Slaton, Lubbock County, Texas, November 23, 1928.

Number 26.

Expense of Poultry Show is Estimated; Will Request Funds

Officers for the Slaton Poultry Association, in making their final plans for the third annual poultry show in Slaton, have estimated as carefully as possible the expense of the show this year, and will begin in a very few days to canvass the city for funds with which to meet these expenses.

Since no new coops are being purchased this year, and due to having some funds on hand from last year's show, the amount to be raised will be less than was necessary last year, although a much larger expense is expected in paying off premiums this year because it is expected that twice as many birds will be shown this year, compared with last year.

"A little more than \$400 will put the show over in good shape this year, we believe," said Messrs. Hicks and Splawn this week.

These two men expressed the belief that Slaton business men, recognizing the great value of developing the poultry industry and also knowing the large amount of benefit coming from holding the annual poultry shows, will respond generously when called upon for help in the next few days.

Slaton Lends Aid To Welcome of Denver Visitors

Although not on the South Plains extension of the Fort Worth and Denver line, and in spite of the fact that Slaton is a Santa Fe city—"The Santa Fe Center of West Texas"—Slaton helped Lubbock welcome the visitors who came to that city Wednesday to celebrate inauguration of train service over the new Denver line.

An invitation was extended by the Lubbock Chamber of Commerce, of which A. B. Davis is manager, for the Slaton Chamber to send representatives to the big banquet at the Tech gym on Wednesday night. J. W. Hood, president, and L. A. Wilson, secretary of the Slaton Chamber, and T. E. Roderick, Slaton newspaper publisher, attended the banquet, mingling with representatives from many other South Plains towns, with Lubbock citizens and with the visitors who were present from Amarillo, Fort Worth, and Dallas. Officials of the Denver road also attended and appeared on the evening's program.

Several other Slaton citizens were in Lubbock Wednesday afternoon to help Lubbock say "Howdy" to the first Denver trains over the line.

SOUTHLAND BOY HAS ARM BROKEN IN FALL

Billy, ten-year-old son of Mr. and Mrs. W. T. Crozier, of Southland, suffered a broken arm Thursday morning when he slipped and fell to the ground in the back yard of his home. He was brought to the office of Dr. W. E. Payne here, where surgical aid was given.

SCHOOL REPRESENTATIVES TO MEET IN FORT WORTH

FORT WORTH.—Dean Colby D. Hall of Texas Christian University is chairman of the local committee on arrangements for the meeting in Fort Worth Dec. 4-7 of the Association of Colleges and Secondary Schools of the Southern States. Texas has 21 colleges and universities that are members of the association and about 150 high schools.

L. B. Cyfert transacting business in Crosbyton Thursday.

Mrs. Geo. Marriot and D. I. Skelton were shopping in Lubbock Wednesday.

Rev. M. M. Short, recently appointed pastor of the Church of the Nazarenes here, was in Lubbock Wednesday working on arrangements for a church building for his members here. He reports a very encouraging trip.

Methodists Meet In Lubbock for Annual Conference

Rev. M. S. Leveridge, pastor of the Methodist church here, and numerous members of the church, are attending the nineteenth annual meeting of the Northwest Texas Methodist Conference now in session at Lubbock. Large numbers of Methodists from over the district are attending each session of the conference, reports state.

Very interesting and instructive programs are being conducted, it is said by those attending from here. Bishop John M. Moore, of Dallas, is presiding.

The following preachers were announced by the bishop as having been transferred by him into this conference: Clifton L. Hodges, First Church, Abilene; E. C. Rainey, East Oklahoma; B. W. Dodson, New Mexico Conference; H. W. Strong and George Davis from West Oklahoma conference; S. Culwell and C. A. Norcross from Central Texas conference; J. L. Willis from the North Texas conference. Those transferring from this conference are Virgil Fisher, to the Central Texas conference; O. W. Carter to North Texas conference, and M. P. Timberlake to East Oklahoma.

Names of superannuates were called and in most cases retained in that relation. An exception was Rev. G. S. Slover, former president of Clarendon College and former publisher of the Texas Christian Advocate, who announced recovery of health and desire to become again effective.

Rotarians Have Spelling Bee at Program Friday

The Slaton Rotary Club had an old-fashioned spelling bee at the regular meeting last Friday noon. C. Lem Sone pronounced the words, and the entire group, visitors and all, took part. At the finish, both sides had numerous representatives on the floor who had not "spelled down". The contest was ended by declaring the side having the larger number standing to have won the match.

A quartet song number was scheduled to have been given by Ed B. Carroll, Walter E. Olive, Jess Swint and Walter B. Hestand. The number turned out to be a trio, one member not taking part.

Visitors were: Tom A. White, Lubbock; George Barton, Amarillo; M. R. Blake, Paducah, and N. C. Hardin, of Louisiana, Mo.

The program for this Friday will be a boys' work program, involving a debate on the subject, "Do Athletics as Now Carried on in Our Schools and Colleges Militate Against Proper and Adequate Physical Training for the Masses of Pupils Who do Not Make Places on the Teams?" Affirmative speakers are Minter W. Uzell and Ed B. Carroll, and the negative will be defended by Abe Kessel and Oskar Korn.

P. G. Stokes, Ben G. Holloway, Horace G. Sanders and Horace Hawkins are on the program to sing in quartet fashion.

Rotarians Attend Meeting at Lubbock

Several members of the Slaton Rotary Club were in Lubbock Monday attending the noon luncheon of Lubbock Rotarians, among them being A. Kessel, P. G. Stokes, J. T. Overby, H. G. Sanders, Dr. H. F. Miller and T. J. Able. Some of them went to "make good" their attendance record, it was said.

LAMESA MAN NOW AT RED CROSS PHARMACY

W. T. Orgain, recently of Lamesa, has accepted the position of assistant manager and pharmacist of the Red Cross Pharmacy here, it was stated Thursday by C. F. Anderson, owner of the store. Mr. Orgain expects to move his family here soon.

Jack Estes, representing the circulation department of the Dallas News, was in Slaton Thursday representing his publication.

Good Roads Meet At Union School Next Tues. Night

A Good Roads meeting will be held at the Union school house, about nine miles west of Slaton, Tuesday night, Nov. 27, it was announced here Thursday by the Union committee of the Lubbock County Good Roads Association. The committee is composed of W. Lamb, E. A. Deering and A. C. McRae.

The meeting, like others being held throughout the county, is to be for the purpose of discussing the road bond election which has been called for Dec. 1, and to enlighten taxpaying voters of the county on the project, the committee stated. Speakers from Slaton will have parts on the program, according to present arrangements, and a general invitation is extended to all to attend. Speaking will begin at about 7:30 o'clock.

Pember Ins. Agcy. Gets Judgment in Justice Court Case

A verdict in favor of the plaintiff was rendered by a jury in Justice Court here Wednesday, when the case of Pember Insurance Agency vs. S. P. Mosley, in which the plaintiff was asking for judgment of \$43.77, with interest, came up for trial in Justice J. H. Phillips's court. Attorney R. A. Baldwin represented the plaintiff, while Attorney D. E. Kemp was attorney for the defendant.

The amount sued for was said to be the amount of the premium on an insurance policy issued about two years ago.

Road Meeting at McClung Changed To Friday Night

The road meeting that had been set for Wednesday night this week to discuss with McClung citizens the proposed bond issue in this county has been changed to Friday night this week, officials announced yesterday. A box and pie supper is to be held there that night, also, and a discussion of the road bond question will follow the holding of that event.

Slaton had been asked to send a delegation of business men to the box and pie supper, and these will now attend and take part in the road meeting, too, it is announced.

State Lets More Highway Contracts

AUSTIN.—Contracts for road construction work totalling \$660,521 in nine counties were awarded by the State Highway commission, bringing the amount for lettings of the two day session to \$1,155,216 for 18 counties.

The commission granted aid to El Paso county for one-half the cost of two miles of pavement from the city limits of El Paso east and 2 1/2 miles west from the west city limits on highway one.

Aid totalling \$160,000 was awarded to Hale, Burnet and Newton counties.

Contracts awarded included: Goliad County: 16.95 miles grading and drainage structures, Highway 12; F. W. Heldenfels, Rockport, D'nyemoyon, Ward and Worrell, Itasca, \$38,820.06 for bridges.

Bell County: 6.79 miles grading and drainage structures, Highway 2; C. C. Moore, Temple, \$24,851.62.

Mitchell County: 5.09 miles grading and drainage structures, Highway 1; Tibbetts Construction company, \$37,239.21.

