

NEW HOSPITAL IS COMPLETED

Medical Arts Building a Model in Every Detail

LARGE ROOMS FOR PATIENTS IN HOSPITAL

All patients' rooms of the new Medical Arts Hospital, which will have its formal opening Friday and Saturday of this week, are equipped with the very best of furnishings and are finished with restful color effects. Simmons beds and furniture are used in each room. The beds, of two types, are of steel and are on ball bearing rubber tired roller casters, which enables the nurse or attendant to move the bed with ease and without the slightest sound. The beds are equipped with Simmons coil mattresses, which afford the very elite in restfulness and comfort.

One type of bed used is the crank type, and by the use of cranks at the head of the bed it may be adjusted to almost any position. The attendant can easily raise the end of the mattress to allow the patient to repose in a sitting position, or in any desired angle. By the use of another crank the bed may be elevated at the knee, which affords much rest to a patient who is otherwise unable to bend the legs at the knee. Another type of bed in use is constructed to allow elevating one end of the mattress to any desired angle, this being done by lifting the mattress and spring to the position suitable to the patient.

Other Furnishings
In addition to the bed there is an all-steel dresser with drawers and two all-steel chairs, one a rocker and another a straight chair. Still another important article of furniture and one for which no expense has been spared, is the adjustable bed table. This table is of a cabinet type, containing a space for a waste receptacle and a drawer for any personal trinkets of the patient. The adjustable table can be raised to any desired height and can be used for a writing table by the patients or for a dining table. It can be lowered and dropped to the side of the building, as in the case of the bed table. This article of furniture is also made of steel.

Attractive light fixtures swing from the ceiling, the windows have appropriate shades and curtains and on the floor by the side of each bed is a beautiful rug. The entire room, as is the rest of the building, is finished in cafe-au-lait color design. The doors of each room are of birch and the transoms are of wood, which assures strict privacy to the occupant of the room.

Walnut Finish
The furniture of most rooms is finished in walnut, while others are finished in a light green. Many of the patients rooms are adjacent to beautiful tile finished bath rooms. Within easy reach of each patient is the signal switch or button, to be used when attention is desired.

NURSES HAVE ATTRACTIVE LIVING ROOMS

Excellent living quarters have been provided for the nursing staff of the new Medical Arts Hospital. A private dining room, as well as kitchen, private baths and bed rooms are afforded the nurses. The quarters are located on the third floor at the south and southeast end of the building overlooking East Anderson Street.

Two rooms have been set aside for nurses and these are equipped with the very best of furniture, including beds, vanity dressers, chests of drawers, attractive lighting fixtures, window curtains and shades as well as appropriate floor coverings. The two rooms have a connecting bath, the walls and floors of which are of tile. Running hot and cold water may be had at all times. The floors in these rooms, as throughout the building, are of oak. Suitable linen and clothes closets are also available.

Dining Room
The spacious dining room, located adjacent the nurses' living quarters and at the end of the hallway has double French doors and is furnished with a very attractive and expensive dining room suite. Nurses can see all signal lights from the dining room. Adjoining the dining room is a large pantry which is also near the door into the kitchen.

Adjacent the dining room is located a kitchen that would be a source of joy to any housekeeper. The kitchen is spacious and has all of the most modern built-in features and ample cabinet space. It is well lighted, having double windows on the west and south sides, as well as a large flood light in the ceiling.

In addition to the built-in features the kitchen is equipped with one of the largest electric refrigerators built by the General Electric Company. The refrigerator works automatically and is in keeping with other features of the hospital, in that its operation is practically noiseless. A large gas range, over which there is a large canopy to carry all fumes out of the building, occupies one corner of the room. All food served in the hospital will be prepared in this kitchen by a skilled and competent chef. Patients trays will be prepared here and taken by nurses and helpers to the patient's rooms.

An international civil aviation congress is to be held in Washington, D. C., next December to commemorate the twenty-fifth anniversary of the first flight of the Wright brothers at ityhawk, N. C. Aeronautical engineers and experts in England, France, Germany, Italy and other countries are to be invited to the congress.

Patient's Room equipped in Mahogany Furniture. All Patients' Rooms are large, well lighted and well ventilated, and equipped with the most modern beds and other furnishings.

One corner in a Doctor's private office, showing some of the special equipment.

WILL HOUSE OFFICES FOR PHYSICIANS WITH MODERN HOSPITAL ROOM EQUIPMENT

The Medical Arts Hospital in Brownwood is a magnificent structure, with building and equipment representing an investment of \$125,000; but neither the size of the building nor the amount of the investment, in themselves, give an adequate idea of what has been added to Brownwood in the construction of this plant.

The public is invited to attend Open House of the new institution Friday and Saturday, March 9 and 10, from 9 a. m. to 10 p. m. on both days. It will give them the opportunity to inspect a hospital as complete and perfect as could be found anywhere in the state. If any surpass it, it is in the matter of size, and not in the class of building and the modern features of arrangement and equipment. And the Medical Arts Hospital here is so constructed that it may be enlarged at any time occasion demands, either by the building of a wing or the addition of two more stories to the present building.

First of this week the occupants began their moving into the new building, while workmen at the same time were busy finishing the details of their work. The attractiveness of the building and the finished workmanship in its construction, the elaborate furnishings, reception rooms and offices, and the abundance of modern apparatus were soon apparent.

Opening Tomorrow
The finishing touches have been put on. The hospital is complete in both construction and equipment, and all visitors will find a welcome there tomorrow morning. During the two days of open house it is expected that not hundreds, but thousands, of the citizens of Brownwood as well as large numbers from out of the city, will pay a visit to the new hospital and inspect it from lower floor to roof, and in every department.

The Medical Arts Hospital is ideally located at the corner of West Anderson and Booker streets, on a lot 1100 by 110 feet. The new hospital is the culmination of the efforts of several physicians of the city who joined together for the building of an institution of this kind. Local doctors had been considering such a proposition for some time, and last year Dr. L. P. Allison resigned his position as head of the Over-all Memorial Hospital in Coleman and returned to Brownwood, and soon succeeded in interesting them still more in the project. The new hospital is the result.

The Corporation
Eight physicians and two other stockholders compose the personnel of the corporation building and controlling the hospital. Dr. Ben M. Shelton is president and Dr. W. H. Paige is secretary. The board of directors is composed of the entire membership of the corporation, these being, in addition to the officers named, as follows: Dr. W. B. Anderson, Dr. L. P. Allison, Dr. Homer B. Allen, Dr. J. M. Horn, Dr. O. N. Mayo, Dr. J. N. Arvin, dentist, and Douglas Cousper and A. H. Bell. Each holds an equal amount of stock.

All the doctors interested are in partnership in the hospital and the ownership of the building, but this carries with it nothing in the nature of a partnership as to the practice of them all. The practice of each physician or each firm will continue to be an individual matter just as it has been heretofore.

The lot for the hospital was purchased last summer and the company formed and a charter obtained in September. After that plans progressed rapidly. Plans were soon adopted and actual construction work was gotten under way without undue delay. J. H. Davies & Co. of Fort Worth were the architects and C. D. Horton & Co. of that city were the building contractors.

Building Committee
The building committee was composed of Drs. Allison, Horn and Shelton. Dr. Allison as chairman of the committee gave lots of time and attention to structural details. The committee made its own floor plans and the architect worked the details and general construction of the building in accordance with these plans. This committee also did all the purchasing for the building.

The cost of the building was \$75,000. Hospital equipment amounts to above \$14,000, and the equipment installed by individual physicians or firms brings the total to \$125,000 or more.

The building is three stories of beautiful light-colored brick and semi-fireproof, with metal lath and plaster walls. The sound proof floors are features worthy of especial mention. A large reception room and the offices of the physicians and surgeons are on the first floor of the building. Drs. Allen, Horn, Mayo and Paige occupy the entire west wing, consisting of a main waiting room extending entirely through the building and the doctors' offices opening into the waiting room and the corridors. In their suits are the chemical and microscopic laboratory and another laboratory containing the physio-therapy apparatus.

Of the main west corridor is the X-ray suite of rooms and the cystoscopic rooms. The X-ray room is finished in barium plaster and has lead-lined doors, this being for the purpose of confining the rays to that room.

In the east wing are the offices of Dr. Allison, Dr. Arvin and Drs. Anderson & Shelton. There is a suite of offices and the superintendent's office on the second floor. The patients' rooms are all on the second and third floors.

COMPLETE SIGNAL SYSTEM CALLS NURSES TO PATIENTS

Few hospitals in Texas are equipped with as elaborate signal systems as the new Medical Arts Hospital which will have its formal opening Friday and Saturday of this week. The "Chicago Nurses' Signal System," one of the most satisfactory signal systems yet found, has been installed throughout the new building. This system has proven more satisfactory to patients and nurses alike than other systems yet devised.

Under the pillow or at the head of each bed, and within easy reach of the patient is the signal cord and button to be used by the patient when a nurse or attendant is wanted. The nurse or attendant is wanted at the other end of the line and in the halls of the building is found an elaborate and complete system of signals, annunciators, etc., which unfailingly direct the nurse to the patient calling for attention. When a patient sends his or her signal for a nurse, five separate and distinct signals are given to the nurse, three of which are visible and two are auditory. At the end of each hall on the first and second floors, the floors used for patients' rooms, is found the annunciator. When the patient gives the signal the number of that room is shown in red by the annunciator and at the same time a small buzzer calls attention to the signal that has been given. Simultaneously a red light is flashed over the door of the room from which the signal was flashed, thus giving two visible and one auditory signals. In addition to this another light flashes over the nurses desk along the front or side.

Grounds Around Hospital Will Be Beautified Later

Present plans of the officials of the new Medical Arts Hospital do not call for an extensive beautification of the grounds surrounding the hospital building. Plans were first made to spend about \$1,000 in making the grounds surrounding the new building one of the beauty spots of the city but this improvement has been delayed indefinitely. The grounds in front of and at the side of the new building, however, will be sodded with Bermuda grass and some flowers will be planted in front and at the side. No trees will be placed along the sidewalk, either at present or later. It is desired to have an unobstructed entrance to the building at any light flashes over the nurses desk along the front or side.

Distinguished Physicians in New Professional Enterprise

Eight local physicians and surgeons comprise the staff of the new Medical Arts Hospital which will have its formal opening Friday and Saturday of this week. The new institution that is almost ready to swing its doors open to the public is the culmination of years of planning and dreaming by the eight men who have pooled their resources to make such an institution possible. They have spent months and even years in careful study of every detail of an ideal hospital and the new Brownwood institution that is now inviting the public to come and see what has been done is the product of the tireless efforts of these eight men. Not only is the new institution a credit to the men who have made it possible but it is distinctly a credit to the city of Brownwood—a city that claims the elite in any progressive project. These eight Brownwood men are opening to the public one of the most modern institutions of its kind in Central-West Texas and they are inviting the citizens of Brownwood and surrounding territory to rejoice with them in the completion of a worthy as well as needed, project. The eight physicians are aided by two local investors who complete the personnel of the corporation.

Stock Ownership
Each of the eight physicians holds an equal amount of stock in the new organization and has equal rights in the operation of the new institution. But, as in any organization officers have been elected and various committees have been appointed with duly delegated authority to act. From the very first, harmony has prevailed among the

official staff and as a result the thousand and one details of the construction and other problems that have been met with, have been handled in a most satisfactory way to all parties concerned.

