Hereford's getting to be an industrial city. Three major industries have been started here this summer. George Heard's new alfalfa dehydration plant has been in operation for several weeks and is going strong. The Deaf Smith Meat Company packing plant began operation yesterday; and the new canning plant should be in operation in a short time.

The Deaf Smith label is getting around. A letter to The Brand this week from McKinney, Texas, was addressed to "Mr. Deaf Smith, Editor."

Mr. "Deaf Smith" Gillentine is away this week on one of those famous fishing trips—somewhere in Colorado.

Mrs. W. A. Springer of Frio has furnished the Around Town Columnist with some prize samples from her Anoka apple tree. Known as "the old folks' apple" because it produces fruit the second year after planting, the Anoka is a high plains apple. Mrs. Springer's tree was planted in 1939, and produced its first apples the following year. This year, she reports, she has picked some eight bushels of apples off the single tree. Good apples, too!

Dr. Will Graham is all set up for "molar maintenance" again in new offices in the Buckner building, over the Brand office. Office hours are eight to five, and its the last door on the right down the hall.

Fertilized Wheat Produces Five Bushel Bonus

An experiment in fertilizing wheat land on the M. S. Benefield farm northwest of Hereford was carried out shortly before this year's crop was seeded, and results of the experiment have just been returned following an analysis of the grain by the Amarillo Grain Exchange.

Part of the wheat in one field was fertilized with 100 pounds of 10 percent ammonium nitrate and 200 pounds of 6 percent rock phosphate per acre, and the remainder of the field was left in the natural state.

Wheat from both patches was No. 1 Dark Hard Winter Wheat. Test weight on the fertilized wheat was 61.2—on the unfertilized grain 62.4. Both samples tested the same in moisture content, 11.3 percent.

However, the fertilized wheat produced 19.1 bushels per acre as compared with 14.5 bushels harvested from the unfertilized portion.

Benefield believes that the increased yield is well worth the cost of fertilizing, and points out that the benefits from the fertilizer added to the soil this year will continue over a period of several years.

Fire Damages Box Car and Feed at Alfalfa Mill

A fire at the Heard Alfalfa Dehydration Plant east of town on Highway 60 early Wednesday morning damaged a boxcar and destroyed approximately 75 sacks of freshly loaded feed.

A spark is believed to have started a smoldering fire in one of the sacks, which were being loaded on the box-car on a siding near the plant Tuesday night.

One truck from the Hereford Fire Department made a run to the scene. The alarm was turned in at about 4 a. m. Wednesday morning.

Deaf Smith County Meat Company Opens New Packing Plant in Hereford on Wednesday

Hereford's newest industry, the Deaf Smith County Meat Company, began operations yesterday. The new slaughtering and packing plant, owned and operated by Bonnie and Homer Brumley and Marvin and Stanford Knox, received a permit Tuesday afternoon to begin operations.

Just completed, the plant is completely equipped with new and modern machinery, and, according to B. Brumley, will be able to handle 40 head of cattle and 20 hogs daily.

"When we hit full production," Brumley said, "we expect to work a crew of 18 to 20 men. We will do custom slaughtering, but the big proportion of the business will be in wholesale market in the Deaf Smith, Farmer, and Castro county area with fresh and processed meats.

The shortening shortage in Hereford may be relieved when the plant gets into full operation, since lard will be one of the products of the rendering plant. Ham, bacon, beef, lunch meats and wieners will be among the products placed on the market by the company, Brumley said.

An invitation has been issued to the public to visit and inspect the plant, which is located a mile east of Hereford and south of the Santa Fe tracks. A formal opening will probably be held after the plant is in full operation.

Included in the lay-out are three refrigeration rooms, a slaughter room, curing room, and office.

Garden Clubs of Plains Organize District Council

A group of representatives from eight Garden Clubs of the High Plains Area met at the Herring Hotel in Amarillo on July 9 to organize a Garden Club Council for District 1, Texas Garden Clubs Inc.

Purpose of organizing the council is to unify the efforts of all the garden clubs in this area, to promote a district flower show and to promote an exchange of ideas and knowledge among the clubs of the district.

Mrs. John Jacobsen Jr., Mrs. Lyle Blanton and Mrs. W. S. Fluitt represented the Hereford Garden Club and Mrs. Maurice Tannahill, president of the Garden Beautiful Club, represented her club.