Nolan County: 7.81 miles gravel base course and bituminous macadam surface, Highway 70; R. B. Sparks, Dalas, \$55,995.14.

Hardin County: 1.06 miles panel timber pile trestle and grading Highway 8; Brown and Abbott, inc., Dalas, \$72,777.

El Paso and Hudspeth Counties: 20 miles grading and structures and gravel surface Highway 130; Lee Moore Construction Co., El Paso, \$127,788.95.

Slaton Team to Play Brownfield There on Friday

The Slaton High School Tigers will meet the Brownfield High eleven at Brownfield this Friday at 3:30 p. m., says C. L. Sone, superintendent of schools.

A large crowd of fans may attend the game, going in their cars, it is hoped by officials. Anyone who can and who wishes to go is invited to do so to help the team have proper support when they meet their opponents on Friday afternoon.

So far, the Tigers have established an imposing grid record for the season. It is as follows: beat Tahoka, 26 to 6; defeated Spur, 12 to 7; crushed the Lamesa Tornados, 33 to 14; and trounced Paducah, 13 to 6. Post beat the Tigers, 19 to 0, the only defeat suffered by the Slaton eleven in the district race this season. The game with Lockney, scheduled for Nov. 2, has not been played, having been postponed from that date due to bad weather.

The Tigers are expecting to win over Brownfield, and then a victory over Floydada at Floydada on Thanksgiving Day is the next goal in front of the Slaton crew.

Miss Stallings Gets Recognition At Baylor College

Belton, Texas.—Miss Evelyn Stallings, Slaton, has been chosen house chairman of Luther Hall and a member of the Judicial Council of the Student Self-Government Association of Baylor College.

Miss Stallings, a junior, is also chairman of the Luther Hall Y. W. A. She is a member of Historical-Philaliterary Society.

Liquor is Seized, 19 Arrested, When 'Flats' are Raided

A delegation of law-enforcement officers, headed by County Attorney L. A. Howard, of Lubbock, swooped down on Slaton's negro district Wednesday afternoon, with a determination to rid the "Flats," as the negro village is commonly termed, of vagrants and bootleggers.

The raid was not at all fruitless, officers stated, following a march to the office of Justice Phillips of just one less than a score of lawbreakers. There were 14 negro men and 5 negro women in the procession. Some of them paid fines; it was said, some went to jail, while others made bonds in varying amounts. Vagrancy was charged against several. Others must face "liquor" charges.

Following the raid officers stated there must have been more than five hundred gallons of "home brew," either bottled or in the making, found in the Flats and destroyed. It was discovered at numerous different places, they stated. About eight gallons of whiskey was confiscated, also, it was said.

To stage the raid, officers surrounded the quarters, and ordered all inhabitants there to gather in the middle of the street. While they were being guarded by some, and questioned by County Attorney Howard, other officers made the search of the entire village.

Among those taking parts in making the haul were: County Attorney L. A. Howard, Deputy Sheriff Vernice Ford, Constable J. C. Roberts, Deputy Joe Bird Sone, Jailer Cap Moore, all of Lubbock, Constable Dave Hoffman, and Deputy Sam Selmon, of Slaton.

SCARLET FEVER REPORTED AT PIWONKA HOME HERE

A case of scarlet fever is reported at the home of Mr. and Mrs. L. F. Piwonka, at 18th and Scurry streets. Their three-year-old daughter, Ladel, is the patient, doctors stated.

Mr. and Mrs. G. A. Guthrie attended the Northwest Texas Conference at Lubbock Thursday.

"Stars and Stripes," A. E. F. Newspaper, Is Shown Here

To Mr. Roy Cobb, Adjutant of Luther Powers Post, American Legion, Slaton, Texas, are we indebted, in being permitted to examine two issues of "The Stars and Stripes", under the dates of May 24, 1918 and September 24, 1918. Both issues are of Volume No. 1, numbers 16 and 32 respectively.

This publication was the official organ of the American Expeditionary Forces on the Continent, and published by Our Boys, at Paris, France. It was a seven column paper, filled with advertising, cartoons and spicy reading matter for the boys. It carried advertising from the States, England and France, and the subscription price for six months in the States was only \$2.00. We note an editorial in the May 24 issue, under the caption of "The Day It Should Be," wherein "The Stars and Stripes" viewed with regret the avowed intention of some of the officers and men of the A. E. F. to celebrate Memorial Day with a program of field sports. They believed it strictly not in keeping with the spirit of the great commemorative day, which was doubly true at that time, when almost every hour their buddies were added to the list of those who "die to make men free." Asking them for a moment to recall Memorial Day in the Old Home Town—when it was a day of prayer—prayers for the repose of souls of those who fought for the right, as God gave them to see the right, thanking that those dead had not died in vain. Truly the Spirit moved and encompassed the A. E. F. and with the passing of ten years, prayers are said and requiems sung for the repose of souls gone West. May we never, as a nation, lose sight of the "Faith of Our Fathers".

Smith and Son to Pilot Special to Floydada Grid Tilt

Preparatory to sending a special train to Floydada Thanksgiving, Thursday, November 29, when the Floydada Whirlwinds and the Slaton Tigers will meet in their annual grid-iron fracas, committees have been named, and other arrangements announced, as follows:

J. H. Brewer is chairman of the ticket sales committee, and these others are on the sales committee, according to Mr. Brewer: Chick Garland, C. F. Anderson, I. M. Brewer, H. S. Riggs, H. G. Sanders, T. E. Roderick, C. B. Jordan, Mrs. Lee Green, K. L. Scudder, Carl George, R. A. Baldwin, Dr. W. E. Payne, Tess Bruner, Walter Tomlinson, J. G. Killian, C. L. Sone, C. W. Taylor, and W. H. Smith.

The fare to Floydada will be three-fourths of the regular one-way charge, making the round trip cost only \$2.40 per person next Thursday. A minimum of 150 tickets must be sold. It is expected that at least 400 or 500 people will ride the special. Almost that many, 370, went to Lamesa on Nov. 12, and greater enthusiasm is anticipated for the Floydada contest than was seen when the Tigers met the Lamesa eleven.

Those desiring tickets for the trip to Floydada are advised to see members of the ticket sales committee at once, Mr. Brewer has announced.

R. L. Smith, Sr., veteran Santa Fe engineer of this city, has stated that he will pilot the special to Floydada and his son, R. L., Jr., will be the fireman, both of them giving their pay to the high school athletic association, if that arrangement is desired. Mr. and Mrs. Smith has a son on the team this year, and have been represented on the Tiger squad for the past several years by having one of their sons on the line-up at various times. They are, therefore, much interested in the football team, and are anxious to do something for the Tigers. Considerable comment has been made on the offer of Mr. Smith and his son, R. L., Jr., and they have been highly praised for their offer. It is hoped they will be allowed to pilot the special to Floydada.

Tigers Guests of Business Men at Banquet Tuesday

While other towns were celebrating Father and Son Day, with banquets and festivities, thirty business men acted as fathers to "Our Boys," the Tigers of Slaton High.

Covers were laid for fifty. The tables were nicely arranged and decorated, the menu all that an epicure could wish for, with a background of fried chicken. In the center of the room, from a column, were draped the everlasting colors, purple and white. The only things lacking and missing were the lassies of the pep squad.

Our distinguished fellow citizen, R. A. Baldwin, acted as Toastmaster. He not only acted, but as well performed. An innovation directed by the toastmaster was in having each member of the squad introduce the member on his right. Much merriment was afforded in the spicy remarks made by each in the introduction. The Tigers delivered.

The entire program was impromptu from start to finish, which included a wonderful toast at closing. Those called upon for talks were, Dr. W. E. Payne, on "What it is all about," (Doc told it); Coach Wright, "The Team". The coach gave a very pleasing and instructive talk on the personnel of the squad; Capt. Gerald Woolever, "Our Coach"; J. H. Brewer, "Slaton's Debt to Our Football Team"; "Runt" Woolever, "The Game Next Friday at Brownfield"; Demp Cannon, "If Brownfield Plays?"; C. W. Taylor, "The Pep Squad"; T. E. Roderick, "The Team as an Advertiser for Slaton"; Odus Cannon, "Past, Present and the Future of Football"; W. H. (Bill) Smith, "How to Get to Floydada Thanksgiving Day"; I. M. Brewer, "The Victory Spirit"; Supt. C. L. Sone, "The Future".