Shelton President
Dr. Ben M. Shelton was elected president of the new organization soon after the building project was launched and he has served very efficiently in that capacity since. Dr. Shelton needs no introduction to the citizens of Brownwood as he has spent a greater part of his life in this city. Before he acquired his degree in medicine Dr. Shelton was a student of Howard Payne College and took his Bachelor of Arts degree from the local college. Dr. Shelton took his M. D. from the medical department of Baylor University in 1918. He did one year of extern work in Baylor Hospital, this being done during his senior year at the university. Dr. Shelton then spent one year as an interne in the Cincinnati General Hospital. Dr. Shelton then came back to Texas and opened an office in Ranger where he did general practice for two years, after which he did special work in New York and at Mayo Brothers Clinic at Rochester, Minnesota, taking course in the treatment of eye, ear, nose and throat diseases.

Dr. Shelton then removed his office from Ranger and came to Brownwood to be associated with Dr. W. B. Anderson, with whom he served as an interne in the George Washington University Hospital and

CONTRACTOR

C. D. HORTON, of C. D. Horton Construction Company, general contractor on new Medical Arts Hospital.

AMPLE FIRE ESCAPE FACILITIES PROVIDED IN HOSPITAL BUILDING

In addition to being a semi-fireproof structure of steel brick and hollow tile, the new Medical Arts Hospital is equipped with a large steel, stair-step type fire escape which reaches from the third floor to the ground. The fire escape at the hospital was built by the North Texas Iron and Steel Company of Fort Worth.

Occupants of the building are able to reach the fire escape through two outlets on each floor of the building, the fire escape having a ten or twelve foot run-way on each floor and directly under two non-connecting windows, one window being in a hallway of each floor and the others being from a patient's room on each floor.

In addition to this assured safety to all occupants of the building, the elevator shaft is absolutely fireproof and could be used as long as occupants could reach the entrance to the shaft. Stairways also run from the first to the third floors and would offer another avenue of escape should it become necessary.

There are three doorways, two of them having double doors, of the first floor and these three widely separated exits would assure all occupants of the building a safe outlet in case of fire.

Advertising by airplanes is now accomplished at night. The planes do skywriting in the same fashion as at present, but with a special luminous smoke. Another plan is the transformation of airplanes into flying electrical signs 700 to 800 feet long and 90 to 100 feet high, through the attachment to the gas envelop of frames consisting of electric bulbs.

ELEVATOR IS AUTOMATIC IN OPERATION

One of the outstanding features of the modern equipment of the new Medical Arts Hospital is the Otis automatic elevator, which is one of the newest and most efficient type of elevator now in use. Its operation is very simple as it is so constructed as to remove all danger to occupants, regardless of who is operating it.

The elevator car has ample room for a wheel stretcher and several attendants. Fifteen or twenty persons can ride in the car at one time. The car is operated in a shaft constructed of steel, hollow tile and brick, therefore being absolutely fire proof. The large electric motors and other machinery necessary to its operation are located on the roof of the building in a house built exclusively for that purpose.

Simple Operation
As stated, the elevator automatically and the process is very interesting. If the elevator car is on the first floor a passenger needs only to open the sliding door to the elevator shaft and a similar door to the elevator car. When all passengers are in the car, both these doors are closed and if it is desired to take the car to the second floor one needs only to push a button with the numeral "two" on it. The car automatically stops at the shaft entrance on the second floor. The elevator will not move if either the car or shaft door is left open or partly open, thus assuring absolute safety.

Had the passenger or passengers desired to go to the third floor the button with that numeral would have been pushed. On leaving the elevator the passenger or passengers close both the shaft and car doors. If the car is wanted on the third floor all that is necessary is to push a button near the shaft entrance and the car automatically comes to the third floor, provided of course that no one is using it and that the shaft and car doors are closed. The shaft doors cannot be opened unless the elevator car is waiting at that entrance.

In transit the car may be stopped by pushing a stop button and after stopping, the button to the desired floor may be punched.

The many special features described more fully in separate articles in this issue of the

SPACIOUS ROOMS EQUIPPED WITH ALL MODERN APPLIANCES

One of the outstanding features of the new Medical Arts Hospital is the large number of spacious, well arranged, well lighted and well ventilated patients rooms that are built for a purpose and that purpose being for the welfare of patients and for the convenience of nurses and physicians.

All patients' rooms are located on the second and third floors, away from the noise and bustle that will of necessity be more or less prevalent on the first floor of the building, where are located the offices of the doctors. There are 23 patients' rooms, 15 on the second floor and 8 on the third floor. This is exclusive of the rooms set apart for the use of resident nurses.

All patients' rooms are outside rooms and have ample window space to allow an abundance of fresh air and sunlight to enter as the demand requires. All windows may be lowered from the top or raised from the bottom. Every room in the building opens directly into a hallway that reaches throughout the length of the building on each floor. Due to the L-shape of the building it has been

possible to place the nurses' desks on each floor, also the nurses signal systems, in a centrally located place, convenient to all patients' rooms.

All Rooms Large
All rooms of the hospital range in size from 10 by 14 feet to 16 by 14, one dimension of each room being 14 feet, the width varying in some. Practically every room in the building is large enough for at least two beds and some of the larger rooms would well accommodate three beds, should the demand ever be made.

Every room in the building is finished in a beautiful cafe-au-lait color, a very restful color scheme and one that is sure to please all patients. The doors to each room, are made of birch and due to the construction of the walls, floor and ceiling, a patient is assured quiet and rest. Over each door is a wooden transom, which works on the same order as other transoms, the advantage being that the wooden type assures even more privacy than would otherwise be possible. A partially opened transparent transom often reflects the contents of

the room and a passer by would be enabled to see anything that might be taking place in the room.

Beautiful Bath Rooms
Many of the rooms open directly into beautiful white tile and white enamel bath rooms and all are near bath rooms opening into the hall. The complete arrangement of all rooms, the spaciousness of each, the furnishings, the color scheme, the many other facilities available make of them the ideal for any patient, whatever the ailment.

Another feature of the room is the beautiful light fixture swinging from the ceiling. This may be turned off and on at the desire of the patient. In each room there are numerous base plugs for the attaching of electric appliances that might be needed. Private telephones are being installed in several rooms. Each room is furnished with a small gas stove, which is to be used only when the weather conditions are too severe as to require additional heat from that provided by the heating system that has been installed.

SNAKE "OIL"
"Quick, get a doctor. My friend's eyes are blind."
"What's the trouble?"
"I asked him if he could see a snake. Said he couldn't and the room's full of 'em.—America's Humson often reflects the contents of

HERE'S MORE ABOUT OFFICES STARTS ON PAGE ONE

The general plan of the hospital for the treatment and care of the patient and the complete laboratories of the most modern and scientific apparatus now known to medicine and surgery naturally attract the attention first, but the numerous specific features soon present themselves on further inspection.

Major Tien Lai Huang, of the aviation force of the Chinese Nationalist army, has asked Colonel Charles A. Lindbergh to join him in piloting a tri-motored plane from San Francisco to Shanghai next summer. The trip would be made by way of Honolulu and Midway Island.

Paris milliners are now making hats so close fitting that they look like the wearers' hair—feathers of all colors are used for them.

Allspice is not a combination of spices, but is the prepared berry of the pimento tree, supposed to contain the flavor of several spices.

The oldest calendar known to man came from Egypt.

LABORATORIES ARE EQUIPPED SCIENTIFICALLY

The X-ray department of the new Medical Arts Hospital is located in large commodious rooms on the first floor of the building and is convenient to all doctor's offices as well as to the hospital. The department within itself is a complete unit and a credit to the new hospital that is being opened this week.

The department is equipped with the most modern X-ray machine available, according to Dr. O. N. Mayo, who will have charge of this department of the new institution. He states that the new X-ray machines consist of Acme equipment \$25,000 K. V. transformer with all late accessories, such as a Bucky-Diaphragm, upright and horizontal fluoroscopes, plate changer, stereoscope, etc. X-ray pictures or films can be made in any position or the patient may be directly viewed through and through, by means of the Fluoroscope and the organs of the body, such as the heart, lungs, stomach and intestines can be seen

in their living and physiological movements.

Special Rooms
The rooms of the X-ray department have been built especially for this purpose as the walls and ceiling have been lined with barium plaster and all the doors are lead lined. This is a necessary precaution to protect other people in the building from the rays of the X-ray which readily penetrates wood stone or brick but will not go through lead or barium.

The X-ray is one of the most important aids, in diagnosis of many diseases and is used successfully in the treatment of many diseases, states Dr. Mayo.

Cystoscopic Department
Adjacent the X-ray room is located the Cystoscopic room, which is a part of the X-ray suite. It has the most modern equipment for the diagnosis and treatment of kidney and bladder diseases under direct visual control. The word cystoscope is a combination of the words cysto, meaning bladder, and scope, meaning to see. Every convenience has been arranged for efficiency in this work and for the comfort of the patient, states Dr. W. H. Paige, who is the director of this department.

Laboratory Rooms
Located on the first floor also, but separated by a hallway from the X-ray rooms, is located the Microscopical and Chemical laboratory. This unit of the new hospital is patterned after the most modern laboratories in the large

city hospitals and is a model of compactness with every convenience at the command of the laboratory diagnostician in his examination and culture of bacteria and in the many other tests that are made in a first class laboratory. This department is under the director of Drs. Paige and Allen.

The Physio-Therapy department contains the standard high frequency machine for the application of diathermia, auto-condensation, and various other electric modalities, the Apline sun lamp and the Kromayer quartz lamp for the application of the ultra violet ray, also the Zoalite for the application of the infra-red rays, all of which will be accessible to the office and hospital patient.

HERE'S MORE ABOUT PHYSICIANS STARTS ON PAGE ONE

was a resident physician in Starmont Sanatorium at Washington Grove, Maryland for one year. He did special work in diagnosis at Johns Hopkins University at Baltimore, Maryland and spent three months in Los Angeles where he did special work in urology.

Dr. Paige came to Brownwood in 1916 and since has done general practice and urology. He has been associated with Dr. Homer B. Allen since 1921 and the two have been

associated with Dr. J. M. Horn and Dr. O. N. Mayo during the last three years. In addition to serving as secretary-treasurer of the new hospital, Dr. Paige will do general practice and urology but will not do surgery. Dr. Paige will have charge of the laboratory in the new institution. His office is located in the suite of offices in the west wing of the first floor of the new building.

Veteran Specialist

A fourth and perhaps the oldest member of the official staff of the new hospital in point of service as well as in years is Dr. W. B. Anderson, who has been practicing in Brownwood for the past 33 years. Dr. W. B. Anderson is a graduate of Vanderbilt University, taking his M. D. degree there in 1888. Four years later Tulane University of New Orleans conferred upon him the same degree. Following his graduation from the medical departments of these two schools Dr. Anderson took special work in the treatment of eye, ear, nose and throat disease, taking three regu-

lar courses at the University of Chicago and four at New York University. Since that time he has many special courses in numerous other universities.

Dr. Anderson came to Brownwood in 1895 and for eight years did a general practice. Since 1903 he has confined his practice to diseases of the eye, ear, nose and throat. For the past five years he has been associated with Dr. Ben M. Shelton and will continue to be an associate with Dr. Shelton in the new hospital. He will continue his regular practice at his new location.

Dr. L. P. Allison

Dr. L. P. Allison, M. D., F. A. C. S., second only to Dr. Anderson in point of service experience, is another member of the new Medical Arts Hospital staff. Dr. Allison has acquired the reputation of being one of the best surgeons in this section of the state. He is widely known in this section and needs little introduction to the citizens of Brownwood. Dr. Allison took his M. D. degree at St. Louis University in 1893 and attended Harvard Univer-

sity in 1911, taking special work in surgery. He has attended several surgical clinics in Europe as well as various schools of surgery in the United States. He was granted his fellowship in the American College of Surgery at Philadelphia in 1923, an honor that few surgeons in the state have been granted.