Officers were elected with Mrs. Lyle Blanton named as recording secretary and Mrs. W. S. Fluitt chairman of the awards committee.

Estimates of Yield Low As Wheat Harvest Nears Finish

With harvesting of wheat virtually completed in this area this week, estimates place the total yield for Deaf Smith county at the comparatively low figure of between one and a half and one and three-quarters of a million bushels.

Even though the wheat is all in now, these figures are, at best, a fair guess based on observations of experienced grain men and farmers. Partly because of the government's "forced sale order" which was cancelled two weeks ago, and partly because of the local shortage of other types of feed, a great deal of the crop has been stored in farm granaries.

Not more than three-quarters of the 1946 crop has been brought to the elevators for storage or sale, operators estimate. This year's crop, battered by hail and drought, is far below the 1944 "normal" crop of 4,740,079 bushels, and the 1941 record year.

DAIRY SUBSIDY FOR APRIL MAY AND JUNE PAYABLE

Dairy subsidies for April, May and June are payable now at the Deaf Smith County ACA office, F. C. Collier, secretary, advised local farmers yesterday.

The rate for April is 17 cents on butterfat, 70 cents on whole milk. For May and June, rates are 15 cents and 55 cents.

Applications for payment should be filed as soon as possible, Collier said.

Geo. Pace Home Razed by Fire Monday Noon

Fire gutted a five-room frame residence owned by George Pace on Avenue H shortly after noon Monday.

The blaze was started by an oil stove in the kitchen, according to members of the family, and spread rapidly through the house.

Efforts of neighbors to get the fire under control, with the aid of garden hose failed, and by the time the fire department arrived at the scene, the blaze had swept through the entire house.

Walls and roof were left standing, but the interior of the house was burned out. Only a small amount of furniture and clothing was saved from the blaze.

The loss was partially covered by insurance. Two families were living in the house, Mr. and Mrs. George Pace and family, and their son and daughter-in-law, Mr. and Mrs. George Pace Jr.

The elder Mr. Pace was burned about the face and hands in an effort to save furnishings from the house, and George Jr. received first-aid treatment after being overcome by smoke while battling the fire.

No One Injured in Car-Truck Crash On Highway 51

James L. Burnam of Dimmit escaped injury last Thursday morning when his car, a 1936 Dodge, crashed into the rear of a truck on Highway 51 three miles south of Hereford.

The accident occurred at about 11 o'clock Thursday morning. The truck, a 1946 Ford, was driven by Victorino Encinas of Tremontina, New Mexico.

The accident occurred when Burnam started to pass the truck as Encinas made a left turn. Burnam's car crashed into the rear of the truck. Damage was estimated at about \$1600, the state highway patrolman investigating the accident, said.

Firemen On Top; High School and Summerfield Tie

The Hereford Fire Department softball team boosted its lead over the idle Summerfield Farmers this week to a full two games while the High School team clambered into a second-place tie with the Farmers with a pair of wins.

The league race was still red-hot, with Summerfield and High school scheduled to battle it out tomorrow night (Friday) in a game that may go a long way toward settling the scramble.

The High Schoolers took a 10 to 9 victory over the cellar position DeMolay team last Thursday night to march into a tie for second place. Bishop was the winning hurler, allowing 11 hits while his teammates collected 14 off Whitaker and Bookout.

Growers Sell to Government: Jam Local Railroad Yards

The bottom dropped out of the potato market Tuesday as the Deaf Smith spud harvest was getting in full swing and precipitated a near riot in the loading yards at the Santa Fe railway as growers rushed to dump freshly harvested spuds into boxcars for government shipment.

Prices which had been steadily on the downgrade from a \$3.00 top a week ago, under pressure of a record potato crop throughout the county plunged below government support at \$2.25 Tuesday.

Many growers were by-passing the potato processing houses entirely to dump their spuds into boxcars and claim the government payment of \$2.25 per hundred on No. 1 spuds loaded in bulk.

Caught in the rush, Santa Fe freight yards were pushed far beyond capacity and shippers complained bitterly of long delays in getting cars. Communications were tied up also, as each shipment of potatoes sold to the government must be reported to the Amarillo office of the Production Marketing Administration, and Hereford's limited telephone facilities were unable to handle the traffic.

Long delays were reported on calls to Amarillo, and no priorities are available, according to F. C. Collier of the AAA office. Majority of reports were being handled by Western Union.