The honored guests in attendance were, Gerald Woolever, "Runt" Woolever, Odus Cannon, Demp Cannon, Cecil Austin, Artie Nowell, Raymond Drenn, "Mac" McMennamy, Claud Gentry, Woodson Arnes, Cecil Scott, John Simmons, Choice Rucker, J. J. Maxey, Everett Young, "Fat" Reed, Jim Smith, Jack Stalcup, Frank Johnson, representing the squad, and Coach Wright and Supt. C. L. Sone, representing the high school.

As a climax to the wonderful evening spent in paying tribute to "Our Boys," the spirit of fandom was evinced in again underwriting a special train for Thanksgiving Day, to meet Floydada in the annual engagement. Eighteen of Slaton's stalwart business men made possible the trip to Floydada, as follows: Dr. W. E. Payne, J. H. Brewer, H. H. Edmonson, Chick Garland, T. E. Roderick, J. G. Killian, R. A. Baldwin, Walter Tomlinson, C. W. Taylor, K. L. Scudder, C. B. Jordan, I. M. Brewer, E. P. Millican, W. H. "Bill" Smith, H. S. Riggs, Tess Bruner, C. W. George, and T. S. Tekell.

While all were loth to leave the banquet hall, with its flow of wit and kindred spirit, still the "Fathers" sped the departing guests, "Our Boys," with an admonition that they be true to the spirit of sportsmanship, clean living, clean thinking, that they may buck the game of life with the same spirit of fight as when holding the line. And may the laurel leaves of victory be theirs in the games to come. Goodnight.

Slaton Folks Attend Father-Son Banquet

A number of Slaton men and boys attended the father and son banquet held Tuesday night at the Tech gym at Lubbock. It was a county-wide affair, attended by an estimated crowd of about 1,200. An interesting program, one of much interest to boys especially, was presented.

Included among those who attended from here were: J. W. Hood and two sons, Odie and Boo; J. F. Merrill and son, James, Jr.; B. H. Taylor and son, Orthal; B. D. Griffin, his sons, and L. A. Wilson, guest, Harley Evans. Mr. Evans claimed that, since his boy had to borrow a boy.

Mrs. Jno. T. Lohay and wife were Lubbock Tuesday afternoon.

**THE DEMOCRATIC PARTY'S FUTURE.**

Editorial Opinion of the New York World (Dem.)

The attempt to forecast the future of the Democratic party is idle speculation, and responsible leaders of the party will be well advised not to rush into print with prophecies, declarations, recriminations. Four years are a long time in the history of a party, and what is said now in a mood of depression or elation can have very little value. What is needed now is a clarification of mind, and to that end we suggest tentatively the following consideration:

1. 1928 was a landslide in the electoral college slightly but not much larger than 1912.
  2. The Democratic party polled a larger proportion of the popular vote this year than in 1904, 1920 or 1924 and only a slightly smaller proportion than in 1908 and 1912.
  3. There will be two parties in the United States.
  4. Almost certainly they will be called the Republican and Democratic parties.
  5. The Republican party survived the disaster of 1912 and the defeat of 1916.
  6. A party which polls at least 40 per cent of the popular vote is not negligible.
  7. A party with at least 12 million votes in the pivotal states is not negligible.
  8. A party which has more than 75 per cent of its popular strength outside the old solid South will have to consider the wishes of that 75 per cent.
  9. Events in the next few years rather than wishes and opinions today will set the issues and reveal the leaders.
- In the meantime we suggest to the 12 million Democrats outside of the South that they study and remember

the gallant fight of the southern leaders and southern newspapers who vindicated the best traditions of this country. We know of no nobler episode in American politics than the sustained and brilliant struggle conducted by the dry Protestants of the South against bigotry and fanaticism. They faced odds which would have daunted all but the bravest and most honorable men.

The World for its part does not know how to pay them adequate tribute.

**NOW LET'S REPEAL GRAVITATION**

Arkansas by popular vote has repealed the law of evolution. Next we presume the voters will take things in hand and repeal the law of gravitation, which we have considered doing ever since the last time we slipped on the damp kitchen floor just after it had been mopped, and bumped both funny bones.

**HOW TO DEAL WITH CANCER.**

For the last week The Star has been printing a series of authoritative articles on cancer furnished by a committee of several medical bodies. It has done this because it believes diffusion of this information may save many lives.

These articles have shown that cancer is not contagious, that in the early stages it may be cured, that the only effective treatment is by surgery, or in some cases by radium or X-rays. If any other treatment produced results it would be taken up by the medical profession, just as insulin has been universally adopted in the treatment of diabetes.

The important thing is to recognize the symptoms early, obtain competent medical advice at once—and act on it! —Kansas City Star.

**FARMER BOOSTS HIS POULTRY PAY CHECK**

Increasing the production of his 300 hen flock from ten eggs daily in September, 1927, to more than one hundred eggs per day in the succeeding winter months, L. W. Hartman of Orange Grove in Jim Wells county has boosted his monthly poultry pay check by \$17.58. He has been demonstrating good poultry management under the supervision of his county agent, L. A. Pierce, who explains that this increased production cost an additional cash outlay of only \$10 and a few extra hours of labor. There were fewer hens in the flock during 1928 than in 1927, yet the monthly returns in 1927 were only \$22.19 as against \$39.77 last season. Another favorable result was the fact that the peak of egg production was reached in the months of December, January and February when egg prices are high.

The demonstration consisted of culling out the poor layers, feeding a balanced ration and keeping the birds well housed and free of lice, blue bugs and intestinal worms. Extension Service suggestions from Texas A. and M. College as contained in C-52, Poultry Culling, C-33, Feeding for Egg Production, B-63, Poultry Houses for Texas, and C-69, Common Worms in

Poultry, were used in this demonstration.

One of the best rations suggested in the bulletin on poultry feeding is popularly known as the "Big Five Ration" and is designed for farms where no milk is available. The laying mash is composed of 100 pounds each of corn meal, ground oats, wheat bran, wheat shorts and meat scrap of 50% protein. Wheat farmers substitute 200 pounds finely ground wheat for the bran and shorts in the ration to make it more nearly a farm grown ration. The scratch feed is made up in the proportions of 2 pounds cracked corn or maize, 1 pound wheat and 1 pound oats. Where plenty of milk is available and kept before the flock at all times the meat scrap may be left out of the mash in this ration and the scratch feed changed to 3 pounds cracked corn or maize and 1 pound wheat, omitting the oats.

**WILLYS OVERLAND SHOWS NET PROFITS OVER \$8,000,000**

Toledo, O.—The Willys-Overland Company reports net profits of \$8,557,399.21 for the nine months of the current year ending September 30, after all charges but before Federal taxes, indicating that the 1928 business volume of the company as well as its

earnings for the year will establish a new high record.

The nine months earnings compare with \$7,806,184 for the same period of 1927, an increase of \$1,251,215.21 for the first nine months of 1928.

The company's earnings for the third quarter of the year were \$2,146,584 after all charges except Federal taxes compared with \$1,250,631 for the third quarter of last year.

Throughout the current year the Willys-Overland has set new monthly sales and production records and is

now nearing the end of the greatest year in the entire history of the company with an indicated output of 325,000 Whippetts and Willys-Knights.

Not alone has the Toledo manufacturer of Whippet fours and sixes and Willys-Knight sixes shown a record breaking domestic business for 1928 but the remarkable growth of the company's business in the foreign markets of the world and the wide public acceptance of the Willys-Overland products has been one of the current year's business.

**Acid Stomach**

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on other methods, never continue to suffer

when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 25c and 50c a bottle—any drugstore.

"Milk of Magnesia" has been the U. S. Registered Trade Mark of The Charles H. Phillips Chemical Company and its predecessor Charles H. Phillips since 1875.

**A RECORD IN POLITICS.  
A STATUE TO PASTEUR.  
THE EYE OF THE NEEDLE.  
PRAISE FOR THE MOVIES.**

The President cast his first vote in Northampton, was elected councilman there, long ago, and has been steadily in office ever since, nominated nineteen or twenty times—never beaten. A record in politics as good as Cromwell's in war. Cromwell never lost a battle.

The old farmers would observe with pleasure that being President, with \$75,000 a year salary, a White House and a big yacht have not spoiled Calvin Coolidge. Next March he will move from the White House to Northampton and resume life in a small house which he rents for \$32.50 a month.

Such a man is not dependent on money. But the President could save plenty of it. More than one law firm would be glad to guarantee him three times his Presidential salary. And he would not have to work hard. Perhaps the President chooses to wait a while, look around, and possibly take a second elective term in the White House, eight years hence.