Dr. Allison built the Brownwood Infirmary (now Brownwood Hospital) in 1912 and operated it until 1920 when it was sold to the

late Dr. T. J. Pier. Dr. Allison later built the Overall Memorial Hospital in Coleman and served as chief surgeon and head of the institution for four years, retiring about one year ago. Dr. Allison has, to a certain extent, taken the lead in the promotion of the new institution. Due to his experience in building hospitals Dr. Allison was made chairman of the building committee of the new hospital and his tireless efforts have given to

Brownwood the elite in hospital construction. He has spent days and weeks at the new hospital and has kept a close oversight of the construction from the very first. He has also served on the employment committee as well as on the purchasing committee with Drs. Ben M. Shelton and Homer B. Allen.

Dr. Allison will continue his work

HERE'S MORE ABOUT PHYSICIANS STARTS ON PAGE ONE

In the new hospital to surgery and consultation. The operating suite at the new hospital can be attributed to a great extent to the careful planning of Dr. Allison. His rich experience as a surgeon has enabled him to select the elite in operation room equipment. Dr. Allison's office is located next to Dr. Anderson and Shelton's suite on the first floor.

Dr. J. M. Horn
Dr. J. M. Horn, another veteran surgeon and physician, is also a member of Medical Arts Hospital staff. Dr. Horn is likewise widely known in this part of Texas, having been in Brownwood for 18 years, coming from Temple to this city. Dr. Horn graduated from the University of Louisville, Ky., in 1903 and took special diplomas from that institution in diseases of children and diseases of women. In 1913 Dr. Horn did post-graduate work at the University of Chicago in surgery, gynecology and general medicine. In 1914 Dr. Horn attended clinics of the late John B. Murphy and the late A. J. Ochsmeyer in Chicago, also clinics in Philadelphia, at John Hopkins and at Mayo Brothers. Dr. Horn will continue to be associated with Drs. O. N. Mayo, Homer B. Allen and W. H. Paige in the new hospital. His office will be in the same suite with the other three physicians in the west wing of the first floor of the new building. Dr. Horn will continue to do surgical work and will specialize in the treatment of the diseases of children and women.

Dr. H. B. Allen
Dr. Homer B. Allen, perhaps one of the youngest members of the new organization in years of experience, has taken a leading part in the promotion and building of the new Medical Arts Hospital. Dr. Allen has served very efficiently as a member of the building committee with Dr. Allison and has together with Dr. Allison made most of the purchases for the new institution. He has likewise served on the employment committee. Dr. Allen has devoted much of his time to the building of the new hospital.

Dr. Allen graduated from the medical department of the University of Texas at Galveston in 1918. He served one year as an interne in Scott and White Sanitarium at Temple and in the Santa Fe Hospital of that city. Lated Dr. Allen did three months post graduate work at Poly-Clinic of New Orleans, taking special courses in surgery. Dr. Allen came to Brownwood in 1921 and has been associated with Dr. Paige ever since. About three years ago Drs. Paige and Allen formed partnership with Drs. Horn and Mayo. Dr. Allen's office will be located in the same suite with these three physicians in the west wing of the first floor of the new hospital.

J. N. Arvin, D. D. S., the eighth

member of the staff of the new Medical Arts Hospital, was also the last to enter the organization. Dr. Arvin is widely known in Brownwood and surrounding territory as he has been practicing in this city since 1909. Dr. Arvin graduated from the Lattimore College of Dental Surgery in 1905 and since has done much post graduate work. He has been associated with his brother, Dr. H. E. Arvin since 1917 and will continue this partnership.

Dr. Arvin will not move his office from the First National Bank building to the new hospital but will establish an emergency office in the new building. Present plans call

for emergency work in dental surgery. He will likely be called in for consultation as to dental work by other members of the Medical Arts Hospital staff. At a later date Dr. Arvin may move his main office to the new building.

The personnel of the Hospital Corporation also includes A. H. Bell and Douglas Coakson, two well known Brownwood business men who associated themselves with the staff of doctors as investors.

Winter thunderstorms occurred somewhere in the British Isles at the rate of one every 180 days during the six months from October 1, 1926 to March 31, 1927.

PREPAREDNESS

WIFE: I'll have to run away for a while, John. I've just got the stuff for a new dress, and—

JOHN: But, my dear, you shouldn't be thinking of a new dress while I'm ill.

WIFE: Oh, John, you dear, careful old silly! Why, it's a black dress; so it will be all right in any case.—Tit-Bits.

PROOF APLENTY

"Your uncle seems rather hard of hearing?"

"Hard of hearing! Why, once he conducted family prayer while kneeling on the cat."—Tit-Bits.

WELCOMES

And

CONGRATULATES

The

MEDICAL ARTS HOSPITAL

The people of Brownwood are glad to offer their congratulations to the builders of the

MEDICAL ARTS HOSPITAL

Our thanks are due to those who have erected and equipped it, for an institution that is an addition to the city and a service to humanity.

ALAMO MANUFACTURING COMPANY

The Service of Science---

Is Fully Exemplified in an Institution Like the New

Medical Arts Hospital

To those at the head of this New Hospital, those who have made this great contribution to Brownwood, we offer you our profound congratulations.

It is a source of much pleasure to us—May we say in offering our congratulations to you—know that the science of electricity can, and does, work with the science and skill of the physician and surgeon in ministering to the needs of humanity.

It is indeed gratifying to us to know that the best that electrical invention can devise has been brought to bear in the equipment of your modern and magnificent plant—that shadowless lights have been placed over your operating tables, that convenient electric bells may quickly summon aid to any patient, that the automatic elevator will promptly respond to the touch of the electric button, and that in numberless ways electricity will aid you in your work for mankind.

Texas Power & Light Company

We Join With All Brownwood In Our Congratulations to You.

Welcome

And

Congratulations

To The

Medical Arts Hospital

It is an institution that merits the praise of the entire heart of Texas section and bespeaks volumes for the courageous and far seeing men who have brought it into existence.

It is undoubtedly a mile stone in Brownwood's rapid progress.

Private room for patients, showing part of the room equipment. Every item of room equipment that can be made of steel is in that durable and fire-proof material.

essary for the hands to come in contact with the fixtures when preparing for an operation.

Operating Room
From the scrub room the surgeon enters directly into the main operating room, a large, spotlessly white and well lighted room, equipped with the very best fixtures possible to buy. The room is equipped with an expensive Ohio operating table, costing \$750.00. The table gives all the surgical positions and it is satisfied that nothing finer can be had than this complete table. The room also contains service tables, in white enamel with Monell metal tops, stools and other necessary equipment. Swinging from the ceiling of this room is a very expensive "No-Shadow" light which allows the surgeon to assume any position and yet have the same flow of light.

Sterilization Room
Adjoining the main operating room and between that and the minor operating room is found the elaborate sterilizing room, which within itself is a credit to the new hospital. The room is equipped with a large American Sterilizer which has two fifteen gallon hot water tanks, filter and still, for making distilled water. All surgical instruments are sterilized in the autoclave under pressure of dry steam. This room is also finished in tile and white enameled walls.

From the sterilizing room one enters next into the eye, ear, nose and

throat operating room. This unit is equipped with operating table, operating chair, service tables and spared in making the entire operating suite the very best to be had and it compares very favorably with the best in the large hospitals of the state.

Incinerator Burns Refuse of All Kinds

Along with other modern equipment and conveniences, the new Medical Arts Hospital is equipped with an incinerator for the burning of dressings and other refuse. A special shaft has been built in the west wall of the building, adjacent the kitchen, and with an intake in the room adjoining the kitchen. At the bottom of this shaft is located the Kenerator, a furnace fire which is furnished by natural gas.

The Kenerator, manufactured by the Kerner Incinerator Company, affords sufficient heat to readily consume any refuse that is thrown in it. As stated the intake to the incinerator shaft is located in a room on the third floor adjacent the kitchen, this being the only intake. At the bottom of the shaft

on the ground are doors through which the residue of all refuse that has been burned can be removed. The incinerator shaft is about one and a half feet square.

It is possible to feed a man sufficiently to maintain life by massaging him with a mixture of fat, proteid, sugar and other ingredients.

A gun used in German East Africa during the World War was actually made in 1680; it is to be seen in the Imperial War Museum, London.

OPERATING ROOMS EQUIPPED IN MOST MODERN APPLIANCES

One of the outstanding units of the new Medical Arts Hospital is the elaborate and expensive operating suite, consisting of doctors' lounge and locker rooms, surgeons' wash-up room, shower bath, main operating room, sterilizing room, and the eye, ear, nose and throat operating room. Four of these rooms are finished in beautiful white tile, with walls of Keene white cement finished in hard white enamel, giving the entire suite a smooth washable finish. The entire

suite contains the very best equipment that money can buy, all of which is the most modern in fixtures for surgical operating rooms. In preparing for an operation the surgeon enters a comfortable lounge and locker room where his uniform to be used in the operating room is kept. From this room the surgeon enters a spotless white, tile and enameled scrub room. Here he prepares for the operation. The room contains a shower bath for the use of the surgeon. The lavatories in

the scrub room are large and knee lavatories. No expense has been spared, which makes it unnecessary

TO THE Medical Arts HOSPITAL and those who have given Brownwood this Modern Institution GREETINGS

While we are literally linked with the new Medical Arts Hospital by the telephone wires, there are also other ties that bind us together.

There are the ties of service. Nobody knows better than the physicians how much depends upon the telephone for a quick call for help in case of accident or sickness—often when the matter of a few minutes means much in the saving of a life—and nobody knows better than the telephone people the calls that are made for the physicians at all hours of the day and night.

We realize our great responsibility to you and your patients—you of the Medical Arts Hospital—and we shall ever strive to see that you have the aid of prompt and efficient service.

There are the ties of interest in our community. As the city of Brownwood grows, through the building of such enterprises as you have established here — we must grow with it.

YOU ARE SETTING BROWNWOOD AN EXAMPLE IN PROGRESS— FOR WHICH WE THANK YOU.

WEST TEXAS TELEPHONE COMPANY

We wish to express our appreciation of the efforts of the Doctors which made possible the erection of the splendid Medical Arts Building, which is a credit to the city of Brownwood—Such enterprises as this will fast put Brownwood in the real city class.

VOL. NO. 47 BROWNWOOD, TEXAS, THURSDAY, MARCH 8 1928 NO. 12

TANK TRUCK EXPLODES KILLING THE DRIVER

Arrest Ex-Convict On Forgery Charges

DAN ARNETT, alias N. A. Hughes, an ex-convict who has served two terms in the state penitentiary at Huntsville, is again in the clutches of the law after having passed a series of forged certified checks to banks and business men of this section of the state, his latest intended victim being the Brownwood State Bank, called at the local bank about 9:30 Thursday morning and presented a letter of credit from the Forney State Bank of Forney, Texas, and displayed a certified check for \$1,000 on that bank with the name of O. W. Reagin, vice president and cashier, written on the instrument. He also drew his personal check for \$950 on the Citizens State Bank of Ranger and asked to open a checking account with the local bank, depositing with that institution the two checks for a total of \$1,950. He was given a pass book and before leaving the bank was given \$25 in cash on his personal check on the new account.

The letter of credit presented with the two checks is given here: "Letter of Credit: This is to certify and recommend the bearer, Dan A. Hughes, a substantial citizen of Kaufman county, Texas. Mr. Hughes is thoroughly reliable, honest farmer and land owner near Forney, Texas, a tax payer of a value over \$25,000, with a deposit account with the Forney State Bank of \$8,950. Having recently sold a part of his dairy holdings he is going on to a prospecting and trading tour and we commend and guarantee all favors to him are worthy and appreciated.

