourning on the afternoon of October 25. One hundred and ten indictments were returned during the five days.

BRAZOS VALLEY PECAN GROWERS' ASSOCIATION

Eastland, Texas, Nov. 13, 1929.

Correct methods of transplanting nursery grown pecan trees will be demonstrated in connection with a talk on this important factor in the development of a pecan grove by J. A. Evans of Arlington at the fall meeting of The Brazos Valley Pecan Grower's Association at Weatherford November 22nd.

Pecan growers have been constantly reminded that western grown pecans are better suited to planting in West Texas than eastern varieties. Now Ross Wolfe of Stephenville will explain at Weatherford how nature has equipped pecans of western origin to withstand hot winds and dry weather. There are botanical reasons far too important to be ignored why eastern pecans will not prosper in this section and why western pecans are not so well adapted to the East.

Other speakers will be J. H. Burker, Clyde; Frank Willman and L. D. Bomberg, Austin; Jimmie Rosborough, A & M College Extension Service; O. S. Gray, North Texas Agricultural College, Arlington; Dave Glenn, Gran-

bury; C. F. Denny and others of note. An interesting educational program is assured.

The Annual Pecan Show will be held at this time and premiums of \$3 and \$2 are offered for quart exhibits of Burkett, Halbert, Western Schley, Texas Prolific and other Westerns. Eastern, Natives and natives that have never won a ribbon, also specimens of other nuts. Gray, Willman and Rosborough are the judges.

An added feature is a pecan story writing contest in which \$5, \$3 and \$2 are offered for the best pecan story in the area of the Association. It is preferred that photos accompany the story. This contest is open to everyone. Material submitted will be used by the organization for publicity. The program and show are open to the general public and an invitation is extended to all those interested in pecan development to attend. Registration will begin at Parker county court house at 9:30 A. M. Friday, November twenty second.

J. C. PATTERSON, Secretary.

Mrs. William B. McNaughton of Pittsburg Pa. is the guest of her daughter, Mrs. Bill Lowe. Mr. and Mrs. Lowe met Mrs. McNaughton in Waco, Saturday.

STARTING SALARY OF \$105.00 PER MONTH IS PAID RADIO GRADUATES OF TYLER COMMERCIAL COLLEGE

Our employment records will prove the above statement. At this time, if there is a qualified graduate of our Radio Course out of employment we do not have a record of same.

If you are a young man interested in Radio, you may feel sure of getting as much as \$105.00 per month, with expenses paid, when you have completed our full course. Calls are being received through our Employment Department every week for licensed Radio Operators.

Our Radio Department is supervised by a competent instructor. The equipment is up to date and modern. Working conditions are the very best.

Our instructor in Radio, Mr. Daniel, is an associate member of the Institute of Radio Engineers, a distinction held by only a few Radio Operators in the United States.

A nice position with a good beginning salary will await you when you have completed the course.

If you are interested in Radio, one of the greatest of all professions, then write for our catalog, "Achieving

Success in Business," and for full information regarding our Radio Course. Send the coupon at once. TYLER COMMERCIAL COLLEGE TYLER, TEXAS

Cross Plains Buffaloes
VS
DESDEMONIA

AT
MURPHY FIELD

Citizens Endorse Road Bond Issue

Continued from page 1

ing this money anywhere else.

Fourth: Because, we think it will be of immense benefit to Cross Plains and the country in the Cross Plains to the east, the west, south, north, southwest, making it possible for everyone to get to Cross Plains in all kinds of weather and also possible for the citizens of Cross Plains to go where they want to in any kind of weather.

Fifth: Because we have been assured by the County Judge and many others who have made an accurate calculation, that our taxes will be increased to not exceeding 75 cents on the \$100.00 valuation in our Cross Plains Precinct. This is only an increase of \$2.50 on the \$1000.00 valuation or \$25.00 on the \$10000.00 and we doubt if there are many single tax payers in this precinct who pay on more than that amount. Therefore it will not cost many taxpayers more than \$25.00 per year additional, and everybody who has a car pays more than that on tires and damages to his car caused directly by the terrible roads which we have to travel to our county seat and to other places. Therefore we think it will be a good investment for everybody to vote for these bonds and carry this election.

