Three Way Eagles Expect Great Fall Football Season

"If we can just keep everybody healthy, we can really get off to a good start this year," said Brent

Members of the Muleshoe Fire Department were called to the David Faver home at 600 W. 5th St. around 10 p.m. Friday night after the home was reported to be burning.

Fireman found an apparent short in an outdoor light fixture had ignited the back of the house and filled the home with smoke. Little fire damage was reported

Mini-Mule T-shirts will be available in Muleshoe beginning September 6, according to Shirley Hicks and Toni Eagle.

The cost is \$6.50 each and they will be available from Mrs. Hicks at Dillman Primary School or Mrs. Eagle at DeShazo Elementary School.

Bailey County Farm Bureau will hold their regular monthly meeting of the Board of Directors on Thursday, September 1 at 8:30 p.m. in the Bailey County Farm Bureau office. All members are welcome to attend.

THe Muleshoe Athletic Boosters will meet Tuesday, Aug. 30 at 8 p.m. in the high school cafeteria. The film of the Denver City scrimmage will be viewed at this time. All interested persons are encouraged to attend.

Muleshoe Rebekah Lodge No. 14 held their weekly meeting Tuesday evening at 7:30 with 32 members present. A salad supper proceeded the meeting. Renee Rudd and Mary Franklin were initiated into the Rebekah Degree. ****

Larry Don Mitchell, son of Mr. and Mrs. George Mitchell of 802 W. Date, and a graduate of Muleshoe High School, recently participated in TSTI graduation ceremonies at the Amarillo Civic Center auditorium.

He received an Associate of Applied Science Degree from Computer Science Technology.

During summer commencement ceremonies, more than 300 West Texas Cont. Page 6 Col. 3

coach at Three Way. "This. year's team is really easy to motivate, and they are also very enthusiastic about the season."

With a couple of outstanding players, Coach said Wellman may be the toughest team they will have to face this fall, although other traditional rough teams are Dawson and Whitharral. Coach Fountain and his

assistant coaches, Ron Windom and Eddie Fortenberry, feel comfortable with the team this year, although this is the first year for any of the coaches to coach in six-man football with several different rules.

In regular 11 man football the field is 100 yards long, as compared to 80

Fountain, head football feet for his team. Also, 6man football fields are only 40 yards wide, as compared to the 54-foot regular football fields.

When the team has a first down coming up, it will be first and 15 as compared to first and 10 for an eleven man team. If either team is at least 45 points ahead after halftime, the game is immediately

Although 6-man teams get six points for a touchdown, the same as regular 11-man football, they get two points for kicking the extra points after and only one point for running the ball over the goal line.

According to the new coach at Three Way, his starting quarterback will be sophomore Brett Stegall

Dove Hunters Find Regulation Changes

Texas Parks and Wildlife Commission has approved a new three-zone alignment for dove hunting in the upcoming season. The new system utilizes highways

New Members To Be Elected On GSPA Board

Grain sorghum farmers in a 29-county area of the Texas High Plains, including Bailey County, will elect four members to the Texas Grain Sorghum Producers Board on September 15. The twelve-member Texas Grain Sorghum Producers (TGSPB) administers the collections and programs of a grain sorghum checkoff program which was established by a referendum of sorghum farmers in 1969. The voluntary checkoff of five cents per ton of sorghum production is used to finance grain sorghum research and promotion. Directors serve six-year terms staggered so that terms of directors expire

biennially. The election will be conducted by mail. Ballots will be mailed to grain sorghum farmers this week and must be returned to the TGSPB office with a postmark no later than midnight, September 15, 1983. The names of five nominees appear on the ballot. They

Jack Cobb of Plains: Olan (Jack) Crowl of Morse: George Reeves of Cont. Page 6 Col. 1

for boundary lines for better delineation of zone boundaries. Under the former two-zone system, county boundaries were used.

Panhandle Zone mourning dove season will be Sept. 1- Nov. 9; the Central Zone season will be Sept. 1-Oct. 30, and Jan. 7-16, 1984; and the Rio Grande season will be Sept. 17-Nov. 5, 1983 and Jan. 7-22, 1984.

The Panhandle Zone, which includes County extends to IH 10, IH 20 and IH 30 to the

west, south and east. Meeting in Austin last week, the commission established the Panhandle, Central and Rio Grande zones. The three-zone system has been designed to provide optimum hunting opportunity for hunters when the birds are available, within the context of proper management, said Ron George, dove program leader for the Parks and Wildlife Department.

Significant brought about by the new alignment includes Sept. 1 opening date for a large portion of the Southeast Texas which formerly had the later South Zone opening date; a straight 70-day season for the Panhandle-South Plains and much of North Texas; and allowance for two white-winged doves in the daily bag limit statewide.

Statewide bag limit will be 12 doves, not to include more than two whitewinged doves. Shooting hours will be one-half hour Cont. Page 6, Col. 4

who "reads the defense well, catches on quick and is not afraid to block, including on sweeps."

Local Trio Attends Farm Bureau Seminar

Bailey County Farm Bur- other speakers were Dr. eau sponsored three students to attend the 21st annaul Texas Farm Bureau High School Citizenship Seminar, July 18-22 at Angelo State University in San Angelo.

Jay Cage, son of Mr. and Mrs. J.D. Cage; Darin E. Shaw, son of Mr. and Mrs. Eugene Shaw and Kacy Henry, daughter of Marcia Henry, were chosen to represent this county because of their leadership ability, scholastic achievement and character, said Dale, President.

This was the first time for the seminar to be held at Angelo State University and Dr. L.D. Vincent, president, welcomed the

Speakers included Dr. Clifton Genus, president of Harding University, Searcy, Ark.; Glenn Kimber, senior vice president, the Freeman Institute, Salt Lake City, Utah, spoke on "The Miracle of America.

Dr. Sam Zakhem, vice president for Economic Affairs, Rocky Mountain Orthodontics, Denver, Colo., spoke on "Understanding the Middle East," and

Teal Duck Season Set For Hunters

September 10-18 has been approved by the Texas Parks and Wildlife Commission as statewide season dates for hunting all species of teal ducks.

As in the past, the daily bag limit will be four teal in the aggregate; possession limit eight. Shooting hours will be sunrise to sunset throughout the

A spokesman said the special teal season gives waterfowl hunters the opportunity to hunt newlyarriving teal which often pass through much of the state before the opening of regular waterfowl seasons.

Seasons and bag limits for ducks, geese and sandhill crane are expected to be adopted by the Texas Parks and Wildlife Commission on Wednesday, August 31.

