# The Slaton Slatonite

The Only Paper That Carries Full Reports of Slaton Activities.

Published Tuesdays and Fridays

VOL. XVIII Slaton, Lubbock County, Texas, Friday, January 4, 1929. Number 38.

## C. of C. Members Are to Help Form '29 Work Program

Members of the Slaton Chamber of Commerce will be asked to make suggestions, at the annual banquet next Tuesday night at the Slaton Club House, which will be used as a guide for officers of the body in outlining the program of work to be adopted for 1929, according to J. W. Hood, Chamber of Commerce president.

## Assessing Fine is First Duty of Bean As County Judge

The first duty of County Judge Robert H. Bean after being sworn into the office yesterday, was performed when he fined two youths \$1 and costs amounting to more than \$20 on a charge of disturbing public worship at Carlisle Sunday night.

## Remodeling Bldg. For Barrier Bros.

The T. M. George building, on Garza St., just north of the square, is now undergoing repairs and remodeling, preparatory to housing the Slaton store of Barrier Brothers, Inc.

## G. A. Cook Buys Feed Mill Here

The Slaton Feed Milling Company's plant, located on North Eighth St., was sold recently to G. A. Cook, it was announced early this week.

## DINNER AND THEATRE PARTY.

Miss Lorene McClintock was hostess to a few of her friends at a dinner and theatre party at her home on Eleventh Street.

## Howard Hoffman left Wednesday for Texas University to resume his studies, after spending the Christmas holidays with relatives and friends in Slaton and Lubbock.

Paul Houston and Frank Pohl have returned to S. M. U. to resume their studies in the academic department.

## Get Your Tickets; Attend the Banquet

If there is a single event during the year in which every citizen of Slaton should be and is vitally interested, it is the annual banquet of the Chamber of Commerce.

## Mail Delivery in Slaton Started on Wednesday Morning

Slaton now has free city mail delivery. The service began Wednesday morning, as per schedule, with three carriers in charge.

In spite of the expected handicaps connected with changing methods of handling the mail in the local office, incident to establishing city delivery, the work started off well for the first day, according to postal officials.

## Tax Collector Coming To Slaton on Monday

According to advices received this week by Slaton city officials, representatives of the Lubbock County Tax Collector's office will be in Slaton next Monday to begin making tax collections from people of this territory.

## Slaton-Idalou Cagers To Play Here Friday

Slaton and Idalou high school basketball men will play at the Slaton High School gym on Friday night of this week, according to C. L. Sone, superintendent of Slaton schools.

## Farm Returns Ought To Improve in 1929

Farm returns in 1929 should be better than in 1928, the January 1 Oklahoma Farmer-Stockman declares in a review of the farm outlook for various farm products during the coming year.

## VISITS SICK MOTHER.

B. E. Wilson, manager for the Kelly Produce here, returned Monday from Brownwood, where he was called late last week due to the illness of his mother.

Alvin O. White returned Monday from Cooper, Texas, where he spent the holidays with his parents and his children.

George Green and family returned early this week from Oklahoma, where they visited during the holidays with relatives.

# ANNUAL BANQUET OF CHAMBER OF COMMERCE TUESDAY NIGHT

## Dean Gordon, of Tech, to Speak; Change Place of Meeting to Club House Instead of High School; Officers to be Elected.

Final arrangements are rapidly being made for holding the annual banquet and election of officers of the Slaton Chamber of Commerce, next Tuesday night, Jan. 8, starting at 7:30 o'clock, according to J. A. Elliott, chairman of the committee.

Dean James M. Gordon, of Texas Tech, Lubbock, will deliver the main address, using the subject, "How Big Will Slaton Grow?"

Place of holding the banquet has been changed from the high school building, as originally announced, to the Slaton Club House, on West Garza street, according to the members of the committee.

A completed program is virtually ready, which promises to be interesting and snappy, committeemen said today.

Seven directors of the Chamber of Commerce board of directors for 1929 will be elected at the banquet session.

The attendance last Sunday is reported, as follows: High School, 33%, Miss Cary leading, with 57%.

## Attendance at Sunday School is Too Small, Sone Says

Superintendent C. L. Sone of the Slaton public schools expressed disappointment Tuesday morning at the small number of scholastics attending Sunday school last Sunday.

The attendance last Sunday is reported, as follows: High School, 33%, Miss Cary leading, with 57%.

