CROSS PLAINS LIONS ENJOY GREAT BANQUET

MAVERICKS TAKE CLOSE GAME FROM BUFFALOES SAT.

Playing a smashing, fine plunging game on a rain soaked, heavy field the Cross Plains Buffaloes covered themselves with mud and glory Saturday when they held the Eastland Mavericks, a strong class A team, to a six and nothing score.

Although the Buffaloes lost the game they completely outplayed their opponents throughout the last half, and time after time came within striking distance of a touchdown.

Several football experts of West Texas, who saw the game proclaimed the Cross Plains squad the best team on the field.

The Cross Plains Team had been doped to lose heavily. Other clashes between Class A and B teams this season have resulted in victories with large scores for the class A Gridmen. That the Buffaloes not only held this strong class A team to a low score but actually outplayed them should convince Cross Plains fans that they have one of the strongest Class B teams in this section.

Playing steadily against the "break" the Buffaloes held opponents to a scoreless tie the first half of the game. No more evenly matched teams were ever seen on a gridiron. The Mavericks had a slight edge on end runs but the Buffaloes more than made it up by steady gains through the line. However, neither team was able to cross the 20 yard line.

It was early in the third quarter that the touchdown was made. A speedy Eastland back managed to get past the first line of defense and side-stepped his way to the goal line, while the Buffaloes, with five pounds of mud on each foot, were unable to reach him.

From then on the advantage was undoubtedly with the Buffaloes, as they threatened time and again to score. The rest of the game was played in Eastland's territory as the Buffaloes plowed the line savagely for gains, and then when on the defensive stood like a brick wall against Eastland's rushes. The Buffaloes went down fighting and the game closed with them still threatening to score.

Four first downs were made by each side, each team completed one pass, and the Buffaloes are believed to have a slight lead in number of yards gained in scrimmage, although the exact number is not known.

Rex Clark who done all the punting very easily out punted his opponents. Bennett and Murry were consistent ground-gainers, smashing the Eastland line for steady gains. Coverts Reynolds, playing center, and backing up the line on the defensive was a consistent menace to the Mavericks. Cross Plains was not only brilliantly represented by its football team but 25 lively members of the pep squad went along and yelled themselves hoarse in the drizzling rain.

The Buffaloes play Goldthwaite here on the Buffalo Range next Friday, and the Cross Plains fans are urged to see in action the team that showed such an indomitable fighting spirit last Saturday.

The line-up in Saturday's game was as follows:

B. Adams; R. E. S. Carmichael; R. T. McDermott; R. G. Reynolds; C. Maddox; L. G., Harlowe; L. T., A. Carmichael; L. E., Bennett; Q. Davis; R. H. R. Clark; L. H., Murry; F. B.

Substitutions: S. Clark for S. Carmichael; in second quarter, Mayes for A. Carmichael in third quarter.

Mrs. B. F. Andrews of Baird is visiting her parents Mr. and Mrs. J. W. Farmer.

Elder P. S. Young will preach at the Church of Christ Sunday morning and evening.

W. H. Duke of Nimrod was here Saturday.

TRADE AT HOME

The regular meeting of the Cross Plains Lions Club, held in the banquet hall of the Methodist church Tuesday night of this week, was pronounced by all present as being the most joyous which the club has had since its organization. About two hundred members and guests were present.

An unusual but most relished feature of the banquet was the dove barbecue, and those consigned to the task of capturing the doves at the preceding meeting, being cautioned along the lines of an extra tail-twisting in case of failure, had supplied the feathery tribe in abundance for the occasion. Tom Anderson and Mayor Neeb are the Nimrods that brought in the greatest number and pulled down the capital prizes. Sam Barr waddled in with a lone dove, just enough to save himself, and won the booby prize. The hunters were instructed to bring in 400 doves, but they exceeded that number and 452 birds were prepared for the feast.

The Lions of Abilene, Baird, Cisco, Coleman, Santa Anna and Crownwood had been sent special invitations to have representatives present, and among them were listed the principal speakers for the occasion, including Dr. Surface of Abilene, Rev. Cal Wright of Baird and Parker Bond of Santa Anna. Lion Clyde Durringer acted as toastmaster, and Lion Scott lead the singing program, assisted by Lion Chas. Hemphill. Miss Dorothy Davis, music teacher in the Cross Plains High School, rendered some excellent selections on the piano.

Among other invited guests who were present from towns that have no Lion Club, were Mayor B. M. Baum of Dripping Springs, and Mrs. B. W. Webb of Burkett, and Ed Curry and Mr. Gibson of Pioneer.

It was decided that the wild game barbecue feature of the banquets be held quarterly, and the next will probably be a duck or squirrel barbecue. Lion Taylor Bond says that if it is duck, he already has a lame one captured for the occasion.

The doves, as they were collected and brought in for the feast, were kept in cold storage by the genial manager, Everett Roberts, of the Cross Plains Ice Co.

ANOTHER GOOD OIL WELL ON JONES FARM

Another good average oil producer, located on the Wiley Jones farm, was added to the new west shallow field this week. It was completed at 440 feet and is the same sand of the surrounding shallow pools. The scope of this new field is large and well proven territory, which is notably indicated by the sudden increase in prices from \$10 to \$25 that is being offered for nearby leases. Many other new locations, resulting from the strike in this well, have been made. Well No. 2, on the G. W. Klutts farm, now drilling at 250 feet, is due for completion the first of the coming week. This farm adjoins the Wiley Jones farm.

The Tom Bryant deep test, located on the Pinkston estate north-east from Cross Plains, was drilling the middle of this week at about 300 feet above the depth of the Hilburn pool in the thick strata of gray lime which tops the Hilburn pool. The Pioneer sand was encountered in this well at the expected depth, and revealed oil and gas, but not in paying quantities. Drilling to the Hilburn depth will probably be completed next week, and should a pool not be discovered at that depth, drilling may proceed to the depth of the old Vestal well sand, which was found at 3,762 feet.

A shallow test, resulting in a medium gas producer, was completed on the Derrington land, about one mile south-east of Cross Plains, the first of this week.

Harvie Dennis, a local boy who is preparing himself for the ministry, preached at the Baptist church last Sunday morning and night.

Your Own Home

It is not beyond the means of any family to own their own home, especially with the help we are in a position to give those who are willing to help themselves. The plan that will buy your home is a matter for consultation. Drop in and talk it over.

CROSS CUT TO HAVE ELECTRIC LIGHTS

ABILENE, Texas, Sept. 27—Keeping pace with growth of West Texas another extension of the copper highways of the West Texas Utilities Company electrifying the town of Cross Cut was announced from the general offices of the company here.

Construction work has been started on a 66,000 volt highline beginning at the Dunn Lease in Blake oil field, extending the line west for a distance of six miles to the town of Cross Cut. Extension of this line will provide lights and power to this rapidly growing community.

At the same time it was announced by company officials that the Noodle Dome oil field line would be extended from the Roberts Oil Company lease to the Roslor-Pendleton Company lease to serve three drilling wells and for pumping of another.

Leta Neeb, who is a student at John Tarleton, spent the weekend at home.

Vita Little of Randolph College, spent the week end here with her parents.

VICIOUS GRAY WOLF CAPTURED

Another large gray wolf, and one which the government trapper, E. Brumelow, states was the most vicious of any of the wild dogs he has captured in this locality, was brought in and exhibited at the Review office last Saturday.

This animal was trapped in Pinkston's peanut patch, southeast of town, and had evidently been in captivity when it was a pup, but had failed to retain any of the gentle nature taught, or attempted to teach it at that time.

Both ears had been marked with a smooth crop and its tail had been bobbed. This brings the number of gray wolves which Brumelow has captured in this locality within the past few months to twenty-one. Sheep, goats, poultry raisers and farmers generally should certainly appreciate the hard and successfully work which he is doing in destroying these destructive animals.

FOR SALE—My home in Cross Plains near school, at a bargain. Easy terms. R. A. Autry, Coleman, Texas.

(© 1928, Western Newspaper Union.)

Nor can I count him happiest who has never been forced with his own hand his chains to sever. And for himself find out the way divine; He never knew the aspirer's glorious pains, He never earned the struggler's priceless gains. —Lowell.

SPECIAL DISHES

Those who enjoy the gamy flavor of the wild duck will like a dish of:

Duck en Casserole.—There may still be a few who have not dressed wild birds who do not know that they can be clean and well picked in a few minutes by taking off as much of the down and coarser feathers, then dipping in hot paraffin, hang up and let get perfectly cold. The feathers, pinfeathers and all will peel off like a glove from the hand.

Wash and dress the birds well and if the gamey taste is not liked, parboil in water to which a tablespoonful of vinegar has been added. Drain, stuff with celery—a few stalks laid into the cavity of the bird, brown in a little butter, then place in a casserole with carrots, potatoes, small onions and enough moisture to steam and cook. Bake in a hot oven until all are well done. Serve the duck from the casserole. Remove the celery before serving. Some prefer an onion baked in the duck, or both. Season well as the birds are put into the casserole.

It is often a great help to have a recipe for an occasion which will serve a large number. Here is a punch which serves seventy-five:

Fruit Punch.—To three quarts of water add seven pounds of sugar and stir until dissolved. Boil gently for ten minutes. When cool add the juice of twenty oranges, twenty-four lemons, the juice and chopped pulp of a pineapple or a can of grated pineapple, two quarts of cold tea, one quart of water in which two bunches of mint have been steeped after being chopped then strained; one cupful of water in which one tablespoonful of cloves have been simmered twenty minutes and strained, and lastly one quart of carbonated water and a quart of ginger ale. Serve in a punch bowl with ice, slices of fruit and maraschino cherries.

Favorite Dishes.
With little thought and planning, almost any of our common foods may be changed into something unusual and appetizing.

Did you ever try a baked apple salad? For those who are not able to digest the queen of fruits uncooked, this is a simple and delicious salad. Add a few dates, a few nuts a bit of celery and such dressing as the following:

Boiled Salad Dressing.—Beat the yolks of seven eggs until thick, drop three tablespoonfuls of good olive oil slowly, beating all the time, then add one-half cupful of melted butter and continue beating; now add one-half cupful of mild vinegar, and the juice of one lemon, slowly. Cook in a double boiler until the mixture coats the spoon. Remove from the heat and sift in the following ingredients which have been well blended: One and one-half tablespoonfuls of mustard, one-eighth teaspoonful of white pepper, one-eighth teaspoonful of cayenne pepper, three tablespoonfuls of powdered sugar. Mix well and when using the dressing add plenty of whipped cream.

Beet Salad.—This is a salad which is especially attractive in appearance. Cook small, even sized beets until tender, dice and add a cupful more or less of pecan meats broken into small pieces, add the above salad dressing which has been tinted a light pink using the beet liquor. Marinate several hours in a French dressing before adding the heavy dressing, and the salad will be more tasty.

Pear Salad.—Cook ripe pears until tender in a sugar syrup; arrange two halves of fresh lettuce and decorate with quartered blanched almonds, pushing the sharp point into the pears. Heap a spoonful of golden mayonnaise on the side of the lettuce and serve.

Pomona Jelly.—Soak one-half a box of gelatin in one-half cupful of cold water. Dissolve in one cupful of boiling water. Add two cupfuls of sweet cider, sweeten to taste, and add a tablespoonful of ginger syrup, strain and mold. Serve with roast pork.

Apple and Cabbage Salad.—Shred purple cabbage very fine, mix with finely sliced and shredded apple, add a small portion of finely cut celery, a good dressing with a bit of onion juice if desired. Season and serve well chilled.

French dressing: Take one-half teaspoonful of salt, one teaspoonful of powdered sugar, a dash of cayenne, three tablespoonfuls of olive oil and one of vinegar. Beat well before using.

THE NEW WORD

"Little son Henry," said Mrs. Buffalo, "will soon be a big buffalo. His horns are curved. For such a long time they have been quite straight—the way all sons' horns have been when young.