Very truly,
"By O. W. REAGIN,
"Vice President and Cashier."
"Signature of N. A. HUGHES, Guaranteed."

Immediately after Arnett left the local bank the assistant cashier, O. L. Plyler, put in a call for the Ranger bank and was informed that the check drawn on them was worthless and that the man giving it was a forger and was wanted in Ranger, and to get him at any cost. A telegram was also sent to the Forney bank and a reply was received stating that the check on that bank was also a forgery and would not be paid, stating that several such checks had been on them in recent weeks.

Mr. Plyler immediately notified the Sheriff's Department and called the Brownwood Retail Merchants' Association who in turn wanted all local business men to be on the alert for the forger. City police were also tipped off to the alleged forgeries and began a search for the wanted man.

Caught by Thippen
Late Thursday afternoon Arnett went into Rousel-Robertson Company's to make some purchases and presented another certified check on the Forney bank for \$75. He also displayed his letter of credit. Officials of the local store approved his credentials and allowed him to proceed with his purchases and while he was doing this he slipped the officers and City Detective C. S. Thippen soon had the man under arrest and behind the bars at the city hall. He was later turned over to the Sheriff's Department.

Mr. Thippen searched Arnett's clothing and found in his pockets three checks, all supposed to be certified checks on the Forney State Bank. The checks were for \$1,000, \$2,500 and \$75 and with them was the original and a copy of the letter of credit he was carrying. He had about \$14 in his pockets. A fishing license carried by Arnett revealed that his name was Dan Arnett, instead of N. A. Hughes, as he claimed.

Recognized by Early
Arnett was brought before District Attorney Walter U. Early Friday morning for an examining trial. Mr. Early immediately recognized him as the man he had sent to the penitentiary for two years on similar charges against him at Coleman several years ago. Before the Coleman sentence was given him Arnett had served out a two year sentence, being sent up from San Saba.

Mr. Early stated Friday morning that Arnett had swindled persons in Coleman but had posed as a sheep man in that city. He was drawing certified checks on an Oklahoma bank while in Coleman. The checks Coleman had accepted, his checks Coleman and Arnett got busy, bought a ranch near Coleman and made many other purchases before his fraud was discovered. He was arrested in a small West Texas town later and brought back to Coleman for trial.

Arnett made no reply to the statement Friday morning but did not try to claim any mistake in his identity or his purposes in giving the forged instruments. Following the examining trial Arnett's bond was fixed at \$2,500 and he was remanded to jail to await action of the Brown county grand jury which convenes Monday.

Elizabeth Crockett Pioneer Texan is Honored by Society

FORT WORTH, March 2.—(AP)—Though many pioneer mothers who blazed the trail into the southwest and shared every hardship of their courageous husbands' test in unmarked graves, the State of Texas paid a signal honor to all these women when it placed above the grave of Elizabeth Crockett a magnificent monument, topped by a life-size statue.

This is the latest of members of the Daughters of the Republic of Texas, who began a two-day annual session in Fort Worth Friday.

Mrs. Crockett lived in the old home given her by the State for distinguished services rendered by her husband. The site was 35 miles west of Fort Worth in Hood county, now marked by a crumbled chimney that once was a part of the old cabin dwelling.

The pioneer woman came to Texas in 1854 with her son, Robert, making the trip in covered wagons. They settled first in Ellis county and two years later moved to the Hood county location, where the monument now stands.

JUDGE WOODWARD TO BE CANDIDATE FOR RE-ELECTION

Judge J. O. Woodward, presiding judge of the 35th judicial district court, and president of the District Judges Association of Texas, who is here for the spring term of the Brown county district court, indicated this morning that he would again seek the post of honor that he now holds in the coming Democratic primaries and general election this year. Judge Woodward, who is one of the veteran jurists of the state, has been district judge of this district for many years.

In recognition of his ability as a jurist the District Judges Association of Texas made him president of that august body in 1927. Further recognition of his ability as a jurist was given him last year when Governor Dan Moody appointed him presiding judge of the Seventh Administrative Judicial District of Texas. Though this office he has direct supervision over court affairs in 40 West Texas counties.

Judge Woodward stated today that if he were to have an opponent this year he had not heard the slightest rumor of such.

"I have tried to render the very best of service and I feel that I have done all within my power to mete out justice to all law violators who are brought into my court for trial," the amiable judge stated today. "I hope there is no dissatisfaction at any place in my district," the judge stated as he turned to dispose of certain court affairs that had been brought to his attention.

BROWNWOOD TELEPHONE OFFICER WILL SPEAK AT FT. WORTH SESSION

FORT WORTH, Texas, March 2.—The "voice" with the same will drop its impersonal anonymity and show itself to the public at the 23rd annual convention of the Texas Independent Telephone Association in Fort Worth March 20-23.

The hello girls, who constitute the voice behind the telephone, will have their innings in the form of a number of speeches on the convention program, according to announcement by L. S. Gardner, of Waco, secretary of the organization. A number of chief operators will tell of some of the problems which the telephone girls overcome in their daily routine and they will share places on the program with executives of the companies both from Texas and other states.

Officials of the United States Telephone Association of other state associations will be present to advise with the Texas independent telephone people.

Miss Willie Campbell, assistant traffic superintendent of the West Texas Telephone Company at Brownwood, will tell of the operators' part in public relations.

BUFFS PRACTICE

HOUSTON, Mar. 5.—(AP)—Manager Frank Snyder and his squad of a score of Houston Buffs, regulars and rookies, romped out on West End Park diamond Monday for the first spring practice session of the year. Snyder found his gang already in uniform. He turned the squad loose on the balls, gloves and bats and the park resounded again with the crash of ash against horse hide.

NEW CORPORATION FORMED TO OPERATE BROWNWOOD HOSPITAL

The Brownwood Hospital, located at 1806 Austin Avenue, is being incorporated with a capitalization of \$29,000, with Drs. A. L. Anderson, T. B. Bailey, Roy G. Hallum, Ned Snyder, H. L. Locker, B. A. Fowler, H. L. Lobstein and J. W. Tottenham as incorporators, according to announcements made Sunday following a meeting of the foregoing physicians held Saturday night. Dr. A. L. Anderson has been elected president of the new Hospital Corporation; Dr. H. L. Locker, vice president; and Dr. Roy G. Hallum, secretary-treasurer.

Negotiations for the forming of the new corporation and the association of the eight local physicians named have been under way for some time, but reports have not been available until all the details of the merger had been made.

The Brownwood Hospital has long been one of the leading institutions of its kind in this part of Texas and under its new ownership even greater progress and expansion is anticipated. In fact, Dr. Anderson, president of the new corporation, states that a new building is planned for the near future. Present plans call for the razing of the present building and the construction of a modern, brick and fireproof structure within the next year or two, it is stated.

The hospital has recently been repapered and repainted throughout and much needed equipment has been installed. Only recently an elaborate X-ray room has been provided for and an expensive X-ray machine and other equipment for that department has been installed.

No Policy Changes
Dr. Anderson states that the new owners plan no radical changes in the operation of the institution and that as far as is known the present nursing staff will be retained. The hospital will be open to all reputable practicing physicians.

The eight local doctors will retain their present offices but will take most of their patients, who require hospitalization, to the Brownwood Hospital. It is understood, however, that patients of these doctors will be taken to other hospitals open to new owners. Each of the Brownwood Hospital will continue its regular practice, but will co-operate one with another in the new enterprise. Neither of the eight will be chief surgeon for the hospital, but each who does surgery will continue as in the past. In fact, each will follow his own special line of work.

Well Established

The Brownwood Hospital has long been one of the leading institutions of its kind in this part of Texas and under its new ownership even greater progress and expansion is anticipated. In fact, Dr. Anderson, president of the new corporation, states that a new building is planned for the near future. Present plans call for the razing of the present building and the construction of a modern, brick and fireproof structure within the next year or two, it is stated.

Born in Kentucky

Born in Breathitt county, Kentucky, September 2nd, 1840, he came to Texas in 1850 and rode the first stage coach from Waco to Austin. He settled in Belton and had a stage station where the court house now stands. After he sold that he joined the state rangers and was among the best known of the Indian fighters until the Civil War when he enlisted with the Confederate forces.

After the war he settled near here, was the first member initiated in the Knob Creek Masonic Lodge, and was the last surviving charter member of the First Baptist Church here. He helped to haul lumber from Calvert by ox wagon for the first Masonic hall and also for the First Baptist Church. The first church was at old Birdsdale before Temple was founded and was later moved to Temple.

Captain Wright was a real man, a courageous man, God fearing and cheerful. He lived through life with a smile for everyone and the earliest settlers in Temple recall being carried to town in one of Captain Wright's hacks and recall meeting Captain Wright here.

At the age of 10 his father died and he was left to support seven sisters. His entire life was for his family, his children and his friends. In his last illness he was confined to the bed for three years but he did not complain, being a most patient sufferer.

Pioneer Business Man

Captain Wright had one of the first business institutions in Temple, a livery stable, opened here in October of 1861. On two lots was the livery stable business and later he tore down the old barn and built a modern brick building, still property of the Wright family. His business partner in those days was J. E. Moore another of the fathers of Temple, and the firm name was Wright and Moore.

After the building of the brick structure the undertaking department was established and continued, moving in later years to larger quarters on First Street. His son, John Wright, deceased, was the first licensed embalmer in the state and he was the first president of the state association.

After John Wright's death the business management passed into the hands of Tom Wright, another son who with the years has won a nationwide reputation.

"Uncle Tom" Wright had many distinctions and he was a strenuous part in Temple's upbuilding, especially in the days before he turned the hard work over to the boys. He was active in politics, served several terms on the city council and had a large part in city affairs.

He was a charter member of the Baptist Church at old Birdsdale, a settlement that was located just west of the present Freeman Heights section of Temple. Capt. Wright was largely instrumental in moving the church to the new town of Temple and a few years ago when the First Baptist Church here celebrated its fiftieth anniversary, the church pre-dating the town because of its former location at Birdsdale, he was honored as the sole surviving member of the old Birdsdale church as well as long a "living spirit" of the First Baptist Church.

He was a descendant of this branch of the Wright family. Mr. Wright preceded to the grave by his wife in February, 1901, and by two sons, John and Joe, and one daughter, Mrs. Elina Murrell, who died four years ago.

Surviving him are four children: T. S. Wright of Temple, Mrs. J. B. Waters of Houston, Mrs. Mollie Wright, Mrs. E. M. Dutton of Temple; one brother, J. A. Wright of Co-

WILL TRY TO IDENTIFY RAY

W. L. Johnston, cashier of the Zephyr State Bank, which was robbed on Christmas Eve of about \$1,400 by two unnamed young men, will drop its impersonal anonymity and show itself to the public at the 23rd annual convention of the Texas Independent Telephone Association in Fort Worth March 20-23.

The hello girls, who constitute the voice behind the telephone, will have their innings in the form of a number of speeches on the convention program, according to announcement by L. S. Gardner, of Waco, secretary of the organization. A number of chief operators will tell of some of the problems which the telephone girls overcome in their daily routine and they will share places on the program with executives of the companies both from Texas and other states.

Officials of the United States Telephone Association of other state associations will be present to advise with the Texas independent telephone people.

Miss Willie Campbell, assistant traffic superintendent of the West Texas Telephone Company at Brownwood, will tell of the operators' part in public relations.