## ROTARIANS TO DISCUSS Kellogg Peace Treaty

At the Friday luncheon this week, the Slaton Rotary Club will hear a discussion of the Kellogg peace treaty, recently signed by fifteen leading world powers, and designed to end, or at least hinder, occurrence of wars.

## MOVES FURNITURE STOCK.

The furniture stock of the Amarillo Furniture Company's store here, which closed recently, was moved to Lubbock Thursday by Williams Transfer and Storage.

## AT THE PRESBYTERIAN CHURCH.

Sunday, Jan. 6, 1929 Sunday School meets at 9:45 a. m. Morning Worship at 11 a. m.

Dr. and Mrs. V. A. Hartman and Dr. Hartman's father, all of Post, were the dinner guests of Mr. and Mrs. O. D. McClintock last Sunday evening.

## Express Delivery Started in Slaton Wednesday Morning

Free delivery and "pick-up" service was started in Slaton Wednesday morning by the American Railway Express company, according to W. H. Smith, local agent.

The service resulted from the cooperative work done in recent months by the local Retail Merchants' association, of which Mrs. Lee Green is secretary.

This makes it important that Slaton business firms co-operate in patronizing the express company so free delivery service can be kept in force, it is pointed out by officers of the organizations which secured establishment of the service.

The outside boundaries of the area of this city which is now included in the delivery and pick-up territory are given in the following: (All territory within these boundaries receives the service.)

Starting with Santa Fe depot, southwest on Texas Avenue to Seventh; south on Seventh to Garza; west on Garza to Eighth; south on Eighth to East Lubbock; west on Lubbock to Ninth; south on Ninth to Scurry; returning on Ninth to intersection with Lubbock; west on Lubbock to Tenth; returning on Lubbock to Ninth; north on Ninth to Garza; west on Garza to Tenth; returning on Garza to Ninth; northwest on Panhandle Avenue to Lynn; east on Lynn to Ninth; north on Ninth to alley between Lynn and Crosby; returning on Ninth to Lynn; east on Lynn to Seventh; north on Seventh to Crosby; returning on Seventh to its intersection with Lynn and Texas Avenue.

## Rotarians to Discuss Kellogg Peace Treaty

At the Friday luncheon this week, the Slaton Rotary Club will hear a discussion of the Kellogg peace treaty, recently signed by fifteen leading world powers, and designed to end, or at least hinder, occurrence of wars.

Speakers will be Ben G. Halloway and T. E. (Rod) Roderick. A quartet is to be given by J. Tom Overby, Chick Garland, Joe K. Rogers, and Horace G. Sanders.

## AT THE PRESBYTERIAN CHURCH.

Sunday, Jan. 6, 1929 Sunday School meets at 9:45 a. m. Morning Worship at 11 a. m.

The theme for the evening is, "The Race of Life," Heb. 12:1. The public has a cordial welcome at all of these services. Come and worship with us.

## Rotarians to Discuss Kellogg Peace Treaty

Speakers will be Ben G. Halloway and T. E. (Rod) Roderick. A quartet is to be given by J. Tom Overby, Chick Garland, Joe K. Rogers, and Horace G. Sanders.

## AT THE PRESBYTERIAN CHURCH.

Sunday, Jan. 6, 1929 Sunday School meets at 9:45 a. m. Morning Worship at 11 a. m.

The theme for the evening is, "The Race of Life," Heb. 12:1. The public has a cordial welcome at all of these services. Come and worship with us.

## Letters Sent Out Asking Farmers to Mass Meeting Here

Letters were being sent out by the local Chamber of Commerce today to many farmers and dairymen living in a large territory surrounding Slaton, asking them to attend and to get others to attend the mass meeting which will be held here at the city hall next Friday night, Jan. 11, in the interest of a milk plant to serve Slaton and surrounding country.

The letters were sent to school principals, trustees, and others in the various communities, asking them to have the meeting announced at public gatherings to be held in these communities between now and the date of the mass meeting, and to urge a large attendance from all communities.

A large attendance of farmers and dairymen is expected, at which session it is hoped by leaders that a definite plan of procedure will be decided upon to get the milk plant, according to J. H. Brewer, chairman of the milk plant committee of 18 men, recently appointed by the Slaton Chamber of Commerce to work on the project.