The erection of a fine statue to the great Frenchman, Pasteur, honors Chicago. Excepting the Lincoln statue, none in Chicago is erected to so noble and useful a man.

Dr. Leopold Stieglitz, of New York, able scientist and brilliant diagnostician, brother of Professor Julius Stieglitz, who teaches chemistry at Chicago University, says, "We need a Pasteur to solve the cancer problem. That task calls for a man of preconceived notions and prejudice; not a man of medical training, seeking to explain cancer according to old methods."

The ignorant sometimes ask, "Of what real use is science?" Bismarck taking five billion francs from France, after the war of 1870, thought he had reached the limit. Dr. Stieglitz reminds you that the cash value to France of Pasteur's discoveries far exceeds five billion francs, to say nothing of his work against human disease and suffering.

What Dr. Stieglitz says of Pasteur and the cancer problem, encourages

**RELIEVING THEMSELVES.**

Practically everybody would be glad to see some practical means of farm relief brought about by legislation, but the wise farmer is not depending too much on politicians for a betterment of his condition.

Some instances in which farmers have successfully sought relief through better methods are related in a recent magazine article which gives food for thought. Here are a few:

John D. Brader, of Oswego, Kan., rented out three-fourths of his land seven years ago and devoted the rest to dairy cattle and poultry. From 17 cows and 350 hens he cleared \$2,600 last year. Fifteen years ago he was a renter; now he owns his farm and is president of a bank.

A. E. Nelson of Gopvick, Minn., found a few dairy cows profitable, so he increased his herd, likewise increasing his monthly milk check to an average of \$308.

Henry Hageman of Emmet County, Iowa, got out of the beaten path by raising 50 acres of beets which brought him \$3,600 last season.

William Molison, another Iowa farmer, raised a big flock of poultry in connection with his other farming operations and made money.

In many sections of the South the "cow, sow and hen" are bringing prosperity to farmers who formerly grew poorer and poorer through depending on cotton alone. In every state many progressive farmers are bettering their condition by similar means.

There is no denying that agriculture is in a bad way generally, but a better planned farm program would enable many farmers to overcome this condition to a great extent.

men of no special training. Clear thought and accurate observation work wonders. The inventor of the sewing machine did not know how to sew. Had he known, it would not have occurred to him to put the eye of the sewing machine needle in the point of the needle, rather than in the old place, farthest from the point.

That one idea made the sewing machine possible.

Mussolini, wiser than superficial critics in America, has only praise for moving pictures. Quite accurately, he classes them among the greatest agencies for the education of mankind. The other two are moveable type and photography.

**Every Woman Knows**

Every woman knows how easy it is to burn or scald herself while working in her home. Every woman knows that these burns and scalds are painful and sometimes very slow to heal. Every woman should know that the pain of burns and scalds will be quickly relieved, infection positively prevented and speedy healing assured if Liquid Borozone is instantly applied. Get a bottle of Liquid Borozone and keep it handy in your medicine cabinet. Sold by City Drug Store.

**Slaton Couple, Married 53 Years  
Enjoying Good Health; 37 Descendants**

Laying claims to being among the oldest, if not the oldest, married couple in Lubbock county, Mr. and Mrs. J. F. Berry, of Slaton, state that they were married more than fifty-three years ago.

Following the appearance, in a Lubbock county paper, of a photograph of Mr. and Mrs. R. S. Patterson, of Lubbock, who have been married fifty-two years, and who are to be complimented on their advanced ages, Mr. Berry dropped into The Slatonite office early this week and stated he believed he could go Mr. and Mrs. Patterson "one better".

Mr. and Mrs. Berry, who live at 105 Garza St., here, came to Slaton three years ago from Princeton, Texas, having moved to that community in 1899 from Mississippi. They are the parents of nine living children, seven daughters and two sons. Two of the daughters, Mrs. T. O. Petty and Mrs. O. N. Aleorn, live in Slaton. They

have twenty-eight grandchildren living, Mr. Berry states, some of whom they have never seen.

Interesting features in the married life of Mr. and Mrs. Berry are the facts that, as he states, they have spent less than two hundred dollars for meats since they were married; spent less than that for doctor's bills, and, during the entire fifty-three years have never asked for credit. Mr. Berry states, also, that he was never arrested, and never was sued during his lifetime, laying behind him a remarkably good record. Until advanced years forbade it, they have always taken active parts in church work, Mr. Berry stated.

Mr. Berry is seventy-five years of age, and Mrs. Berry is seventy-one. She was born on the first day of the week of the first month of the year, seventy-one years ago; Mr. Berry stated.

**OF INTEREST TO WOMEN.**

"A large portion of our earthly ills are due to faulty diet, and he who limits himself to bread, meat, potatoes and sugar is bound to suffer certain bad results," declares Miss Lola Blair, Food Specialist in the A. and M. College Extension Service, in outlining food and health programs for women's home demonstration club for the coming year. "Milk, fruit and vegetables furnish the large share of the phosphorus, calcium and iron in our food and when combined with eggs, meats and grains they form a balanced diet."

The essentials of an adequate diet as suggested by the Division of Rural Research, Texas Agricultural Experiment Station, furnish the basis of a dietary program to be pushed by Texas home demonstration agents this year. This adequate diet consists of 1½ pints of milk daily; at least one serving of butter, whole cereal and starchy vegetables each day, and leafy vegetables at least three times per week. Every person should have two servings of fruit daily of which one should be raw, and three times during the week some citrus fruit or tomatoes

(fresh or canned) should be eaten. Of protein-rich foods such as meat or eggs or cheese or beans or peas or nuts, a person should have one serving of any two of these daily. If these essentials are observed, say these authorities, a person may consider himself to be keeping to a fairly good diet.

**Would Finish at T. C. U. in 51 Years At 5 Courses Yearly**

FORT WORTH.—If a student should enter Texas Christian University with the beginning of the fall semester of 1928 with the intention of taking every course now offered by the University at the rate of five courses a year, it would take him fifty-one years, and he would still lack one half-year course at the opening of the 1979-80 school year. This is according to the fall catalogue of T. C. U., which shows 161 half-year and 175 full-year courses now being offered.

The school of fine arts leading the university in the number of courses offered with 40, and Brite College of the Bible is a close second with 39. The department of business administration offers 19 courses and the English and sociology departments offer 18 each.

The department of economics and the department of mathematics each give 17 courses for the year. Sixteen courses are catalogued in each of the history and government departments, and both the home economics and French departments offer 13 courses. Spanish and public speaking offer 14 courses each. The departments of biology and geology offer 20, Greek 4, Latin 3, German 5, Chemistry 10, Bible 8 (not listed elsewhere), school of education 12, (not listed elsewhere), and physical education 5. The philosophy, physics, journalism, psychology departments each offer 7 courses for the year.

**Big Cotton Yield Made by Rotation**

More than a bale to the acre on six acres of old corn land and only one-third of a bale to the acre on land devoted to cotton for the last three years is announced by a San Patricio county farmer, C. B. Elliott of Odem, who has conducted this crop rotation demonstration with P. Donald, the county agent. The acre yield on the demonstration was 665 pounds of line and on the old cotton land the yield reached only 167 pounds of line per acre. The six acres of cotton grown on old corn land netted a profit of \$718.20. The land on both tracts was prepared, planted, cultivated and treated the same throughout the year. It was disced and listed last fall, planted the last of February to good seed, cultivated six times, and chopped out and hoed once.

Mr. Elliott declares he is not so proud of this demonstration cotton yield, however, as of the 100 White Leghorn hens left him after a culling demonstration last fall, and of two Jersey cows. He says the hens and cows have fed and clothed his family of three and kept them in ice for the past year.

**Nut Pusher is in Sight of Goal**

HARLINGEN, Nov. 21.—If Bill Williams' nose pushes a peanut across a finish line here at 11 A. M. tomorrow, as scheduled, he will be greeted by a brass band, mayors of two cities, county officials, and a big crowd.

At that hour tomorrow Williams plans to end his 11-mile peanut pushing stunt on the eleventh day—and all because he lost an election bet on Governor Smith. Williams started his trek at Rio Hondo, 11 miles away, and when he quit tonight he was within finishing distance of Harlingen.

Hard luck pursued the valley's nasal peanut pusher. Sunday, he was hit by an automobile, and he has been hard pressed to find cotton gloves or goobers as durable as his nose. He wore out 15 peanuts and 11 pairs of gloves, and worked overtime Sunday without "getting time a half pay, although I am a union man," as he puts it.