"But now it shows Henry is growing up—he has beautiful horns which go off in semi-circular curves."

Semi-circular curves are curves which only go half round—just like half a circle.

And so Mrs. Buffalo gazed with fondness and admiration at her son.

Mrs. Buffalo's son Henry was really much older than one would have guessed to have looked at him.

Henry was born one May, seven years before Mrs. Buffalo made this speech.

She did not know that he was seven years old.

She had not stopped to count the years, if she could have counted them, but she did know that he was at least a grownup son because of his horns.

Every spring of the seven years she knew that she and her family and cousins and relations had all shed their coats and that they had not bothered about new ones until the fall.

This had happened every year. It was simply that Mrs. Buffalo had not counted how many years there had been.

"Come and talk to me," said Mrs. Buffalo, as she noticed Mrs. Bison was not far away.

Mrs. Bison belonged to the same family of animals as Mrs. Buffalo.

Sometimes one is called a buffalo, then again one is called a bison.

It is like having two names that mean just about the same thing.

But this buffalo had always been called Mrs. Bison, and when Mrs. Buffalo called her she went right over. "Good-morning," said she politely.

She Did Not Know He Was Seven Years Old.

"Good-morning," said Mrs. Buffalo. "How are you feeling?" asked Mrs. Bison.

"I am feeling rare," said Mrs. Bison. "What in the world does that mean?" asked Mrs. Buffalo.

"It means the way I am feeling, of course," answered Mrs. Bison. "If that's the way you feel, I am sure I don't understand.

"Are you ill at all?"

"No, not at all," said Mrs. Bison.

"Then whatever do you mean?" asked Mrs. Buffalo, who was becoming more puzzled every moment.

"I heard some people from a long distance off shout to each other, and this is what they said when they looked at me:

"Do you see that buffalo over there?"

"Then some one else said:

"Yes."

"And after a little while I heard a third person say:

"The buffalo is getting to be very rare these days."

"So you see, I am right. I am rare, very rare."

"Then I must be feeling rare, too," said Mrs. Buffalo. "Your name is Bison, though you are the same as I am, and so I am every bit as rare as you are."

"I suppose that is true," said Mrs. Bison. "But you must give me the credit for having heard that we are rare."

"If I hadn't, we might never have known that word."

"No, we would probably never have known it," said Mrs. Buffalo.

"It must mean we are gentle and nice, even if we are stubborn and always insist upon having our own way."

"Of course, now and then, the bulls get very angry, but perhaps it may mean we are very large."

"No," said Mrs. Bison. "It doesn't mean that. I could tell from the way they were speaking it meant that we were unusual to see these days—that there weren't many of us."

But they both felt happy to think they had heard a new word about themselves. That pleased them.

Worse Yet

Father—Aren't you ashamed to be at the bottom in a class of 28 boys?
Willie—Oh, that's not so bad.
Father—What do you mean, not so bad?

Willie—Suppose there were 50 boys?

Diplomat

Willie—Would you mind, mother, if I pretended we had visitors at the table?
Mother—Certainly not.
Willie—Well, I would like some more cake for them, please!

Community Building

Town to Have Novel Home-Life Features

Now a new kind of town has been invented. The first one is being built at Radburn, N. J.

It will consist of a number of units for 600 families each. Each house will have its own individual garden in the rear. From each garden a path will lead to a parkway. Each parkway will be a city block in width and about half a mile in length. Primarily the parkway will be park space, but in each parkway will be tennis courts, playgrounds, a school and a community center.

The cultural life of the 600 families of each unit will center about their own parkway. Every child can reach school by walking along tree-shaded paths and, even if the distance be as much as half a mile, without having to cross any automobile road.

The "limited dividend company" is the practical and powerful tool, through which towns can be built which will solve the perplexities introduced into city life by the automobile age of today. It limits dividends on its stock to 6 per cent. Through economies possible by building hundreds of houses at a time it has been able to pay 6 per cent and yet to develop home regions not for speculative profit but to provide generously for home life and community well-being.

One novel feature of the Radburn plan is that all homes front on side streets—dead-end streets—which will be used only by the automobiles that are going to houses in the particular block. Through traffic is restricted, therefore, to streets definitely planned as motor highways, and hence made wide enough in the first place to accommodate traffic.

Brick Veneering Held as Good Construction

Brick veneer, perhaps, classifies as neither fish, fowl nor good red herring. Nevertheless it is considered sound construction and its practicability has been demonstrated in many years of satisfactory use. But strictly speaking, a brick veneer exterior finish is a shell—a shell of brick protecting some form of backing, such as wood sheathing, mineral sheathing, concrete or other material.

The major purpose of a brick veneer exterior is to carry out the architectural design of the structure. In itself, brick veneer is without structural strength. It is laid up over one of the standard bases, generally in what is known as a "running bond."

Around the lower "course" or any small projecting cornice, the bricks are likely to be laid in what is known as a "soldier course." In this course the bricks are stood on end, with the narrow length exposed, like so many soldiers in a stiff row.

There are a great many bonds for the laying up of solid brick walls, but most of them are not applicable to brick veneer construction because the narrowness of the brick veneer walls makes it necessary to break the brick to carry out the designs of most of the bonds.

Brick's Value Appreciated

While the ancients knew how to use brick structurally and left commendable examples of their skill, they were handicapped in achieving the beautiful effects possible today because the wide range of colors and textures as manufactured now were not then available.

It is gratifying to know that our own country has far outstripped the rest of the world in providing this versatile material in such a variety of colors and textures. And that the architect is thoroughly appreciative of the opportunity it affords in the way of artistic effects is evidenced by his lavish use of face brick, not only for exterior walls, but interior finish as well.

Country Life

True liberty, independence, the practice of virtue, where do they flourish in such amplitude as in the country, where the farmer is master and lord in his own domain; where life is more healthy, moral, and simple; where love is kindled in happy homes; where children are brought up in a more Christian way; where bad examples are rarer, vices more unknown, and subsistence more assured; where upright and the love of honest toil and thrift are cultivated; where nature herself is more beautiful, "the air purer, heaven closer, and 'od nearer"—Prince Albert Patriote de l'Onest.

Progress and Taxation

If we are to enjoy "real" tax reduction, it is not necessary to cut out progress and needed improvements. But it is necessary to cut out non-essentials, experiments and political hobbies which add to the overhead of government without giving added advantages comparable with their cost. —Exchange.

Worth Remembering

The resale value of the home made attractive by a well-thought-out grounds plan will be materially increased.

HATS KEEP COLOR SCHEME; YOUTHFUL PARTY FROCKS

HAVING purchased a new coat or coat dress, or a velvet ensemble, the next step is to betake one's self to one's milliner in search of a chapeau to accurately match the color of the newly acquired costume. Fortunately, a perfect color match need not necessarily imply an expensive hat.

Fall Millinery.

The beauty about the millinery program this season is that even the simplest popular priced felt shapes come in rich, handsome colors which accurately repeat the tones and shades of either the new dress fabrics or cloakings or the fur with which they are trimmed. It is not at all unusual for a woman to order several inexpensive felts, so as to top each of her early fall costumes with a matching hat.

The modish browns and allied shades are foremost in fall showings. When one enters a shop it almost seems as if autumn browns of every degree had taken possession. The range extends from dark African brown or most alluring coppery shades which fairly dazzle the eye with their brilliant highlights. However, the brown tones have much competition, particularly in the deep wine shades which enter so handsomely into the autumn picture. Then there are the new dark greens, jungle green being outstanding. Light canna and pinky beige, too, are widely sponsored.

When millady tours the shops seeking "perfect-match" colorings, she finds three types of hats are outstanding, namely, the beret, the poke-cloche and toques, the latter including many sorts, from cap shapes to those which are intricately draped.

A dark brown velvet beret, such as one as shown at the top of the group

woman who is "fair and forty" the news of a changing silhouette is anything but welcome. Perhaps one of the reasons the younger set is so delighted with the idea of a raised waistline is that in it youth sees an opportunity to accent youthfulness.

To her elders, whose avoirdupois is ever a source of worryment, the young women of svelte figure fluttering about in the simple house dresses so fullskirted and shortwaisted during the summer, were an object of envy. And the pretty, dainty silks, with their short-waisted sensitizing sleeveless bodices with bouffant skirts, sewed on at the waistline, how they do differentiate youth from its elders! In seasons just past, sweet-sixteen and women of mature years dressed alike, the present trend is toward making a decided distinction between styles for the flapper age and those for the matron.

The charming dress illustrated is one whose semi-fitted fashion tones to young waistlines. In this quaint frock of lace and cream-colored mousseline de soie, winsome Mary Nolan, a favorite among Hollywood's screen artists, looks her prettiest. The lace capelet is in keeping with the trend of the vogue as is also the sash of huge, very wide ribbon, which ties in huge loops and streamers at the side. The importance of the bow theme in the realm of fashion cannot be overstated. Indeed, bows have become the

Frock Accentuates Youth.

plaything of those who create formal modes, who give to them every possible intriguing interpretation. So conspicuous are bows, a single one dominates the entire frock. While it is very smart fashion to wear a huge bow at the side as pictured, of late the sentiment seems to be to move toward the back, which hints strongly of the return of the bustle effects. Soft taffeta ribbon is particularly well liked for the bustle-bows, and they are caught up over the arm while dancing.

A Sour Stomach

In the same time it takes a dose of soda, to bring a little temporary relief of gas and sour stomach, Phillips Milk of Magnesia has acidly completely checked, and the digestive organs all tranquilized. Once you have tried this form of relief you will cease to worry about your diet and experience a new freedom in eating.

This pleasant preparation is just as good for children, too. Use it whenever coated tongue or fetid breath signals need of a sweetener. Physicians will tell you that every spoonful of Phillips Milk of Magnesia neutralizes many times its volume in acid. Get the genuine, the name Phillips is important. Imitations do not act the same!

PHILLIPS Milk of Magnesia

Woman may be a conundrum, but she always has a ready answer.

To insure glistening-white table linens, use Red Cross Ball Blue in your laundry. It never disappoints. In all good grocers.—Adv.

We make a great mistake when we think all men have conscience.

NURSES know, and doctors have declared there's nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

Aspirin is the trade mark of Bayer Manufacture of Monocetate diester of Salicylic acid

The hog may be a squealer, but he never gives anything away.

HELPED DURING MIDDLE AGE

Woman Took Lydia E. Pinkham's Vegetable Compound

Denver, Colo.—"I have taken six bottles of Lydia E. Pinkham's Vegetable Compound and will take more. I am taking it as a tonic to help me through the Change of Life and I am telling many of my friends to take it as I found nothing before this to help me. I had so many bad feelings at night that I could not sleep and for two years I could not go down town because I was afraid of falling. My mother took the Vegetable Compound years ago with good results and now I am taking it during the Change of Life and recommend it."—Mrs. T. A. MILLER, 1611, Adams Street, Denver, Colorado.

**\$400,000 DEAL IN
BLAKE OIL FIELD**

One of the largest oil deals in this section in several months was closed Monday afternoon in the sale of the properties of the Anna Belle Oil Co. in the Blake field in Brown county to Young Brothers & Alexander and the Woodley Petroleum Company for a consideration of \$400,000. Of this amount \$250,000 was paid from one-half of the owners, seven-sixteenth of the oil produced.

The deal was closed in Forth Worth Monday afternoon where the purchase money had been held in escrow in one of the banks of that city to several days pending the passing on all titles

and other details necessary to the final closing of the transaction, and representatives of the purchasers left immediately for Brownwood with the papers to be recorded.

The leases involved in this sale have a present daily production of 600 barrels. It is understood that the purchasers will proceed with other production there.

Young Brothers & Alexander is a Tennessee Corporation with a Texas permit, with offices in Forth Worth. They have been operating in this section of the state for some time.

NOTICE

I have returned to Cross Plains and have re-opened my Beauty Parlor, with complete equipment, at my home north of Baptist Church.
Mrs. EDNA MAULDIN.