Growers attempting to load direct reported delays of two to eight hours in getting cars, and protested vigorously as truckloads of freshly harvested spuds waited in the hot sun to be loaded on to boxcars because of a shortage of cars.

J. B. Brisco, Superintendent of the Amarillo division of Santa Fe and F. A. Donnell, trainmaster, were in Hereford Wednesday to inspect the local traffic situation.

By Wednesday morning, the yards had been cleared and traffic was moving on quick schedule. Two switch-crews are working the yards, and potatoes are being moved out rapidly, Brisco said.

The Santa Fe officials blamed the tie-up Tuesday on the difficulty of getting clearances quickly from the Amarillo office of the PMA.

A meeting of growers and shippers was held at the courthouse Tuesday afternoon, with Dwight L. Ancher of the regional office of the PMA from Dallas, and Dennis Poe of the Amarillo office, present.

Seventy-five cars of un-billed potatoes were shipped out of the local yards to Amarillo Tuesday night to clean the tracks for more cars, and as many more left the yards here yesterday afternoon. There were more than 90 loaded cars in the yards Tuesday night.

By Wednesday night, over 600 car-loads of potatoes had been shipped from the local Santa Fe yards, and no figures were available on a number of (Continued on Page 10)

Margaret Staats Recovering From Wound, Doctors Report

Margaret Staats, 13-year old Summerfield girl who was critically injured on July 6 when a gun was accidentally discharged, is reported to be recovering satisfactorily and will probably be released from the hospital within a few days.

J.M. Gilliland returned from Dallas Tuesday night and reports that doctors at the Baylor Hospital in that city now hold high hopes for complete recovery after a successful operation to remove the .22 calibre bullet from the spinal column.

ACA Office Will Aid Shippers on Government Sales

The Deaf Smith county A.C.A. office has been mobilized to give all possible assistance to potato growers making sales direct to the government, F. C. Collier, local secretary, said yesterday.

Growers who are selling spuds to the government at support levels are required to report to the Amarillo office of the Production Marketing Administration at Amarillo as soon as possible after loading the shipment.

The A. C. A. office is handling these telegrams for growers, Collier said. All that is necessary is to report to the local office in the basement of the courthouse after the spuds have been loaded, give the necessary information, and pay for the wire.

Telegrams will be prepared and sent, and confirmations of the sale will be handled by the office.

Three-way Crash On Highway 60 Injures One

Two cars and a truck were involved in a three-way crash on Highway 60 a mile and a half east of the sub-station Tuesday morning, and one man was injured seriously enough to be taken to the hospital.

The accident occurred at about 7:25 a. m. A truck owned by Merit Mills of Amarillo, and driven by Rex L. Lamberson, sideswiped two cars when the driver fell asleep at the wheel.

The first car, a 1936 Dodge sedan, was driven by Mrs. Barbara McElmurry of Clifton, Arizona, who escaped without injury. The second was a 1946 Ford coach driven by Quentin R. Williams of Hereford.

The Williams car turned over and was badly damaged. The driver escaped without injury, but his passenger, Steve S. Williams, was taken to the Deaf Smith County Hospital suffering from a broken nose and probable chest injuries.

Highway patrolmen investigating the accident said the truck was west-bound, and both cars were headed east. According to their report, the driver of the truck fell asleep at the wheel, and his vehicle swerved over to the left side of the road, striking the two cars.

The Ford was completely wrecked, with damage estimated at \$1400, patrolmen said. Damage to the Dodge were slight, and estimated at about \$60, and the truck was damaged to the extent of about \$100.

New Potatoes Are Plentiful Item on Market Now

Abundant supplies of new potatoes head the list of fresh vegetables in local markets, according to B. F. Vance, state director, Production and Marketing Administration, who urges meal planners to take advantage of the ample crop and include them often in family menus.

Plentiful supplies of early crop potatoes can replace bread in well-balanced meals, he said. And generous use of this wholesome food, while it is abundant, will lessen demand for the more scarce foods needed for foreign shipment. New potatoes do not store for a long period of time and must be consumed rapidly in order to prevent waste.

The U. S. Department of Agriculture is pushing consumption of potatoes in a state-wide campaign and is asking well-fed civilians to add more of them to their diets, thereby easing local pressure on wheat and wheat products.

Three Cars Turn Over in Trio of Freak Accidents

WESTWAY, July 16—Three cars were overturned in freak accidents in this community within a week, and all drivers escaped without injury.