## Annual Report of C. of C. Will be Out in Few Days

The annual report of the work done by the Slaton Chamber of Commerce during 1928 will be prepared and issued in printed form for the benefit of Slaton citizens, and will appear within a very few days, officers of the Chamber of Commerce have said.

The report will show the largest amount of constructive work for this city and section that has ever been accomplished in a single year here, officers declare.

## Fite Takes Over Chrysler Repair Shop in Slaton

C. G. Fite, who for the past several years has been connected with the Slaton division of the Santa Fe as brakeman, has resigned his position, and has taken over the mechanical work of the local Chrysler dealers, it was announced this week.

## Rotarians to Discuss Kellogg Peace Treaty

At the Friday luncheon this week, the Slaton Rotary Club will hear a discussion of the Kellogg peace treaty, recently signed by fifteen leading world powers, and designed to end, or at least hinder, occurrence of wars.

## JUNIOR CIVIC AND CULTURE CLUB

The Junior Civic and Culture Club will meet Saturday, Jan. 5th, with Helen Clay, as hostess at the home of her parents on Lynn street.

Miss Marian McHugh, who is the daughter of C. I. A., returned, continue her year's work.

Dr. and Mrs. V. A. Hartman and Dr. Hartman's father, all of Post, were the dinner guests of Mr. and Mrs. O. D. McClintock last Sunday evening.

Miss Lucile Senor has returned to her home in Dallas after spending the holidays with her friend, Miss Grace Kennedy, saleslady at Cypert Dry Goods Co.

**NOTICE!**

I have bought the Slaton Feed Milling Company, and will appreciate your patronage. You will find that it pays to feed ground and mixed feeds. Our charges are liberal—service good.

**World's Largest Gas Container to Direct Aviators to Airport**

The world's largest gas holder, the property of The People Gas Light and Coke Company, will go into service in Chicago within the next few weeks. Built to hold 20,000,000 cubic feet of gas—5,000,000 more than the largest now in use—the new "tank" was erected at a cost of \$1,800,000.

The builders, who conferred with governmental agencies in planning beacons and markers for the structure, claim the devices for aiding airmen with which it is equipped are the most complete and up-to-the-minute in the United States. These costs \$65,000 and their maintenance will amount to \$1,500 a year.

Across the top of the holder, which is 283 feet in diameter, is painted in chrome yellow on a black background a broad arrow pointing to the airport two miles distant and the inscription: "Chicago Municipal Airport, 2 Miles," in 30-foot letters. The new holder is located at 73rd street and South Central Park avenue.

A 70-foot tower, surmounting the holder which is itself 416 feet high carries a 1000-watt electric light—red—visible for 15 miles in clear atmosphere. Additional red lighting is provided by 42 150-watt lamps, a cluster near the top of the tower, and two bands encircling the holder. The lights will be switched on and off automatically by an astronomical clock and a photo electric device controlled by the intensity of the lights in the surrounding atmosphere.

**TELEPHONE RESEARCH MADE TALKING MOVIE**

While it may not be clear just why the telephone industry is interested in the talking motion picture industry, the latter, as a matter of fact, is a by-product of research engineering carried on by the Bell Telephone System in the United States for the purpose of improving telephone communication.

Development of the talking movie involved the harmonious association of devices which are of use in telephony, although not in the particular ways required in talking motion picture work. Out of researches directed toward the improvement of the telephone transmitter and receiver has come various high quality transmitters. One of these is now employed in public address systems and is also in well-nigh universal use for pick-up in radio broadcasting. It also is responsible for the loud-speaking receiver now generally used in many different forms.

Out of researches underlying the telephone repeater itself came a wide range of amplifiers for speech and other uses, of capacities ranging from that of tiny "deaf" set, which can be carried in the pocket, to that capable of projecting the speaker's words to an audience of 90,000 persons. Combinations of these devices have been made, through research to meet various needs. Perhaps the best known is the public address system, another is a perfected phonograph, and these in turn have been merged by special adaptation to form a part of the talking motion picture system. The phonograph or talking motion pictures must employ large records capable of running fifteen minutes, equal to the time needed to display a reel of film. This, in turn, led to the production of a new reproducing instrument and method of cutting records. Then the principles used in accurately reproducing sounds in the telephone were applied to reproduction in the phonograph, resulting in the introduction of many new mechanical arrangements to produce perfect reproduction from a record, now known to the phonograph trade as "electrically cut".