**JUDGE ASKS CLEAN-UP
OF COLEMAN COUNTY**

In impelling the grand jury Monday morning of last week for the fall term of district court in Coleman county, District Judge W. O. Woodward took cognizance of "street talk and observations" of Coleman citizens when he suggested to that body that Federal prohibition officers who recently invaded Coleman be called for investigation. "If I were you men," the Judge said, "I would call them into the grand jury room and find out what they know and what they did. It was the fortieth time Judge Woodward had empaneled and instructed a grand jury and he urged the twelve men to make a supreme effort to clean up Coleman county before his successor qualifies.

"If what I hear is true Coleman county is in a deplorable shape. There is more crime committed in your county and my county than any other county in the 35th judicial district, Judge Woodward told the inquisitive 12.

"I want you 12 to call these men charged with driving cars while intoxicated before you and make a supreme effort to ascertain where they secured their liquor. Don't be satisfied when they tell you they got it from some Mexican they could not recognize if seen again. If they lie and sufficient evidence to warrant an indictment can be secured do not hesitate to act."

Judge Woodward discussed the suspended sentence law at some length. "I believe in the suspended sentence law," he told the 12 men "but it is the worst abused law on the statute books. It is flagrantly abused on all occasions. If a man burglarizes a residence he cannot seek the provisions of the law, but if he burglarizes a store he is entitled to its elastic provisions. If he sells a quart of liquor and is convicted and is over 25 years of age the suspended sentence law can not be invoked to lighten the penalty that may be imposed..." —Coleman Democrat-Voice.

**PETRIFIED FOREST
NEAR CROSS PLAINS**

(CISCO AMERICAN)

One of the most unique natural wonders in Texas has been found, with the discovery about five miles south of here a petrified forest, which contains, in addition, to large pieces of solidified trees apparently hundreds of years old, an occasional stone image.

Discovery of the petrified forest and images of idols leads to the belief that prehistoric man may have once inhabited this section of the state, but the theory is advanced that the idols were probably brought in by Aztec Indians, who once held sway over Texas and parts of Mexico.

One of the images is indisputably the head of an idol apparently once set up for worship of the Aztecs. It is carved from a sandstone rock, and is perfect in formation. From the crown, it appears that it might have been made by the Aztecs which at one time inhabited old Mexico, and either brought to this country by them, or by Mexicans, a colony of which lived in this vicinity.

The face of the image looks as though it were to represent some worshipped leader of the yellow race, or possibly Budah. There is a perfect collar on one side of the figure that resembles the work of an Egyptian.

This is the only piece of this nature that has been found, and many theories have been advanced to account for its presence. It has been mentioned here that the piece be sent to the Smithsonian Institute for examination, and an investigation as to possibility of its origin.

CARD OF THANKS

We, the children, grand-children and great-grand-children of Grand-mother Erwin, wish to express our gratitude to our neighbors and friends, and to her pastor, Rev. S. P. Collins, and to her physician, Dr. John Rumph, and to all who contributed flowers. For your help during her long sickness and death, and for your kind words and sympathy, you will ever be remembered.
By J. S. ERWIN.

A HORSE RACE

is not judged by the start the horse makes but by the way he finishes the race. So it is with Batteries. They may have an even start but the way they finish the race is where EXIDE wins the blue ribbon—Long life!

**PARENTS YOUR
PROBLEM SOLVED**

The Problem or selection of a College with which to entrust the business training of your son and daughters is of the utmost importance. Human lives are involved—your own flesh and blood—and the training received will become an inseparable part of those lives. If good, it will bring success and honor; if poor, it will prove a handicap for life.

At Tyler Commercial College the maintenance of high moral standard is considered of first importance and, when you entrust your sons and daughters to our care, you may be sure that they will be surrounded by influences that will make for upright manhood and womanhood, as well as for educational thoroughness.

The Tyler school employs a Nurse-matron whose sole duty is to look after the welfare of the student body. You cannot estimate in dollar and cents the advantage this department has to do with the business integrity of your child.

"Thanks to Mrs. Pinson, your Nurse-Matron, for excellent care she gave Willie, Joe and Minnie while they were attending Tyler Commercial College. Mrs. Pinson is certainly splendid in her work. I believe she gave my son and daughters a mother's care. She is a mother, and I know she gave my children the same care she would want me to give her daughter, were she placed in my care."

This paragraph, taken from a letter recently received from Mrs. S. C. Roberts, Greenville, Texas, occupies a place of honor in the private files of the president of Tyler Commercial College.

Mrs. Pinson, Nurse-Matron at the world's greatest business training school, is just as much a part of that institution as is any member of the faculty. She plays the role of "mother" to thousands of "away-from-home" boys and girls, and treasures hundreds of just such letters of thanks and gratefulness from parents in more than twenty states.

MOTHERS AND FATHERS:

If you have been denying your son or daughter the advantages of T. C. C. training because you hesitate to have them away from home influences, you owe it to yourself to make the acquaintance of Mrs. Pinson. Write her or come in to talk with her personally. After that interview we feel sure all your fears and worries will be set at rest, and that your boy or girl will be in T. C. C. on his way or her way to a good position without further delay. Write today for "Achieving Success in Business." The large book will give you much information—it is FREE. (We have no branch schools. We lead; others follow)

**TRIBUTE TO THE
COUNTRY NEWSPAPER**

J. C. Holton, Mississippi state commissioner of agriculture, recently paid a worthwhile tribute to newspapers that expresses graphically the general public feeling for the press.

"I have always appreciated the power of the press, more especially the 'country press' said Mr. Holton. 'The home papers carry the home news, and are read from cover to cover by those whose first interests is in home affairs. They reach the people and constitute a powerful influence of public sentiment.

"A wonderful factor for good is the country newspaper; worthy of the pride and support of folks at home, an avenue of commercial entrance to those who would sell their goods to our people. President T. L. Turner in his annual address eloquently described its importance in these words: 'Out yonder stands a locomotive on the railroad track. Everything about it is in order; water in the boiler, coal in the tender, engineer at the throttle; but it can't move. All it lacks is steam. Remove the newspapers from Mississippi, take away the 'steam,' and this state would soon be a state of idle people; its credit gone. Wealth would depart from us, and our people would seek new fields of labor."

The "home town" paper is an integral part of the lives of the people it serves. It has been a tremendous factor in building up an American spirit and consciousness, and in turning public opinion into wise avenues.

CRIS PARSONS

He was a great man always manly
In his every word and deed,
For he stood by his friends so grandly
In their misfortunes and their needs.

He never failed to extend his aid
To the rich or the poor.
And those who knew him were not afraid
For to ask for help at his door.

For he stood there with a ready hand,
Each friend to him was Brother,
In that he obeyed the Lords Command,
Which is to love one another.

When misfortune would over take him
He would bear them without a sigh,
He would not give over to any whim,
But to succeed he'd ever try.

We know he's gone to a great reward,
For he lived a true Christian life,
As his money went free as his word
To his fellow man in strife.

With undying love and affection
In his words, his acts, and life,
Best of comfort and protection
He bestowed on children and wife.

They had in him a loving father
A fond and tender husband too,
Who would bear each care or bother,
To his family he was true.

He will be missed by the Cattleman
Who rode with him side by side,
They realize they have lost a friend
And a partner and a guide.

He'll be missed by the Business World;
How they'll yearn for his sound advice,
For before them like a flag unfurled
Was his character without price.

Oh! that the Earth were filled with his kind,
What a better world it would be,
With noble deeds and nobler mind,
Blessings to his sweet memory.

By JOHN HOLDER

The State of Texas

To the Sheriff or any Constable of Callahan County, Greeting:

You are HEREBY COMMANDED to summon JOSEF SCHWERTNER by making publication of this Citation once in each week for four successive weeks previous to return day hereof, to appear at the next regular term of the Justice Court Precinct No. 6 of Callahan County, to be holden, at the office of the Justice of Peace in Cross Plains, Texas, on the 2nd Friday in October A. D. 1928, the same being the 12th day of October A. D. 1928, then and there to answer a petition filed in said Court on the 12 day of July A. D. 1928. In a suit, numbered on the docket of said Court as No. 537, wherein Putnam Supply Company, a corporation is Plaintiff, and JOSEF SCHWERTNER is Defendant, and said petition alleging that on or about the 18th day of March A. D. 1928, plaintiff, at the special instance and request of defendant, sold and delivered to him, at the several times specified in the account hereto attached marked Exhibit A and made a part hereof, certain goods, wares, and merchandise in said account mentioned, in consideration whereof defendant then and him the several sums of money charged thereof in said account specified, amounting to the sum of \$144.03 not later than the first day of July A. D. 1928 with interest thereon at the rate of 8 per cent annum from said due date until paid.

That said account is past due and unpaid, and defendant, though often requested, has hitherto failed and refused, and refuses to pay the same, or any part thereof to plaintiff's damage in the sum of \$144.03.
Wherefore, plaintiff prays the court that defendant be cited to appear and answer this petition, and that he, have judgment for his debt, in the sum of \$144.03, interest and costs of suit, and for such other and further relief, special and general, both in law and in equity that he may justly be entitled to.
Herein Fail Not, and have you before said Court, at its aforesaid next regular term, this writ with your return thereon, showing you have executed the same.
GIVEN UNDER MY OFFICIAL HAND, at office in Cross Plains, this 28th day of August A. D. 1928. W. C. ADAMS, Justice of Peace Justice Court, Prec. No. 6, Callahan County.

COTTONWOOD NEWS

John Hart of Cisco was in our midst Monday looking after his farm. A. E. Ellis and family were called Sunday afternoon to Atwell to the bed side of his sister, Alice, but as better at the present writing.
Fred Ellis of Moran was down Monday doing some repair work on his car.
Rev. G. C. Williams filled his regular appointment at this place Sunday and Sunday night.
Mr. and Mrs. Harley Thomas have moved back to Meadow. Sorry to give them up but hope they find the west prospering.
Mrs. John Treagar and baby have gone back to Porterville, Calif., after spending a few weeks with parents and relatives here.

CORRESPONDENT

Rising Star, Texas.

FOR SALE OR TRADE

My residence and two lots, in northwest part of town. See me at once Mrs. CORRIE B. WEST. 27-N.P.

King George Tichled at Forestalling Pitt

One January evening, the Manchester (Eng.) Guardian relates, Dr. Mauners Sutton was giving a dinner party at his deanery at Windsor, when a visitor was announced, who insisted upon seeing him immediately. Sutton, in no very amiable mood, went into the hall, to find George II standing there.
"How d'ye do? How d'ye do?" said the king, genially. "Come to let you know you're archbishop of Canterbury—archbishop of Canterbury. D'ye recollect. D'ye accept? Eh?" The astonished dean could only bow in token of acceptance.
"All right," said the king. "See you've got a party. Go back to your guests." And he departed, chuckling at having forestalled Pitt, who rode posthaste to Windsor next morning to suggest another nominee for the office, only to find it filled.

Sagacious Elephants

"Being the elephant around at nine," is quite the convention first order of the day when traveling in portions of the Malay states, according to Robert V. Walton of New York, now in Tokyo.
In Siam, Mr. Walton said, the elephants work in "gangs," with an "overseer" who is quick to reprimand any laziness. The boss elephant jangles a heavy chain in the direction of any shirker and, if the offense is repeated, resorts to more drastic punishment. When the teak logs are floated down from the north and the dread jam occurs, the elephants quickly discover the key log and break the jam.—North China Standard.

Grasshopper "Music"

The male long-horned grasshoppers and crickets fiddle by rubbing their wing covers together. The male of the field crickets chirps by rubbing the file on the under side of one wing against the roughened surface on the upper side of the other.
Crickets can be made pets and kept indoors to sing in the winter months, but keep them away from your woollens. The genus grasshopper has an omnivorous appetite and will soon eat holes in woolen clothing. It is suggested by one entomologist that a lantern globe set on soil in a pot will make a good cage. Lettuce, moist bread and bone meal makes an attractive menu for the cricket pet.