Man, Woman Get Life In Tot's Death

VANCEBURG, Ky., March 3.—(AP)—Robert H. Pitts was found guilty of the willful murder of his three-year-old daughter Mary Magdalene, today, and was sentenced to life imprisonment.

The jury reported at 1:45 o'clock this afternoon after having deliberated two hours and forty-five minutes.

Thirty minutes earlier, a special panel, sworn in to try Pitts' case, placed Mrs. Marie Frazier, found her guilty and fixed life imprisonment as her punishment. She had pleaded guilty and her trial was simply a formality, the prosecution having agreed with defense counsel on the sentence.

Pitts and Mrs. Frazier, his former housekeeper, accused of beating and abusing the child until it died. The woman testified against her former employer. He admitted whipping the child but denied brutality.

CAPTAIN T. C. WRIGHT EARLY SETTLER IN STATE OF TEXAS

TEMPLE, Texas, March 7.—(SP)—Captain T. C. Wright, affectionately known for several decades in Temple as "Uncle Tom," died at his home on North Second Street at 1:10 p. m., Tuesday, after an illness of three years.

Funeral services will be held on Thursday.

Captain Wright was one of the real fathers of Temple, a business man, whose interests have steadily grown and prospered; a church leader, an active figure in local politics.

He was a Texas ranger, an Indian fighter, a veteran of the Confederate Army where he served in Hood's brigade, and a very early Bell county pioneer.

NON-COTTON ZONE RECOMMENDED FOR BREWSTER COUNTY

AUSTIN, Tex., Mar. 7.—(AP)—The state pink boll worm commission adjourned Wednesday, after recommending to Gov. Moody that he proclaim protective regulations over seven West Texas counties newly infested with pink boll worms.

AUSTIN, March 7.—(AP)—After having announced that it would recommend a "non cotton" zone for Brewster county only, the State Pink Boll Worm Commission, deliberating means of eradication of the pest from 14 West Texas counties, seven of which are newly infested, got the second day of its executive session under way here Wednesday.

The commission declared it would recommend to Governor Moody that he proclaim semi-quarantine regulations for the area affected, except in Brewster county, one of the original seven counties which for years has been fighting the pest.

Brewster, the commission found, has "but a single (cotton) plantation and regulations cannot be provided to cope with the situation there."

The body will issue a formal and executive report to the Governor, probably late Wednesday.

CHRISTIAN ENDEAVOR DISTRICT MEETING OPENS HERE FRIDAY

Sixty or more young people from a dozen towns in this part of the state will convene in Brownwood Friday, to join local Christian Endeavorers in the annual convention of the Brownwood district. The convention sessions will be held in the First Christian Church, George B. Hall of Winters, president, will direct the convention programs, and Mrs. E. Boyd of San Angelo will serve as song leader. Miss Willie Kimes of Brownwood is chairman of the local convention committee.

A series of entertainments for the visiting delegates have been arranged by the local committees.

The theme for the convention will be "Walking With God." One of the principal speakers will be E. F. Huppertz of Dallas, state director for Christian Endeavor work. Other speakers who will appear at various hours during the three days session include Rev. A. A. Johnson, Brownwood; Miss Alma Rohr, Brownwood; George Hall, Winters; Mrs. M. K. Coulter, Menard; Rev. R. B. Twitty, Brownwood; C. Cole, San Angelo; Mrs. Irving Hurd, Brady; Mrs. E. Boyd, San Angelo; Wm. F. Rogan, Brownwood; Miss Mamie Gene Cole, Atlanta, Ga.; Rev. M. S. Eggerston, San Angelo; Miss Lucretia Robertson, Brownwood; Rev. W. B. Gray, Brownwood.

The convention sessions will begin Friday evening, and continue through Sunday evening.

Non-Jury Cases Are Heard Before Judge Woodward

District Judge J. O. Woodward heard only one case in district court Thursday morning, that being the only civil suit that was ready for trial today. This suit brought by G. T. Bentley against Josephine Bentley, et al to remove cloud on title, was heard before the court, the jury having been discharged earlier in the week. Judgment was given the plaintiff as prayed for.

Several divorce suits were heard in district court Wednesday afternoon but no other cases of importance had been set for trial this week. Unless some unexpected case is announced ready for trial today Judge Woodward will return to Coleman for the week-end, subject to call should his presence be needed here.

WILLY'S POINT
FATHER: Aren't you ashamed to be at the bottom in a class of 26 boys?
WILLY: It might be worse.
FATHER: How could it be?
WILLY: Suppose there were 40 boys in the class?—Flicking Blaetter.

WOODWARD CONVENES DISTRICT COURT IN REGULAR SESSION

District Judge J. O. Woodward opened the spring term of District Court in Brownwood Monday morning at 9:30 o'clock with the calling of all cases on the jury civil docket. Several suits on this docket were set for trial this week and others were set for trial later during the present term of court.

Charge to Jury
District Judge J. O. Woodward, in giving his charge to the Brown county grand jury Monday afternoon recounted the large number of law violations current throughout his district, especially in Brown and Coleman counties, this being due, he stated to the oil boom and development in the two counties. Judge Woodward told the grand jurors that 16 cases were before them for investigation at the present term and that other law violations throughout the county should be likewise investigated. Judge Woodward stressed the importance of curbing the liquor law violations and urged the grand jury to call before it for investigation every man who had entered pleas of guilty to drunkenness charges in city, county or justice court of Brownwood since the last term of district court. "Get a list of all who have entered pleas of guilty to drunkenness and summon them before you and ask them where they got their whiskey," the court urged. "They may say they don't know but if they do you may rest assured they are lying and if you can catch them in a lie indict them for perjury," the court charged.

Check on Officers
Judge Woodward also asked the grand jury to check up on all officers of the county and see that all money handled by them is going to its proper sources. "If officers of the county are doing their duty, say so; and if they are not, face the music and make your report accordingly," it was said. In conclusion the court asked for a thorough and impartial investigation of all law violations, regardless of the social standing of the parties guilty of any infraction of the laws of the state.

At the close of his charge to the jury, Judge Woodward appointed Clyde McIntosh foreman for the present term of court. Other members of the grand jury are, C. M. Carpenter, Brownwood; M. E. Fry, Brownwood, Rd.; G. J. Murphy, Brownwood; C. L. Y. McIntosh, Brownwood; L. J. McCoy, Indian Creek; Luther Crow, Brownwood; L. W. Gorman, Brownwood, Rd. 5; O. W. McDonald, Brownwood; Luke Reeves, Blanket; D. W. Kyzar, Brownwood, Rd. 6.

WILDCAT SOUTH OF TOWN GETS OIL IN GADDO

The W. L. Spence wildcat well on the Jacobs tract three miles south of Brownwood, being drilled by J. H. Green et Co., topped the Gaddo line at 1,227 feet last night, and was shut down at midnight at 19 feet in high gravity oil. The oil appears that it would test about 40 gravity, it is said.

This is an absolutely new discovery for that section, being the first line production in the territory to the south of Brownwood. The well is shut down for 5 inch pipe and will be drilled in as soon as the pipe is run.

This well is between the old Lakewood Swimming Pool well and the well on the Clark tract drilled last year, on the Indian Creek road.

SANTA FE RAIL EXTENSION IS BEING PLANNED

LUBBOCK, Texas, March 8.—(AP)—The Lubbock Journal will say today that officials of the Santa Fe Railway Company are negotiating with citizens of Lamb county, and Olton, the county seat, for the construction of approximately sixty miles of railroad to connect Farmer-town, Farmer county, with Hale Center, Hale county, by way of Olton.

The Santa Fe officials, in conference with Lamb county men at Olton, the Journal will say, declared upon promise of a right-of-way across Lamb county that the proposition would be placed before the Interstate Commerce Commission and upon the consent of that body the road would be in operation within two years.

Committees are working on the right-of-way plan, which would entail donation of approximately 30,000 worth of land, the Journal will say, and will make a report to Olton business men tonight. The branch would connect with main trunk at Hale Center and Pamerton, Olton, at present, is an inland town.

FRAUD CHARGED

NEW YORK, Mar. 8.—(AP)—Allegations of gross mismanagement were made in a Federal court petition filed today for an equity receivership for the Continental Bag and Paper Mills Corporation, a \$28,000,000 subsidiary of the International Paper Company.

AUTO MAKER DIES
WORTON, Dk., Mar. 8.—(AP)—Jonathan Dixon Maxwell, pioneer automobile manufacturer and one of the three men who built the machine, now preserved in the Smithsonian Institute, believed to have been the first automobile, died at his home here today.

OBVIOUSLY
MRS. SMART: I have nothing but admiration for the new pastor.
MRS. SMARTER: So I notice when they passed round the pulpit.—Answers.

Otto Anderson Killed; Pal Slightly Wounded

Jordan Springs School Building Damaged by Fire

Fire of undetermined origin burned a large hole in the floor of one of the rooms of the Jordan Springs school house early Sunday morning before citizens of that community were able to extinguish the blaze.

Smoke was noticed coming from the windows by people living near the school and immediately the alarm was spread. By the use of the bucket brigade the fire was soon extinguished. The amount of damage was very small, it is stated. It is believed that a match thrown in a waste basket on the floor was ignited by a mouse. The Brownwood fire department did not go to the scene of the fire as there is no water available for the use of the fire engines.

\$5,000 RAISED THIS MORNING WITH NEW PLAN

Total voluntary subscriptions to the Chamber of Commerce budget at 3 o'clock this afternoon were \$7,259. The total was expected to top \$12,500 tonight.

At 12 o'clock today 70 cards had been signed in the Volunteer Day enrollment for financing the Chamber of Commerce and Young Men's Business League, the subscription.

The honor of being first to enroll this morning when the committee began to receive the subscriptions for the support of the Chamber of Commerce for this year fell to E. V. Johnson, manager of the Graham Hotel.

However, several subscriptions had been made during the two or three preceding days by persons who were going to be out of town today, or who had volunteered to get their amounts in early, without waiting for Volunteer Day.

scriptions totalling about \$5,000. A majority of the larger business houses of the city are yet to come, and will register their subscriptions during the afternoon, according to report of the membership committee at noon.

Among the volunteers this morning were 16 who were not on the list of contributors to the Chamber of Commerce last year. Their subscriptions amounted to \$400.

Volunteer Day is "going over good" according to the committee, it being confidently expected that the number who will register during the afternoon and tonight will be much larger than that of the morning. And the results of the morning are very gratifying.

The Chamber of Commerce office will remain open until 8 o'clock tonight so that those who were unable to volunteer during the day may have an opportunity to do so this evening. Employees who were busy until six o'clock this evening were especially urged to go to the Chamber of Commerce office after that hour and enroll as members for the year.

The comments of Chairman E. J. Weatherly of the membership committee, who is in charge of the financing plan, remind one of the minister who received the present of branded peaches from one of his members and declared that he "appreciated the gift, but more especially the spirit in which it was sent."

"The good feeling" with which the people were coming in and making their pledges, Mr. Weatherly declared, was very gratifying.

Among those who have been assisting in the committee work this morning, besides the chairman, are Sam Morris, C. E. Boyer, Elmer Haynes, W. J. Odell, E. T. Jolley, J. J. Timmins, J. H. McKee and B. A. Fain. Others will assist during the afternoon.