Having perfected a public address system capable of filling any auditorium, also a perfected phonograph and the means for making high quality records, there remained only the combination of these two and a method of synchronizing, or timing, the phonograph record with the motion picture film.

**TERRACED LAND PRODUCES BETTER**

Haskell, Texas.—Demand for terracing work in Haskell county is increasing rapidly due to the experience of farmers there that terraced land produces from \$5 to \$15 per acre more than unterraced land. The past dry season has clearly demonstrated the value of terraces as a means of moisture conservation, the county agent, W. P. Trice declares. The kind most commonly used are level terraces having no slope as these have been found by experience and by the results of the Spur Experiment Sub Station to be superior to that country to the

**Dairy Farmers Find Profits in Better Feeding**

It is the extra two or three inches of milk at the top of the pail, which can be added by feeding well balanced rations, that determines the difference between profit and loss to the dairy farmer, agricultural authorities agree.

Making money in dairying is essentially a business problem. The farmer, like the storekeeper or manufacturer, has certain fixed charges or overhead expenses such as taxes and interest on investment in land, buildings, and livestock. If the production per cow is not sufficiently high, then almost the entire amount of the milk check may be required merely to meet these unavoidable expenses. If, however, production per cow can be increased only fifteen or twenty per cent then profits begin to put in an appearance.

These increases in production per cow can be effected on many farms by giving a little more attention to the feeding of well balanced rations. As a guide to dairymen for the present year, the Wisconsin College of Agriculture recommends the following scale for mixing dairy feeds:

Where timothy hay is fed good results may be secured with a mixture of 200 pounds of wheat bran and 300 pounds of linseed meal.

With mixed hay, the grain mixture should consist of equal parts of ground corn, ground oats, wheat bran and linseed meal.

With clover hay the ration recommended is 200 pounds of ground corn, 200 pounds of ground oats, 100 pounds of wheat bran, and 100 pounds of linseed meal.

With alfalfa hay, the mixture consists of 200 pounds of ground corn, 300 pounds of ground oats, 200 pounds of wheat bran, and 100 pounds of linseed meal.

Ground barley or hominy feed may be substituted for corn in any of the above rations. In feeding, one pound of grain mixture is recommended for each three pounds of milk for Jerseys and Guernseys and a pound of grain mixture for every three and one-half to four pounds of milk for Holsteins, Ayrshires and Brown Swiss.

**TESTING COWS.**

Hereford, Texas.—Cow testing in the association in Deaf Smith county reveals that in one herd one cow made a net profit of \$16.62 in five months while another made a profit of \$69.50. Six herds are under test and 10 boarder cows have already been sold off because of poor performance, R. O. Dunkle, county agent, reports.

In the last 20 years the American Telephone and Telegraph Company has increased the number of its stockholders from 7,500 to more than 400,000.

**CITATION BY PUBLICATION.**

The State of Texas.

To the Sheriff or any Constable of Lubbock County, Greeting:

YOU ARE HEREBY COMMANDED to summon F. M. Putty by making publication of this Citation once in each week for four successive weeks previous to the return day hereof, in some newspaper published in your County, if there be a newspaper published therein, but if not, then in the nearest County where a newspaper is published, to appear at the next regular term of the 99th District Court of Lubbock County, to be holden at the Court House thereof, in Lubbock, Texas, on the Second Monday in January, A. D. 1929, the same being the 14th day of January A. D. 1929, then and there to answer a petition filed in said Court on the 13th day of December A. D. 1928, in a suit, numbered on the docket of said Court as No. 3520, wherein Mrs. Mary Putty, is Plaintiff, and F. M. Putty is Defendant, and said petition alleging that plaintiff and defendant were legally married in Eastland County, Texas on or about the 27th day of October A. D. 1918 and defendant without any provocation whatever left and abandoned plaintiff, with the intention of finally separating and living apart from her, on the 1st day of March A. D. 1925, and such abandonment has endured for a period of more than three years and up to the time of filing of her petition herein. Plaintiff therefore prays defendant be cited to answer and appear herein and that she have judgment dissolving said marital relations, etc.

Herein Fail Not, and have you before said Court, at its aforesaid next regular term, this writ with your return thereon, showing how you have executed the same.