Explaining Phenomena

Phenology is the science which deals with the relations between climate and periodic biological phenomena, such as the migratory movements and nesting habits of birds, the leafing, flowering and fruiting of trees and plants, the appearance of insects, etc. The word "phenology" is a contraction of "phenomenology," which means the science of describing and explaining phenomena.—Pathfinder Magazine.

Go Far Back in History

The origin of the Olympic games is lost in antiquity. The official list of victors begins with Coroebus, who won the foot race in 776 B. C. They were celebrated every four years, and were at their height in the Fifth and Fourth centuries B. C. The games continued until 394 A. D., when they were suppressed by Emperor Theodosius. The modern series of Olympic games began in Athens in 1896.

Starvation Diet

Eating one food to the exclusion of others will lead to death by starvation as quickly as will fasting. White flour foods belong in this category, according to doctors, as they supply no building material for the body.

LETTER ABOUT PROHIBITION ADRESSED TO A NEWSPAPER PUBLISHER

Don't lay this down until you have read the last word, or you'll miss the biggest laugh you ever had. Whether you are for or against the present prohibition laws, we believe you'll like it. We enjoyed it so much we wanted to pass it to our friends.
Arthur G. Stapiles, veteran editor of the Lewiston (Maine) Evening Journal, printed in his book, "The Passing Age," the following letter from "A correspondent who seems to have taken some offense at our opinion on the duty of good people to obey the law."
To the Editor:

You seem to take a great deal of delight in telling other people how to live and perhaps that is your business but it seems to me that you exceed your duty when you arrogate to yourself the right to inform all of those who may happen to enjoy an occasional drink of "Scotch" on occasions.

I have been presented a fine bottle of Scotch whiskey for Christmas and it is before me as I sit at my typewriter and indite this letter to you. It bears the label of Sandy Mac Donald, a good, fair, well bodied liquor which I am assured was bought before the war and has been in my friend's cellar ever since. What right has any form of Law to make a criminal if I partake of this gift as it was intended that I do by the giver.

I claim that any such law is an invasion of my personal liberty. I notice that you have referred often in your excellent column to the so-called Bill of Rights which secures to all men and women certain inalienable rights to their personal liberty, which as you say, are not inconsistent with the rights of others. How do you reconcile your statements.

I have just tasted this bottle of liquor, I will confide to you, and I cannot see where or how I am invading the rights of any other person on earth. I find it excellent. It warms my stomach; it inspires my thought. I cannot feel, Mr. Editor, that I have wronged the community or added to the lawlessness of general society in so doing. It makes me tired to be classed as a criminal for any such occasion, and I notify you that before long, there will be a revolt against the sort of stuff that you are writing.

Just to show my independence of such truck as you are writing, I have taken another drink of the aforesaid most jubilant Sandy McDonald, and I will say to you that it is about as smooth a drink as a Criminal ever put into his system. The second drink, which I shall soon follow by a third, makes me more certain that those who feed their systems require stimulants, should band together; organize, and start a campaign to floor this Volstead business if it can be done.

Now, Mr. Editor, I am no bum and you'll not make me a bum. I like a little drink now and then and I have taken a third or maybe it is a fourth and I am more than ever convinced that any man that doesn't is a big idiot. You may say that evasion of the law is producing a state of affairs in our Great and Glorious Country. You are wrong. This country is just as good as it ever was and was a grade deal better country and I will leave it to you if it wasn't, when we had free rum.
I was to say to you that this Scotch is all right. A lot of it wouldn't do us harm. When we need stimulatory we need it. My grandfather was brought up on rum. They had it in the house all the time. They drank it freely and even themstery drunk it when he came to our house. It's a pretty kind of a country when a grand son is better than his grandfather. I can drink this Scotch all day and not be no worse a citizen than I was before. What of you is to remind you once again and again that I am drunk I could drink this whole quet and a Emeritt an \$8haoy Nner yrare" neger qiber an efelash. Bue whay I wromb eb confenging evert body who drinks as a boulem we ain't criminals.
I will sat intlosing, that I wisg yiu terevrtillu Yioytdx o8Bd—4t Swry—14T.

Willie E. Fuller

SOME FAST OIL WELL DRILLING

A record time was set last week by Biggs Bros., drilling contractors, for wells in the Bruner field when they drilled the Lu-Tex Company's No. 2 Wilson to a depth of 2,160 feet in four days and eight hours drilling time. Casing was then set in the well at that depth.

TRADE AT HOME

SOME CHANGES IN STATE GAME LAW

Hunting license for the past season expired August 31. Those who wish to hunt outside their home counties must purchase one of the new license and carry same with him in order to lawfully do so. A number of rules and regulations accompany the new license, dealing with zones, type of game and bag limits. Following are the rules which will govern hunting in Texas during the ensuing year:

Bag Limit and Season

It is unlawful to kill or possess at any time antelope, mountain sheep, woodcock, wood duck, egret or other plume bird, nongame water-fowl, song bird, insectivorous bird, pheasant turkey hen, or doe deer.

It is unlawful to hunt from a motorboat, sail boat, airplane, automobile or boat under tow; and to hunt at night with any kind of light or lantern.

It is unlawful to buy or sell (or barter), any game bird or animal.

It is lawful to kill at any time, birds, and blackbirds, buzzards, crows, owls, hawks, woodpeckers, and rabbits. Open season on Wild Game—Not conflicting with either state or Federal laws.

North zone—North and west of a line beginning on Rio Grande west of Del Rio, thence east to Del Rio, thence east along Southern Pacific to intersection of the I. & G. N. R. R. near San Antonio, thence along I. & G. N. R. R. to Austin, thence H. T. C. R. R. crosses the Brazos river, thence north following Brazos River to Beaumont Branch of Santa Fe R. R., thence following G. C. & S. F. R. R. in an easterly direction to a point at or near Cleveland, where G. C. & S. F. R. R. crosses H. E. & W. T. R. R. thence along H. E. & W. T. R. R., north easterly to the Louisiana line.

South zone—South and east constitutes South one.

Wild Bear, north and South zones, Nov. 16 to Dec. 31.

Buck Deer, North and South zones, Nov. 16 to Dec. 31.

Whitwing Doves, both North and South zones, July, August and Sept.

Wild Ducks of all kinds (except wood ducks), Geese, Brant, Snipe Gallinules, and Mudhens, North zone, Oct. 16 to Jan. 31; South zone, Nov. 1 to Jan. 31.

Prairie Chickens, both North and South zones, Sept. 1 to Sept. 10, closed in counties of Collingsworth, Donley, Wheeler and Gray until Sept. 1, 1929.

Quail and Mexican Pheasants, both North and South zones, Dec. 1 to Jan. 16.

Wild Rail (other than coot and gallinules), Sept. and Oct. both North and South zones.

Wild Black-Bellied Plover and Golden-Wing Plover, and Yellow legs closed season under Federal law.

Red Fox Squirrels and Gray Squirrels, both North and South zones, May, June, and July and Oct., Nov. and Dec.

Wild Turkey Gobbler, both North and South zones, Nov. 16 to Dec. 31. Wild Turkey season closed until Nov. 16, 1930, in Cameron, Hidalgo, Starr, Willacy Kennedy, Brooks, Kleberg, and Nueces county.

Bag Limit

Bear, one in a season.
Deer, two bucks in one season.
Must have three points or more.

Dove, 15 in one day and not more than 45 in one week.

Ducks, Snipe, Gallinule, or Mudhens, 25 in any one day and not more than 50 in a week, the daily and weekly limit counting all varieties.

Geese and Brant, four in any one day or 12 in any one week.

Prairie Chicken, or pinnated Grouse, five in any one day or ten in an open season.

Quail and Mexican Pheasants, 12 in any one day or 36 in any one week, counting all varieties.

Squirrel, ten in any one day.
Turkey Gobbler, three in one season.

Federal law forbids the hunting of migratory birds between sunset and one-half hour before sunrise.

PROMOTION DAY AT METHODIST CHURCH SUNDAY

Sunday morning at the conclusion of the lesson period a special program and rewarding of diplomas, the program follows:

- Song by School.
- Prayer, Superintendent.

CITATION BY PUBLICATION The State Of Texas

To the Sheriff or any Constable of Callahan County, Greeting: YOU ARE HEREBY COMMANDED to summon L. G. BRADSTREET and J. G. BRADSTREET, by making publication of this Citation once in each week for four successive weeks previous to return day hereof, in some newspaper published in your County, if there be a newspaper published therein, but if not, then in the nearest County where a newspaper is published, to appear at the next regular term of the District Court of Callahan County, to be holden at the Court House thereof, in Baird, Texas, on the 5th Monday in October A. D. 1928, the same being the 29th day of October A. D. 1928, then and there to answer a petition filed in said Court on the 5th day of July A. D. 1928, in a suit, numbered on the docket of said Court as No. 7358, wherein J. H. WALLER is Plaintiff, and L. G. BRADSTREET and J. G. BRADSTREET are Defendants, and said petition alleging: J. H. WALLER vs. L. G. BRADSTREET and J. G. BRADSTREET. In the District Court of Callahan County, Texas, October term, A. D. 1928.

TO THE HONORABLE JUDGE OF SAID COURT:

Comes now J. H. WALLER plaintiff, complaining of L. G. and J. G. BRADSTREET, hereinafter styled defendants, and represents that plaintiff resides in Callahan County, Texas, and that the defendant L. G. BRADSTREET resides in Tarrant County, Texas, and defendant J. G. BRADSTREET resides in Brown County, Texas, and for cause of action represents to the court as follows, to wit: First: That on or about the 3rd day of September, 1925, plaintiff owned and still owns 53 acres out of the C. Vigil Survey in Callahan County, Texas, being all of the following described 63 acres tract, to wit: Beginning 214 varas N. of the S. E. corner of said Vigil Survey thence N 64 2 varas, thence W 54 3 varas, thence S 64 2 varas, thence E 54 3 varas to place of, beginning except 10 acres in N. E. corner sold to J. H. POTTER.

That J. H. WALLER and wife and J. H. POTTER and wife leased 40 acres of the N. end of said 63 acre tract to R. D. Howell on or about the 3rd day of September 1925 for the development of oil and gas. The defendants L. G. and J. G. BRADSTREET came into possession of said lease covering 40 acres of said land, 30 acres of which is owned by plaintiff, and drilled four wells on said thirty acre tract. That by the terms of the said original lease executed by Plaintiff, under which defendants operated said lease and drilled said four wells provided, among other things, that the lessee would pay all damages to growing crops on plaintiff's said thirty acre tract, and there was an implied obligation upon the part of the said lessee in said lease and his assigns to pay all damages resulting from the negligence of said lessee or his assigns in the drilling of said wells to the land and improvements on said land.

That at the time the defendants and their employees entered upon said 30 acres of land, as assignees of the said original lessee, the said thirty acres of land, the larger part thereof was cultivated and had growing upon it an orchard consisting of fruit trees of various kinds, which bore fruit apples, peaches and plums, each year.

That the soil of said land was a deep, sandy loam and was sub-irrigated very fertile and produced large crops of vegetables, berries and all crops planted thereon, such as pinto beans, tomatoes, feterita etc., that the defendants went upon said thirty acres and drilled four wells for the development of oil and gas, and in doing so, negligently constructed a slush pit at each well into which was run, salt water and other noxious and poisonous mineral waters taken from said wells.

That defendants negligently constructed said slush pits by failing to excavate the same below the bottom of the sandy soil into the clay soil beneath a sufficient depth to prevent salt water and refuse waste to escape out of said slush pits and percolate through, into and over the adjoining cultivated lands of plaintiff, thereby destroying the fertility of the soil, killing the vegetation in, on and growing out of the adjoining lands of Plaintiff to his great damage, as herein-after alleged.