Mrs. Grady Wilson Jr. luckily escaped Monday when her car overturned about half a mile east of the Westway school-

house. A tire went flat and she struck the soft dirt in the middle of the road. The top of the car was badly dented, but no damage otherwise.

Glen Williams, who lives on the farm of his uncle, Steve Williams, northwest of the Westway schoolhouse, had a similar accident Monday with a pick-up. (For news of another accident in which Mr. Steve Williams was injured, see page 1).

The third in the trio of mishaps occurred last week to V. Skypalpa who was driving a pick-up in which he had been hauling wheat, and overturned

retained with a party for the young people at their home Saturday night.

Two Firemen Top League Softball Batting Averages

Two big reasons why the Hereford Fire Department is on top of the heap in the municipal Softball League can be found in the season's individual batting averages released this week

by Bartley Dowell, official league scorer. The reasons: The Fire Department sluggers are leading the batting list with percentages well over the .500 mark. Barrett is on top with a season average of .533, with Carroll trailing by a fraction with .529. In third place is W. Lueb of the second-division Knights of Columbus team with a season average of .522. J. London of

448. Others in the first ten, with their batting averages, are Millard of High school, .443; Easley of DeMolay, .440; Davis of High school, .425; R. Lueb of High school, .416; Williamson of VFW with .416; and L. Loerwald of the KO's with .414. All averages are based on 20 times or more at bat. Davis of the High school team is the League's leading scorer, having crossed the plate for 30 runs. Trailing him are two team-mates, Millard with 17 runs and R. Lueb with 15. Wilson and Fowler of Sunday school have each accounted for 15 runs. Carroll of the Firemen is the leading hitter, with 18 safe bingles to his credit. Davis of High School and Barnett of the Firemen are next with 17 each. R. Lueb of High School and Williamson of VFW are in the first five with 15 hits each. Averages were compiled as of July 12, when the season was little more than half over.

attended. Mrs. Finis Hunter, Norma and Doris, and Orval Pierce were shopping in Amarillo, Friday. Mrs. E. L. Adams and David returned from San Francisco, Friday. They had been visiting Mrs. Adams' mother. Mr. and Mrs. Clyde Renfro and O. C. visited Will Todd near Lubbock, last Sunday. Lucille Dyer, a student at West Texas State College in Canyon, spent the weekend with her parents, Mr. and Mrs. P. H. Dyer. Mr. and Mrs. Howard Bishop were visitors in Canyon Thursday. Mr. Bishop suffered a back injury while combining, and is under the care of a doctor in Canyon. Mr. and Mrs. Stanley Callihan moved to Amarillo this week, where Mr. Callihan had found employment. Mrs. Callihan was formerly Miss Billie Dyer. Word has been received that C. C. Hunter Jr., and Jim Dyer are on the way home from the Pacific. C. C. has been stationed in China for the past few months, and Jim in Honolulu. Little Jimmie Manning of Dimmitt visited with O. C. Renfro Thursday. Mr. and Mrs. Edwards of Odessa are visiting their daughter, Mrs. Glen May, this week. Rev. Dyess preached to a good crowd at Jumbo Sunday. Attendance at Sunday school is increasing. Next Friday evening the Sunday school will have a werner roast at the State Park south of Hereford. The entire community is invited. Rev. and Mrs. Dyess visited in the Sparkman home Sunday. The next club meeting will be held at the home of Mrs. Pauline Baid on July 24, at 3:00 o'clock. Blondes are of three kinds, natural, bleached and suicide—the latter died by her own hands.

Most of the farmers in this community are through cutting wheat and are plowing day and night. Dry land wheat made from 4 to 15 bushels per acre in this area. Mr. and Mrs. E. W. Shugart were called to Plainview Saturday by the serious illness of Albert E. Hudgins, Mrs. Shugart's brother. Newlin Jones of Sayre, Okla., visited in the R. L. Campbell home last week, and he and Mr. Campbell left on a fishing trip to Colorado. Mr. and Mrs. E. W. Helm of Amarillo, visited in the Bob Axe home last week. Mr. and Mrs. C. L. McBroom and children visited in the Tom McBroom home in Canyon, Saturday. Miss Suzanne Owens from Canyon visited in the E. W. Womble home last week. Miss Mary Jo Wattson of Amarillo visited in the home of her sister, Mrs. Glenn Allred, Saturday and Sunday. Frank Raelsback from Amarillo and Mr. and Mrs. Tommie Gibson of Brady were visitors in the Rue Wells home last week. Mr. and Mrs. J. D. Allen spent four days in the home of their son, Wallace Allen, near Kress. Norma Jean Tomlinson is visiting in the home of her grandmother, Mrs. Taylor Golden, near Lockney. Mr. and Mrs. C. L. McBroom were dinner guests in the Joe Rogers home Sunday. Mrs. Eddie Rapstine and children spent the weekend in Hereford. Mrs. O. J. Crabbe made a bus trip to Fort Worth Saturday.