GIVEN UNDER MY HAND and the Seal of said Court, at office in Lubbock, Texas, this the 13th day of December A. D. 1928.

FLORA GREEN ATCHISON, Clerk.  
99th District Court, Lubbock County.  
Olive Flake, Deputy.

**SUBJECT TO REGISTRATION MISLEADING TERM.**

To the reliable breeder of registered animals, there is one greatly overworked term which must in all cases be very offensive. This term is that of animals "subject to registration," which is used by so many persons in an attempt to sell an animal and making claims for its blood line that would entitle it to registration. If an animal is subject to registration, as the term goes, and has not been registered, one may feel reasonably sure that the reason this animal has not been registered was because it was an inferior individual and did not justify the expense of having it recorded on the herd book. Then again, in many instances when animals are held by the owners to be subject to registration, one may just assume that the

owner is mistaken or is making a blank misrepresentation about the individual. Too many people are misled by unscrupulous livestock dealers who try to leave the impression that their animals are as good as registered animals, simply because they claim that they are subject to registration, when as a matter of fact, in the largest per centage of cases there is a relatively small amount of pure blood in the ancestry of such an animal.—The Progressive Farmer.

San Antonio was founded in 1718 by the construction of the Mission Alamo.

In 1716 the Spanish became active in building a line of missions from East Texas to Mexico. The first was built on the present site of Naacoches.

# A Good Year To All

Week after week during the past year we have chronicled your achievements and recorded your triumphs, rejoiced in your successes and sorrowed with you in your bereavements.

Now, we start a New Year together, and the best wish we can make for you is that we may hear such news of you as it will be a delight to pass on to others through these columns.

A Happy New Year to You All!

## THE SLATON SLATONITE

"Here Since 1911"

### FINISHING TOUCHES ARE CAREFULLY GIVEN FORD CAR

The external finish of pyroxylin lacquer and the manner in which it is applied are further examples of the superior workmanship that is going into the production of this latest of Henry Ford's products.

When the new Ford body enters the paint department it is first treated to a bath in special spirits until all traces of oil or grease are removed. It is then dried with clean towels and carefully buffed to smooth out all burrs or marks that may have been made in the process of assembling the body. Crevices or other places inaccessible to a towel are blown clean with compressed air.

Next comes another wash which not only cleans the body again, but also neutralizes any acids that may have remained on it. In this final washing process, the workmen are required to use rubber gloves to preclude the possibility of any finger marks on the smooth, metal surfaces. Following this the body is again thoroughly wiped, this time with specially prepared cloths which will not leave any lint or dust on the body surface.

Then the clean body goes into a spray booth where it is given the primer coat. Next it is placed in a dried and kept there for two hours at 225 degrees Fahrenheit. Following this any slight imperfections that may remain are removed with a flexible knife and metal glaze.

Next comes a coat of foundation surfacer and another period of drying for an hour and a half at 225 degrees Fahrenheit. The body then emerges from the drying room into a rubbing deck, where skilled workmen wash and smooth the surface with clear water, very fine sandpaper and finely powdered pumice stone.

Another drying process takes thirty minutes, after which the body is ready for the pyroxylin. It is placed in the spraying booth where it is given two "double-header" coats of pyroxylin. Each double header coat consists of two consecutive coats, one applied with vertical strokes of the air brush and the other with horizontal strokes. Twenty minutes is allowed for air drying between each double header coat.

It requires but two and a half hours for the pyroxylin to set and harden thoroughly. Then with water, sponge and fine oil-bonded sandpaper, it is sanded to an absolutely smooth finish. Again the body is washed and dried with clean towels, compressed air again being used to clean out places inaccessible to the towels.

Finally, the body is given a mist coat of pyroxylin thinner—just enough to permit the microscopic sanding marks to be smoothed over. After drying for twenty minutes at 100 degrees Fahrenheit, the body goes to the polishers where it receives the high lustre which gives it such an attractive appearance.

### KEEP WARM WATER BEFORE THE HENS

Clean, warm water is the cheapest of all poultry feeds and one of the most important, says the research department of the National Association of Farm Equipment Manufacturers. Because the egg is 65 per cent water, hens cannot lay unless they drink heavily, something they are not likely to do if their drinking water is dirty or coated with ice.