**Oakland Has "Oil Wetted" Air Cleaner**

Efficient muffling of carburetor "hissing", reduction of fire hazard and practically 100 per cent air cleaning are advantages claimed for the new type "oil-wetted" air cleaner used as standard equipment on the latest Oakland All-American Six.

The cleaner, attached to the intake of the larger carburetor, is composed of a porous mass of oil-wetted copper ribbons enclosed in a metal cylinder through which air is drawn, according to research engineers of the AC Spark Plug company, makers of the cleaner, in a report to the Oakland Motor Car company. "In passing through the pores of this filtering mass," the report continues, "any dust particles come in contact with the oil surfaces and are retained by them."

"When attached to a carburetor, this type of cleaner acts as an efficient muffler because the dense mass of filtering material breaks up and diffuses sound waves before they are projected out of the cleaner. The result is that all of the objectionable hissing noises so common with unprotected carburetors have been practically eliminated."

"Another distinct feature of the oil-wetted type air cleaner is that it will minimize fire hazard. The Underwriters' report in this connection says, in part:

"Backfire test showed that the backfire flames are completely arrested in the cleaner and will not reach the engine compartment. Repeated and severe backfires failed to ignite flammable material held within an inch of the shell."

"Inasmuch as a large number of automobile fires have been traced to carburetor backfire, it is thought that the attachment of a properly designed cleaner to the carburetor air intake will materially assist in decreasing the number of fires."

In summarizing, the report says: "The device is practicable from the standpoint of operating, installation and maintenance; is sufficiently durable to withstand carburetor backfire flames to the engine compartment."

"When necessary to be cleaned, the filter unit may be removed and easily and thoroughly washed by moving it up and down in a pail of gasoline. Re-oiling is accomplished by simply applying oil with an oil squirt can through the air outlet to the filtering material."

"The cleaner element should be re-oiled at least once a year under ordinary driving conditions, and more under especially severe conditions."

**T. C. U. Student in Cross-Continent Race**

FORT WORTH.—Homer Shipp, of Ranger, Texas, freshman in Texas Christian University here, was one of the runners last spring in C. C. Pyle's cross-continent race from Los Angeles to New York. Shipp was forced to drop out of the race in Arizona on account of a bad knee, although he continued with the party as far as Ohio as trainer for Kenneth Campbell, another entrant from Ranger. Shipp was winner of the Oil Belt athletic medal in 1925 and district winner for two years in the Interscholastic League Meet, representing Ranger.

**CIRCLE THREE MEETS.**

Circle No. 3, of the W. M. U., of the Baptist church, met Monday afternoon at the home of Mrs. F. D. Young, with twelve members present. One new member was elected.

The Circle will meet next Monday, Nov. 26, with Mrs. D. W. Liles. Every member is urged to be present and bring their packages for Buckner's Orphans' Home. The lesson for the afternoon will be the book of James, with Mrs. Jarrett as teacher.

Reporter.

**Educators to Meet At Lubbock Saturday**

The County Board of Trustees of Lubbock county has called a general get-together meeting of teachers, trustees, educators, administrators, etc., for Saturday, Nov. 24, 2 P. M., at the Lubbock County courthouse. Representative-elect, Hon. Carl Rountree, Lamesa, has agreed to appear on the program. Likewise, Dr. A. W. Evans and Prof. J. T. Shaver of the Tech College will make addresses. Hon. Pink L. Parish has been invited and will attend if possible. Likewise, Supt. M. H. Duncan, Lubbock City Schools, will make an address, if he is in town. Other out-of-town speakers have been asked to appear on the program. Invitations have been sent to all the adjoining counties and towns requesting that representatives be in attendance.

The nature of the meeting will be to formulate an educational program to present to the next legislature for consideration, it was stated, as it is believed certain vital changes are desired in the present school laws.

At this meeting opportunity will be afforded everyone to express his views regarding the school laws of Texas, and to offer his suggestions for remedial statute. Superintendent Marrs has a program before the people, and the plan will be discussed at the meeting.

**TEXAS COLLEGE GIRLS TO COMPETE IN ATHLETICS AT T. C. U.**

FORT WORTH.—Seven Texas Colleges have, to date, accepted the invitation sent out by the Women's Athletic Association of Texas Christian University to attend the Texas Athletic Conference of College Women, to be held at T. C. U., Dec. 6, 7 and 8.

The schools accepting are: East Texas State Teachers' College, Commerce; Southwest Texas Teachers' College, San Marcos; West Texas State Teachers' College, Canyon; Baylor College, Belton; Marshall Junior College, Marshall; South Texas State Teachers College, Kingsville, and Texas Woman's College, Fort Worth.

It is expected that at least ten other schools will participate in the conference.

**STYLE GREATER ASSET THAN BEAUTY.**

"A woman does not have to be slender to be chic, but she must study herself and determine the lines best suited to her type, then select a model which is smart and correct for her type. Present styles can be adopted by the large woman. There are a great many side drapes used today which are especially good for the stout woman. Surplice lines are kind to the woman of ample proportions, and verticle lines which extend from neck to hem, the use of panels, loose draperies, rows of buttons and plaits are very becoming to the stout woman," so Mrs. Doris R. Barnes, clothing specialist in the A. and M. College Extension Service explains.

"The woman with over-developed legs should not wear skirts which are too short. V neck lines and deep neck lines are usually becoming to the large figure, and fitted garments which cling but are not too tight tend to reduce one's size. It is very important not to over-fit, for example: A large arm will look larger if the sleeve is too tight. Tightness at the top of the hip is correct at present but there should be ease everywhere else."

"High lustre materials should be avoided by the large woman. She should likewise shun a sharp contrast of color when it breaks the figure horizontally. The short necked woman should try to increase the apparent length of this connection, and the narrow shouldered woman should try to get the effect of more breadth by use of raglan sleeves, bertha, drop shoulders, etc. By increasing the apparent width of shoulders the apparent size of the hips is reduced."

"All accessories should be selected to bring out the best lines. The person of short neck and double chin should never wear a choker necklace but a long string of beads. All these things are important, for woman's dress aids her progress by giving her self reliance and self respect."

Material arrives daily at Crowell for construction work on the Lee Highway. A car of steel to be used in reinforced concrete work on culverts and bridges is the latest to arrive. Work on this stretch of the highway is progressing rapidly.

**SQUEEZING AN ACRE.**

One acre of land in Shelby county, planted four successive years to cotton by Ray Dickson, a club member, has made a total of 9 bales of cotton, two of which were harvested this year. "The trick has been turned," Ray says, "by plowing under all green vegetation in the fall, plowing well in the winter, fertilizing at planting time and applying a side dressing of 300 pounds of Chilean nitrate of soda and 25 pounds of muriate of potash after the cotton was up a few days. I also poisoned for boll weevil and found that my cotton began making again after I had done so." This boy produced 930 pounds of line cotton this year on the acre which netted him more than \$200. He has been a club member five years and last year won a Santa Fe trip to Chicago.

**SIX CLUB BOYS MAKE COTTON RECORD**

Six Rusk county 4-H club boys, each growing one acre of cotton have collectively produced more than eleven bales of cotton from the six acres, with no boy making less than 2000 pounds of seed cotton per acre and one of them, Marvin Kelley of Minden, gathering 3272 pounds from his acre. A total of 14,363 pounds of seed cotton were gathered, the cost of production averaged \$23.90 per acre, and after all expenses including rent of land were paid, a total net profit of \$1,003.89 was left. The average profit made per boy amount to \$167.31 per acre. This outstanding success is attributed by the county agent, B. F. Gray, to the fact that these boys followed instruction faithfully by carefully preparing their land early, fertilizing generously and cultivating frequently.

A premium of \$3.85 per bale has been paid for one variety cotton of certified seed grown to the extent of 4000 acres this year by farmers in three Victoria county communities and pooled and sold cooperatively. This project was launched by the Farmers' Luncheon Club of that county in cooperation with H. B. Ross, the county agent, who states that already 10,620 acres have been pledged by farmers for producing nothing but this standard variety next year. A goal of 20,000 standardized acres has been set by the club for 1929.

**SOME STRAIGHT REASONING ON THE ROAD BOND ISSUE.**

In Lubbock County, where we are to vote on a road bond issue on December 1, amounting to \$2,004,000.00, there are a few people who are fighting the bond issue. This was to be expected, for we never find all the people agreed on any proposition.

It seems that practically all the opposition is outside of the eastern half of Lubbock County, the section in which Slaton is located, and therefore the main reason for opposition lies in the fact that Slaton, Union, McClung, Acuff, Idalor, Canyon and Becton are getting some roads under the proposed issue. This, and the factors incidentally connected with this feature, is the basis of virtually all the opposition to the bond issue, according to the information obtainable.