There is no silver in the U. S. five-cent piece. It consists of 75 per cent copper and 25 per cent nickel. Coins originating in the U. S. mint at Philadelphia have no mark that indicates their point of manufacture. One-hundred-dollar bills have Benjamin Franklin's photograph on them.

The U. S. ten-cent piece is called a dime after the Latin word decima, meaning one-tenth. The face of a coin is called its obverse side. Twenty-dollar bills carry President Jackson's photograph. Grant's picture appears on all \$50 bills.

Elect

Floyd H. Richards

District Attorney

69th Judicial District

SO THE PEOPLE OF DEAF SMITH COUNTY MAY KNOW

FLOYD H. RICHARDS was elected County Attorney of Dallam County, Texas in 1940. He served in that capacity until he was called to the United States Army. For the next four and one half years he was in the Army; first as a Bombardier where he flew forty combat missions in the European theater of operations, and later he was appointed Trial Judge Advocate (Prosecuting Attorney) at Midland Army Air Field.

He has now returned from the Army, opened a law office in Dalhart and announced as a Candidate for District Attorney of this District.

We believe he has earned the promotion he asks. His experience as County Attorney and Trial Judge Advocate has qualified him for the advancement.

Miscellaneous Shower Is Compliment To Mr. and Mrs. Geo. LeGrand Friday

Of interest among the social affairs centering around brides and bridal couples during the past week was the attractively arranged shower given for Mr. and Mrs. Geo. L. LeGrand Friday evening at the First Baptist Church where wedding vows were recently exchanged by the couple.

The fellowship hall of the church was decorated throughout with midsummer flowers and the refreshment table, laid with a white cut-work cloth, held a center arrangement of white tapers for candlelighting. Pink and white flowers formed other table decorations. Mrs. Bartley Dowell presided at the punch bowl and Mrs. R. L. Dowell Jr. was in charge of the guest register.

Miss Marie Williams entertained with informal piano music as the guests arrived and the lovely array of gifts were shown. Other entertainment features included a toast to the bride by Mrs. Lloyd Crume, appropriate vocal music by Bettye Katherine Hodges and a poem read by the bridegroom's sister, Mary Estelle LeGrand.

Approximately 75 close friends and relatives made up the guest list.

Hostesses for the party were Mesdames Barrett Sowell, Robert Gollehon, Lloyd Crume, W. L. Alexander, Phil Radovich, T. W. Roberson, W. B. Dowell, R. L. Dowell Jr., Ray Johnson, Doyle Rose and Miss Naomi Brumley.

Auxiliary to Sponsor Tournament

The American Legion Auxiliary will sponsor a bridge-tournament on July 25 and 26. The tournament will be held at the Fireman's Hall and will begin at 8 o'clock each night. Prizes and an overall grand prize will be given. Proceeds from the tournament will go to the building fund of the VFW program. Tickets may be obtained from members of the Auxiliary and at the tournament.

Westway H. D. Club Meets Wednesday

"Flat ware is the term applied to knives, forks, spoons, etc. instead of silverware, and hollow ware is used to designate creamers, sugar bowls, etc.," stated Miss Oliver, CHDA at the meeting of the Westway Home Demonstration Club held Wednesday at the home of Mrs. Maurice Tannahill.

Miss Oliver showed two patterns of Dirlyte, an alloy which is becoming popular for flat ware, and showed pictures and samples of some of the popular plastic creations, including Natigahyo, an imitation leather, Neolite shoe soles, Foam rubber, and Nylon. New appliances for homes were also dis-

Garden Club Meets In Kelton Home

Mesdames C. D. Kelton and Liston Wilson were hostesses for the Garden Club meeting held Friday afternoon in the Kelton home.