Second: Plaintiff further alleges that in addition to the negligence of the defendants in permitting the salt water and other waste to escape from the slush pits, the defendants erected on said land of plaintiff tanks for the storage of oil produced from said wells. That mixed with the oil placed in said storage tanks, was a great amount of salt water, the oil being lighter than the water, the oil would rise to the top and the salt water settle to the bottom of the said storage tanks, and in order to get rid of the salt water, the defendants negligently drained the salt water from said tanks at the bottom of the tanks and permitted the same to flow on over and through the adjoining land of plaintiff, destroying the fruit trees, vegetables and other crop on said land, and killing and destroying the vitality of the soil and rendering it totally unfit for the growing of fruit trees, vegetables, berries or any other character of crops in the future, to plaintiff's great damage, as herein-after set out. That in addition to the negligence of the defendant in the operation of said wells on said 30 acres, as hereinbefore set out, plaintiff further shows to the court, that prior to the time defendants took charge of said lease, the Plaintiff used a lane running from his lots to the well where he secured water for his stock, that defendants after finding production in said wells, negligently erected two lines of rods across said lane, about four

above the surface of the ground, thereby preventing plaintiff's stock from going from his pastures and pens to the water aforesaid, and this compelled plaintiff and his stock to go a great distance around in order to get to said water, to plaintiff's great damage, as hereinafter set out.

That by reason of negligence of the defendants in the manner and form as hereinbefore set out, this Plaintiff has been damaged in the following amounts to wit:

- One plum tree killed of the value of \$150.00
- One apricot tree killed of the value of \$50.00
- Two apple trees killed of the value of \$250.00
- One acre of berries destroyed of the value of 250.00
- 1/2 acre of tomatoes destroyed of the value of \$100.00
- 1/2 acre of watermelons destroyed of the value of \$75.00
- 1/2 acre of cucumbers destroyed of the value of \$50.00
- 1/2 acre of feterita destroyed of the value of \$100.00
- One willow tree destroyed of the value of \$400.00
- Damage to other fruit trees of the value of 250.00
- Damage to 5 acres of land \$400.00
- Inconvenience and extra labor in getting to water \$100.00
- Total damages in the sum of \$2,175.00

That plaintiff has repeatedly demanded of the defendants to pay the above damages, but defendants have failed and refused, and still fails and refuses to pay the same or any part thereof.

Wherefore plaintiff prays the court that defendants be duly cited to appear and answer in this cause, at the next regular term of this court, and that on final hearing of the same, plaintiff have judgment against the defendants for the amount of his damages as hereinbefore set out interest and cost of suit and for such other and further relief, special and general, in law and in equity, that he may be justly entitled to, and for which he ever prays the court.

SCOTT & GILBERT
Attorneys for plaintiff.

USED CARS

"with an OK that counts"

Reconditioned to Assure Thousands of Miles of Dependable, Satisfactory Service

Due to the great popularity of the Bigger and Better Chevrolet in this community, we have now in stock some reconditioned used cars that represent exceptional values. These cars have been thoroughly inspected by our expert mechanics and completely reconditioned wherever necessary. They are good for thousands of miles of satisfactory service. And because they are sold under the famous Chevrolet Red O.K. Tag system, you can buy them with the utmost confidence, assured of their dependability and quality. See these cars today.

A few of our exceptional Used Car Values "with an OK that counts"

When you buy a used car from us you get a car that will give you the miles of satisfactory driving that you pay for. Our stock of reconditioned used cars is full of good bargains. They are reconditioned and ready to go out and drive without grief. We are listing below some of the many used car values.

FORD ROADSTER 1926

Has Balloon Tires, 2 New Tires, other Tires are Fair. Has Bumpers, Has the original Paint, and looks good, a real Bargain, Price, \$165.00

1926 FORD COUPELET, 5 good Balloon

Tires, lock wheel, new duco paint job. Seat Covers, car looks like new, will sell worth the money.

Many other values in our used car department that are not listed.

Dodson Chevrolet Co.

OK

Stancel Greenwood has returned home from Carlsbad, New Mexico, where he has been spending the summer.

Mr. and Mrs. R. E. Wilson and daughter Juanita, returned last week from San Antonio, where Mrs. Wilson has been taking treatments from an eye specialist. Also visiting their son R. E. Jr., near Austin.

Mr. J. Lawson and Juanita Wilson were Coleman visitors Sunday.

Browne Baum and Jack Scott were among those who saw the Cross Plains, Eastland game Saturday.

R. O. Eubank of Dressy, was a Cross Plains visitor Monday.

A. G. Gunn of Cross Cut was a business visitor Monday.

Budge Baum of Coleman was a guest of his parents here Sunday.

A. J. Ivy of San Marcus, was a guest of his daughter, Mrs. Ted Brown, and her husband last Wednesday.

Geo. Scott, Fred Cutbirth, Mr. and Mrs. J. D. Conlee, Slim McNeal, A. G. Crabb and wife, Mr. and Mrs. John Conlee and daughter, Jackie, attended the San Angelo Fair last week.

Miss Harvey of Tulsa, Oklahoma, spent a couple of days last week with her brother, Marion Harvey, and his wife.

Dr. J. H. McGowen attended the Dental Convention in Sweetwater last week.

Mrs. Sam Long and daughter spent the week-end out on the old home place with Mr. and Mrs. Norrell Long.

Mr. and Mrs. Roscoe Smith and family of Forth Worth were the week-end guests of Clyde Durringer and wife.

Thaduis Kelly, who had an appendicitis operation several days ago, is getting along nicely. He was moved home the first of the week.

L. C. McKinney of Cross Cut, was in Cross Plains Monday.

Jerry McDonald of Rowden, was a business visitor in Cross Plains Monday.

Harold Gracey and family of Rising Star, were in Cross Plains Sunday.

Dorothy Candler has been ill during a vaccination, and was not able to leave for school in Abilene until Wednesday.

Mr. and Mrs. Ted Brown, E. D. Priest, and Miss Jennings were Cisco visitors Sunday.

Walter Seward of Brownwood and Catarina, made a business trip to Cross Plains and Albany Monday.

Tom Bryant returned Saturday from a trip to New Mexico, where he had been in interest of his silver claims, and to see about the illness of his superintendent of the mine. His superintendent was found to be in a serious condition, and he had to be placed in a hospital.

BRIDGE PARTY

Mrs. Bill Lowe entertained a number of friends in her home Friday afternoon in the form of bridge.

Mrs. Renwick Clark won a lovely high score prize, and Mrs. J. C. Young got the lucky card and was awarded a lovely prize.

Lovely vases of flowers adorned the tables and delicious refreshments were served in two courses to the following:

Misses Harvey of Tulsa, and Hazelle Dorr, Memis, Marion Harvey, Tom Bryant, J. C. Young, A. C. Dodson, Jack Noel, Frank Green, Ben Garner, George Wilson, Ed Lowe, Renwick Clark and Bill Lowe.

FOR SALE—6 Score Tall Bull pups. See them at my residence. Red Huckaby.

FOR SALE—Furnished or unfurnished Rooms, all conveniences, close in. See A. F. Tate 3 T-P

FOR SALE—1927 Ford Fodor Sedan will take on good Roadster on deal. L. O. Payne. 2 T-P

POSTED

No Hunting, Fishing, or pecan gathering on my place. A. RUDLOFF. 4T-P

FARM WANTED

WANTED—Hear from own good farm for sale. Cash price. D. E. Bush, Minnear

Going to the Movies While Sitting at Home

By ELMO SCOTT WATSON

GOING to the movies while sitting at home! Doesn't sound possible, does it? It not only is possible, but, judging from a demonstration made in East Pittsburgh, Pa., recently, that seeming miracle may soon become one of the commonplace of our daily life.

Recently there gathered in the television laboratory of the Westinghouse Electric and Manufacturing company a group of radio leaders, among them representatives of the Radio Corporation of America, the National Broadcasting company, the General Electric company and the Westinghouse company, who saw motion pictures which, broadcasted from a station nearby and transmitted on radio waves, were picked up on a receiver in the laboratory and reproduced before their eyes. It was the world's first demonstration of radio movies and possibly the most astounding of the many advances in the science of radio announced during the past year.

While radio movies are still in the laboratory stage, Westinghouse officials, under whose auspices the demonstration was made, declare that the event heralds the day when the radio listener will sit at home and have that most popular form of entertainment, motion pictures, projected by his individual radio receiving set.

The development of radio movies is a triumph of scientific engineering. During the last summer, the idea came to the mind of Dr. Frank Conrad, in charge of this branch of his company's activities and the fact that in barely two months he brought the device to the laboratory stage in the degree of perfection witnessed at the recent demonstration, is said to have set a record. Radio movies are a step beyond previous developments in television and required the invention of a number of appliances in addition to a great deal of scientific calculation, synchronization of various high-speed mechanisms, and accurate control of light and radio waves.

Although the sending of moving pictures by radio, as may well be imagined, required many complicated and delicate pieces of apparatus, the principles of the art as explained by Westinghouse engineers, are not beyond ordinary comprehension. Photography in its simplest form consists of the producing of spots of light and shadow in the same arrangement as they appear in the subject photographed. The screening of a motion picture, of course, requires that a roll of film be operated at a speed which sends sixteen pictures a second before a projecting beam of light. Because of the structure of the human eye, if a series of pictures follow each other at the rate of sixteen or more per second, the human eye sees it as a single moving picture.

All this the broadcasting of radio movies requires, with the addition that the spots of light must be transformed into frequencies, some of which are in the audible range, transferred to a radio wave and broadcast as electrical energy. In receiving the pictures, the process is reversed, the electrical energy is picked up, and the frequencies returned to lights and shadows, which when viewed presents the radio movie.

In the first step of the process a pencil of light traverses each picture,

1. The heart of the television motion picture transmitter. The scanning disc is clearly shown as well as the dot of light which is thrown upon the motion picture film. Above the scanning disc may be seen the synchronizing tube which keeps this disc turning at a predetermined speed.

2. Dr. Frank Conrad, assistant chief engineer, Westinghouse Electric and Manufacturing company and inventor of the television motion picture projector. The scanning disc of the apparatus is immediately in front of him.

or "frame," as it is called, at the rate of sixty times a sixteenth of a second. This process produces a sixty-line picture, as clear as the usual newspaper halftone illustration. The pencil of light is produced by a scanner which is a disc with a series of minute square holes near its rim. The disc is so arranged that all light is excluded from the film except that which goes through the square holes. The disc turns very fast, and as it turns passes the beam of light across each "frame," with the result that an individual beam of light touches every part of the "frame."

The beam of light passing through the film falls upon an electric eye or photo-electric cell, which is not unlike an oversized incandescent lamp. Within the cell, however, is a metal whose electrical resistance varies with the light falling on it. Caesium, a rare metal is used in the Westinghouse cell. The amount of light falling on this cell determines the amount of current passing through it. The result is that each individual beam of light sends an electrical impulse which varies directly according to the amount of light or shade in the film through which it passed.

The beams of light have now become electrical impulses and are sent on to the broadcasting station. Here the beams assume definite and varied frequencies, some of which are audible. Doctor Conrad states that these frequencies range from somewhere near 500 to approximately 50,000. Since the human ear is limited to frequencies of approximately 15,000, much of the radio movie wave is inaudible.

At the broadcasting station these frequencies are transposed on a radio wave and transmitted exactly as the ordinary music or voice. The radio signals now can be sent across a room, or across the continent. Their distance range is limited only by the broadcasting station's equipment. In the Westinghouse demonstration, the signals traversed a distance of about

four miles; two miles from the laboratory to the broadcasting station by wire and two miles back to the laboratory by radio.

To turn these radio waves back into light, an arrangement which permits the use of a mercury arc lamp is used. By this adaptation the weak radio currents control the action of the many times more powerful current operating the arc lamp. This action may be compared to the action of a radio tube, where the weak radio current on the grid of the tube controls the action of the independent and more powerful plate current.