Certain groups in the county have been advancing what they think, or what they apparently think, are reasons for opposing the bond issue. If their objections are actually good reasons for opposing the bonds, then they are worth the consideration of every voter in the county. If they are not good reasons, they do not deserve serious consideration on anybody's part. Let's see what the facts are with reference to some of the objections that have been advanced.

Here is a list of the main objections that have been advanced, and we will take each one separately for a short discussion:

1. "That high-priced cheap roads are disgusting, as evidenced in East Texas counties where they have been built and where they have lasted for only five or six years after the bonds were voted."

Now, let us first understand that no "high-priced cheap roads" are to be built under the proposed bond issue. The county roads are the ones referred to, because the estimates prepared by state highway engineers provide for concrete roads or better, and probably no one would call such roads "high priced and cheap."

All right. Estimates for the county roads have been made to provide for an 8-inch Caliche Macadam base with a two-course inverted penetration asphalt topping. Are these high-priced and cheap? They are exactly what Tom Green County is now building under state and federal supervision and with aid from these two sources on their state and federal highways. If state and federal engineers believed these roads to be

high-priced and cheap in quality, would they approve the granting of aid in building these roads? Most certainly not. The state and federal highway departments have long since stopped giving aid on roads where expensive "cheap" roads are being built.

And, we should remember that our county roads will not have nearly so much traffic to bear up under as will those state and federal highways in Tom Green County. Perhaps we are all agreed now that there are no high-priced "cheap" roads included in the proposed bond issue in this county.

2. "That the proposed bond issue is too large."

Is it? We do not think so. Our taxable valuations are large enough to stand much more than the bonds proposed, if we wanted to vote larger bonds, and when we have approved the proposed bonds we will still be far below the tax levy for road bonds that many other Texas counties have already adopted and that have found their investments highly profitable. Lubbock County will be getting roads costing \$4,000,000 for an expenditure of just a little more than \$2,000,000, due to the state and federal aid roads included in the project. We have always considered half price a big bargain on any article that was worth the price ordinarily asked for it, as is true of good roads. How can we afford to turn down such a fine bargain?

3. "Interest on the bond issue will be too heavy, all the bond issue money going away from the county never to return, and the taxes will be doubled in this county."

These arguments are childish, just to be frank about it. How were our railroads built? By money secured from the sale of bonds and stocks on which interest is paid, just as in the case of these roads. Was it good business for the railroads to build on this basis? Certainly, because with the roads in operation they could make enough money to pay off the indebtedness plus interest and still have legitimate profits left. The same principle applies to the building of electric power lines, natural gas lines, large hotels, big office buildings and numerous other gigantic development projects. And the same principle applies to the construction of permanent, good roads, such as Lubbock County is to have under the proposed bond issue.

It is not true that all the bond money goes outside of the county, never to return. In fact, practically all of the bond money used in building roads stays right here in the county, in the form of good roads for our use and for the use of future generations. And don't forget that the type of roads now proposed for Lubbock County will be here in good condition when the present voters have gone back to dust. They are permanent, high quality roads. And, the interest we will pay on the bonds will be only a small part of the profit we will realize from the use of good roads, while the remainder of that profit will be "velvet" which we can stuff down in our "jeans" or use to buy a new home,

new living room furniture, a new car or what-not.

The taxes will not be doubled, and such a statement is wrong on the very face of it. Actual facts and figures, which do not lie, show conclusively that the tax rate for these bonds can never be more than 53 cents on the hundred dollars valuation. That will more than provide enough money to retire the bonds, interest and all, over the period of duration. The chances are very strong that this rate will never be levied in any single year, because valuations are steadily growing due to new improvements and building in the county, and also because not all of the bonds can possibly be sold before the expiration of five or six years. We must first get state and federal aid on our main highways before the bonds can be sold, and that will take a good, long time. The county roads can be built immediately, and for the first several years after we vote the bonds we will be paying taxes on the bonds for these roads only.

4. "We would lose the state and federal aid and the roads would wear out in five years."

We have never thought we could get state aid on the county or lateral roads. That has not even been considered. But, the construction of these roads will have no bearing whatever upon our getting state and federal aid on the state and federal highways. This aid will be available as fast as

the state and federal governments can give it.

The roads will not wear out in five or six years, because concrete roads don't act that way, even on crowded and heavily traveled highways in the densely populated centers of the United States. Furthermore, the county or lateral roads will not wear out in that time, nor in several times that period, for such roads have been approved for state highways in other parts of the state, while in our county the traffic will be much lighter over roads of this type.

5. Someone has advanced the idea that "we don't like to give the other fellow (Slaton) a bonus in order to get them to favor the bond project."

Slaton will not be getting a bonus in the proposed bond issue. We will only be getting what we are justly entitled to. Lubbock will be getting eight roads, all of them state highways. Slaton will be getting five roads, two of them very short, and only two of them, that is those going out two directions, being state highways. The western half of the county will get three state highways paved, while the population there is only one-fourth that in the eastern half of the county. Taxable valuations are heaviest in the eastern half of the county. Where does a fellow get that stuff about giving Slaton a bonus? It just isn't so. Slaton is entitled to all that is proposed, and Slaton people, together with the other folks in the eastern half of the county, will support the bond issue "tooth and toe nail" to get

**TAX THE LOAFER.**

Theoretically, the perfect tax would be a tax on inaction. The proper man to tax would be the loafer, not the worker; idle land, not used land; inactive capital, not active capital; lack of enterprise, not enterprise.

Such a tax would not be practical, but it would be a just tax.

Our present taxes are based on an opposite theory.

We tax thrift, action, capital, enterprise.

We levy taxes in proportion to ability to pay, which means that the harder a man works, the more we tax him; the more thrifty he becomes, the more we soak him; the more efficient

he grows, the more we knock him down.

If a man saves his money and buys a house, he is taxed; if he wastes his money in extravagant living, he is not taxed.

None of our taxes encourage production by the simple process of discouraging idleness, shiftlessness, inefficiency.

The devil himself could not do a neater job of hobbling the race.—Fort Atkinson, Wisconsin, Journal.

## Slaton Boys Make Good on Simmons Gridiron Team

ABILENE, Nov. 20.—Curtis Hamilton, former guard on the Slaton High School Tiger football team, played his first full varsity football game Saturday when the Simmons Cowboys defeated the Texas Tech Matadors. Hamilton, who has been working steadily on the Simmons squad finally broke into first string ranks and played a creditable game throughout at right guard for the Cowboys.

"Red" Bennet, center, another former Slaton man, has been showing up well with the Cowboys also and proved to be a sensation at defensive center in the Armistice day game with the Trinity Tigers last week.

These Slaton boys promise to be some of the mainstays of the Cowboy teams of the future.

### WHY BLAME THE CAT?

In the good old days when grandma and grandpa were young, it was considered an ill-omen to have a black cat cross one's path. Doubtless many of the dear old folk would exclaim, "I told you so," if they heard the story of John Coffey, reported from Muskogee, Oklahoma.

Apparently the black cat of this tale crossed Farmer Coffey's path at a very inopportune moment. The farmer, in attempting to light his pipe, broke the match, which dropped into a kerosene can. An unfortunate accident for the cat. The explosion that came instantaneously ignited the poor feline and it scampered frantically for the barn, where it was consumed by flames along with the building and the hay stored in it.

"A black cat—I told you so" yes, but why blame it on the cat? Why have an open can of kerosene standing about and why light a match near such a can? Common sense dictates that all inflammable and explosive liquids should be kept in tightly closed metal containers and in a safe place. The black cat from his happy hunting grounds knows they are dangerous, and the National Board of Fire Underwriters supplies figures showing that the annual fire loss from careless handling of petroleum and its products was over \$14,000,000 in 1926.

J. S. Neely, of Winters, who was a member of the West Texas Chamber of Commerce Agricultural Motorcade to California in September, produced three peppers which placed together measure twelve inches. He is producing 400 to 500 bushels of peppers per acre.

### OLD BELL IS USED FOR GIRLS AT T. C. U.

FORT WORTH.—The bell that rings at Jarvis Hall at Texas Christian University each morning to awaken the girls is as old as the school itself. The bell was used back in the '70s and '80s at Thorp Springs, was taken to Waco when the school was moved there in 1895, and was brought to Fort Worth in 1910 when the school was again moved.

