Pledge

I will think—talk—write . . . Texas Centennial in 1936! This is to be my celebration. In its achievement I may give free play to my patriotic love for Texas' heroic past; my confidence in its glories that are to be . . .

County Agent News

ROSS B. JENKINS
County Agent

PEANUT COMMITTEEMEN CHOSEN
Sign Up Starts February 4th

At various meetings over the county in which peanuts are most heavily grown, there have been 5 men chosen to serve in the signing of the new peanut contract and help administer the act. These men will start signing contracts Monday morning February 4th and will sign for 4 days, ending Thursday night, February 7th.

Clyde farmers will sign with their committeeman M. B. Rhoades at Clyde Belle Plain farmers and those of Rowden will sign with Warren M. Price. He will be at Belle Plain on Monday and Tuesday and at Rowden on Wednesday and Thursday. Cross Plain growers will sign with Jim Barr at Cross Plains; Cottonwood growers will sign with C. C. Elliott at Cottonwood. Atwell growers will sign with their committeeman, Dayton L. Sessions at Atwell.

Any grower of peanuts, or better still, any land that grew peanuts in 1933 and 1934 is eligible to sign a contract. If peanuts were grown in 1933 and preparation was made to grow them in 1934 but the drouth prevented their being grown, may sign a contract. Any grower who had peanuts only in 1934 is eligible to sign a contract. It is the land and not the man that is to be considered. Every man must have his land measured and the proper card filled out before the committeeman will start signing a contract. In no case will a peanut contract be signed in the Baird office. Consult your committeeman.

Growers will be paid not less than \$2 per acre their allowable acres. It will not be necessary the amount be planted to nuts this year but no commodity crop can be grown on these acres. Commodities are cotton, wheat corn and peanuts.

1935 COTTON ADJUSTMENT PROGRAM

All cotton reduction contracts signed in 1934 have been declared effective for the year 1935 by Secretary of Agriculture and require a reduction of at least 25 percent but allow the producers to reduce as much as 35 percent and be paid on that amount.

Rental payments of 3 1-2 per pound and parity payments of not less than 1 1-4 cents on the farm allotment will be paid.

New contracts will be offered to those who did not sign last year. These are expected to be signed and ready for acceptance by March 1st.

After a searching examination of all facts and factors relating to world cotton production. The Bureau of Agricultural Economics, in the recent Outlook reported that the immediate expansion of cotton acreage outside the United States is not likely to be very serious. The report shows that most of the increases this past year represented a restoration of previous reductions made by those foreign nations.

The Department of Agriculture does not think that the reduction of acres in America has caused us to lose trade

since we have on hand now, 9,000,000 bales of cotton that can be exported if we can find a market. If abundance makes for a good foreign market, as some claim, then the United States should do a thriving business.

One point all should bear in mind relative to surplus and that is that raw cotton is not clothes. In 1932 there was an abundance of raw cotton every where in the South but not an abundance of clothes. That condition still exists.

East Texas oil wells today are allowed to run 2.16 minutes per day or 10 hours in 277 days which is many times more drastic than cotton control yet the State of Texas is trying hard to hold this control for the benefit of the industry and for the laboring men. The above data furnished by Mr. G. E. Adams, State Cotton Agent, shows that there are two ways of looking at the cotton question.

CORN-HOG CONTRACTS

New 1935 corn-hog contracts are in the office and are being studied in preparation for a new sign-up to be started as soon as necessary data is received from Washington. Signers from the Clyde, Baird, and Putnam districts will sign with Mr. V. E. Jones in the Baird office. Those of the Cross Plains, Atwell, and Cottonwood vicinities will sign with Mr. C. D. Lane at Cross Plains. The Denton, Dudley, All south of that section in the Oplin vicinity will sign with Roy Armor at Oplin.

Those producers who did not raise at least 25 per cent of their base allowance will not be eligible to sign a new contract, except under certain conditions and must show sows are now owned and preparing to raise hogs in 1935. As one man stated, no filling station hog raiser can get in this year.

PECAN TOP-WORKING

February is the best time for this section to get the top-working done on pecans. This type of work is best done while the tree is still dormant but not too long until it will resume growth. If the topping is done too early, the wood will die back deep into the body of the tree and be a much better harbor for insects.