New Senior Citizen Programs Planned New Service Center

Plans Underway Possible In Future For MD Telethon

All plans are underway for another major Jerry Lewis Telethon in Muleshoe during the Labor Day weekend and all day on Labor Day, September 5.

Don Prather is general chairman and the local telethon will be hosted by the Caprock CB Club. Bob Phillips has been very busy lining up live entertainment to be staged at the Bailey County Civic Center and Coliseum for Saturday night and Sunday nights before Labor Day.

Phillips said he has outstanding musical entertainment for the Western Show on Saturday night, and equally good gospel shows lined up for after church on Sunday night.

There is no cost to attend either or both of the

Glen Williams, is working

to help better the lot of the

purpose activities. He explained that the Center could better serve all the citizens of the county in a better manner than the small office located in Bailey courthouse.

In explaining the Aging Service program, he said:

"The government Program On Aging is designed to serve all senior citizens, regardless of their race, creed, or sex and without respect to their political persuasion, social or financial circumstances of life. There are a number of services available in Bailey County at this time, and if we can expand and improve our program, there

will be many more. "It might be that in the near future we can arrange for a Service Center from which to operate. And, then our program will come into its own. Ours is the only county in this area that does not have a Service Center. The communities that do have them are proud of them, and they enjoy them.

"Service Centers are for all senior citizens, and many of the younger folks visit them, too. They serve as a focal point for senior citizens, and many pleasant hours are spent at them. They can provide such things as nutritional services, meals for shut-ins, a place for blood pressure checks, exercise programs, recreation, quilting, painting, ceramics, and many

"Senior Citizen Programs can help with job referrals, and can serve as a resource in other areas. Through the Texas Tech School of Law, they can provide answers and confidential information about a number of other

"We have a constantly aging population -- people are living longer, and the younger ones are moving away. And, in all probability, rather than being reversed, in the years to come, this trend will be Cont. Page 6 Col. 1

Enrollment At Schools Now 1,555

Muleshoe ISD opened school this week with an enrollment below last year's enrollment, but on target with the predictions made by the local administration, according to figures released by Superintendent John Fuiler.

On Thursday, the enrollment total was 1555 as compared to 1593 this time las year. The administration had predicted an enrollment of 1555.

According to Superintendent Fuller, "the real importance in the enrollment is that state funding is directly linked to the average daily attendance of our students. With our current enrollment and with good attendance, Muleshoe ISD will be right on target with our predictions of state funding in our 1983-84

Muleshoe High School has registered 82 seniors, 97 juniors, 119 sophomores and 109 freshmen for a total of 407 students.

In the three junior high classes, 367 students are enrolled. These include 123 in the eighth grade, 119 seventh graders and 125 in the sixth grade.

A total of 406 students have enrolled at DeShazo Elementary. This includes 126 in the fifth grade; 148 in the fourth grade and 132 for the third grade. At Dillman Elementary,

137 second graders have registered; 125 for the first grade and 111 in kindergarten. There are also two students in the early childhool class for a total of 375 at that schook

Scouting, an overview of the program, program activities, resources, and planning. Attendance on both days will be required for completion of this course. In Post, the course will be offered Sept. 1, 9 a.m. to 3 p.m. and on Sept. 29, 9 a.m. to 12:30 p.m. The course will be offered in Brownfield on Sept. 17 at 620 S. 1st Street. 9 a.m. to 3 p.m. and Oct. 29, 9 a.m.

to 3 p.m. The Lubbock Service Center will offer the first day of the course on Oct. 3, 9:30 a.m. to 2:30 p.m. and again 6 to 10 p.m. The session will be repeated on

Oct. 20 at the same times. The second day of the course will be offered on Oct. 10, 9:30 a.m. to 2:30

Preheating Oven May Waste Energy

Most recipes for ovencooked foods traditionally call for a preheated oven, but recent studies have shown that preheating is not essential for food quality and may even waste energy.

Researchers at the United States Department of Agriculture's consumer nutrition laboratory compared a variety of foods prepared in preheated and nonpreheated ovens and found few significant differences in the quality or size of the items, reports home economist Bonnie Piernot.

The non-preheated ovens required five minutes or less extra baking time than the preheated ovens, says Piernot, who is with the Texas Agricultural Extension Service, Texas A&M University System.

The energy savings from not preheating averaged about 10 percent.

"Overall," Piernot says, "the findings confirm that preheating the oven is not essential for good quality baking, so it's an unnecessary use of energy.

The foods used in the research study included pies, cakes, casseroles, souffles and meat loaves. The dishes were prepared in preheated and nonpreheated standard continuous-cleaning standard electric and selfcleaning electric ovens.

The variability in baking times reported between preheated and preheated ovens was often less than that reported among the different types of ovens, adds

p.m. and again 6 to 10 p.m. The session will be repeated on Oct. 27 at the same times. Those wishing to attend the Service Center sessions may choose the day or evening course on either of the days listed

and must attend both days to receive the full program The course will be offered at the Girl Scout House in Plainview on Oct. 4, 9:30 a.m. to 2:30 p.m. and again from 6 to 10 p.m. The second day will

Oct. 11, 9:30 a.m. to 2:30 p.m. and again 6 to 10 p.m. Participants choose morning or evening sessions and must be present both days.

Orientation in Friona will be held at 703 Ashland on Oct. 6, 6 to 10 p.m. and on Nov. 3, 6 to 10 p.m. In Levelland the course will be offered at Cactus Drive Church of Christ on Oct. 13 and Oct 25, 6 to 10 p.m.

Age level roundtables for experienced leaders will be held at the Service center on Sept. 15, 6:30 to 9:30 p.m. Second and third grade Brownie leaders will discuss planning and bridging activities and fifth and sixth grade junior leaders will discuss badges, sighs,

and bridging activities. Leadership awards, challenges and interest projects will be discussed by eighth through twelfth grade cadette and senior leaders. A Movin' On Workshop is offered for fourth and seventh grade leaders who have scouts moving into a new age level. The workshop content will emphasize the junior and cadette programs and awards sys-

Primitive camping tips will be the focus of a camp training session at the Service Center on Sept. 10, 10 a.m. to noon. Camping skills necessary for the Council's primitive site, Camp Haynes near Silverton, will be presented for cadette and senior leaders who plan taking their troops on the Camperafters

Holiday, Sept. 24 and 25. An ACA Camperafter troop camp course will be offered as a prerequisiste for troop camping on any site. This course will include a classroom session as well as an overnight at Camp Rio Blanco near Crosbyton. The classroom

ATPE Supports Excellence In Teaching Reward

In response to the thousands of Texas teachers whose classroom performances reflect excellence on a continuing basis, a merit pay task force created by the Association of Texas Educators Professional (ATPE) will recommend to its board of directors in September that a system to reward these outstanding

educators be developed. If the ATPE board of directors approves the task force recommendations, the association will share resources and research findings with school districts interested in developing a merit pay concept.