Thus the mercury arc lamp goes bright or dim as fast as the current changes, and its light at any instant is in proportion to the light that the electric eye sees in the same instant. To return the dots of light to their original pattern, another revolving disc or scanner is also used which is similar to the transmitting scanner. The use of a mercury arc lamp permits the radio pictures to be thrown upon a ground glass or screen, the first time this has been done with television apparatus.

Both these scanning discs turn at exactly the same speed; the hole in the receiving disc must be exactly in the same relative position as the corresponding hole in the transmitting disc. In other words, they must be synchronized.

Westinghouse engineers were the first to develop a feasible method of synchronization, and their method was by means of radio. From transmitting equipment, which may be located in the broadcasting station, they transmit a constant frequency wave of 5,000 cycles. This wave is produced by a tuning fork and transmitted over a special carrier wave from the broadcasting station. The constant frequency note is received on a special receiver and by means of special apparatus controls the speed of synchronous motors, which drive the scanning discs of both transmitting and receiving radio movie equipment. This revolutionary method of controlling equipment indicates, in a measure, the extent to which science must go in order to perfect television or radio movies.

But the developments in radio during the past year, and especially the latest development indicates that the word "impossible" is rapidly being written out of the vocabulary of American electrical engineering genius and that radio movies for all who care to enjoy them are an assured fact.

for radiovision will spur on the development.—Science Service.

California's Flowers

Some of the wildflowers of California are: Annuals, California poppy, blazing star, baby-blue eyes, white daisy, blue lupine, Clarkea elegant and wild Canterbury bells; perennials Indian paint brush, scarlet larkspur, pride of California, scarlet honeysuckle, California fuchsia and white evening primrose.

LEGEND EXPLAINS A PETRIFIED FOREST

Navahos Call Stone Trees Bones of Monsters.

Tucson, Ariz.—The Navaho Indians of the southwest have a strange and fantastic legend to account for the great stone tree trunks whose broken columns strew the desert in the region of the famous petrified forest.

In the early days of the world, the Indians say, the sun did not ride tranquil and undimmed through the sky as he does now. At that time there was a black monster that was continually contesting his supremacy. His name was Yletso, and many were the battles that he and the sun fought.

Lived in a Cave. This Yletso lived in a cave in the big mountains, and from there he would sally forth and contend with the sun. He had long and strongly muscled arms and powerfully clawed hands. And his bones were of stone. When he stood erect he could reach the sun at any place in the sky.

When he was defeated in his fights he would have to rest many days and often even many months before he was able to renew the attack, but he was never vanquished. Also at times during those terrible bouts he would get a finger, hand or limb so broken that he would have to discard it, but he possessed the power to grow a new part in the place of the disabled one. The bones of these disabled, discarded parts, which were of stone, he threw out from the cave over a ridge from time to time as they got in his way, and thus for years and ages the stone-wood accumulated.

At that time a boy by the name of Kee lived in a grass-tied feather home with his mother, Shemah, and his sister, Zonnie. One winter it got very cold. Finally, as they had no fuel, Kee went to the mountains for pitch wood. As the sun set before he reached the forest he slept out where he was. Then on the next day he went into the mountains and found what he supposed was pitch wood, a quantity of which he chopped.

Bones Instead of Wood.

When he reached his home it was growing dark the second night. So he slept outdoors in front of his Hogan, where Zonnie found him still sleeping when she came home in the morning. She also noticed the wood, just as their grandmother came out of the house. And instead of pitch wood he had brought bones of Yletso; whereupon his grandmother scolded him and told him to throw the bones away.

In time Kee grew to be a great man. Time and again he visited the mountain where he had obtained the bone-wood, and there he prayed to his god and made sacrifice. Then one day he discovered the cave where the monster lived, and at the rising of the sun on the following morning he told him, through prayer, of the beast's abode.

Just as he was telling the sun the news he saw the great black thing leaping above the mountains to the attack. Quickly Kee called the men of his tribe together and they all prayed for the powers of good to aid the sun in this battle against darkness.

Right against the face of the sun leaped the monster. It stretched its fierce arms and clawing hands toward the sun's rim. Then the battle began in earnest. The sun attacked him with his millions and millions of rays, and aided by the prayers of the then good people of earth, he finally overcame it.

In this battle of all battles the sun's rays pierced Yletso's body, and his blood, on reaching the earth, was congealed in lava flows. Finally he fell back to the earth dead, and the sun mounted triumphantly in the heavens, as he spread his invigorating and cheering light over land and sea. And the Plateau region is still incredibly covered with his bones, called by the Navahos Yletsobitsin, the bones of Yletso.

Trappers Dead Fifty Years Found in Cave

Sault Ste. Marie, Ont.—A long-forgotten tragedy of the fur-trading days is believed to have been uncovered. A prospector reported that he had found two skeletons and a number of rusted old-fashioned muskets in a cave north of Bruce Mines.

The skeletons were lying by the side of a small, well-hidden lake, and until he found them, A. B. Frazer, the prospector believed he was the discoverer of the lake.

Frazer said he was positive no one had visited the lake since the men met their death. The muskets were of a type which has not been used in the North for fifty years. No other articles could be found to indicate when the men died or what caused their death.

Amputates Frozen Toes With a Kitchen Knife

Prince George, British Columbia.—A trapper who amputated four of his toes with a kitchen knife when they became frozen last winter has arrived here for professional surgical attention, but was told he had done the job so well no further treatment was needed.

While inspecting his trap line on the upper Finaly river, J. Omeria suffered frost bite in his right foot. On returning to his cabin, which is 50 miles from the nearest neighbor, he spent several days to perform the operation, then washed the wounds and bound them up.

SURVIVOR TELLS OF SUBMARINE ESCAPES

Milwaukee Man Was in Four Disasters.

Milwaukee.—After having been in four submarine disasters in five years with the navy, C. H. Redding, twenty-eight, Milwaukee, is still very much alive. Throughout his navy service Redding was assigned to submarine duty as an electrician.

Redding was on the S-48 when it went down with an open hatch off Bridgeport, Conn., with 43 men on board, all of whom were rescued after fighting water and gas fumes for 12 hours. The thing that stands out in Redding's mind is the droll attempt of a machinist's mate to sweep back the ocean with a broom.

"The sub went down for a deep dive, but the hatch had been left open," he said. "Water poured in. This machinist mate was sweeping up water with a broom and was unaware of what had happened, as we all were for several minutes. He kept sweeping and sweeping but the water got too much for him. Finally he went into the control room and told the officers he needed a mop. We soon learned what had happened then."

When the R-6 sank in San Pedro (Calif.) harbor in 1922 after some one inadvertently had opened a torpedo door, Redding was just coming on board for the night.

As he stepped on the sub it began to sink and he stepped off into the ocean and swam to a tender lying alongside. Six men who were asleep were drowned but the others were rescued.

Redding had his head and face burned when a battery blew up on the S-37 in 1923. This accident also happened in San Pedro harbor. Six men were killed by the blast.

He was also on the L-5 which dove with an open hatch off the coast of California during the winter maneuvers in 1920. The crew of 22 men were rescued.

Lighthouse Built Amid Tempests on Coral Reef

Washington.—A successful end to an 18 months' campaign to plant a lighthouse on Tubatabaha reef in the Philippine Islands, marked by a bitter and ceaseless struggle against the elements, has been reported by the lighthouse service of the Department of Commerce.

A low coral reef set in the midst of a nest of rock shoals, sun-baked and hurricane-swept, has been crowned with a 120-foot tower to carry the light that will warn mariners. Presently the reef will be covered with soil behind the sea wall to make a tiny park under the tower.

Work began on the construction in November, 1926, and was stopped repeatedly by hurricanes which swept the barren, low islet. Many days the sun, beating on the white coral, made labor impossible during normal working hours.

Water had to be distilled out of the sea to supply the gangs struggling with the concrete and steel. Sickness forced retirement of a high percentage of the working force, but the erection of the light has been proven a necessity to safeguard the sea traffic between Manila and Hongkong and Australia, and the Philippine government kept its forces at the task.

Sea Serpent Has Sheep's Head on Body of Eel

Vancouver, B. C.—A nameless marine creature about six feet long, having an eel-like body and a head resembling that of a sheep, was on display at provincial police headquarters here as evidence of the existence of a "sea monster" which many people have reported seeing in Lake Okanagan, in the interior of British Columbia.

The strange creature was caught by the young son of Harry Alexander, Vancouver magistrate, while trolling on the lake.

Tales of the appearance of a monster in the lake have been coming from there for two years.

Most Moral Town

Linz, Austria.—This little town, capital of Upper Austria, claims to be the most moral and best governed in the world. Because of the lack of litigation, the law courts here have closed their doors, the police having reported no crimes or misdemeanors of any kind among the 50,000 inhabitants.

Kemalists Turn Backs on Traditional Hero

Constantinople.—President Kemal, follower of Western cultural fashions, has bowled over the George Washington of old Turkey, Sultan Mahomet, conqueror of Constantinople in 1453.

An article in the official press, signed by a prominent Kemalist deputy, heaped insults on the national idol, charging that his only motto was "conquest and booty."

The attack on the Father of Turkey shows a fundamental change in the national mentality since the war. The author says that if Kemal had been on hand in 1453 instead of the great sultan the European renaissance would have sprung from Turkey instead of Greece and Rome.

HISTORY IS TAUGHT BY MUMMY FAMILY

Scientists Study Remains of Ancient Egyptians.

Detroit.—A family of Egyptian mummies 3,000 years dead are teaching history to a little group of studious Detroiters.

They are telling curious and amazing things about themselves and others of their kind, who walked the earth ten centuries before the beginning of the Christian era, relating strange facts, revealing long sought mysteries, bringing to life again a splendid civilization that vanished generations ago.

Dr. S. Edward Sanderson, Detroit physician, and Benjamin Birch, curator of Asiatic arts in the Detroit Museum of Art, have joined forces in the study of the mummies. Doctor Sanderson has called upon the X-ray to aid him in his search for further knowledge of these silent spokesmen of the past and March brings a complete and thorough knowledge of the artistic side of ancient Egypt, to aid in the undertaking.

Possibilities Endless.

This is an exceedingly novel and original experiment and both men insist that they have accomplished very little in spite of their intensive studies. Both believe, however, that the possibilities of the venture are endless, and express the hope that something of great value may some day come out of the undertaking.

"If we are to know and understand the men and women of the present, we must know something of those who lived in the past," Doctor Sanderson says. "If we took away all the knowledge we have acquired from our study of dead races and vanished peoples we would be very ignorant indeed."

"Egyptian mummies are especially interesting to study because Egypt was the great melting pot 3,000 years ago. We can prove this racially. The old Egyptian was a masterful man."

"Some of the mummies are so perfectly preserved that it is still possible to detect the presence of food in the stomachs of the children and to tell something of their diet. We find grains, an old form of millet and delicate bits of young mice."

Two passive bodies lie still and quiet upon the dissecting tables in the art museum but even in their silence and immobility they give up many secrets in response to the proddings of skilled scientific fingers, the searching eye of powerful X-ray machines.

Brain Tissues Removed.

March describes the procedure of an Egyptian burial. The embalming of the body so perfectly that today, after the lapse of centuries, the bones, the muscles and sometimes the skin are to be seen. The vital organs were removed and placed in four canopic jars, each guarded by its particular god and so placed that it would be easy for the whole body to reassemble itself when the time came to enter into a new life.

The X-ray has accomplished one thing of definite value. It has demonstrated the method by which the brain tissues were removed from the head without breaking the skull. Tiny borings through the nostrils are now believed to have freed the brain substances which were placed in their designated canopic jars.

It has long been assumed by many scientists that this was the method, but it needed the X-ray to reveal it in undisputed actuality. The X-ray plates which demonstrate this method will be loaned to the University of Michigan for class room study.