M. Neal, Henry Hart, Mark Bardeck, Monroe Rochester, Jim Jones, Pauline Driskell, Lanie Kesler, Jess Wadsworth, Hubert Roach, R. H. Scott, W. A. Cole and Messrs. M. M. Rochester, Hubert Roach, Fred Wright, Laurence Hallmark, Alton Keeler, Harvey Kesler, Carl Belvin, Lynn Mrs. W. K. Coffey, Carpenter Jones, T. H. NeSmith, William and Hilton Dabney, James McKinney, Garland Boland, Marvin Lee Ford, Nugent Wadsworth, Will Cole, H. L. Jones, Flois Hart, Henry Hart, R. H. Scott, G. L. Piller, Charles Cabler. After this every one returned home declaring they had a wonderful time.

M. L. (Luther) Cobb today announced his candidacy for the office of County Clerk and stated that he expects to make a detailed canvass of the county during the campaign period.

Mr. Cobb is already well known to Brown county people. He served very acceptably as county school superintendent, and during his period of work in that capacity came closely in contact with all the rural citizens. He has lived practically all his life in Brown county, and everywhere he is known bears the reputation of an honorable and upright citizen.

Mr. Cobb stated that he is seeking the office of County Clerk solely upon his own qualifications for giving the people good service. He has adequate education, is thoroughly acquainted with the details of the work, and pledges his very best efforts as a faithful public servant if he is placed in charge of the county's records.

AIR MAIL LINE TO SAN ANGELO SIGHT SESSION IS SLATED

SAN ANGELO, Mar. 8.—(Sp.)— Seeking to promote the immediate establishment of an air mail line, that would possibly carry express and passengers, between Tulsa, Oklahoma and San Angelo, Claude C. Wild, manager of the Board of City Development, Walter E. Yaggy and Ernest Tucker, world war aviators and members of the aviation division of the organization, accompanied by Mayor W. D. Holcomb left Tulsa Tuesday for Tulsa and Oklahoma City where they will attend meetings at which the line will be discussed. Tulsa, Oklahoma City, Wichita Falls, Abilene and San Angelo would be connected by the air line proposed, and which has been a subject of negotiations between organizations of the cities for several weeks. All of these cities will be represented at the Tulsa and Oklahoma City conferences.

San Angelo, looking to the development of aviation and the securing of air mail service, has recently bought a 250 acre tract of land five miles south of the city on a paved highway to be converted into an air port. The option on the land was secured by the aviation division of the Board of City Development, and a bond issue of \$35,000 to pay the purchase price of the land and for air port equipment has been proposed.

AS GOOD AS THE BEST

BETTER THAN THE REST

WILL EXTEND DEPOT STREET

Depot street will be extended from Brown street to Center Avenue, it was decided at City Council meeting Tuesday night. Property on Center Avenue was purchased from E. B. Henley, J. M. Blackwell, Dr. A. L. Anderson and Mrs. Paul Kinze for \$30,000. The street will be forty feet wide.

The committee instructed to investigate the gas utility situation here asked for further time and no action was taken on Brown County Gas Company's franchise, which is up for reappaisal.

Material for the "white way" to be installed by Texas Power and Light Company will arrive here soon, it was reported.

To Open Street Several streets in the territory between Austin Avenue and Hot Wells are to be opened, following presentation of a petition by Mrs. L. Starck.

A street light to be placed on Austin Avenue in front of the Church of Christ was granted following a request by Mr. M. D. Usery.

An ordinance recently passed prohibiting the laying of gas mains within two feet of mains owned by other gas companies was ordered published by Mayor-City Manager W. D. McCulley.

An ordinance regulating the construction of sewer traps was placed on first reading.

Reports of City Attorney R. E. Lee, Chief of Police George Williams and City Recorder O. C. Pouns for February were read and accepted. A total of \$291.80 was collected by city recorder. There were 37 convictions in city courts during the past month.

An ordinance taking a section on the south side of the city into the city limits was ordered prepared after the reading of two petitions.

EFFICIENT NURSING STAFF ON DUTY AT MED-ARTS HOSPITAL

In keeping with the thorough and complete arrangement of the entire building and organization of the new Medical Arts Hospital, the official staff has employed a very competent and efficient staff of nurses, which includes six, three of whom are graduate nurses and three undergraduates. However the latter have had much experience in nursing and all have had experience in hospital work.

The nursing staff will consist of a general or day superintendent, a night superintendent and an operating room nurse. Each of these will have a capable assistant. As in all hospitals any patient may employ a special nurse if one is desired and appropriate accommodations have been arranged for all

special nurses who may be called on by patients of the new hospital.

Acting Superintendent

Miss Margaret Merle Hooper, the regular night superintendent, is acting as temporary general superintendent, pending the arrival of the superintendent who has been unexpectedly delayed in reaching Brownwood. Miss Hooper is a graduate of John Sealy Hospital, a part of the school of medicine of the University of Texas. She finished her course there in 1924 and since has been engaged in public health work in Texas and Virginia, later serving for almost a year in the Naval Hospital at Norfolk, Virginia, and in hospitals at Washington, D. C.

Miss Maggie Hereford, a graduate of Scott and White of Temple in 1924 will have charge of the operating rooms as well as the sterilizing department. Miss Hereford comes to Brownwood from the Hamilton Sanitarium in Hamilton, Texas, where she held a similar position.

MOTHERS Watch for symptoms of worms in your children. These parasites are the great destroyers of child life. If you have reason to think your child has worms, act quickly. Give the little one a dose or two of White's Cream Vermicide. Worms cannot exist where this time-tried and successful remedy is used. It drives out the worms and restores the rosy hue of health to baby cheeks. Price 35. Sold by Camp-Bell Drug Stores and Renfro-McMinn Drug Stores.

Damascus is the oldest inhabited city in the world.

ALL MODERN IN PLUMBING AND HEATING

"We are prouder of the plumbing and the heating system in the New Medical Arts Hospital than of any other job we have ever done," said Mr. Mills of the firm of Mills, McHorse & Peck, the contractors, viewing at the completion of the job the modern systems that have been installed by the hospital authorities.

The plumbing, he continued, presents "something not seen in a building of this size before," and this applies also to the heating system. The hot water heaters are all on a circulating system, and all halls are set with gas steam radiators. These radiators—a very interesting feature—are automatic. They can be set for the desired temperature, and if the heat goes to a higher degree the gas is automatically cut down.

Sanitary Precautions The doctor's offices, scrub-up rooms and operating rooms have all plumbing fixtures finished in acid resisting enamel. A gas light is installed in the main operating room as a precautionary measure, for while trouble with the electric lighting is not anticipated, it is desired to be entirely safe in the matter of lights if the unexpected should occur.

In all the doctors' offices there is the foot-control water, enabling one to turn on or shut off the hot or cold water without touching the hands to any part of the fixtures. In the scrub-up rooms the hot and cold water and waste are all handled by the knee-control fixtures. This is in the interest of sanitation, as well as for greater convenience.

The gas incinerator is also an interesting feature of the plumbing and heating system. On any floor in the building the garbage or waste of any kind can be dumped into a chute that takes it down into a furnace in which the gas is kept constantly burning and where all that comes into it is quickly consumed.

All Standard Fixtures In all parts and departments of the building, in the offices, the kitchen, the patients' rooms—and in fact, throughout the entire hospital—the most modern and perfect that could be devised, both in respect to the water and the heating, has been put to use. Standard plumbing goods were used throughout, the quality of material and fixtures being up to the standard maintained in all construction of the hospital.

A SURE CURE PATIENT: Doctor, I can't tell how I feel, I am sick anyhow, it took me suddenly, I don't know how—I am not very well, I can't tell you why. DOCTOR: Take this prescription for I don't know what to the chemist; take it I don't know how many times a day and you will be cured—I don't know when.—Pargés Gales, Yurdon.

TEXAS COTTON FIRM CHARGED BEFORE HOUSE

WASHINGTON, Mar. 5.—(P)—A charge of attempting to manipulate prices on the New York cotton exchange was laid against the Anderson-Clayton Company of Houston, Texas, and George H. McFadden, and brother of Philadelphia, by Arthur E. Marsh, former president of the exchange, in testimony today before the House judiciary committee. Advocating passage of the Rankin bill which would confiscate all cotton withheld from the market in an attempt to control prices. Marsh declared that the two cotton firms have sought to dominate the cotton exchange and create artificial prices which caused big losses to the rank and file of cotton brokers and to the producers and manufacturers.

The "manipulation" of the two firms consisted of buying in large quantities in one market "so delivery impossible," Marsh declared, and then "they gorge the market they wish to depress by selling in correspondingly large quantities."

Louis M. Osmond of New York, and L. F. Ganier of New Orleans, both cotton brokers, declared that these cotton firms concentrated large quantities of cotton in amounts up to 200,000 bales to manipulate the prices by disrupting the course of supply and demand.

"This cotton often deteriorated in storage so it was unmerchantable," Ganier said. Some of the cotton was described by Osmond as bearing "improper inspection stamps by the Department of Agriculture, which grades the cotton."

Representative Rankin, Democrat, Mississippi, author of the measure, interposed that "this was one of the most gigantic conspiracies in the country."

WATSON CASE SET FOR TRIAL ON MARCH 19

On motion of District Attorney Walter U. Early, the trial of C. W. "Mutt" Watson, charged with murder in connection with the fatal shooting of Jack McMeth in Coleman almost two years ago, has been set by Judge Woodward for March 19, at 1:30 p. m. A special venire of 144 jurors was ordered, with writs returnable, March 17. Watson has been tried twice in Coleman on the same charges, both trials resulting in hung juries.

The trial of Lloyd B. Lee, Dr. W. D. Litter and George Mayer, three prominent Fort Worth citizens, on charges of burglary of a private residence, has been set for Wednesday, March 28, by District Judge Woodward. These three men were tried on the same charges at the last term of district court but the jury could not agree, being divided almost equally for conviction and acquittal.

Jury Released Judge Woodward has discharged the jury for this week due to inability to arrange for any trials on the jury civil docket. Wednesday morning the suit of W. R. Hood, et al against O. T. Houston, et al for partition of 160 acres of land, was heard before Judge Woodward. At the conclusion of attorneys' arguments the court ruled that the property was not subject to partition and appointed T. J. English as receiver to sell the property and make a division of the proceeds, his report to be made at the next term of court.

In addition to this suit Judge Woodward has been busy throughout the day hearing divorce suits. A total of seven divorces have been granted during the present term of court.

CHRISTIAN ENDEAVOR CONVENTION TO MEET HERE FOR THREE DAYS

The Brownwood Christian Endeavor organization will entertain the Brownwood District Christian Endeavor this week, the sessions to begin Friday night and to close on Sunday night.

Seventy-five or more young people from sixteen counties will attend this meeting and will be entertained in the homes of friends here. The opening session will begin Friday evening at 7:30 at the First Christian Church. Saturday and Sunday sessions will be held throughout the day. Friday evening a social hour will follow the program and Saturday evening a banquet will be served by the First Presbyterian, First Christian and Austin Ave. Presbyterian churches. In the basement of the First Christian Church, Miss Mamie Gene Cole of Atlanta, Ga., a Junior Christian Endeavor worker, will be present as well as E. F. Huppert, Christian Endeavor field secretary of Dallas, who will be the principal out-of-town speaker.

Miss Willie King is general chairman for the convention. More rooms will be needed than have been promised and all who desire to help the young people in this way will please notify the general chairman, Miss King requests,

Judge Harrell is Not to Make Race For Legislature

Having the promise of Judge C. H. Jenkins, candidate for the State Legislature that he will introduce a bill prohibiting football if elected, Judge E. C. Harrell has abandoned plans for making the race on a platform opposing the sport.

Harrell, veteran Brownwood barrister, recently made what he termed "tentative announcement" and that he would seek the office of State Representative from the 125th district comprising Brown and Coleman counties on the Democratic ticket. He said he wanted the Legislature to pass a law "making and classifying so-called football a prize fight and punishing the performance as such."