Clara Davis, president of the ATPE Austin local unit and chairperson for the task force, said, "In accord with ATPE's philosophy of being a reasonable voice and a positive influence for education, we are committed to be involved in developing a solution to the merit pay issue rather than to be a part of the problem."

Davis stressed that ATPE does not purport to have a patent plan and that the task force could only support a merit pay concept as long as it is responsive to local needs, standards, and criteria.

"Many teachers have negative feelings about merit pay because they fear that favoritism by evaluators will be an inherent factor in any plan," Mike Morrow, executive director of the 35,000-member teacher's association said.

Davis explained that the task force recognizes the complexity of the issue and the challenges involved in developing and equitable plan. Because they are cognizant of these factors they will be presenting the following points to their board of directors who will meet Sept. 234 in Austin.

Merit pay should not be a substitute for an adequate base pay. Merit pay should not be

used in lieu of existing due process procedures to rid the profession of incompetent teachers. Merit pay alone will not

attract bright new students to the teaching profession. The determination of merit should entail a multi-

faceted evaluation process. Any merit determination should be based on valid criteria observed by qualified individuals and/or measurement tools.

The distinction between merit (superior performance) pay and incentive (extra pay for extra work) pay should be made.

One goal of rewarding teacher excellence is to encourage good teachers to stay in the classroom.

If the task force recommendation is approved, it will then become a part of the association's policy. ATPE is a statewide or teachers,

administrators, and support personnel. It supports local control of public schools, a team concept approach to problem solving, teacher competency, better salaries and benefits for teachers. ATPE opposes collective bargaining for public educators.

SOUTHWESTERN PUBLIC SERVICE COMPANY

Texas Brucellosis Program Increased **Participation**

Basic changes in the Texas brucellosis program during the past three years are resulting in increased producer participation, according to statistics from the Texas Animal Health commission.

"The Texas brucellosis program now in effect is vastly changed from what it was just three years ago. It is geared now to helping the producer with his problem, not aggravating it," Dr. John W. Homcombe, executive director, Texas Animal Health Commission, said.

"Before revisions went in effect in 1980, the Texas brucellosis program was primarily one of regular testing without an emphasis on vaccination," Holcombe explained.

Under the revised program, a producer has the opportunity to develop a herd plan that incorporates the use of adult vaccination

Plainview Air Show Planned

Wes Winter, veteran aerobatic pilot from Mesa, Arizona, will be the main attraction at the 15th Annual Plainview Air show on Sunday, September 11, from 2:00 to 4:00 p.m. at the Hale County Airport in Plainview, Texas. Flying a Pitts, S2s and a twin engine Partenavia, Wes Winter will perform spine-tingling aerobatics including a triple ribbon pickup, ribbon ballet and various exciting twin engine aerobatics. The air show will include many other aerobatic performers such as Mike Stavter in a Pitts-S2s, Van White flying a Taylor Craft, Clarence Langerude in his Vari-Eze, Mike Owen flying a Marquart Charger, a Bellanca and Aerostar demonstration by Miller's Flying Service and a display by the Confederate Air Force. Other displays and performances scheduled include skydivers, gliders, hot air balloons, unusual experimental aircraft, military aircraft and a parade of homebuilts. The show will be sponsored jointly by the Plainview Kiwanis and the Experimental Aircraft Association Chapter No. 438 with proceeds going to their various civic and charitable programs. Admission will be only \$3.00 for adults and \$1.00 for children.

People who extend liberal support to the churches seldom worry about what they get in

and testing to fit his normal working schedule. This results in an immune herd once the disease is eliminated. About producer acceptance, Dr. Holcombe noted:

1. Vaccination of heifer calves has almost doubled since 1980;

2. Certified free herd numbers have skyrocketed from a total of 62 in 1980 to more than 800 this year to date.

A comparison of the old regulations (those prior to Feb. 29, 1980) to the present show:

The card test was the official test for brucellosis; now, the card test is a presumptive test only. The TAHC lab routinely runs additional tests to determine actual infection. The high dosage of Strain 19 vaccine was used which caused problems with vaccine induced test reactions. Reduced dosage of Strain 19 virtually eliminates this.

Herd plans were inflexible for individuals whose cattle were infected; testing of such herds was to be conducted every 30 days.

Now, testing is done to correspond with the herd owner's scheduled gatherings of cattle.

An epidemiologist is also involved in establishing individual herd plans.

Herd owners also now have the right to protest procedures; under the old plan this was not allowed.

The new program also provides for incorporation of private veterinarians, and improvements in surveillance methods to detect brucellosis.

Recently passed legislation gives the TAHC administrative and legal authority to enforce rules and to meet minimum eral guidelines.

The party was hosted by the Needmore Community Club and Odessa Shanks provided music for singing. Muleshoe Floral and Gift provided corsages for the ladies and boutonnieres for the gentelemen. (L-R) Maggie Bruns, born 8-1-1898; Bertie Hendrix, 8-24-1896; Standing, Lois Ethridge, 8-22-1907.

Alpha Zeta Pi Chapter Holds Beginning Day

The Alpha Zeta Pi chapter met in the home of Jan King Tuesday, Aug. 23 for their "Beginning Day". Dressed in pajamas, the members were served an evening brunch consisting of stuffed egg casserole, layered fruit salad, homemade biscuits, cinnamon rolls and juice.

Debbie Hutto, president, called the meeting to order. Betty Bush read the minutes of the two previous meetings and the treasurer, Alice Liles, discussed the Bingo carnival proceeds and sorority dues. Ms. Hutto then read local and international communica-

Program chairman, Alice Liles, explained the program outline for the year to each member. Membership chairman, Peggy Pohlmer, told the members the names of the new pledges to be rushed Aug. 30 at a "Punk Rock" party. Annette Bonds, courtesy chairman, presented a silver Beta-Sigma Pi baby spoon to Jan King, for her new son.

New business on the agenda concerned what local charity or activity the proceeds of the money dog would go to. Suggestions were made by various members, with follow up information to be presented at the next meeting.

Ms. Hutto passed out a paper to each member. Each member wrote a goal for themselves and the chapter for 1983-84. The goals were read aloud and will be read again at the end of the year.

Following a message by the president introducing optism and goals in life for themselves, the members were dismissed.