Drinking fountains should be large enough to hold at least a half day's supply of water, say poultrymen, and numerous enough to provide plenty of drinking space for the flock. Fountains should also be sanitary and easy to keep clean. Mounting drinking vessels on stands about 15 inches from the floor helps to keep straw and litter out of the water. Flock owners who have electric lights in the poultry house find that they can fill thermostat-type fountains with hot water in the evening so that it will be warm for the hens the following morning when the electric lights go on.

### VET'S OLD PISTOL CHECKS BANDIT

CHICAGO, Dec. 28.—There aren't any more bullets in Joseph M. Adler's old army pistol today, but there is one less bandit alive.

Adler came out of the World War with the revolver and a wooden leg. Last night, when four men held up his drug store the war veteran, who was in his living quarters above the store, took the gun from a drawer and hobbled downstairs.

Through a peephole Adler saw his clerk being held off by revolvers of the four robbers. Pushing open the door and bracing himself with his wooden leg, Adler opened fire. His first shot went through the heart of one of the bandits, later identified by finger prints as Harry Cassel, 24. Another man was wounded and had to be dragged from the store by his companions, who turned Adler's fire without effect.

### Hints for the Home.

By Nancy Hart.

A novel and convenient curtain arrangement for the bathroom is the one wherein double-tier glass curtains are used. Have one tier extending from the top of the window to the center sash, and the second tier from the center sash to the sill, allowing the bottom edges of both tiers to hang straight.

This makes possible a perfect control of light and air, and at the same time insures privacy. It is also good to sew a strip of very small curtain weights to the hems so that the curtains will hang in neat folds without billowing out with the slightest breeze.

### A New Year's Menu.

Oyster Cocktail  
Roast young duck—Chestnut stuffing  
Candied apples—Mashed potato  
Creamed Spinach—Tomato salad  
Burnt almond ice cream  
Coffee

### Cranberries in a New Way.

From one pint boiling water remove one-half cupful and dissolve a package of lemon-flavored gelatin in it. When cold and beginning to thicken add juice of ½ lemon, ½ cup chopped celery, ½ cup shredded pineapple, 1 cup thick cranberry sauce sweetened, and mold. Can be served as salad with cooked dressing.

### Baked Tomato Stuffed With Turkey

Where there are just a few remnants of turkey left, chop the meat, add a few bread crumbs, a little chopped parsley and celery and seasoning. Stuff tomato with mixture, dot generously with butter and bake until crumbs are brown.

### Quick Caramel Pie

2 cups dark brown sugar, ½ cup butter, ½ cup thin cream, yolks of 4 eggs and whites beaten separately. Mix all but whites of eggs, beat well, then add whites and add 1 teaspoon vanilla. Pour in pastry-lined pie tin and bake.

### To Freshen Cake

Soak cake that has become dry and hard in cold milk and rebake it in rather a cool oven and it will taste almost like new again. This same scheme may be used to freshen stale bread.

### When Pressing Seams

Use a dampened toothbrush for moistening seams to be pressed. The brush will open the seam as it draws along and facilitates the work.

### LYNCHINGS DECREASE AS YEARS PASS, IS NEGRO SCHOOL REPORT

Statistics concerning lynchings in the South for the past year, as compiled by the Department of Records of the Tuskegee Normal and Institute, colored school, of Tuskegee, Ala., has been sent out, as follows:

There were 9 persons lynched in 1928. This is 7 less than the number 16 for 1927, 21 less than the number 30 for 1926, 8 less than the number 17 for 1925 and 7 less than the number 16 for 1924. Six of the persons lynched were taken from the hands of the law, one from jail and 5 from officers of the law outside of jails.

There were 24 instances in which officers of the law prevented lynchings. 3 of these were in Northern states and 21 in Southern states. In 23 of the cases the prisoners were removed or the guards augmented or other precautions taken. In 1 other instance, armed force was used to repel would be lynchings. 14 white men, 1 white woman and 25 negro men were thus saved from death at the hands of the mob. Of the 9 persons lynched, 8 were Negroes and 1 white, (Mexican). The offences charged were: murder 2; rape, 2; wounding men in altercation, 2; killing officers of the law, 3.

The states in which lynchings occurred and the number in each state are as follows: Louisiana, 2; Mississippi, 3; Missouri, 1; New Mexico, 1; Texas, 2.