Holland Turning From Wind to Electricity

The Hague.—Electricity is playing a rapidly increasing part in the industrial life of Holland, as it is being found that, in spite of their picturesque character, windmills are falling very much behind in their output capacity. The capital for financing conversions from wind power to electrical power and for creating electrical power for other purposes is not always available and, therefore, an international finance corporation has been founded, with a capital of 10,000,000 florins, at Amsterdam.

The holders of this capital are Phoebe and Gutmann and Telzeila de Mattos of Amsterdam; Chase Securities corporation and Speyer & Company of New York; Dresden bank and Darmstadter and National bank of Berlin, and Hambros bank, London.

Activity will not be restricted to Holland, although the idea and the central organization have originated here, but will be spread wherever there is need of capital for electrical enterprises. It is possible that shares in electrical undertaking will be purchased, but the chief aim is to be able to supply loan capital of either a permanent or temporary character.

Howe's Hair Sold

Ticonderoga, N. Y.—A lock of hair, preserved as a memento of Lord Howe, who was killed near here, has been purchased by S. H. P. Pell and placed on exhibition in the museum of old Fort Ticonderoga. The lock was divided among the officers of Lord Howe's regiment, but was later collected by William Lupton, quartermaster of the regiment, from a descendant, of whom it was purchased by Pell.

Rocket Cars Coming

New York.—Rocket cars are being built in Germany for demonstration at Daytona Beach, Fla., next winter, and are expected to get a speed of 100 miles per hour.

Give Her a Radiovisor

Radio movies will be received in thousands of homes next winter. Thousands of amateurs and radio enthusiasts will build their own radio vision receivers and early this fall ready-made radiovisors will come on the market. Radiovisors will be the Christmas gift for the millions who are in radio.

GOLDEN TEXT—Christ liveth in me.
Galatians 2:20.

PRIMARY TOPIC—Stories of Paul.

JUNIOR TOPIC—Paul, the Brave Missionary.

INTERMEDIATE AND SENIOR TOPIC—Paul the Dauntless.

YOUNG PEOPLE AND ADULT TOPIC—"In Labors More Abundant."

In the review of this quarter's lessons, a good opportunity is given for character study. The interests of the quarter's lessons center in Paul, Stephen, Barnabas, John Mark, Luke, Timothy, James and Ananias. Assignments should be made a week in advance for the preparation of brief essays by the pupils.

Another method would be to lift out the principles contained in the lessons of the quarter and apply them to the important problems of the day. The following suggestions are offered:

Paul's the Ideal Education; Evidence of Genuine Conversion; What is a True Christian? What is the Real Missionary Spirit? Who Should Go as Missionaries? Should Religious Differences Be Compromised? If so, How Far? How to Be Assured of Divine Leading.

Perhaps the most satisfactory method for adults is to summarize the facts and state the leading lessons. The following suggestions are offered:

Lesson for July 1. Paul, by birth and education, had much to be proud of. A godly ancestry and a true education ought to be the heritage of every child.

Lesson for July 8. While Stephen ministered in the benevolences of the church he testified of Christ and met with violent opposition. The ring-leader in this opposition was Paul. A man may be conscientious and wrong.

Lesson for July 15. Paul in unbelief zealously persecuted the church, even consenting to the death of Stephen. When his eyes were opened by the appearance of Jesus Christ on the road to Damascus he was transformed into a zealous witness for Christ.

Lesson for July 22. The sight which Paul had of Christ was so real that he at once testified of His deity and saving power.

Lesson for July 29. Paul and Barnabas were sent forth by the Holy Ghost to preach the gospel to the Gentiles. They were opposed by Elymas, the sorcerer. Spirit-filled men will most surely meet with opposition.

Lesson for August 5. The preaching of Barnabas and Saul was accompanied with such wonderful signs that the people attempted to worship them as gods. The same people soon were moved to stone them. Despite this horrible treatment, Barnabas and Saul carried on their work.

Lesson for August 12. The question of the grounds upon which Gentiles were to be received was bitterly debated. Paul preached that it was to be by faith alone. Certain Judaizing teachers taught that faith was to be supplemented by the works of the law.

Lesson for August 19. Paul was forbidden to preach in Asia; then called to preach in Europe. Divine guidance is just as really shown in closed doors as in open doors.

Lesson for August 26. When Paul's missionary work interfered with the unlawful gain of certain men at Philippi, he and Silas were sent to jail. Through their miraculous deliverance and their testimony of the saving power of Christ, the jailer was converted.

Lesson for September 2. Wicked Jews followed Paul to Thessalonica and Berea. They stirred up the people to such an extent that he had to flee. Wherever he went his ministry was accompanied by supernatural signs so as to convince the Gentiles.

Lesson for September 9. Paul preached the gospel in Corinth with such power that many were saved. The gospel is the power of God unto salvation.

Lesson for September 16. The church was threatened with disruption through party spirit. The right conception of the gospel, Christian ministers and persons constituting the church, will cure sectarianism.

Lesson for September 23. The Christian should abstain from that which might cause his brother to stumble.

Love One Another
Let us love one another whilst we live. I would speak for a kind word on behalf of those who are sifting next you and making your own house glad by their deft fingers and their loving hearts.—Joseph Parker.

Serving God
Serving God just where you are, with what you have, and nothing else God requires nothing more; He will take nothing more. It is yourself in your own position, wherever you are, that He wants.—Margaret Slattery.

Thy Will Be Done
To do or not to do; to have, or not to have; I leave to thee; thy will only be done in me; all my requests are lost in one, "Father, thy will be done!"—Charles Wesley.

Webster's Presidential Aspirations

HARDLY less eager for Presidential honors than Henry Clay was that other illustrious member of the Whig party, Daniel Webster. Though on two occasions he had to play second fiddle to Clay, it was true with Webster, as with the great compromiser from Tennessee, that too many military heroes were the chief stumbling blocks to his Presidential ambitions.

Clay was passed over three times by his party for old generals. Webster had to stand aside four times while military men of mediocre political ability became the nominees of his party.

And the biting irony of it is Webster's case was that on two occasions he thrust away from him what would have meant a term in the White House when he refused to accept proffered nominations for the Vice Presidency.

As the Lincoln-Douglas debates made Lincoln an inevitable Republican candidate in 1860, so Daniel Webster's famous reply to Senator Hayne of South Carolina in 1850 on the subject of nullification marked him at once as a Presidential possibility, with a name which, however, he stepped aside in 1852 for Clay. The latter's defeat whetted Webster's ambitions for 1856, but in that year Gen. William Henry Harrison got the nomination on the strength of his military reputation.

Webster was confident of the nomination four years later. "I think I shall be the Whig nominee," he declared. But Thurlow Weed, astute New York political boss, expressed doubt. "It looks to me like Harrison," he said. And Harrison it was.

When asked whether he would be a running-mate on the ticket with the general in 1856, Webster proudly declined. Had he been willing to run he would have been President a month after the inauguration of "Old Tip" died within that short time after assuming office.

The nearest Webster came to being President that year was in helping Harrison revise his inauguration address, killing off a number of the Roman proconsuls with which the hero of Tippecanoe had filled his speech.

Webster declared he was not a candidate in 1844, but in 1848 he had high hopes of winning the coveted prize. Again he thought he had it within his grasp, but again Thurlow Weed proscribed to him that another old soldier, Gen. Zachary Taylor, would get the nomination.

"Why Taylor is an illiterate frontier colonel who hasn't voted for forty years!" Webster exclaimed in surprise.

Once more it was proposed that he accept the Vice Presidential nomination, and once more Webster declined, his eyes firmly fixed on the higher prize. Again the President died while in office, and Daniel Webster would have been President had he been content to take second place on the ticket.

Four years later Webster still fondly cherished the hope of being the Whig nominee but yet another military man blocked the way. Gen. Winfield Scott was the Whig standard-bearer in 1852 and Webster, whose famous Seventh of March speech, with its uncompromising attitude on slavery, had alienated large groups of northern supporters, polled only 22 votes out of a total of 238 in the convention.

Clay, when thrust aside for Harrison in 1840, nevertheless supported him in his election canvass. But he balked at supporting Taylor. Webster, who had supported both Harrison and Taylor, finally balked at supporting Scott.

The great New England orator took his final convention defeat with at most funeral solemnity. He may have been his death blow, for he left Washington soon afterward and died a few weeks later on his farm in Massachusetts.

The Whig party was dying, too, and in the next campaign was to appear the new-born Republican party, challenging slavery, rising to victory in a long and for the most part successful dual struggle with the Democratic party, which up to that time, had had little really effective opposition to the Presidency.

The Charitable Aunt
Slerius, the Roman, tells in his memoirs of an old aunt who lived at his house for years. She had been an object of charity all her life; she imposed on her parents as a girl, and on an husband when married. For years she was a task to her children, and other relatives. Slerius says he once found his aunt in tears. Being asked what troubled her, she replied that she wanted to do something for the poor; she wanted Slerius to give her a great amount that she might be charitable.—E. W. Howe's Monthly.

Encore
"You're the most wonderful girl in the world. You are the object of my dreams, the light of my life, the hope of my hope, my inspiration, and my ambition. I would fight dragons to quiet the world for you. I would give my life for you! Will you be mine?"
"Do you love me, Tom?"

The "Know-Notings"

NINETEEN-TWENTY-FOUR was the first Presidential year since 1856 when a religious issue promised to attract great attention in a national campaign.

As one looks back to that contest of 74 years ago, it must seem remarkable that the religious issue for the moment almost overshadowed the issue of slavery extension on which opinion by that time had become intensified and had crystallized in the formation of the Republican party.

The religious issue sprang out of the formation of the American party outgrowth of the Order of United Americans, whose members stood strongly for native Americanism and professed hostility to the Roman Catholic church. The order was oath-bound and secret, and its members became popularly known as the Know-Notings because of ignorance of even the existence of such an association professed by all its members.

At the time when it was at the height of its power, Horace Greeley predicted it was destined "to run its career rapidly, and vanish as suddenly as it appeared. It may last through the next Presidential canvass; but hardly longer than that."

It would seem as devoid of the elements of persistence as an anticholera or antipato-rot party would be.

Old Horace was right in his prophecy, but while the American party lasted it wielded considerable influence. It gained increments of strength from the dying Whig party, which was moribund after the election of 1852.

The Whig party was mired for death because it regarded the Compromise of 1850 as definitely settling the slavery question. That position was not satisfactory to a large group of Whigs, Abolitionists and northern Democrats who united in the new Republican party.

The Whigs hoped that the issue of native Americanism would, for the time, swallow up the issue of slavery but it was a vain hope, for both issues flourished side by side in the canvass in 1856.

The Know-Nothing party carried forward its principles in a platform that demanded denial of public office to any but native-born Americans; demanded the requirement of an American residence of 21 years before naturalization could be granted; and attacked the Democrats for removing from office members of the American party.

The new party presented for the Democrats a challenge as definite as that which they met in 1848. It was a challenge similar tenets of faith. But on the issue of condemning secret orders with religious and political objects, there was no contest in the Democratic national convention of 1856 at Cincinnati such as energized the party gathering of 1924 at Madison Square Garden. The platform of 1856 came out with a series of unopposed resolutions declaring that since "an adverse political and religious test has been secretly organized by a party claiming to be exclusively American and it is proper that the American Democracy should clearly delimit its relations thereto and declare its determined opposition to all secret political societies, by whatever name they may be called. Resolved, that the foundation of the Union of states having been laid in, and its prosperity, expansion and pre-eminent example of free government built upon entire freedom in matters of religious conviction, and no respect of persons in regard to rank, or place, or birth, no party can be justly deemed national, constitutional, or in accordance with American principles which bases its exclusive organization upon religious opinions and accidental birthplace. And hence a political crusade in the Nineteenth century and in the United States of America against Catholics and foreign-born is neither justified by the past history or future prospects of the country, nor in unison with the spirit of toleration and enlightened freedom which peculiarly distinguishes the American system of popular government."

This is the plank which Senator Oscar Underwood of Alabama sought in vain to have reincluded in the Democratic platform of 1924.