Those present included:
Ruth Locker, Jan King,
Annette Bonds, Betty
Bush, Lyniece Goodnough,
Dani Heathington, Debbie
Hutto, Alice Liles, Paula
McMeans, Peggy Pohlmeir,
Kristi Phelps and Gina

In Fashion

Designers have created classic fashions for the coming fall with combinations of fabric and color. Soft wool, fine hand-woven tweeds and mohairs will be seen in suits, skirts and coats.

AUGUST BIRTHDAYS...(L-R) Archie Scarlett, born 8-20-1901; and A.M. Bradley, 8-9-1898, were honored with a birthday party Thursday afternoon in the Day Room of the Muleshoe Nursing Home, hosted by the Needmore Community Club.

SENIOR CITIZENS

The Bailey County Senior Citizens met Monday, Aug. 22 in the fellowship hall of the First United Methodist Church for a covered dish luncheon. The invocation was given by J.C. Shanks.

There were 39 present including ten from the Nursing Home. They included: Ruby McCamish, Bunnie Hurd, Rosa McKillip, Cleo Bellar, Lois Etheridge, Clara Rickert, Cordelia Cochran, Ora Roberts, Joy Stancell and Helen Free. Other visitors included: Vigil Willbanks and Homer Millsap, who are new members.

The meeting was called to order by the president, Mrs. Mildred Head. Minutes of the previous meeting were read and

Mrs. Lena Hawkins and Lois Etheridge celebrated birthdays. The birthday song was sung with Zed Robinson at the piano.

An anniversary card was signed for Mr. and Mrs. A.R. McDaniel, who have been married 13 years. Cards were also signed for the members who are sick. They are Raymond Rubineck, Mrs. Edith St. Clair and Mrs. Maude Robinson, Mrs. Eva Ashford pre-

sented the Muleshoe Singers, who sang several songs. Then Zed Robinson sang "That's His Name" and "Keep Walking". Claude Coffman dis-

Claude Coffman dismissed the group with a prayer.

If you find the weather hot, cheer up; it's only four months until Christmas.

From a business standpoint, too many people find principles inconvenient.

Three Way

Cont. From Page 1

All three of the seniors on the Three Way Eagle team are "leaders" says Fountain. Steve Roberts, as fullback, is said to be a power runner, and is going into the season at 205 pounds. The other two senior starters are Brad Stegall at left end and Dewayne Williams, center.

At right end will be Mike Whitehead, a junior, who is a good blocker, runs a good pass pattern and is very intelligent, says the

Albert Zapata, is a junior tailback, and also a starter. Coach Fountain says he is quick, and very speedy getting into the hole and on into the secondary.

Other junior members of the team are Victor Hernandez, tailback; Leo Rubalcava, right end and Israel Belez, running back.

One more sophomore is on the team, Steve Zapata, fullback.

Freshmen team members are Oscar Guillen, quarterback; Robert Zamora, playing end both ways; Jessie

Zapata, backfield; Jose Rubalcava, fullback; Charles Latimer, center; Matt Sowder, end and John Welch, end.

Coach Fountain added that main strengths for the team will be in their speed and quickness, combined with a fairly large line. Major weaknesses are in the depth line. "We don't feel adequate in our depth, but we are coming along real well right now," said Coach Fountain.

Three Way has an open date on the traditional Friday night opening night, September 2. They play their first two games at home, with action against New Life Christian Academy of Lubbock at Three Way at 8 p.m. on Friday, September 9 and Silverton will be at Three Way on September 16.

Homecoming for the Three Way Eagles will be on Friday, September 30, when they will tangle with Whitharral. This action will also be the first district game for the fall.

Senior Citizens

Cont. From Page 1

accelerated. It might be well for businessmen, public officials, and the professions to take note of these facts. Because more and more senior citizens are becoming a potent force in America. They afford unlimited potential, and if properly recognized, can be a tremendously valuable asset. It is good to see community support for

"As one example of the need for services, in our office, we are required to keep a daily record of the people that contact us, whether by telephone or in person. During the month of July and through August 18, we registered a total of 231 contacts. Of course, not all of those were for official services, but most of them were, and were mostly in person. That number will likely increase as time goes

"If those who are interested in improving our steer show. Wheeler exservices will please contact me, we will try to coordinate our efforts to that end. And, I will be happy to assist in every way pos-

sible," he concluded. Williams also said he welcomed suggestions and would appreciate any help in trying to make the final? years of senior citizens more comfortable

involving

ure problems

The Present Problem Solving contest was piloted in Texas this past year as a natural outgrowth of the FPS program. Students use their problem solving shills to work toward solving a current community problem rather than a potential future problem. The Muleshoe High School team, consisting of Kristi Spies, John Isaac, Tracy Tunnell, and Wade King worked to help complete the Mule-Putt miniature golf course. Their project notebook and videotape were then taken to the World Bowl by state FPS director Judye Stewart in June with the hope that other states and countries will implement the Present Problem Solving competition in the future.

Muleshoe became involved in the Future Problem Solving Program last year for the first time. The

Allsup's Marathon Set October 1

The stage is set for the 9th Annual human drama that is: The Allsup's Marathon! From all over the United States, runners will gather in the fall atmosphere of Clovis, N.M. for one of the biggest events for runners in the

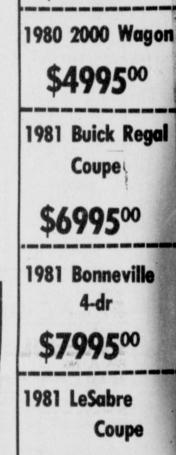

Over 500 runners are expected to compete in this year's roadraces to be held Oct. 1st. 1983. Again, this year there are THREE big events from which runners may choose: the full marathon (26.2 miles), the half marathon (13.1 miles) and the 10 K (10,000 meters). All of the races begin and end at the same locations or by calling (505) 769-(an Olympic style finish in our stadium) and the run-

courses are all certified to insure quality races and accurate times for all participants.

Quality trophies will go to: Men - first 5 overall, and Women - first 3 overall, with awards in each class for men and women. Tee shirts will be awarded to all finishers, plus commemorative patches for all marathon finishers.