### MIND YOUR OWN BUSINESS.

Finding fault with others, picking personal flaws in others, criticizing the manners or condemning the methods of others is your private privilege, but not your public right.

If you see so much that is wrong in others, has it ever occurred to you that others may see some faults in your make-up?

Just in proportion to the number of times that you find faults in your friends—just in that proportion are they liable to see some shortcomings in you.

There is such a thing as being so observing, so critical about others that you take no time to think of your own unnatural or unbecoming ways.

The really big job is for each of us just to mind his own business, and not see so much that is wrong in

### FALLS 11 STORIES IN SUICIDE ATTEMPT

NEW ORLEANS, Dec. 28.—James R. Orr, high school instructor of Birmingham, Ala., who attempted to end his life by plunging from the

eleventh floor of a hotel last night, was alive today because he landed in a wire net over a glass roof of the hotel lobby.

Orr told police he intended to end his life because of failing health. He was seriously injured.

**BIG MEN.**

A recent investigation shows that big men physically fill most of the big executive positions. Unless you wear a number nine shoe, a 17 collar and tip the scales to something like 200 pounds, you haven't much chance to become head of the United States Steel Corporation or president of a railroad.

As a word of encouragement to some of our small friends, however, we can assure them that there are some exceptions. There was once, for example, a little handy-legged fellow with a sallow complexion and a pot belly. He lived in a day when offices of power went only to those born into ruling families.

Yet, starting from obscurity, he made himself dictator of a large part of the world. He was, without doubt, the greatest executive in history. The vastness of his success will always challenge the imagination of men.

His name was Napoleon Bonaparte.

One of our farmer friends says that he wishes he could let his bills stand as long as the farm relief bill.

Don't punish your children too seriously when caught in a first lie, parents are advised. Evidently allowances should be made for lack of experience.

**TELEPHONE TOLL RATE REDUCTION ANNOUNCED**

St. Louis, Missouri, Dec. 31, 1928.—Another reduction in day long distance telephone rates between points 130 to approximately 1500 miles apart will become effective February 1, it was announced today by E. D. Nims, President of the Southwestern Bell Telephone Company. The new schedule, which is the third rate reduction in a little over two years, will cut from \$.05 to \$.25 off charges for day station to station calls within the distances specified. Equivalent rate reductions will be made for person to person service. Evening and night rates will be unchanged.

"This reduction, which is country-wide, will mean an annual saving to telephone users of the Nation of more than \$5,000,000, according to estimates of the Bell operating companies based on the public's use of telephone facilities between cities," Nims said. "In the Southwestern Company's territory consisting of Missouri, Arkansas, Kansas, Oklahoma and Texas, the new schedules mean a reduction of more than three quarters of a million dollars a year.

"This is the second substantial saving offered to the public by the Bell System in slightly more than a year. It is in keeping with the Bell System's announced policy of furnishing the best possible service at the lowest cost consistent with financial safety.

"The previous rate reduction that followed this definition of policy, became effective December 1, 1927, on calls longer than 450 miles and saved the telephone using public \$1,500,000 in 1928. The reduction that immediately preceded this became effective October 1, 1926, and represented an annual saving to the public of \$3,000,000.

"One feature of the February 1 rate schedule of special interest to telephone users is the elimination of higher rates for appointment and messenger calls which will hereafter be provided at regular person to person rates.

"Several influences have made possible this further reduction in rates. One is the increasing reliance of the public upon the telephone for business and social communication between distant points, which undoubtedly has been stimulated by the continuous improvement that has been made in the speed with which out of town calls have been handled."

Approximately \$280,000 a year will be saved to the long distance telephone users of Texas under the new rates, it was estimated today by Tom A. White, District Manager of the Southwestern Company.

**HIS HOG PAID WELL.**

By making a profit of \$106.30 in prizes and returns on a registered Duroc Jersey gilt, Herbert Chesshir of Terry county announces his intention to "grow myself into the hog business and to pay my way through high school and college on my start with club pigs." He was one of seventy-one 4-H club boys who drew lots at Brownfield last spring for registered pigs in a club sponsored by the county agent. By feeding what was at hand, milo maize grain and skim milk, Herbert made his pig weigh 260 pounds when nearly seven months old, the cost of gain amounting to 6.8 cents per pound. The gilt won second in a class of seventeen at the county fair, but at Lubbock, competing in both club and open classes against good breeders, the pig took highest honors. This record won for Herbert a Santa Fe prize trip to Chicago.