Sixth: Because, if we vote these bonds as Highway 22 is built the State will spend \$400,000.00 in this county which otherwise they would spend somewhere else, and besides will forever keep up this highway without cost to us.

Seventh: If this issue is defeated, we will lose Highway No. 22. Brown County has made application for it to be run from Hamilton to Brownwood, and Hamilton wants that route, but Judge Ely has stated that it will come through Comanche and Callahan County if this issue carries. If it fails, Brownwood will probably get the Highway.

Eighth: If this issue is defeated, we will lose much of our Cross Cut and Brown County business which now comes to Cross Plains.

Brown County is building a good Graveled road to Cross Cut and the Callahan County line from Brownwood. If we do not finish this road from the County line to Cross Plains, the folks in Cross Cut, who now are our customers will go to Brownwood to sell their produce and buy their goods.

Ninth: Some good citizens say that we can sell our \$50,000.00 of bonds which were voted years ago, and build our lateral roads. We can do this, but it will raise our taxes nearly to the 75 cents which the bond issue will raise it. We will not get Highway No. 22, and will not get any State money at all and will not get as much County money spent in our precinct as we will if the bonds are issued.

So for the reasons set out above and many other good ones, let us all get in behind this bond issue and put it over. We are going to get another railroad; with our railroad facilities, two highways and good lateral roads, and lots of other good things which we have now and will get later, we will make this town and country a good place to live in.

BUFFALOES SURPRISE WITH GOOD OFFENSE IN DEFEAT OF BEARS

HARLOW SCORES TWO
TOUCHDOWNS; E. WEBB
KICKS GOAL EXTRA POINT

Opening with an offensive rush that surprised the spectators, as well as the Bear team, "Pancho" Vilha's Buffaloes of Cross Plains High School defeated Baird High School Bears 13 to 7 here last Thursday on Murphy Field.

The Baird Bears and Buffaloes are ancient rivals. Lots of teams, after being defeated in previous games, would have been "easy picking" for the next opponent, but the Buffaloes showed their metal at Gorman and against Baird. Buffaloes are hard fighters, and made a record of which the city is proud.

The game Thursday was Buffs' second victory and the reasons are that they were the only games in which Vilha had all of his regular men in the game, and in good condition.

The Buffs and Bears met twice in 1927, when the former team trimmed Baird. In 1928 the Buffs had two games matched with Baird, but they were called off for some reason on the part of Baird. It was said in 1928 that Cross Plains was too tough and hostile. This year they would probably have said the same thing, but the Buffs knocked them out so completely in this last game that they have not sufficiently recovered to register an alibi. One or two of the Bears had to be carried off Murphy Field, several receiving minor injuries caused from falling over themselves.

Capt. Earl Webb led his bunch of Buffaloes around end, through center and over-head with straight, forward lateral passes in a manner that broke the hearts of ever Baird fan. Not only did his field general prove himself smart in his leadership with "honest" football, but he showed skill in deceptive plays which made many gains for his cohorts.

The first touchdown made by the Buffaloes was on straight line bucks during the second period, when Buffs had ball on Bears 40-yard line, then plunging down to Bears 15-yard. E. Webb ran seven yards through middle of line, put ball on Bears 8-yard line. This gain, however, was short-lived, as Captain Webb, smarting at the likelihood of defeat, gathered around him his men and instilled into them a spirit of fight that soon netted a touchdown, when "Boots" Harlow hit his own left side of line, for touchdown, Webb kicking goal, which put the Buffs seven points in the lead.

Outclassing the Bear outfit in every department, the hard-hitting, smoothly performing Buffs team inflicted on the red-and-white one of the most disastrous defeats of the season. The purple and gold warriors chalked up sixteen well-earned downs to six for their opponents, doing just as they pleased, dashing hither and yon over the Bears.

The Bears' only two threats came in last two minutes of third period, when the red and white passed over the center of Buffs' line; the ball was found on the Buffs' 8-yard line.