All runners are urged to come and run in the 9th Annual Allsup's Marathon, Oct. 1st, 1983. You may register until Sept. 30th, 8:00 p.m. by writing Allsup's Marathon, P.O. Box 1907, Clovis, N.M. 88101 2311, ex #224. Registration fees are \$7.00 prior to ning surface is fast, flat Sept. 24th and \$9.00 after asphalt throughout the Sept. 24th. All proceeds go

U. S. Coast Gaurd Has Nationwide Competition

The United States Guard Academy has announced that it is now accepting and processing applications for appointment as Cadet, U.S. Coast Guard, Class of 1988. Applications are being accepted for both men and women. Appointments as Coast Guard Cadets are tendered solely on the bas-is of an annual nationwide competition with no congressional appointments or geographical quotas. Applications for appointment must be submitted to the Director of Admissions, U.S. Coast Guard Academy, prior to December 15. 1983. Candidates must arrange to participate in either the College Board Scholastic Aptitude Test (SAT) or American College Testing Assessment (ACT) prior to or including the December 10, 1983 administration for the ACT and the December 3, 1983 administration for the SAT. The competition for appointment as Cadet is based on the candidate's high school rank, performance on either the SAT or ACT, and leadership potential as demonstrated by participation in high school extracurricular activities, community affairs and/or part-time employment. Most successful candidates rank in the top quarter of their high school class and demonstrate proficiency in both the mathematical and applied science fields.

To qualify for the competition, an applicant must be unmarried at the time of appointment, have no legal obligations resulting from a prior marriage, and must have reached the age of 17 but not 22 by July 1, 1984. All applicants must be assured of high school graduation by June 30, 1984. Regulations stipulate that all applicants must have completed three units in English, and three mathematics to include algebra and plane or coordinate geometry or their equivalents, and must fulbasic physical

requirements. Coast Guard Cadets obgraduate education at no personal expense. In addition, they receive pay and allowances constantly upineering, oceanography.

dated Academy curriculum leads to a Bachelor of Science degree with a strong academic emphasis on engineering and science. The selected major studies, when combined with varied elective courses, establish a solid foundation for a challenging career. Graduates of the Academy are awarded a Bachelor of Science degree and are commissioned as Ensigns in the United States Coast Guard. Selected officers may pursue further postgraduate education and specialized training at many leading civilian and military graduate or schools, in such fields as aviation, business administration, electronics, eng-

graduate can look forward to a varied, exciting, and demanding career as a regular Coast Guard Officer. The Coast Guard performs essential humanitarian missions vital to the safety and saving of lives at sea. Under the Department of Transportation, the Coast Guard establishes and coordinates search and rescue operations by ship and plane, maintains advanced electronic and other aids to navigation scattered around the globe, operates the icebreakers which clear the way for all polar expeditions, and enforces marine law and all aspects of merchant marine safety. professional In addition, the Coast Guard has responsibility for boating safety and marine environmental protection.

Storm Victims Get Aid Offer From Mauro

Texas Land Commissioner Garry Mauro responded to the devastation of the Texas Gulf Coast and the suffering of its residents in the wake of Hurricane Alicia by offering the expertise and resourses of the General Land Office to individuals affected by the storm and to other state agencies.

"I'm extending the full resources of this agency to help preserve and rebuild our fragile Texas Gulf Coast. Texans are blessed with a beautiful and unique natural heritage in our coastal area and our agency will do everything under its authority to maintain and restore this beautiful and resource," productive Mauro pledged.

The General Land Office is responsible for managing the state's coastal lands and waterways and monitoring and protecting environmentally sensitive

Mauro said his agency will provide aerial photo surveillance of the entire Texas Gulf Coast affected by the hurricane to other state agencies and that other agencies are invited to participate in the flights

Mauro, who serves as Chairman of the School Land Board, said he will request that the board waive for one vear the

normal permits fees required for the rebuilding of privately-owned piers, and docks destroyed by the storm. Structures must be rebuilt at the same location and to the same

The young Academy

dimensions. The same waiver will also be requested for counties that administer fishing piers that were damaged or destroyed.

Mauro said his agency will lend its expertise and technical assistance to local governments to aid in rebuilding and revegetating damaged sand dunes along

Mauro will also request a grace period on dredging fees associated with maintenance necessary to unclog migratory channels for fish or to reopen clogged channels associated with the oil and gas drilling industry and other commercial endeavors.

Carlton Bell, Deputy Commissioner for Land Management, said that the hurricane's 115-mile-anhour winds altered numerous coastal boundary lines, creating unintentional violations of the Open Beaches Act. Bell said his staff will work with the Attorney General's Office resolve brought about by the realignment of these property lines.'

Letter. To The Editor

To the Editor:

The youth Employment Service of Muleshoe will close its doors for the winter months on August 26. YES will reopen next May, again providing job opportunities for the young people of our community. As I look back over our

first year, I feel the need to express a well-deserved "Thanks" to the many people who helped make YES a successful reality. Before doing that, however, let me share with you and your readers some of the things accomplished by YES in its first year. Through YES, approximately 60 youth aged 13-17 were placed in some 175 jobs in and around Muleshoe (This does not include those youth who were hired for permanent employment as a result of their association with YES). About \$3000.00 in revenue was generated from approximately 1000 manhours of work completed. Admittedly, there were some problems and some mistakes made. On rare occasions, a boy did not arrive at a worksite as instructed. Also rare was an employer

who was dissatisfied with

the work done. All in all

we had less than 5% dissatisfied customers (I'll bet Ma Bell can't say that). Muleshoe should be proud of these teen-agers. I know I am, and I thank each and every one of them that participated.

Secondly, I'd like to thank the YES Board of Directors: Judy Bruns. Frank Ellis III, Linda Guelker, Katherine Sanders, and especially Joan Lewis. who probably should be nominated for sainthood. These folks gave tirelessly of their time and knowledge to insure the success of YES.

Next, a special thanks to Shirley Farmer of the Journal, Gerald Reid of KMUL, and Maggan Rennels of Channel 6 for their and media support coverage.

Since YES is a volunteer program supported financially through donations, we owe much to civic organizations like the Lion's Club, Rotary Club, and the Jennyslippers. Individuals such as Dee Treadwell, who donated office space, and L.T. Johnson were vital to our being able

Undoubtedly, I have overlooked some people who

gave in some way to YES. For this I apologize, but you know who you are, and I thank you. For instance, everyone that called in to the office with a job to be done is greatly appreciated.

Finally, I'd like to thank the many volunteers listed below and any whom I have failed to list for their help. These ladies sat by the telephones, took work orders, placed kids in jobs, and completed followup

Tommie Bratcher, Janie Moseley, Rhonda Carpenter, Betty Barker, Lindy Schuster, Raynell Bamert, Marsha Watkins, Julie Cage, Sharon Montgomery, Violet Dean, Marsha Rasco, Jenne McVickers, Betty Bush, Joan Lewis, Hazel Gilbreath, Fern Gilbreath, Anita Allgood, Sharon Agee, Pauline Guinn, Pam Zwickey, Doris Wedel, Sylvia Vourazeries

In closing, let me remind you all that YES will be back next year, better than ever. We will attempt to prove once again that Muleshoe is a quality community with quality young people who deserve a chance to work. Keith Madole

Ellis Funeral Home Pre-Need Funeral Needs Price Is Frozen At Time Of Purchase & Guaranteed . 272-4574 Muleshoe

"In quietness and in confidence shall be your strength."