One Hallowe'en afternoon a few years ago the bell disappeared. Search as she might, Mrs. Sadie Beckham, supervisor of girls at T. C. U., could not find the bell. About thirty of the girls had been invited to a Hallowe'en party in Fort Worth, and Mrs. Beckham calmly announced that no one would go to the party until the bell was returned. "By the time every one was ready to go to the party the bell was standing in its place on my desk," Mrs. Beckham relates.

"One of the reasons why the bell is disliked by some of the girls," explains Mrs. Beckham, "is because it brings them in from their dates to study hour each evening. It is so hard for them to leave."

Girls who have finished at T. C. U. and return for a visit invariably ask about the bell. One girl, recently back at T. C. U. for a visit, told Mrs. Beckham, "I didn't think I would ever live to see the day that I would be glad to hear that bell ringing, but I am now!"

### COUNTIES REPRESENTED AT TECH NUMBER 161

LUBBOCK, Texas.—Of the 1,809 students enrolled in Texas Technological College this term, 1,728 are from Texas and 81 from other states. There are 161 counties in Texas represented in the student body, including every section of the state. There is hardly a county in the northern half of the state which has not one or more representatives.

### Unintentional Suicide

Many people are slowly poisoning themselves just as surely as if they drank iodine every morning for breakfast. They are daily absorbing the toxins, or poisons, created by accumulated waste matter in their congested digestive systems. Sooner or later disease will conquer their weakened bodies.

If you have dizzy spells, headaches, coated tongue, bad breath, insomnia, no appetite, bilious attacks or pains in the back and limbs, you are probably suffering from self poisoning caused by constipation. The surest and pleasantest relief for this condition is Herbine, the vegetable cathartic which acts in the natural way. Get a bottle today from

City Drug Store.

### THINKING OUT LOUD!

By Samulman.

There are three new women members in Congress now, Mrs. Ruth Pratt, Mrs. Ruth Hanna McCormick and Mrs. Ruth Bryan Owen. Glad to hear Congress won't be Ruthless.

After all that has been said about it these past months, we wonder how many people really understand what the equalization, fee is all about.

A Texan claims to have invented a telephone that will answer and tell you so when the person you are calling is out. Now for someone to invent a telephone that will answer and tell you so when the person you are calling is in!

A Cincinnati employer says that blondes work harder than brunettes. Well, some of his most industrious helpers may really be brunettes without his knowing it!

Naturally, all the women stars are showing great anxiety to get into the new talking pictures.

The feminine "bloc" is quite strong in Congress now. Let's hope it doesn't prove to be a "block".

Now at last there is some real farm relief! The farmers are no longer reminded of their plight over the radio every single night.

Now that Gene Tunney has definitely retired, Jack Dempsey may come back to the ring after all!

We know a newspaper man who thinks Hoover's election was just a publicity stunt for a certain vacuum cleaner company.

### How Much Water Should Baby Get? A Famous Authority's Rule

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day, and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these are either the babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

### COUNTY CLUBS WILL HAVE FOOD SALES

The County Home Demonstration Clubs of Lubbock county will have a food sale at Lubbock on Saturday, Nov. 24th, for the purpose of raising money for the 1929 year books. All the clubs will participate in this sale except the clubs near Slaton (City Line, Posey and Union) who will have a similar sale at Slaton, Dec. 8th.

This sale will be held in the Davis Bros. Frigidaire building on Broadway and will begin early in the morning. There will be a great variety of foods, such as good fresh butter, dressed chicken, canned chicken, vegetables, etc., fresh eggs, candy, cakes, pies, cookies, doughnuts, etc., preserves, jellies, etc., and plum puddings.

This is the first sale of the kind that the Home Demonstration clubs have had this year, and they urge their Lubbock friends to plan to buy something from this sale for their Sunday dinner.

Thirty cents per pound is the price live turkeys are bringing in Childress. Reports from the Childress Produce Co., say the supply will be about the same as last year. The demand from the wholesale companies is good at this time, but local demand is not heavy.

The new \$16,000.00 school building at Ira is the culmination of a system of schools that started as a dug out, then became a one-room school, later with additions, and finally the fine brick building that is Ira's today. The opening was attended by officials and visitors.

## Older Folks Need SMAX

It Builds Energy and Health

SMAX, the All Wheat Cereal, is the ideal food for older folks.

It contains all the Bran, nature's laxative, as well as the strength and energy giving parts of the wheat and is easily assimilated.

Easy to prepare—cooks in 3 minutes—and is so delicious.

## The Early Bird Gets The Worm!

The early Christmas shopper gets the pick of the gifts.

### Cedar Chest Time Is Here!

We have a nice assortment of those well known Hamblen Cedar Chests, made of Tennessee red cedar, ranging in price from \$10.75 to \$18.50.

A beautiful line of odd chairs, many designs of smokers, all colors in Couch Pillows, several styles in End Tables and Foot Stools.

### THE LARGEST ASSORTMENT OF FLOOR LAMPS IN TOWN.

All of these are ideal for Christmas gifts. If you care to, you may buy now and have the gift delivered on Christmas Eve.

Don't wait 'till the freezing weather forces you to buy a heater, then run down town and buy the first one you see. We want you to look at all of the heaters in town, then come to us.

**New Chevrolet Six  
Will be Seen Sat.**

DETROIT.—Motoring America will be on its tip-toes Saturday as two of its largest metropolitan centers will be viewing for the first time the sensational new valve-in-head six cylinder Chevrolet, which was announced November 16. Interest was keyed to a high pitch in New York and Detroit as the financial and motor capitals of the country respectively, prepared to greet this most advanced offering of the world's largest automobile producer for 1928.

The two advance showings will open simultaneously at noon Saturday, Nov. 24th, the New York premiere to take place in a brilliant setting in the Waldorf-Astoria Hotel and the Detroit debut in the Auditorium of the General Motors building. Both showings are to continue up to and including Thursday, Nov. 29th.

Meanwhile the gigantic Chevrolet manufacturing organization is applying itself to a heavy production program so that cars may be shipped to dealers starting December 15 and deliveries to the public may begin promptly January first.

Chevrolet's dealers are in readiness to take care of a deluge of advance orders. For several days prior to the announcement the sales division of the company, under direction of R. H. Grant, vice-president in charge of sales, made use of every information medium available in preparing dealers and salesmen for the advent of the new six.

Tons of literature have been mailed from Detroit, fully descriptive of the new product. Lighted shadow boxes with full color illustrations of the new models, and slide films for projection on the screen or wall of a darkened room, are proving invaluable assets in disseminating the facts. Special talking records, so timed as to synchronize with the slide film pictures and descriptions are also being used and have proved to be just another instance of the ingenuity the sales division exemplified in getting all the facts to its dealers and salesmen for use during this announcement period.

In the company's announcement of "a six in the price range of the four," there was indicated a smashing triumph for quantity production. It pointed out that the new car with the advanced features it embodies, was made possible at its price chiefly through the influence of great volume production. W. S. Knudsen, president and general manager, stated on the announcement that only volume production made possible by the tremendous popular reception accorded Chevrolet in recent years enabled the company to offer a car with the speed, acceleration, power and smoothness of six cylinder performance at practically the same price that contributed so much to the world-wide popularity of the four.

So that the entire country might have an opportunity of seeing the new car before it goes on the road, January first, the Chevrolet Motor Company arranged a series of eleven advance showings in as many leading cities strategically located throughout the country. The showings now under way will take the form of an elaborate miniature automobile show with attractive settings and suitable entertainment features. Provision has been made to accommodate more than a million people who are expected to attend one or other of the showings that will take place from coast to coast from now until December 22. Included in the legion of automobile enthusiasts who will be in attendance during the course of the showings will be 20,000 Chevrolet dealers and salesmen, many of whom will travel 300 miles or more to be present at the various premiere showings of the new Chevrolet.

Immediately following the advance showing in New York and Detroit, there will be three other important showings. The New York cars will go to Washington for a gala opening at the Mayflower Hotel in the Capitol city, December first. This showing will continue up to and including December 4.

Meanwhile the Detroit display will be moved to Chicago, where the mid-western metropolis will see the new Chevrolet line December 1-6 inclusive. This particularly elaborate exhibit will take place in the Pure Oil Building at Wacker Drive and Wabash Avenue.

The Pacific Coast will get its first glimpse of the new line on the same day with Washington and Chicago, when the Los Angeles display is opened in the Auditorium of the Ambassador Hotel. The time required to ship cars from the Flint, Mich., factory to Los Angeles accounts for the fact that the showings on the western coast will be seven days behind the New York and Detroit premieres. Los Angeles showings will continue through December 1-6.