Trees that are top-worked now will be ready for budding in the latter part of April or 1st of May. All pecans that are small of nut or are shy bearers should be top-worked to the paper shell varieties that are proven for this section. Observation indicates that probably the best pecan for this section is the Burkett. It fills better, has a fine quality of meat, and has a high shelling percentage.

GRAPE GRAFTING

The month of February is also the month in which grape should be grafted. Any one having old vines that do not yield or have those that blight easily, should cut the old canes off some 2 or 3 inches below the surface of the soil and graft into the roots supporting the old cane. Some very successful experiments of this nature were made on the J. Frank Browning farm 3 miles west of Baird this past year. It was found that there are often 3 or 4 roots the size of the fore finger that can be grafted and each will produce a fine vine. After the first year's growth, all but one may be dug and replanted, thereby giving more grapes at practically no cost and fully acclimated.

There are always neighbors who have a fine variety of grapes that will be glad to share some of the surplus vine to the deserving person wishing the same kind. Any time in February is a safe time for grafting.

OPTION CHECKS BEING MAILED

In a reply to an inquiry addressed to J. O. Lamkin, Assistant Manager of the Cotton Producer's Pool, it was stated that these settlements are going forward at the rate of 20,000 per day. Already \$777,282 has been sent out up to January 16th.

Many questions may be saved if it were known that each county is given a number and as that number is received all checks for that county are struck that are in shape to be made.

If any are delayed they will be taken when the time comes up on the next go around and so on until all are finally paid. It is understood that this procedure is used in printing all checks

ONION PLANTING TIME

Many inquiries have come into the office desiring to know if an attempt will be made this year to grow onions commercially. Certainly. The only reason this office has been slow to mention them is to give mother nature time to give out more moisture. Many sections have now received good rains and the soil is in fine shape for planting. The writer has not been so much sold on the idea of setting plants too early as many late freezes hurt onions badly. However, if an onion is once rooted, it is most difficult to kill. They stand more than zero weather in that stage. Plants will cost the same as last year, \$2.70 for a crate of 6,000 plant delivered to any address in Callahan County.

Home Demonstration Club News

MISS VIDA MOORE
County Home Demonstration Agent

We have just finished making 475 feet of tile for sub irrigation at an exact cost of \$4.75" says Mrs. Merlin Garrett, Poultry Demonstrator for the Cross Plains Home Demonstration Club.

During the hardest part of the drouth Mr. and Mrs. Garrett kept the tomato supply for a family of four, adequate by subirrigation of 4 tomato vines. Mrs. Garrett was Poultry Demonstrator for her club in 1934 and caned over 300 pints of food at a value of over \$50.00. In addition to the food produced on the Garrett place, Mrs. Garrett has canned chicken and exchanged it to her grocer for food she could not grow.

"My new clothes closet is going to cost less than \$1 in cash and be very satisfactory at the same time" says Miss Juanita Holloway, Wardrobe Demonstrator for the Rowden Home Demonstration Club.

In addition to building a clothes closet, using heavy box pastboard to make it dust proof, Miss Holloway has made a foundation pattern and successfully used it in the making of a satin blouse for a new spring suit, has started the keeping of her 1935 clothing account and the planning of her spring wardrobe.

"By being the Wardrobe Demonstrator of my club, I feel that I will be able to clothe myself and my family more satisfactorily and more economically", says Mrs. Hayden Patterson, Wardrobe Demonstrator for the Clyde Helping Hand Home Demonstration Club.

Mrs. Patterson is planning to improve her clothing storage space by adding rods for both the larger and smaller members of the family; by adding shelves for flat work; by adding shoe racks and bags; and to keep accurate accounts for the entire family.

Ten varieties of canned beef products making a total of 175 pints, were prepared from one beef by Mrs. Virgil Fulton, 4-H Pantry Demonstrator for the Cottonwood Home Demonstration Club. After saving one quarter to use fresh. Mrs. Fulton canned chili, rolled roast, plain roast, rolled steak, fillet steaks, plain steaks, liver paste, meat loaf, soup stock, and veal birds. She rendered out salt from the extra fat and the cooked bones were fed to the chickens.