Similar

The biggest trouble with success these days is that the recipe is just about the same as that for a nervous breakdown.

Tolerance is no virtue in a majority unless it is also practiced by the minority.

No Conversation

The telephone operator answered an agitated summons from a pay phone.
"Oh, miss," came a tear-

ful feminine voice, "can I have my ten cents back? Albert won't speak to me." know will not be kept.

IT'S A FACT! No one in the Dinka tribe,

of Africa would question the ideal gift for a father. Each paternal family head eagerly awaits the day when he receives the one "perfect" present from his son - the skin of the first lion the young man kills.

American fathers of today might welcome a Father's Day gift that would help better their bowling scores. A bowling ball that's set a new world's record of three 300 games in a 12game set is the AMF Angle. A Stanford University computer helped program its optimum curvature. That's one way to make every father a winner.

Never induce a person to make a promise you know will not be kept.

Anna has been selected to judge the open sheep show during the 88th annual Panhandle-South Fair here Sept. 24-Oct. 1.

Fair general manager Steve L. Lewis said premiums totaling \$4,830 are being offered in the event, which will be headed by superintendent Kyle Smith and assistant superintendent Thomas G. Gaither.

The entry deadline has been pegged for Sept. 12 and non-returnable entry fees of \$3 per head will be charged, Lewis said.

Lewis said the base date for computing ages of entries will be September 1. Yearlings must have been born before Sept. 1, 1982; senior lambs between Sept. and Dec. 31, 1982; and junior lambs on or after January 1, 1983.

Flocks must be owned by the registered exhibitor, one yearling or ram lamb, two yearlings ewes and two ewe lambs. Only one flock is permitted per exhibitor and all individual animals in the flock must have been entered in one of the classes for the single animals.

Divisions of competition include Rambouillets, Dorsets, Suffolks, Hampshires and Southdowns. There will be 16 classes of competition and payoffs range from \$5 for eighth spot to \$20 for first.

Judging is scheduled to begin at 9 a.m. on Sept.

Lewis said that although stars have not yet been signed for opening and closing shows for the 1983 exposition, negotiations are continuing and they will be announced when contracts are finalized.

Other shows are set, with Reba McEntire and the Maines Brothers coheadlining shows at 4 p.m.

and 7 p.m. on Sept. 26. The remainder of the slate include Larry Gatlin and the Gatlin Brothers Band, Sept. 27; Ronnie Milsap, Sept. 28; Conway

Sept. 30. These shows are all set for 7 p.m. and 9 p.m. and will be one-hour shows with no opening acts and no intermission.

"Biddy" Hicks Services Held Saturday

Services "Biddy" Hicks, 76, were held at 4 p.m. Saturday, Aug. 27 in the First Baptist Church with the Rev. E.K. Shepard of Brownfield and the Rev. B.C. Stonecipher, Baptist Longview Church, officiating.

Burial was in County Memorial Park under the direction of Ellis Funeral Home. Hicks died at 12:30 p.m. Friday in West Plains Medical Center following a lengthy illness.

A native of Afton, Hicks was born Sept. 4, 1906, and moved to Muleshoe in 1954, from Afton. He married Martha Patterson on July 10, 1932. She died in 1981. Hicks was in agriculture and car sales business, and a member of the First Baptist Church since 1954. where he served as a Deacon. He was also a member of the Muleshoe Masonic Lodge.

Survivors include two sons, Tommy Hicks of

Graveside Services Held For Mrs. Rowton

Graveside services for Mozelle Rowton, 57, were conducted at 4 p.m. Friday, Aug. 26 at the Lazbuddie Cemetery with the Rev. Brock Sanders, Baptist minister, officiating. Burial was under the direction of Ellis Funeral Home.

Mrs. Rowton was pronounced dead at 8:45 a.m. Tuesday at her home by Parmer County J.P. Albert Smith.

A Knoxville, Tenn. native, Mrs. Rowton was born Sept. 22, 1925 and moved to the Muleshoe area three weeks ago from Levelland. She married David Rowton on June 24, 1944 in Mena, Ark. She was a housewife and a member of the Baptist Church.

Survivors include her husband, David; five sons, Edward of Springfield, Miss., Richard of Erie. Okla., Kenneth of Albuquerque, N.M., and David, Jr. and Johnny, both of Muleshoe; three daughters, Mary Ann Rowton of Erie, Okla. and Betty Ann Rowton and Brenda Kay Rowton, both of Memphis; two sisters, Mrs. Ruth Pruitt of Houston and Mrs. Mae Pleasant of Pennington Gap, Virginia; three brothers, Gene Davis, Walter Davis and Grant Davis, all of Dallas; and five grandchildren.

Grand Prairie and Jerry Hicks of Muleshoe; two daughters, Mrs. Rosemary Smith and Mrs. Coralynn Jarman, both of Lazbuddie; 11 grandchildren; and one great grandchild.

The family suggests memorials to the American Cancer Society.

will again be one of the featured stops at the 74th annual field day of the exit. Texas Agricultural Experiment Station (TAES) on

Tuesday, Sept. 13. Statistics for 1981 show that weeds were responsible for a loss in Texas of 406,000 bales of cotton alone, said Dr. John Abernathy, TAES associate professor and weed scientist. If cotton was 60 cents a pound, weeds cost Texas cotton farmers more than \$1.2 million that season, he

The weed research is one of four featured stops for the field day, which will be held this year at the Texas A&M University Agricultural Research and Extension Center here. The center is north of Lubbock International Airport on

Farm Road 1294, just east of 1-27 at the Shallowater

Motorized tours of the center and its research plots will begin at 1 p.m. and conclude at 5 p.m., Dr. Don Rummel, research entomologist at the station and field day chairman, said. A recently completed addition to the center will be dedicated in ceremonies beginning at 10 a.m.

"We will cover specific weed problems of this area, getting very specific on the herbicides, rates of application and the timing of application that look best in our research tests," Abernathy said.

One of the weeds which Abernathy said would receive particular attention during the field day dembe lakeonstrations will

functions.

New Planning Document To Aid Highway Future

An operational planning document has been developed to enable the State Department of Highways and Public Transportation (SDHPT) to focus on the mobility issues and problems of the future, Lubbock district engineer Ben Alley said here today.