Mrs. A. M. Jones opened the program for the afternoon with a discussion of "Perennials that Bloom From Spring to Frost." She mentioned perennials suitable for basic planting for flower gardens including asters, delphinium, iris, phlox and chrysanthemums which do well in this section.

Mrs. E. Ramey told of the different methods of pruning climbing roses and explained the effect of such pruning.

Miss Sadie Lee Oliver in outlining "First Aid to Gardeners," described three ways of propagation—by seed, division of roots and cutting, illustrating

the division of roots and cutting with plants and roots. She also advised methods of preventing the propagation of undesirable plants.

Members of the club attending the meeting were Mesdames; Fred Axe, E. T. Brooks, Homer Brumley, C. C. Cox, W. S. Flutt, E. E. Fridley, E. W. Harrison, W. C. Hromas, John Jacobson Jr., A. M. Jones, Will S. Kerr, F. M. Kester, Jim Lipscomb, F. H. Oberthier, E. Ramey, Lan, Shore, A. O. Thompson, Robert Wagoner, Earl Springer, Duard Robinson, Miss Oliver and the hostesses.

Prevention of heat exhaustion and sunstroke for farm workers is more important than ever before with the critical need for food supplies. The National Safety Council states that the application of simple safety practices may bring a reduction of workers lost as it has done in industry during recent years.

According to the Council, heat exhaustion and sunstroke are two entirely different things, although both may seem to result one from the other. With heat exhaustion the patient's skin is cold and clammy while with sunstroke, the skin is hot and dry.

A simple rule may serve as a guide and avoid confusion regarding the treatment. Briefly it is this: If the patient is cold, make him warm; if he is hot, make him cool.

The following measures will help prevent heat exhaustion among farm workers: Drink cool water and lemon or other citrus fruit juices, avoiding alcohol and ice water. Eat vegetables and light, easily digested foods. Wear light, loose clothing; avoid over fatigue; bathe daily; get plenty of sleep. Replace body salt lost through perspiration by salting food, drinking salt in water, or by taking salt tablets—about eight 10-grain tablets daily.

Sunstroke results from prolonged exposure to the rays of the sun. Consequently, it is advisable to keep the head covered with a broad loose-fitting, comfortable cloth.

In sunstroke cases move the patient to a cool, shady spot, remove the clothing and then place him on his back with head and shoulders raised. Apply ice cold cloths to the head and cool the body gradually with a cool bath. Call a doctor as soon as possible and administer cool drinks (not cold) if the patient is conscious.

May Involved in War Profits

Rep. Andrew J. May (D) of Kentucky points an emphatic finger as he tells House colleagues there are "sinister motives" behind attacks on him in the Senate War Profits Investigating Committee probe of Illinois munitions firms. Testimony involves a check to the Cumberland Lumber Co. endorsed "A. J. May, President." May declared he did not endorse the check and was not president of the company. Kentucky Secretary of State records show "Andrew J. May, Prestonsburg"—May's home town—to be president. May is chairman of the powerful House Military Affairs Committee.

Texas Safety Association Pledges Aid in Lowering Traffic Deaths

AUSTIN, July 17 (Special)—In the face of an already 45 per cent increase in traffic fatalities over last year, the Texas Safety Association today accepted a charge by governor Coke Stevenson to mobilize public support for a safer Texas.

Announcement of its designation by the governor was made by A. F. Allen, president of the Association, upon receipt of a letter from Stevenson.

"Since my inaugural address as Governor, I have stressed the importance of highway safety as essential to modern, progressive government," Stevenson said. "There is no more tragic waste of human lives,

no more unnecessary background to human suffering, no more needless source of economic loss than traffic accidents.

"The current critical traffic accident situation is a positive challenge for public action to every Texas citizen. Unless vigorous concerted application of proven methods of traffic control is made, Texas faces the greatest accident toll in its history.

"To that end, I call upon the Texas Safety Association to coordinate the practical recommendations of the President's Highway Safety Conference and to mobilize public support for a

safer Texas. "Your worthy organization has rendered invaluable service to the people of Texas through its program of traffic, industrial, school and home safety. I know that its leadership in the present emergency will be no less effective."

President Truman's Highway Safety Conference held in Washington this May was attended by twenty members and officials of the Texas Safety Association. Recommendations of the national conference parallel in large measure those of the Texas Emergency Traffic Conference and the Texas Safety Conference according to Allen.