Judge Jenkins, former member of the Legislature and prominent in state law circles, announced his candidacy and when questioned by Mr. Harrell said:

"As to my attitude in making 'playing football criminal.' I beg to say that if I am a member of the Legislature, and will prepare and send me a bill to that effect I will introduce the same by request but I will not support the bill nor participate in its discussion."

Judge Harrell who saw his first game during the last season says football is dangerous and brutal and should be abolished. He stated Wednesday that it had not been his intention to make the race if a competent man should do so.

RANCHERS COOPERATE WITH COMMISSIONERS IN WARFARE ON WOLF

COLEMAN, March 3.—(Sp.)—If stockmen and merchants in Coleman county can raise \$1,000 for the purpose of eradicating wolves and other predatory animals, that sum will be matched both by the County Commissioner's Court and the State of Texas, it was decided here Friday when several representative ranchers convened with the court and C. E. Landon, who is in charge of Federal and State control of predatory animals.

After appointing a finance committee which will canvass the county, a meeting for the purpose of perfecting permanent organization of a Coleman County Wolf Club was called for 2:30 o'clock next Saturday afternoon, March 10th. Shepherds and poultry raisers throughout the county expressed confidence that the full amount asked by the commissioners and the state department will be raised with ease.

The meeting Friday went on records opposing the bounty plan and expressed a preference for hiring government trappers who have met with singular success in other areas. It was pointed out by men of experience in other counties that wolves will become "trap-shy" under the bounty system with unexperienced men trapping.

Following the meeting Friday morning, County Judge C. L. South, Commissioners R. D. Kinney, J. S. Gilmore, George Pauley and O. H. Kelly together with the ranchmen attending the meeting, were the guests of the Kiwanis Club at its weekly luncheon. Cecil Gray, director and president; S. O'Neal, secretary of the Coleman Chamber of Commerce, assisted in promoting the meeting and pledged the support of their organization.

JONES REPORTS PARTY DEBT IS ENTIRELY PAID

HOUSTON, Tex., Mar. 8.—(Sp.)—The entire indebtedness of the Democratic National Committee has been paid or underwritten, according to Jesse H. Jones, director of finance, who has addressed a letter to Hon. Clem L. Shaver, national chairman, setting forth a list of contributors to a fund of \$508,500 which has been raised in recent weeks. The list includes a gift by Mr. Jones of \$50,000, and the \$200,000 Houston convention fund.

Mr. Jones says, in connection with the announcement of contributions: "Of this amount I hold, as chairman and treasurer of your committee on arrangements, \$200,000 contributed by citizens of Houston for the convention fund. Contributions in cash since Treasurer Gerard's last report total \$142,250. When the other pledges are paid your committee will be entirely out of debt and have probably \$250,000 with which to start the next campaign. In addition to the above several members of the committee have indicated their willingness to raise a quota for their several localities."

Thanks Contributors "I want to take this opportunity of expressing on your behalf, and on behalf of the Democrats of the country, due appreciation to these contributors, and those heretofore reported, for the very generous way they have met the necessities of committee since the campaign of 1924, which campaign left us considerably in debt. It seemed inadvisable immediately to undertake to raise the money with which to pay the committee's indebtedness from that campaign and it had not appeared advisable to make a canvass for funds since that time even to pay the running expenses of the committee. Therefore, we have borrowed for that purpose, and have asked the indulgence of some of our generous in waiting our convenience. I also wish to say that no creditors, who have been extremely

Allen A Hose

In All the Late Shades

In these lovely, new Allen A Hose, long wear has been built without sacrificing the beauty or chic appearance demanded by smartly dressed women. Woven by an exclusive Allen A process into a crystal clear weave. The foot is doubly-strengthened at the toe, sole and heel.

COMING TO BROWNWOOD

Dr. Mellenthin

SPECIALIST
in Internal Medicine for the past fifteen years

DOES NOT OPERATE

Will be at Southern Hotel
FRIDAY, MARCH 30
Office Hours: 10 a. m. to 4 p. m.

ONE DAY ONLY

No Charge for Consultation

Dr. Mellenthin is a regular graduate in medicine and surgery and is licensed by the state of Texas. He does not operate for chronic appendicitis, gall stones, ulcers of stomach, torus, or adenoids. He has to his credit wonderful results in disease of the stomach, liver, bowels, blood, skin, nerves, heart, kidney, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg pains and rectal ailments.

Below are the names of a few of his satisfied patients in Texas who have been treated for one of the above named causes:
Mrs. Alfred Field, Fredericksburg.
Mrs. I. N. Pond, Amarillo.
Mrs. Fritz Wilke, Albert.
Mrs. W. R. Thomas, Athens.
A. A. Krause, Yoakum.
Mrs. Nora Hillboldt, Cad Springs.
Mrs. M. A. Martin, Lorego.
Mrs. J. S. Mitchell, Farmersville.
Remember above date, that consultation on this trip will be free and that his treatment is different. Married women must be accompanied by their husbands.
Address: 211 Bradbury Bldg, Los Angeles, California.

The Banner-Bulletin is authorized to make the following announcements for political office, subject to the action of the Democratic primaries:

- For Sheriff, Brown County: W. C. TOLLESON, L. M. (BARNEY) CRAVENS, M. H. DENMAN
- For County Clerk: E. STARK (For Re-Election), J. T. McDONALD, W. J. ODELL, MARION FORD, M. L. (Luther) COBB, W. E. (Bill) BURLESON.
- For District Clerk: CHAS. S. BYNUM (Re-election)
- For Tax Collector: W. A. BUTLER (Re-election), S. L. SNIDER.
- For Tax Assessor: CLAIR BETTIS (Re-election), T. E. (Tom) HILL
- For County Attorney: T. C. WILKINSON (Re-election)
- For School Superintendent: J. OSCAR SWINDLE (Re-election)
- For County Treasurer: J. R. LEWIS (Re-election)
- For Justice of the Peace, Precinct 1: E. T. PERKINSON (Re-election)
- For Commissioner Precinct 1: N. A. FINSON (Re-election)
- For Commissioner, Precinct 2: L. F. BIRD (Re-election)
- For Public Weigher: L. Q. (Bud) REESE (Re-election)

SIGNS YOU CAN BELIEVE IN
If your breath is bad and you have spells of swimming in the head, poor appetite, constipation and a general no-account feeling, it is a sign your bowels are torpid. The one really dependable remedy for all disorders of the bowels, flatulency and bowels is Cutbirth. It acts powerfully on the bowels, stimulates digestion, purifies the bowels and restores a fine feeling of energy, vim and cheerfulness. Price 50c. Sold by Camp-Bell Drug Stores and Renfro-McMinn Drug Stores (Adv.)

NOTE—It would be illegal to publish this if not true.

Getting Up Nights
For Bladder Relief, is Nature's Danger Signal. Columbus Minister's Wife Relates Experience.
Res. H. Mitchell, 824 No. Park St., Columbus, Ohio, says in his own home papers: "Colombus Dispatch: 'My wife was troubled seriously with bladder irritation until we used Cutbirth. She had to get up 6 to 8 times each night. Will gladly answer any inquiry.'"
Cutbirth acts on the bladder as a stimulant on the bowels. Drives out foreign matter and decreases excessive acidity, thereby relieving irritation. The tablets cost 2c each at all drug stores. Koller Laboratory, Manufacturers, Columbus, Ohio. Locally at Camp-Bell Drug Stores.

PURINA STARTENA fed to baby chicks and turkeys will save 90%. Sold by Witcher Produce Co.

SENATOR TELLS OF ACTIVITIES OF "REDS" IN STRIKE AREAS

EDITOR'S NOTE—This is the last of three articles by Senator Frank R. Gooding of Idaho telling about conditions in the coal strike region of Pennsylvania. A Senate Committee, headed by Gooding, recently made a tour of this section.

BY SENATOR FRANK R. GOODING OF IDAHO
Chairman of the Senate Committee Which Investigated Coal Strike Conditions in Pennsylvania.

(Copyright, 1928, NEA Service, Inc.)

WASHINGTON, March 8.—A specific economic question is involved in the conditions leading to and arising out of the bituminous coal strike in Pennsylvania, Ohio, West Virginia and elsewhere.

Despite the appalling nature of the discoveries made by Senators Wheeler, Wagner, King and myself in the Pennsylvania fields as affecting the conditions striking and working miners are forced to bear, that is only the offshoot of a bad situation.

The miners' union feels its life is at stake in its present fight, and far as Pennsylvania is concerned, that is probably true.

Wage Price War
Part of the mining region has been working under union shop and part under open shop conditions. There has been such a through production that some railroads are able to buy their coal below the cost of production. Others pay only a little more.

We found that some operators blamed each other for the situation, while others blamed the railroads. Fifty per cent of the coal mines now operating and 50 per cent of the miners now employed or on strike can produce all the coal that this nation requires.

Thus, with no organization of the industry, we have had serious over-production. The case of the coal people is much like that of the farmers. The coal operators, it appears, haven't gotten together to violate or evade the Sherman anti-trust law.

Need Consolidations
I believe this problem can be met only by legislation.

Our committee is hopeful that some legislation can bring prosperity back to the coal industry. We must recognize that all the mines can't operate all the time. We must bring about consolidations. The coal companies are entitled to a somewhat better price for their coal from the railroads. As it is now, the public sometimes has to pay too much for coal because the railroads are getting it below cost. The railroads should be willing to pay a fair price.

It may be best to exempt the mines from provisions of the Sherman act. That will have to be determined. We senators are put down.

DEM FINANCES OUT OF RED

WASHINGTON, March 8.—(AP)—Democratic party finances were out of red ink today for the first time since the presidential campaign of 1924 and approximately \$250,000 was in sight with which to begin initial combat with the Republicans for honors in the November elections.

Announcement to this effect by the Democratic National committee coincided with word that Secretary Hoover contemplated making a decision today whether he would enter the Indiana primaries against Senator Watson, and with a nationwide call by the Southeastern convention of the anti-saloon league for defeat of all candidates who oppose or remain silent on dry law enforcement.

The Democratic financial report, made to Chairman Clem Shaver by Jesse H. Jones, the National committee's financial director, showed contributions and pledges totaling \$508,500, enough to wipe out the entire indebtedness incurred during the last campaign and leave perhaps a quarter of a million dollars for use in the next.

Of the total contributed and pledged, \$200,000 came from the citizens of Houston to meet expenses of the June convention there, and \$50,000 apiece was donated by Thomas F. Ryan of New York, and Mr. Jones, who figured prominently in the fight to land the Democratic convention for his home city.

The Republican political spotlight today switched to a little office on the seventh floor of the Commerce department. Herbert Hoover, its head, had until midnight to make up his mind whether to enter the Indiana primary lists to contest for that state's 33 delegates to the Kansas City convention.

Supporters of the Secretary, who has been reluctant to enter Indiana unless there was evident enough strength to warrant it, were busy

MOODY HEARS WORM WAR PLAN

AUSTIN, Mar. 6.—(AP)—The State Pink Boll Worm Commission recommended to Governor Moody Tuesday afternoon that no "non-cotton zone" be placed on West Texas counties "infested with the pest."

Members, promising to give out a detailed statement later, declined to discuss further the measures advocated except to say that they would be regulatory only.

The commission's meeting with the governor did not begin until about 12 o'clock.

AUSTIN, Tex., Mar. 7.—(AP)—Armed with data gathered in several hearings, the state pink boll worm commission, Tuesday began discussing with Governor Moody methods of eradicating the West Texas worm infestation.