"Faced as we are with the prospect of unprecedented growth during the next 20 years and the need to provide and maintain a transportation system to sustain such growth," he said, "the department has completed an operational planning document study and is using it to chart our course for the coming years."

The document identifies construction, rehabilitation. and maintenance programs and projects, the engineer said. It also addresses public transportation programs and operations support functions, as well as establishes priorities.

"The planning document is based on demonstrated and verifiable needs", Al-

PUBLIC NOTICE

CONTRACTORS' NOTICE TEXAS HIGHWAY CONSTRUCTION

Sealed proposals for constructing 5.443 miles of Reconst. Gr., Strs., Fb, 1 & 3 CST & SC From US 70 in Muleshoe to 0.3 Mi. South of Parmer Co. Line on Highway No. SH 214, covered by RS 11(5) in Bailey County, will be received at the State Department of Highways Public Transportation, Austin, until 9:00 a.m., September 14, 1983, and then publicly opened and read.

The State Department of Highways and Public Transportation, in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252) and the Regulations of the U.S. Department of Transportation (15 C.F.R., Part 8), issued pursuant to such Act, hereby notifies all bidders that it will affirmatively insure that the contract entered into pursuant to this advertisement will be awarded to the lowest responsible bidder without discrimination on grounds of race, color or national origin, and further that it will affirmatively insure that in any contract entered into pursuant to this advertisement, minority business enterprises will be afforded full opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color or national origin in consideration for an award. Plans and specifications including minimum rates as provided by Law are available for inspection at the office of Rhea E. Bradley, Resident Engineer, Littlefield, Texas, and at the State Department of Highways and Public Transportation, Austin, Texas. Bidding proposals are to be requested from the Construction Division, D.C. Greer State Highway Building, 11th and Brazos Streets, Austin, Texas 78701. Plans are available through commercial printers in Austin, Texas, at the expense of the bidder ...

blackfoot, morningglory flower of the hour, spurred anoda, lanceleaf sage, and prairie sunflower.

Also to be discussed are use of several new herbicides which offer new options for some weed and certain crops, he noted.

The weed scientist said he also will discuss the economics of weed control. Proper and timely use of herbicides and cultural practices can reduce the number of trips across the field and reduce costs of hand labor, chemicals and fuel, as well as improve the yield potential.

In addition to the weed research, other featured stops on the tour will highlight development of new cotton varieties to improve fiber quality; the latest research on grapes, an increasingly important High Plains crop; and development of drought tolerant cotton to better utilize declining water supplies and reduce irrigation

requirements. Visitors also will be able to tour the Texas Agricultural Extension Service Soil Testing Laboratory and the Texas Forest Service greenhouse and facility at the station, as well as view a display of computers and agricultural programs for computers.

The field day is a cooperative presentation of TAES, the High Plains Research Foundation, the Texas Agricultural Extension Service, the U.S. Department of Agriculture-Agricultural Research Service, and the Texas Forest Service. It alternates annually between the facilities at Lubbock and at Halfway.

Judge-"Why did you

strike this dentist?" Accused--"He got on my nerves."

Troubles

The teacher was having her trials and finally wrote the mother:

"Your son is the brightest boy in my class, but he is also the most mischievous. What shall I do?"

The reluctant reply was: "Do as you please. I am having my own troubles with

By

Mrs. J.D.Bayless Dub Elliott of Morton a former resident of Enochs underwent surgery at Methodist Hospital in Lubbock Thursday, sorry to

hear he is ill. Mr. and Mrs. Morris Hampton of Pharr, Texas came Monday and spent the night with Mrs. Etta Layton.

Mrs. J.D. Bayless drove to Odessa Wednesday afternoon and spent till Friday morning with her daughter, Mr. and Mrs. Leland Finley and Linda. Others that came over to visit with them were a granddaughter, Mr. and Mrs. Kevin Jones and sons, Christopher and Aaron, a grandson Larry Finley and a niece, Mrs. Bill Cunningham and daughter, Angelea all of Odessa.

Loyd Pollard underwent surgery at Methodist hospital in Lubbock Tuesday he was dismissed Thursday he is improving nicely.

Maribel Zormora will be leaving Monday to attend college at Texas University at Austin, and John Snitker and Sheryl Waltrip will be going to college at South Plains College at Levelland. They will be missed very much at Church and in the community.

Future Water Well Drilling Due For Change

wrong fluid to use in drilling water wells on the High Plains. The Water District recently conducted an investigation to determine if the Ogallala Formation contains swelling clays which might be swelling during well development and inhibiting well yields. Many new wells drilled in the area have very poor yields even though they were drilled in areas where the aquifer was thick enough to support much higher yields. The District's study revealed the culprit may be the fresh water drilling process itself.

Drill-bit cutting samples were collected from mud pits of 102 wells drilled in an eight county area. Dr. Necip Guven with the Department of Geosciences at Texas Tech University was contracted to make a survey of the mineralogy of the samples by x-ray analysis. The x-rayed samples revealed the presence of clays which swell when disburbed. Centonites appeared to be the dominant clay mineral in all of the samples, making up as high as 80 percent of the clay fraction. This clay can, be very detrimental to fluid flow through porous media like the Ogallala Formation. One possible reason is that fresh water is easily absorbed into clay molecules weakened when they are disturbed by agitation.

Damage to the fresh water formation's pore spaces and their capicity to allow flow through the formation results when clay particles are torn apart and allowed to move back into the formation during the drilling process. As clays swell they lodge in place and cannot be removed by bailing or pumping. The pore space is blocked and water

move to the well. The formation is damaged and its potential well yield re-

This discovery suggested to the investigators that the presence of clays should influence the choice of well drilling fluids. The most damaging system would be fresh water. The best fluids for drilling would be oil, air, or foam. Where use of such fluids is not possible and fresh water must be used, precautions should be taken to inhibit the clays from swelling.

Depending on the percentage, distribution and types of clays, various fluid systems could be used for drilling, such as salt water, potassium chloride water, combinations of sodium chloride and potassium chloride, various polymers and polymer combinations and salts. Salt in the water, however, increases the strength of the electrical bond of the clay molecules which helps minimize their water absorbtion.

Efforts should be made to keep drilling solids from returning to the borehole. As a minimum, a gate should be constructed in the pit to help keep solids away from the suction pump. If additives are introduced, an in-line mixer on the discharge side of the suction pump should be

To confirm these findings and test the salt concept, a test well was drilled using brine as the drilling fluid to stabilize the clays. A drilling site was selected on a farm south of Wolfforth in Lubbock County. The saturated portion of the Oga-Ilala in that area has a very high clay content. In addition, a well was drilled on the site in 1980 using normal procedures and material making it a point for comparison.