"The principal elements of this uniform traffic control program embrace positive and practical measures that experience has shown are necessary to curtail street and highway accidents," said Allen.

"This basic guide for traffic safety in Texas contains blue-prints for uniform traffic laws and ordinances, adequate traffic enforcement personnel, driver training courses in our schools, and modern techniques in enforcement and engineering.

Allen said the association accepted the governor's charge "in the belief that a balanced and adequate traffic control program of state and local government, fully supported by the people both through organizations and as individuals, can bring down and hold down the highway casualty list."

Streu's Diary

DEAR DIARY:

Still no relief for the shortages of merchandise. What with Congress and the President and OPA still scrapping to see who shall tell us what to do, everyone from the manufacturers down are holding everything until the atmosphere clears.

Prices are advancing on some few items—mostly those which have been selling at 1941 ceilings and which were entitled to some rise. We have made very few changes in our prices to date—but practically all new merchandise will be up from 5 to 20 percent.

The price picture is rather ragged—some prices advancing a lot—others just a little—some remaining the same—and, believe it or not, there are several items on which prices have gone down—mostly items which are becoming more plentiful—and which were too high.

Just received—a factory shipment of Fenton glass ware—new colors, too. Half a dozen good army coats—extra heavy legs and canvas. More lawn sprinklers—well cylinders—irrigation dams—

36" and 48" heavy white canvas duck—plastic screen material.

We have two 50,000 BTU floor furnaces with automatic controls better hurry.

Coming within the next week—small air conditioners—about two room size. 30,000-22 shells (coming—not here as yet)!!

Been swimming in the Dimmitt pool a couple of times lately—sure is swell—I understand that they built the most of their pool with local labor—the grocers and the druggists and the lawyers and farmers and school kids—wonder how many Herefordites would lower themselves to pushing a wheelbarrow (without pay) in order to get a place to swim?

loads which had been shipped by truck. Of this number, Howard Gault, president of the Pan-handle Growers and Shippers Association, estimated that at least one-third had been sold to the government at support levels. Gault estimated that probably 80 percent of the total crop will go to the government under the support program.

Local potato houses were placing as many sacks of graded potatoes on the market as possible at prices of about ten cents above support level, in order to keep the Deaf Smith brand names in circulation and preserve the industry which has been built up here as much as possible.

The bulk potatoes sold to the government are going to brewers, dehydrators, and starch plants. Sacked No. 1 spuds bought by the government under the support plan will go into storage in the large caverns in Kansas.

A record potato harvest is coming in in this area, with an estimated 6,000 acres planted in spuds, and production averaging close to 140 sacks per acre.

The potato harvest over the United States has already broken records, with some areas still to harvest. The government to date has bought over 22,000 cars of potatoes at support levels.

Flies Are Proved Carriers of Polio Virus in Scientific Experiments

"Keep flies away from food." This is another one of the important precautions urged by The National Foundation for Infantile Paralysis during this summer's epidemic of the disease. Lacking a preventive or cure for the disease, the American public's protection against serious infection with infantile paralysis lies in a rigid adherence to the list of simple precautions formulated by the National Foundation.

These safeguards are important for they constitute the results of scientific research made possible by the financial support of the National Foundation in its search for a prevention and control of the disease. Like the other protective advice in its list of precautions, the admonition to keep flies away from food has a sound scientific background.

The fact that flies can carry the virus of infantile paralysis in their bodies is not news to the men and women who have devoted their lives to the fight against infantile paralysis.

throughout the last three months have brought a fair amount of moisture in some localities, there has been no general precipitation over the county since the big snow in January, and the wheat yield was generally higher than anticipated.

Price of No. 1 wheat on the local market has remained steady at \$1.80 a bushel since taking a 10-cent jump immediately following the expiration of OPA on June 30.

The shortage of feed, and uncertainties about price control, plus the "famed sale" order which was in effect at the time harvest started, have held a considerable portion of this year's crop on the farms, and until a new farm census is made, there probably will be no definite figures available on the actual amount of wheat harvested.

On various occasions the scientific detectives of the medical world determined the presence of the infecting virus in flies. But how important this fact is in the actual transmission of the disease has never definitely been settled. Granting that flies can carry the disease, scientists pondered, can they actually be a link in transmitting the disease to humans?

Many well-known experts zealously studied this problem. John Paul and the late James Trask of Yale University were some of the famous doctors who had proved that flies could carry the tiny germ-like virus of infantile paralysis.