A total of 15 counties are affected, eight of them being among the "new" list. The original seven have been battling the pest for years.

When the session got under way, Homer D. Wade, manager of the West Texas Chamber of Commerce, predicted a non-cotton zone would not be recommended. He believed that the commission would decide to establish regulations but not seek to prevent entirely the planting of cotton in the territory under consideration.

Mr. Wade reiterated the belief that a special legislative session ought to be called in the event of a non-cotton zone, or perhaps even if only a "regulated zone" is called. The latter course, he explained, would not necessitate a "to slow" in providing appropriations. The governor has indicated he does not believe a special desirable.

Wade declared interests "allied" to the cotton grower also ought to be compensated, if growing is prohibited. He referred to such industries as gins and compresses.

Agriculture Commissioner Geo. B. Terrell expected to have an announcement after the commission's meeting was finished. He has asked the Texas congressional delegation to seek a \$10,000,000 Federal appropriation to throw in the decided on and has indicated he will breach if the non-cotton course is does not believe even that sum would be sufficient.

LAUGH THAT OFF
"Mummy, do you say 'it is me' or 'it is I'?"
"Always remember the rhyme: 'It is I,' said the spider to the fly."
"I see—but couldn't you say 'it is me' said the spider to the fly?"
—Passing Show.

"That fellow must live in a very small flat."
"How can you possibly tell that?"
"Don't you notice that his dog wags its tail up and down instead of sideways."—Answers.

HIGH IN QUALITY LOW IN PRICE

Federal makes five grades of Tires—a Tire for every purpose and a price for every purse.

But looking back over the last few months — we're dead sure we made no mistake when we tied up with FEDERAL Tires.

We realize there are other tires on which we could have made a longer profit; other tires we could have sold cheaper; other tires on which we could have had all sorts of special concessions. Just the same, we know now from what our customers say that for a permanent tire business there is no better keystone than FEDERAL dependability and quality.

Our conviction about FEDERAL Tires is not the result of a sudden bright idea or of any high pressure salesman's ballyhoo. Not a bit of it. We have studied the tire business from rubber tree to rim and have come to the conclusion that the satisfaction FEDERAL owners get out of their tires is actually "built-in."

69 PERMITS IN BROWN COUNTY IN FEBRUARY

Wichita county led the state in the number of oil drilling permits in February with 72 permits. Brown county coming second with 69. These are far in excess of the number in any other counties...

The permits to drill and the number of completions for the month were as follows:

Table with columns: County, To drill, Pro., Dr. Lists counties like Archer, Anderson, Austin, etc.

Table with names and numbers: Harrison 4, Hardin 7, Houston 2, etc.

Table with names and numbers: Tom Green 2, Tyler 1, Taylor 1, Terrell 2, Throckmorton 1, Upton 1, Wheeler 3, etc.

Search for Body of Woman Seen in Houston Channel

HOUSTON, Tex., Mar. 8.—(AP)—A section of the ship channel here was being searched Thursday for the body of a woman who momentarily came to the surface Wednesday in the wake of a passing tug...

TRY FOR AIR MARK

DETROIT, March 8.—(AP)—Eddie Stinson, Detroit airplane manufacturer and George Hildeman, trans-Atlantic flier, took off from the top of Lake St. Clair at 8:25 a. m. Eastern standard time today in an attempt to break the world's record for sustained flight.

MOTHER KILLS TWO CHILDREN, TAKES POISON

ST. CLAIRSVILLE, Ohio, Mar. 8.—(AP)—Andy Dyken, 15-year old slayer of his mother, who was sentenced today to life imprisonment in Ohio penitentiary, attempted to commit suicide by hanging himself in his cell shortly after he was taken from the courtroom.

Guard overpowered him when they found him fastening his belt around neck. Sheriff T. C. Hardesty revealed it was the second attempt by the boy to take his life in the last twenty-four hours.

Dyken appeared pleased with the outcome. He said he was looking forward to the automobile ride from St. Clairsville to Columbus and told newspaper men "all he wanted was good clothes and plenty of cigarettes."

Two Tots Slain by Ill Mother

PITTSBURGH, Pa., March 8.—(AP)—A mother killed her two babies here today when she made an unsuccessful attempt on her own life.

successful attempt on her own life. According to the police, the mother, Mrs. Catherine Ward, 25, stabbed Billy, aged three years, and then placed him in a bath tub, partly filled with water, after which she strangled Dorothy May, age 3 months, with a rag. Then Mrs. Ward cut her wrists with a razor blade.

Man Killed in Auto Crash

MARLIN, Texas, March 8.—(AP)—Robert Rector, 27, was killed and his companion, Claude Massey, escaped unharmed when an automobile the former was driving overturned near here today. Both were residents of Lott, 14 miles west of Marlin.

School Girl Dies Under Car Wheels

KANSAS CITY, March 8.—(AP)—Miss Ruth Hanakrait, 16-year-old Paseo high school girl was killed and two companions were hurt while walking to school today when a motor car, struck by another at a street intersection, veered to the sidewalk.

Baby Dies of Food Poisoning

MEMPHIS, Tennessee, March 8.—(AP)—The attempt of an eleven-year old girl to take care of her baby brother during her mother's absence resulted fatally today for the baby, Billy Rochelle, age 15 months, who died of food poisoning. He was the son of Mr. and Mrs. L. L. Rochelle, of Parkin, Ark.

FLYERS IN FRISCO

SAN FRANCISCO, California, March 8.—(AP)—Captain Cleodonne Costes and Lieutenant Joseph Lebrun, French naval good will fliers, passed here today to wade through a deluge of invitations to public and private social affairs before meeting here to sail for Japan, where they are to resume the world flight which they started in Paris, October 10th.

PARTY PLEDGE IS NOT LEGAL POLLARD RULES

AUSTIN, Texas, March 8.—(AP)—The state Democratic executive committee went outside its power in adopting a recent resolution binding Democrats to the party pledge, and the action will not be legally effective, Attorney General Claude Pollard ruled Thursday in an opinion to Murray Buckner, chairman of the Dallas county Democratic executive committee.

The ruling could not be used "to deprive any Democrat otherwise qualified, of an equal participation in the affairs of his party with every other Democrat," Mr. Pollard said. "There is no authority in the state executive committee to prescribe any test or qualifications which might be enforced outside of the state and any test within the state different from those of other states would be an encroachment upon the rights of the Texas Democrats to participate equally with the Democrats of other states in the nominations of the party."

To Prevent Bolting

By the resolution, adopted at its February 28 meeting here, the executive committee attempted to require that all participants in the Democratic precinct, county and state conventions, subscribe by resolution to the Democratic pledge, "I am a Democrat and agree to support the nominees of the party." It was aimed to prevent "bolting" from the party after nominations.

File Suit Against Alleged Embezzler of Bank's Funds

FOOT WORTH, Texas, March 8.—(AP)—Alleged embezzlements of E. W. Hightower, deposed vice president of the Stockyards National Bank of Fort Worth from that institution are listed as having aggregated \$286,022, in a suit for debt and damages filed by the bank against Hightower in district court here.

Cattle Range in Texas is Revived by Rains, Report

AUSTIN, Texas, March 8.—(AP)—Revived by recent rains, the cattle range in Texas improved three points in percentage during the month past, and spring prospects are very bright, H. H. Schutz, federal live stock and crop statistician reported here Thursday.

All classes of cattle, he said, have come through the winter in exceptionally good condition considering the shortness of the available range. The March 1st condition is reported at 82 per cent as compared with 80 a month ago. In many instances feeding has been heavy but as a result of the improving range and milder weather, less is needed now.

Hindu Girl Wins 550 Mile Horse Race in France

CANNES, France, Mar. 8.—(AP)—A sixteen-year-old Hindu girl, Mademoiselle Chaitry, who carried a tortoise with her as a mascot, won the Paris-Cannes 550-mile horse race today.

LINDY IN GOTHAM

NEW HOSPITAL BUILDING IS WORK OF ART

Brownwood's new Medical Arts Hospital, which has just been completed at a total cost of a little more than \$100,000 and which is owned by eight prominent local physicians, is housed in one of the most beautiful buildings of the city.

Another feature of the construction of the building is the attractive bath rooms which have been provided. Every bath room in the building has a tile floor with a white and hard enameled plaster wall.

Attractive Color Design. On entering the new hospital one is immediately impressed with the restful, yet attractive color design, that of cafe-au-lait, which is the prevailing color used throughout the building.

Other Offices. The first office to the right and opening into the hall is that of Dr. L. P. Allison, and at the end of the hall is found the spacious waiting room, which opens directly into the offices of Drs. Anderson and Shelton.

Additional Office Rooms. Upon entering from Booker Street one comes to a hall that runs parallel with that street and along this hall is found the laboratory suite and the offices of Drs. O. N. Mayo, W. H. Paige, Homer B. Allen and J. M. Horn.

SANTA ANNA school patrons are rejoicing that their new High School building, costing \$100,000, has been completed and is now in use.

between this and the one inch oak floor is left a half inch air space. The floors have been sanded and varnished and might well be envied by the most fastidious housekeeper.

Second Floor. The second floor of the new Medical Arts Hospital will be used almost exclusively for patients. On this floor alone there are 13 large comfortable patients' rooms.

In addition to other rooms on this floor is found numerous bath rooms that have been set aside for the use of the nurses, the hospital kitchen, nurses' dining room and the elaborate operating suite.

Another feature of the construction of the building is the attractive bath rooms which have been provided. Every bath room in the building has a tile floor with a white and hard enameled plaster wall.

NEW WARD SCHOOL ON AVENUE K TO BE BUILT WITH BONDS

According to present plans of the Brownwood Public School Board, the proceeds of the \$50,000 bond issue, if carried on March 20, will be used in the construction of a new ward school building on Avenue K, between Fifth and Seventh Streets.

Citizens in this part of the city do not have a ward school available south of the Coggin School, which is between 10 and 15 blocks north of the new location.

SANTA ANNA'S NEW HIGH SCHOOL BUILDING

SANTA ANNA school patrons are rejoicing that their new High School building, costing \$100,000, has been completed and is now in use.

RUM WAR

North Brownwood. As a part of the present building plan two more rooms will be added to the North Brownwood School. This school is also badly overcrowded, according to Superintendent E. J. Woodward.

San Antonio. San Antonio, Texas, March 8. (AP)—John Van Nieuwenhuysen, drug store owner at Carino Springs, was killed and Arthur Wildenthal, former mayor injured Thursday in an automobile accident between Carino Springs and Eagle Pass, according to a report received in San Antonio.

San Antonio Yeggs Descend Upon Town Nearby, But Fail

San Antonio, Texas, March 8. (AP)—With the arrest of three men and one woman here today, police believe they have captured a gang of safe robbers who committed nine robberies in ten days here recently and then transferred their activities to Kerrville.

Two Ranger, Texas Boys Survive in Coast to Coast Run

RANGER, Texas, March 8. (AP)—Two Texas boys were among the 125 contestants to survive the fourth day of C. C. Pyle's coast-to-coast foot race.

Another Weakness. "Why do you wear that glass in your eye?" "That eye is very weak." "Then why don't you get a glass hat?"

TEXAN KILLED IN CAR CRASH

Major Edwin B. Heese (above), superintendent of the Washington, D. C., metropolitan police, has been charged with frequent drinking in an "openly operated saloon" by Representative Thomas L. Blanton of Texas.

Man is Attacked Near Berger, is Ill of Pneumonia

BORGER, Texas, March 8. (AP)—Lying ill with pneumonia and suffering also from two fractured ribs and lacerations and bruises, Thomas Marshall, 19, is in a critical condition here.