It was R. Watson and Carmichael who went as guards to stop the Bears from going through middle of line. After these two were sent in the Bears had six yards to go for a touchdown, three downs to make it in, they tried to more line plays, and found out that Vilha's reserve material was sent in to hold them, on Bears' fourth play, which was called around Buffs' left end and was thrown for a 6-yard loss by Buffs' left end.

HARLOW MAKES SECOND TOUCHDOWN

The Buffs had ball on Bears 30-yard line. A second time the Buffs drove to the 25-yard line with an assorted off-tackle, smashing an aerial attack and Buffs advanced the ball up to the 15-yard line. But the Buffs were held for three downs and on fourth down Harlow caught pass over center of line for touchdown.

Five minutes left in fourth period and on no less than four occasions during the melee they took ground loses by passing mildly; on their 25-yard line they were held for downs; this brought about a bad punt, which went out on Buffs' 35-yard strip. Bears complete pass for 15 yards on Buffs' 20-yard line, another pass for touchdown (lucky). Buffs' off-side gives Bears extra point. Scores: Buffs 13, Bears 7.

A few minutes to play, Buffs received the kickoff and rushed the ball

down to Bears' 20-yard line, just as the gun barked and caught Sweetie on a sweep around the end.

AMERICAN LEGION WARNS VETERANS

The American Legion has called attention of World War veterans to the expiration of time on Jan. 1, 1930, for filing applications for benefit under the Federal Adjusted Compensation Act.

Figures compiled on June 30, 1929, showed that there were approximately 1,000,000 World War veterans who had failed to apply for the adjusted compensation certificates. On that date applications had been approved for 3,650,093 cases. A campaign on the part of the Legion resulted in the extension of time set in the original act to that of January 1, 1930. The Legion has attempted, through its members and the public, to inform all veterans of benefits granted by the act.

The average adjusted compensation certificate is \$1,000. This certificate granted the veterans on a basis of the time he was in service and whether he served over-seas is similar in many respects to a twenty-year paid-up-endowment insurance policy. It is payable on death to the beneficiary of the veteran or to the veteran himself if living at the time of maturity. The certificate has a loan value that increases with the years. Application blanks may be obtained from Legion posts or regional officers of the United States Veterans' Bureau.

Veterans who have not made application are warned to act very promptly, as it is considered that Congress may not again extend the time of filing.

The officers or any member of the local American Legion Post will readily assist any veteran who is entitled to this compensation, and who is in danger of being deprived of it through neglect, in making proper application for same. Attention is called to a clause in the Act which provides that any beneficiary of a veteran is entitled to draw the compensation.

Nearest Star Cluster 18,000 Years Away

The immensity of that small corner of the visible universe of which the earth is one small fragment is indicated in some distances announced in a current Harvard College Observatory bulletin.

These are the distances to 93 globular clusters of stars. The light from the nearest travels more than 18,400 years before reaching earth, while that from the farthest takes 185,000 years.

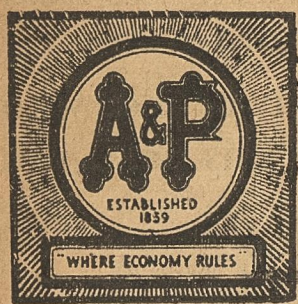

All of them are part of the star system to which the earth belongs, the Milky Way. Outside this Milky Way astronomical telescopes already have photographed thousands of other universes of stars, some so remote that their light requires many millions of years to reach earth.

NOTICE TO DEBTORS AND CREDITORS

The State of Texas, County of Callahan. To those indebted to, or holding claims against the estate of J. D. Love, deceased.

The undersigned having been duly appointed administrator of the estate of J. D. Love, deceased, late of Callahan County, Texas, by W. C. White judge of the county court of said County, on the 8th day of October, A. D. 1929, during a regular term thereof, hereby notifies all persons indebted to said estate, to come forward and make settlement, and those having claims against said estate to present them to him, within the time prescribed by law, at his residence, near Cottonwood, in Callahan County, Texas, where he receives his mail, this the 6th day of November, A. D. 1929.

J. H. Coats, Administrator of the estate of J. D. Love, deceased.