Mrs. Fulton is continuing the job of being 4-H Pantry Demonstrator from last year and if the quantity and quality of food products are continued, her pantry will be adequate.

EPISCOPAL SERVICES

Rev. W. H. Martin, of Stamford will hold services and preach at the Episcopal church Sunday afternoon at 3:30 o'clock.

New Ways With Corn

CORN crops up nowadays in unexpected places. Every housewife in America knows how to serve it in the usual ways, and knows that her family will enjoy it, but has it ever occurred to you, for instance, to use it to stuff green peppers to be served with corned beef hash? Here is the way to do that:

Corned Beef Hash with Stuffed Green Peppers: Add a little water, if necessary, to the contents of a No. 2 can corned beef hash, season more if desired, and brown well on both sides in a skillet with some hot fat. Remove to a hot platter. Cut two large green peppers in halves lengthwise, remove seeds and white fibre, and fill with the seasoned contents of an 11-ounce can corn. Cover with buttered crumbs, and bake until crumbs brown and peppers tender. Arrange around the hash. Serves four.

Whole Kernel Corn

Then there are the dishes in which canned whole kernel corn goes particularly well, such as

Corn Fritters: Chop the contents of a 10½-ounce can yellow bantam whole kernel corn, or put them through a food chopper. Add two well-beaten eggs and one-fourth cup milk. Add two-thirds cup flour, one teaspoon salt and one-half teaspoon baking powder. Drop by spoonfuls into hot fat or drippings in a skillet, and brown on both sides. Makes sixteen fritters.

Corn Salad: Marinate the contents of three 12-ounce cans whole kernel corn and one and a half cups grated or finely-chopped raw carrots in one cup French dressing for an hour or so in refrigerator. Add one cup shredded ripe olives, and serve in a nest of lettuce. Serves fifteen liberally.

CHILDRENS COLDS

DON'T NEGLECT YOUR KIDNEYS!

IF your kidneys are not working right and you suffer backache, dizziness, burning, scanty or too frequent urination, swollen feet and ankles; feel lame, stiff, "all tired out" . . . use Doan's Pills. Thousands rely upon Doan's. They are praised the country over. Get Doan's Pills today. For sale by all druggists.

DOAN'S PILLS

MAN WANTED for Rawleigh Route of 800 families. Write today, Rawleigh Dept, TXA-38-SA, Memphis, Tenn 4-4tp.

Bean Combinations

SOME people just can't leave beans alone. That's natural, because they are very good alone, but they are also delicious in combination with other vegetables. Here, for instance, is a way to combine:

Kidney Beans with Fresh Tomatoes: Put alternate layers of the contents of a 10½-ounce can of kidney beans and of sliced tomatoes (you will need four ripe ones) in a buttered baking dish, seasoning each layer of tomatoes with salt and pepper. Cover top with buttered crumbs, and lay three long slices of bacon, cut in halves, on top. Bake in a medium oven until the tomatoes are done, the crumbs brown and the bacon crisp. Serves six.

Lima Bean Liaisons

Lima Beans and Cabbage en Casserole: Boil two cups shredded cabbage for about twelve minutes, or until tender; in salted water, and then drain. Also drain the contents of an 8-ounce can of lima beans. Put alternate layers of the vegetables in a buttered baking dish, and pour over one cup of highly seasoned white sauce. Cover with buttered crumbs, and bake in a moderate oven for from fifteen to twenty minutes. Serves six.

Lima Beans and Celery with Mock Hollandaise Sauce: Heat the contents of a No. 2 can of lima beans in their own liquor, and then drain. Boil one-fourth cup of diced celery until tender, and drain. Combine the two vegetables, and keep them hot. Melt two tablespoons butter, and add two tablespoons lemon juice. Beat one egg yolk, add the hot bean liquor, and then add the butter and lemon juice, and cook gently until the sauce is creamy, being careful not to boil. Pour over the hot vegetables, and serve at once. Serves eight.

Constipation
If constipation causes you Gas, Indigestion, Headaches, Bad Sleep, Puffy Skin, get quick relief with ADLERIKA. Thorough action, yet gentle, safe.

CITY PHARMACY
CREOMULSION
Your own druggist is authorized to cheerfully refund your money on the spot if you are not relieved by Creomulsion.