The 1980 well was drilled by direct rotary method using fresh water. The base of the Ogallala was encountered at 130 feet below land surface and the static water level was at 90 feet. Twenty feet of Johnson Irrigator continuous wirewrap screen had been placed in the lower part of the saturated section with a few feet of torch-slotted casing above and below the screen. The well was gravel packed using Brady-fine emplaced by pouring while clean water was being circulated.

The well was then developed by combination of surge swabbing, bailing, and high velocity jetting over a period of about 10 hours. After the water cleared, a submergible pump was installed and production tests were conducted.

Specific capacity of the well was 0.6 gallons per minute per foot (gpm/ft). After two hours of continuous pumping, the rate of production began to decline and it was decided to attempt a chemical stimulation. Various surfactants were injected using a garden hose for implacement. These treatments were followed by additional pump tests over a period of several weeks with no improvement in well yield measured. For sustained pumpage, the well yielded 12 gallons per minute which indicated a specific

capacity of 0.3 gpm/ft. In May of 1982, the test well was sited just 90 feet from the 1980 well. A "U" shaped pit with a gate between the two legs was dug and lined with six millimeter Poly Vinyl Chloride plastic sheeting. The pit was filled with weighted

brine water (total dissolved solids equaled 323,000 ppm and sodium chloride equaled 303,000 ppm;.). Drilling was direct circulation rotary and the base of the Ogallala was encountered at 134 feet below land surface with static water level at 92 feet. During the drilling, dry granulated salt was poured into the drill pit directly above the suction hose intake. Sale - a total of 400 pounds - was added while the hole was drilled from 90 feet to 136

Casing and 40 feet of Johnson Irrigator screen were then set and the annulus filled with Brady-fine gravel. The well was then very lightly bailed for a few minutes to be certain it was making water. No further development was attempted at that time.

A submergible pump was then set and production tests were started. A sparling four-inch meter was used to measure well yield. Water levels and pumping levels were measured with an E-line gauge in the production well and a graduated steel tape was used for measurements in the old well located 90 feet from the new well. A squeeze was used on the discharge of the pump to limit production of water from the new well during the first two hours of the test. The valve was then fully opened and the well was produced at maximum capacity of the pump for the remainder of the test.

The test lasted only 1300 minutes because of inadequate disposal for the pumped water. Later during the growning season the well sustained longterm pumpage at a rate of about 60 gpm. This equated to a specific capacity of 1.4 gpm/ft as compared to the 1980 well's specific capacity of 0.3 gpm/ft, an increase

of more than 400 percent. Free salt was added to the drilling fluid after reaching the water table. reasoning it would help plug the pore spaces of any zone accepting fluid. The fluid level in the pit had not declined perceptibly when the drilling was finished. And the character of the return fluid was visibly less turbid than fluids observed in conventional drilling. Cutting accumulations within the pit were almost totally confined to the entrance. On larger or deeper wells, it may be necessary to slightly enlarge or deepen the entrance portion of

to the 100 percent efficiency level.

of cotton is about as important as a good yield, and this is where harvestaid compounds come into the picture. "Cotton grades are determined by color, trash content and preparation, and harvest-aid compounds

can help producers get a better grade and consequently a better price," says Dr. Bob Metzer, a cotton specialist with the Texas Agricultural Extension Service, Texas A&M University System.

As cotton begins to mature, farmers who plan to stripper harvest should

H&R BLOCK is offering

a Basic Income Tax Course starting Setpember 8, 1983. There will be a choice of morning or evening classes held at the H&R Block office at 224 W. 2nd, Muleshoe. The twelve week course is taught by experienced H&R Block personnel and certificates are awarded to all graduates.

The decision to not attempt any type of development activities may require additional thought. It was reasoned that the natural condition of the geologic formation and hydraulic characteristic was equal to 100 percent. The objective of this project was to drill a well without inflicting any damage. As a consequence, if the objective was successful, there would be no need to attempt development back up

The efficiency of the new well is difficult to determine without a series of observation wells close en-

pumpage during a reasonable period of time. However, the efficiency may be estimated theoretically. The theoretical specific capacity of the well was 2.4 gpm/ft. The new well did not perform at this level. It has a specific capacity of 1.4 gpm/ft. However, the theoretical approach assumes homogeneous conditions which are obviously not true at this location.

Brine used as a drilling fluid stabilized the swelling clays which undoubtedly reduced damage to the formation and resulted in a more productive well. But there are advantages and disadvantages. Brine water

is generally available throughout the High Plains or it can be made. Brine water is very corrosive. Drilling equipment would need to be flushed or washed down after use. The pit must be lined and the salt water properly disposed of after the drilling is completed. This includes the initial production from a freshwater well drilled with brine.

I future tests prove successful, contractors could obtain lined storage tanks and reuse the brine water as a drilling fluid. As an alternative, a portable tank with a solids control system could be easily adapted to satisfy the problems of handling brine water.

The average youngster can tell his, or her, parents, how life should be lived, and then some.

Program To **Boost Cotton Grades** Harvest-Aid

Producing a good grade consider a harvest-aid program to achieve the highest grade possible, notes Metzer. He says that ginning costs can be reduced and grades improved by first dropping the leaves with a defoliant and then applying

> ate or paraguat. "In such a program, a key point is to avoid treating the crop too early," emphasizes the specialist. "Apply a desiccant to a mature crop that is at least 75 to 80 percent open. Use a defoliant when at least 65 percent of the bolls are open.'

H & R Block Tax Course Begins Soon

While thousands of opportunities are available, graduates are under no obligation to accept employment with 'H&R Block. Courses are licensed by the Texas Education Agency.

Registration forms and brochures may be obtained H&R by contacting the Block office at 224 W. 2nd, Ph. 272-3332.

Harvest-aids are difficult to use on a poorly fruited crop that has not cut out (stopped growing), says Metzer. If regrowth is a problem, he recommends using a material such as DROPP at .2 pounds per acre. Adding one-half pound of methyl parathion as a tank mix will increase

migrating boll weevils. The specialist advises farmers to follow this treatment with arsenic acid and then to wait until the crop dries sufficiently before harvesting. "Farmers might

the activity of DROPP and

will also help control late-

want to consider a relatively new harvest-aid compound to open cotton bollsethrel--which is marketed under the trade name PREP," says Metzer. He advises applying this compound when bolls are 50 to 60 percent open and following with a fefoliant after five days or more.

"Harvest-aid compounds can play a big role in the quality of cotton farmers take to the gin. However, the condition of the crop at time of application as well as the weather are key factors in achieving good results," says Metzer.