This temporary political flurry three quarters of a century ago over religion and native Americanism was destined to be swallowed up in the great maelstrom of the controversy over slavery and freedom, that already was beginning to present the threat of secession and civil war.

Mother's Accomplishment
A family that recently bought a new radio had a guest from out of town. Father was anxious to be at his post tuning in his various favorites. Not wishing to be rude, it took all his will-power to concentrate on the topic of conversation. Finally he found an opportunity.

"My wife is getting to be quite a player," he said.

"What instrument does she play?" asked the polite guest.

"She plays our new radio, but she's busy just now. I'll show you how it works," replied the eager host.

Lonely Man
He has no faults what does the poor fellow do for congenial companions?—Toledo Blade.

Taking the Blue Out of Monday

By RING LARDNER

To the Editor:

I don't know how it is around different parts of the country but out our way the boys are all worried about Blue Sunday and what they going to do with themselves when the Lords day alliance gets to work on the sleeping beauties down in Washington and slips another dose of bug poison to the boys that still stagers to their ft. when the band plays the land of the free.

A few of the boys takes the proposition like a joke and say they won't nothing come of it, that the Master Minds that makes our laws will knock this one for a row of rhubarb. Well they said the same thing in regards to prohibition but you can drive your flivver up and down Main St. all day long now days without getting side swiped by no beer truck.

The boys might as well get it in their head that the new law will go through like it was playing Yale and in a few more wks. old Mr. Monday, that everybody use to crab at because it meant to go to work, will be a 2d Xmas with people wakening up full of zip and slapping 1 another on the back and hollering merry Monday and many of them.

Personally I haven't saw no draft of the statute but they tell me it provides for everybody to go to church and as far as that is concerned why they might just as well because it also provides that they won't be no movies or no ball game or no Sunday paper and you can't dance or go riding or swimming or picnicking or shoot craps or play cards and etc. with penalties all the way from 30 days to a couple of minutes in the electric chair.

Well friends when this comes they's just 3 ways to take it. You can pack your tooth brush and night gown and move to Paris or you can stay here and obey the law or break it. Now wife many books and songs has been wrote about the glories of gay Paree I seen enough of it so as I would advise my reads to stay here even after the Master Minds passes the next amendment witch is coming after this one and witch will provide that you can't eat meat or have corns.

As for obeying the law they's no use obeying the letter unless you also obey the spirit and the spirit of the law is to see that everybody has a rotten time Sunday, yourself inclusive. This ain't as easy as it sounds like, so for the benefit of my readers I have figured out an ideal program for a blue sabbath as follows:

6 A. M. Get up and take a cold bath. Shave with ice water and find your own clothes.

7 A. M. Breakfast. Burnt toast with any good coffee substitute.

7:30 to 9 A. M. Don't smoke.

9 A.M. to 1 P. M. Sabbath school and church.

2 P. M. Have duck for dinner to witch is invited a man that was in the war and his wife and 4 kiddies. Ask the man about the war.

3 to 5 P. M. Keep asking the man about the war. No smoking.

5 P. M. Vespers

6 to 7:30 P. M. Try and call up somebody that has got a new number.

7:30 to 9 P. M. Church.

9 P. M. to bedtime. Talk nice about everybody.

As for the boys that wants to evade the law, the 1st place they can't be too careful as the penalties is going to be mighty stiff like for inst. 8 yrs. If you are caught laughing unless it's at 1 of the ministers gags or some funny crack in the colic for the day. But for the boys who is willing to take a chance I have got up a serious of substitutes for the different crimes like motoring etc., that can be pulled off without no fear of detection unless the people you play with and invite into your home is a wolf in cheap clothing.

Moating.—Every time you get home from church run out to the garage and change tires.

Cards, craps and etc.—Set in church with a pal and bet on any of the following propositions. 1. The next gal that comes in will be a blonde. The odds against this is about 2 to 1 unless it's a 5th Juniper's church. 2. Will the text be from the odd or even number chapter. 3. Who will cough next a man or a woman.

Surf Bathing.—Fill the bath tub with water and pour ½ hbl of salt in it. Then you and the wife and kiddies put on a bathing suit and get in. You duck them and they squeal.

Picnic.—Put your dinner in a basket along with some bugs and dirt. Sprinkle the dining rm. floor with leaves and sand burrs and set down and eat.

Movies.—Put out the lights and shut the window curtains. Hang a sheet at one end of the rm. and set and chew gum.

Baseball.—Set on the ironing board and keep hollering, "That a boy."

Funny Papers.—Your wife gets in bed and you pretend like its 2 A M and you are just getting home. She says where have you been. You say you been to a lodge meeting. She breaks off a bed post and hits you over the head with it. You say "Ram."

Golf.—Hide a couple of balls 1 Stip day and look for them the next.

Constipated Since Childhood; In Fine Shape Now

"I just couldn't resist any longer telling you of your wonderful medicine, Milks Emulsion. I have been constipated as long as I can remember. Had typhoid fever when I was eight years old and since then my bowels haven't moved freely. I have taken pills, salts, castor oil, and everything a person could think of.

"Now, whenever I hear anyone say they are constipated I immediately tell them of Milks Emulsion. I have taken about 12 large bottles, not all of them regular. Now I keep Milks Emulsion in the house and take it regular. I have taken so much medicine that I thought it was all alike.

"I had a fallow complexion, no color, and felt miserable all the time; but now I have the color of health, and health is something I wouldn't exchange with anyone for a fortune. I wouldn't take ten times the price I paid for Milks Emulsion for the results I have obtained.

"I am 19 years old and weigh 105 pounds. Have gained 5 pounds since taking your medicine and am still gaining. My face is round and my arms are getting round. Before, people used to hang their hats on my elbows, thinking they were fatricks. Now I am going to keep on with Milks Emulsion until I weigh 125 pounds.

"You may publish this letter if you wish and anyone that wants to ask me about your medicine may do so. I promise to answer every letter. In fact, I couldn't do enough for Milks Emulsion to repay them for what their medicine has done for me." ROSE-MOND BOWER, Frontenac, Kans.

Sold by all druggists under a guarantee to give satisfaction or money refunded. The Milks Emulsion Co., Terre Haute, Ind.—Adv.

Good Advice

"Keep your troubles scattered."
"Huh?"
"Don't let 'em hold a convention!"—Louisville Courier-Journal.

MAKE JELLY

PEXEL
MAKES JELLY
never
like this

Jelly made with PEXEL turns out like this

MAKING jelly jell is not a new idea—but Pexel is certainly a new idea. It is tasteless, colorless, odorless! It is a 100% pure-fruit product which, in addition to making jelly jell, saving hours of time, and cutting down cost per glass, does not dilute or change the finest flavor or color.

Pexel saves from one to three times the 30c it costs. Eliminates long and tedious boiling. Saves fruit juice, sugar and flavor—and makes more jelly. Get Pexel at your grocer's. Recipe booklet in each package. 30c. The Pexel Company, Chicago, Ill.

BOILS ENDED—NO LANCING
Carbol contains ingredients that quickly draw out core of worse boils or carbuncles—Stops pain—prevents spreading. Get Carbol today from druggist. Cost 50¢ to 1.00. Carbol Co., Nashville, Tenn.

No ugly, grimy streaks on the clothes when Red Cross Ball Blue is used. Good bluing gets good results. All grocers carry it.—Adv.

WOOD STORES
ROBBED. \$9,000 LOOT
Burglars broke into the Hemphill-Fain dry goods store at Brownwood last Friday night and stole about \$3,000 worth of merchandise.

HOW DOOMED CONVICTS
PASS TIME IN PRISON
On death row in the state penitentiary at Huntsville, three West Texas prisoners have passed away their time in strange pursuits.

Marshall Ratliff, notorious "Santa Clause" bandit of Cisco is learning telegraphy; O. C. Wells, convicted slayer of a Coleman merchant, writes poetry and, strangest of all, Joyce Sheppard, slayer of a Fisher county sheriff, crawls, naked, about his cell floor, apparently a madman.

PUBLIC OPINION
The Cross Plains Review delivers this timely admonition to politicians and the public:
"Since matters politically have got into such a mess, we would advise that every true born man and woman of this country use their prerogative as a free American citizen and vote for whom they damn please for president. The editor of the Review will do that, anyway."

Uncle Morg Harlow received a letter from his sister, Mrs. G. H. Beal, Kansas City, and will leave Sunday for a visit with them. Accompanied by Mr. Beal they will go from there to St. Louis, for a visit with Mr. Harlow's brother, W. J. Harlow, and family.

WIMBERLY-LEWIS WEDDING
The marriage of Miss Gyrlee Lewis, daughter of Mrs. and Mrs. Oak Lewis, to Mr. Arch M. Wimberly, son of Mr. and Mrs. William E. Wimberly, of Burk Burnett, was solemnized Saturday evening at 8 o'clock in a beautifully impressive home ceremony, attended by relatives and friends, including many from out of town.

CONNER-BOND WEDDING
Mr. and Mrs. Foster Bond announce the marriage of their daughter Pauline to Mr. Desmond Conner of Coleman.

CITATION BY PUBLICATION
The State of Texas
To the Sheriff or any Constable of Callahan County, Greeting:
You are hereby commanded to summon L. G. BRADSTREET and J. G. BRADSTREET, by making publication of this Citation once in each week for four successive weeks previous to the return day hereof, in some newspaper published in your County, if there be a newspaper published therein, but if not, then in the nearest County where a newspaper is published, to appear at the next regular term of the District Court of Callahan County, to be held at Court House thereof, in Baird, Texas, on the 5th Monday in October A. D. 1928, the same being the 29th day of October A. D. 1928, then and there to answer a petition filed in said Court on the 5th day of July A. D. 1928, in a suit, numbered on the docket of said Court as No. 7359, wherein J. H. POTTER is Plaintiff, and L. G. BRADSTREET and J. G. BRADSTREET, are Defendants, and said petition alleging:

That on or about the 3rd day of September 1925, he with his wife, executed an oil and gas lease covering said ten acres to one R. D. Howell, for the development of Oil and Gas, which said oil and gas lease contained the usual covenant and agreement contained in the Producers 88 Texas form of lease, which provided among other things, that the lessee therein would pay all damages to growing crops occasioned by the development of said land also that the lessee would not drill a well on said land within two hundred feet of any dwelling house located thereon without the consent of this Plaintiff or lessor in writing, and also would bury all pipe lines below plow depth on said land.

That defendant drilled a well on said ten acres of land wherein less than two hundred feet, to wit: within ninety feet of Plaintiff's family residence, without the written consent of Plaintiff.

That the defendant negligently dug a slush pit into which slush pit was discharged the salt water, mud, oil and slush from said oil well and said slush pit located within six feet of Plaintiff's water well from which he procured water for family use.

That by the negligent construction by defendant the said slush pit in not digging the same down below the bottom of the sand and into the clay underlying the sand a sufficient depth to prevent the said water, slush and oil to percolate through the sand and into the said water well unfit for use, that the slush pit on account of the filthy and stagnant water held in the same, became a breeding ground for mosquitoes, and its proximity to Plaintiff's residence made the occupancy of said home by Plaintiff and his family undesirable and untenable.

THE ROAD TO HEALTH
Why suffer with your old chronic diseases when the opportunity for relief is right at your door. This is not the chiropractic treatment, but the magnetic, the same as practiced at Cisco, Mineral Wells and Glenrose. And practiced by Dr. Milling at Putnam and Cisco for years. Come and let's talk your troubles over. I successfully treat all chronic diseases without the use of drugs or knife.

BEAUCHAMP IS
GIVEN 15 YEARS
Clarence (Curley) Beauchamp was given the maximum sentence of fifteen years in the penitentiary here Friday night by a jury in the 104th district court. Beauchamp was tried for assault with intent to murder in connection with the wounding of his wife at Hamlin several weeks ago. The case went to the jury at 7 P. M. and the verdict was returned less than two hours later—Anson Enterprise.