Each year's epidemic of infantile paralysis presents many opportunities for scientists in their never-ending quest of how infantile paralysis is transmitted. Right now most authorities believe that the infecting virus gets into the body through the mouth and the food passages.

The epidemic of infantile paralysis which struck Catawba County, North Carolina, in the summer of 1944 was a catastrophe, but it was also a great opportunity for important research. Very early in the epidemic, the National Foundation notified Dr. John Paul, head of the Yale Poliomyelitis Study Unit which has been financially supported for many years by the National Foundation, of the impending outbreak.

Immediately a trained team of investigators, Doctors Robert Wand, Joseph Melnick and Dorothy Horstmann set out for the epidemic area. These three were epidemiologists — the Hawksaws of the medical world — specially trained scientists capable of studying the various factors that create an epidemic.

There was a score of tasks for these doctors to perform here in the backwoods section of North Carolina, but one thing they decided not to overlook was the role of flies in carrying and spreading infantile paralysis. They set up a novel experiment. First they went to a local store and purchased some bananas. They then selected a home where a young child had been taken ill with infantile paralysis. In the patient's home the bananas were peeled and sliced in open dishes.

For two days the bananas remained on the kitchen table with flies constantly buzzing food. When the investigators had decided that the food had

been contaminated as much as possible, they packed the dishes of sliced bananas, freezing it with dry ice, for shipment back to the laboratories in Yale.

At Yale University the real work of the experiment began. The problem was to determine whether this food which had been exposed to flies in a polo victim's home contained virus capable of producing the disease in laboratory animals.

Expensive, hard-to-get chimpanzees were selected, and using the utmost caution to prevent contamination from other sources, the Yale doctors fed the sliced bananas to two chimpanzees named by their handlers, "Hickory" and "Catawba."

While this latest scientific study does not positively prove that flies transmit the disease, it does show that flies can carry, on certain occasions, the infecting virus in their bodies, deposit it on food and thus complete the chain of transmission to humans.

"Keep flies away from food," is sound advice. All who wish to do everything possible to avoid the dangers of infantile paralysis would do well to follow strictly the precautions listed by The National Foundation for Infantile Paralysis, for these safeguards are based on the results of scientific research.

Farm Land Values PER ACRE
WORLD WARS I AND II
1912-1914 = 100%

JACK AND JILL WENT UP THE HILL TO BUY A FARM ON CREDIT. JACK FELL DOWN AND BROKE HIS CROWN. IS JILL FOR THAT FATE HEADED?

There is more truth than poetry in that little verse... in World War I many farm borrowers "went up the hill" and obtained loans based on war-inflated prices. You know what happened when those prices fell after 1920!

Today, a growing number of borrowers and lenders are going "up the hill" again... getting loans which can be carried only if war production and prices are maintained long after the fighting stops. History and common sense tell you that can't be done.

Don't misunderstand us... buy yourself a farm if you wish... pay what you think it is worth to you. But, for your own peace of mind and future security, be sure that our loan will be within your means when times may come harder than it does now!

How much, then, can you borrow safely? There is no hard and fast rule, but you can obtain the most, safely, when your loan is carefully fitted to your needs with special features to protect you in less favorable years.

Now, through our special arrangement with The Equitable Life Assurance Society, this bank can offer you loans for up to 40 years that are geared to the long-term earning power of your farm—not its liquidation value.

Don't be misled by offers to lend you more money. In farm loans the most is not always the best.

See us when you are buying a farm. We will be glad to assist you in any way.

ERNEST T. ALLRED
Commissioner, Precinct 4
Wildorado, Texas

To the Voters of Precinct 4,
Deaf Smith County:
Dear Friends:

As you may know, it has been difficult for me to make personal contacts with each of you regarding my race for re-election as County Commissioner.

However, I have always enjoyed doing business for and with you people and I greatly appreciate your support in the past elections. I have tried to fill the place to the best of my ability and if you feel that I have done a good job, I want to ask your careful consideration and support in the coming election.

As you probably know, Deaf Smith County is in excellent financial condition and I am always glad to have you folks investigate these things—which I consider mighty important when other taxes are going sky high and many political sub-divisions are in drastic shape.

I assure you that if you see fit to re-elect me as your commissioner, I will continue to take a great interest in the work and problems of this County and of Precinct 4.

Very truly yours,
ERNEST T. (Dick) ALLRED