San Francisco showings in the Capitol city will be held December 1-6.

**World News Told  
In a Few Words**

**A Money Machine!**  
St. Louis, Mo.—James Chapman, 42, Negro, made from \$3 to \$10 daily selling "black cat wishbones".

But that wasn't enough. He sold a Negro couple here a "money making" machine, which he said would turn out legal tender. He charged them only the \$100 tax which he said the government levied for the privilege of manufacturing U. S. money.

The machine consisted of two pieces of wood bolted together and containing five fresh official \$1 bills. Now Chapman is under arrest on a warrant charging him with using the mails to defraud.

**Pig Keeps Him Out of Jail.**  
Watsonville, Cal.—B. C. Ethers appeared before Judge Webb on a charge of reckless driving, and pleaded to stay out of jail.

"Don't send me up, Your Honor," he begged. "If you wait until I fatten my pig I'll sell him for \$25 and pay the fine."

"How long will it take?" the judge asked.

"Two weeks, Your Honor," said Ethers.

The proposition was accepted—now Ethers is welcoming every pound of flesh his pig acquires!

**Widow Recognizes Skeleton by Gold Teeth**

Salem, N. J.—Mrs. Florence Burt McAllister identified a skeleton found in the woods near here as that of her husband, Frank, 39, who disappeared June 5. She identified him by means of bridge-work and gold teeth in the skull of the skeleton. The dental work was also identified by Dr. James Brown, a dentist.

When found, the hands and feet of the skeleton were tied with bits of clothing and rope.

**This Man Certainly Prepared for a Rainy Day!**

Paris.—M. Houplin went to an auction sale with the intention of preparing for a rainy day. The very thing he was looking for was put up for sale—an umbrella—which he secured for sixteen francs. After closing the purchase, Houplin found he had bought not one umbrella, but 92.

After making many presents, he still had six dozen umbrellas left and nothing to do with them. He tried to sell them, but was arrested for peddling without a license. He still has the umbrellas—but has sworn off auction sales for life!

will be staged in the Sinton Hotel, December 8 to 14, and then to Atlanta, where the Capitol city of the old South and the home of a new Chevrolet assembly plant, will greet the cars from December 18 to 22 in the Auditorium-Armory.

At the conclusion of its six day run, the Chicago exhibit will be moved to St. Louis for a seven day showing in the Arcadia Ballroom, beginning December 8. Dallas, in the center of the Lone Star state, will be next in line, receiving the St. Louis show cars on December 18, when the display will open at the Adolphus Hotel and continue until December 22.

San Francisco will claim the Los Angeles cars on December 8 when the Golden Gate display opens in Civic Auditorium-Larkin Hall for a six day run closing December 13. From San Francisco the west coast show cars will be shipped to Portland, Ore., where the Pacific Northwest will view the exhibition in the Public Auditorium from December 18 to 22.

**MAKING WINTER PROFITABLE.**

While winter time on the farm is often a "slack" season as far as farm work and income production go, it offers the opportunity to help make the farm more profitable, remarks the research department of the National Association of Farm Equipment Manufacturers. The long winter evenings offer the most favorable time of the year for the farm owner or operator to obtain a glimpse of what is going on in other parts of the country and to study new happenings and situations connected with production and marketing of the products he raises.

Never in the history of agriculture has it been more necessary for the farmer who wishes to be a success to keep posted on what is going on in the various phases of agriculture. New and improved crops and crop varieties are being discovered and developed. Improved methods of livestock and dairy production are being worked out by other farmers and college experiment stations. New machines to make farm work easier and more profitable are making their appearance. Often the only way the individual farmer can take advantage of these new improvements and discoveries as soon as they are available is to read about them in some farm journal, magazine, newspaper or experiment station bulletin. The radio and community Farm Bureau or Grange meetings form other mediums through which valuable information can be obtained, to be put into use during the following season.

Every state agricultural experiment station and the United States Department of Agriculture have published valuable bulletins on important farm subjects or problems during the last year or two. A two cent postage stamp will never yield larger returns than when placed on a card or letter addressed to your state college or the U. S. Department of Agriculture, asking for a list of available farm bulletins and publications. The ones you want can then be chosen from the list and they will be sent to you free of charge.

**JUNIOR R. Y. P. U. PROGRAM.**

**SUNDAY SERVICES AT PRESBYTERIAN CHURCH**

Sunday, Nov. 25, Sunday School meets at 9:45 a. m. Morning Worship at 11 o'clock. The Young People's Christian Endeavor at 5 p. m. Evening service at 7:15 p. m.

The theme for the morning hour is, "Man Fades as the Leaf"—Is. 64:6. In the evening on the subject, "Pray Without Ceasing"—1 Thes. 5:17. We are planning for great services on these occasions. Come and worship with us.

The public always has a cordial welcome at these services.

REV. JAMES RAYBURN, Pastor.

**RECORD MILO YIELD CLAIMED.**

"The biggest per acre production of maize ever reported in West Texas, where the grain was actually weighed out," is claimed for a Martin county 4-If club boy, Aubrey Reed, who weighed out 4390 pounds of threshed milo from his club acre. He planted his crop on the "two rows and skip one" method advocated by J. V. Bush, the county agent, who declares that in spite of a comparatively wet year such crops are out yielding the ordinary fields. Rupert Shrader, another club boy in that county also using the skip method made 96 pounds more of maize from two rows than his dad did from three rows. Bush believes the results will be still more convincing in drier years.

valued at about \$600,000,000 a year. Atlantic seaboard ports in between. The coastwise trade of Texas with

**Adults Contract Children's Diseases**

Adults can, and do, contract many children's diseases. And, usually, they suffer from them much more than children do. For instance, many adults contract worms, an ailment usually associated with children. Sometimes they suffer intensely and take expensive medical treatments, without realizing that worms are the cause of their troubles. Yet, the symptoms are the same as in children, loss of appetite and weight, grinding the teeth and restlessness, itching of the nose and anus, abdominal pain. And, the same worms that annoy and humiliate children, cause for adults—White's Anthelmintic, which you can get at

**ALFALFA HAY FOR WINTER EGGS**

Leafy alfalfa hay makes an excellent substitute for grass and other green poultry feeds during cold winter weather, advises the research department of the National Association of Farm Equipment Manufacturers. Laying hens need some sort of green stuff in their ration, poultrymen find, and alfalfa is often the cheapest, most practical succulent feed for winter use. Hay may be self fed to hens in racks made of poultry netting or it can be drenched in boiling water and fed hot. If it is ground before feeding there will be less waste and the hens will eat more. Hay can be economically ground on the farm by running it through a roughage mill or an ensilage cutter.

The coast line of Texas has a tidal short line of 624 miles and a straight-way mileage of 370 miles.

THERE is nothing that has ever taken the place of Bayer Aspirin as an antidote for pain. Safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get real Bayer Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red.

Aspirin is the trade mark of Bayer Manufacturer

**OF INTEREST TO WOMEN.**

**Nature's Cosmetics the Best.**  
Declaring that cosmetics are essential to health and beauty but that nature's brand is the best on the market and that the vanity case should be kept on the dining table rather than the dressing table, home demonstration authorities of the A. and M. College Extension Service are emphasizing gardens as the magic gateway to beauty. "Garden cosmetics should be applied internally for the most part," they say. "Rouge your face with carrots, spinach and turnip greens. Let your mirror be a dish of delicious vegetable soup and note the effect in a bevelled edge mirror. For sparkle in your eyes try boiled onions or spinach, for they contain phosphorus which concentrates in the beacon-like beam, one from each eye.

"Vegetables, both raw and cooked, fruits, fresh air and milk are the health givers that will aid woman in her eternal quest for beauty. The best face cream is cow's vanishing cream used daily. For a clear skin apply fruit juice and plenty of vegetables down the inside of the neck. Make your morning meal of oatmeal

**Suffering With SICK HEADACHES**

Mr. Charles F. Todd, of Esteburg near Waynesburg, Ky., says: "I was suffering with nervous headaches. About once a week I would have these headaches, and have to quit work, and go to bed for about twenty-four hours. I would have pains in my neck, and right behind my right ear. "A merchant at Esteburg told me to try taking Black-Draught, which I did. "It relieved me. From that time on, I would take Black-Draught as soon as I felt like I was going to have one of those headaches—and they wouldn't come on. "Every few weeks, I take three or four doses of Black-Draught, and I feel so well, and do my work, and don't lose any more time with headache." Get a package today.