"Supply of nuts is adequate," says a governmental report. But it didn't take much investigation to come to that conclusion.

The time will come, scientists tell us, when no coal will be required, but some janitors are trying to get ahead of the times.

**NATION-WIDE SALES MEETINGS TO BE HELD BY CHEVROLET FORCES**

Chevrolet Motor Company in order to get its 1929 sales program directly before its dealer and factory selling organization is again sponsoring its annual spring series of nation-wide sales meetings, the first of which is to take place next week in New York.

This year the meetings are to be divided among three crews, each embracing a personnel of five factory executives, all of whom are specialists in some phase of merchandising. Heading the crews will be R. H. Grant, vice-president in charge of sales; H. J. Klinger, general sales manager; M. D. Douglas and D. E. Ralston, assistant general sales managers.

The itineraries of the three crews will carry them to every key city in the country so that none of the 25,000 persons who compose the factory and dealer selling organizations will have difficulty in learning Chevrolet's 1929 sales program from the lips of the men who devised it. Tentatively this program has as its goal the sale during 1929 of 1,250,000 units, the largest annual quota ever established by the world's largest builder of automobiles.

Thirty-five cities are to be included in the three itineraries, the last meeting scheduled for Denver, February 29. In each place the programs will be identical. In each city the meeting will be concluded in the course of two days. There is to be a three hour afternoon program followed by an elaborate evening banquet. Ample time has been provided for dealers to take up their individual programs with factory officials.

More than a carload of scenery, props, stage properties and special lighting equipment are necessary for the presentation in each city. The services are also required of a specially trained show crew to direct the work behind the stage so that in front of the footlights the dealer organization may witness the most impressive and instructive stage show ever sponsored by any company in the industry. All of the crews will be together next Friday when the first meeting opens in New York, and their routes will bring them together again for the Detroit and Chicago meetings. Aside from these instances, however, the three parties will work out into widely divergent sections.

Mr. Grant's party which will leave New York and branch gradually into the far west, includes the following members: C. J. Seifert, Assistant Manager of Dealer Finance and Accounting; H. H. Goodrich, Used Car Sales Promotion Division; J. A. McLane, Fleet division; R. J. Pearce, Parts & Service division. Mr. Klinger's party which will cover the middle west and the southeast, includes: W. A. Brees, Manager of Dealer Finance and Accounting; J. H. Blackmore, Assistant Sales Promotion Manager; T. E. Chancellor, Truck division; and D. G. Frazer, Service Promotion Manager. The party headed jointly by Mr. Ralston and Mr. Douglas, which will cover the middle and southwest, includes: L. L. Linehan, Assistant Manager of Dealer Finance and Accounting; W. G. Lewellen, Sales Promotion Manager; Sidney Corbett, Manager of Truck division; and J. P. Little, Manager of Parts and Service.

The cities to be visited and the dates of the meetings follow: New York, Jan. 11 and 12; Boston, Jan. 14 and 15; Detroit, Jan. 23 and 24; Chicago, Feb. 1 and 2; Minneapolis, Feb. 4 and 5; Butte, Feb. 7 and 8; Seattle, Feb. 11 and 12; Portland, Feb. 13 and 14; Oakland, Feb. 18 and 19; Los Angeles, Feb. 21 and 22; Salt Lake City, Feb. 25 and 26; Denver, Feb. 28 and March 1; Buffalo, Jan. 15 and 16; Pittsburgh, Jan. 17 and 18; Cincinnati, Jan. 19 and 20; Cleveland, Jan. 29 and 30; Des Moines, Feb. 4 and 5; St. Louis, Feb. 6 and 7; Little Rock, Feb. 8 and 9; Memphis, Feb. 11 and 12; Birmingham, Feb. 13 and 14; Atlanta, Feb. 17 and 18; Jacksonville, Feb. 18

**ORANGES SHIPPED BIG DISTANCE; RATE FOR FREIGHT REASONABLE**

Washington, D. C., Jan. 2.—"It is evident from the almost nation-wide movement and distribution of oranges from producing sections that railway freight rates exert no restrictive influence in the distribution of that commodity." This is the conclusion reached by the Bureau of Railway Economics in a comprehensive and detailed study made public today of the production and marketing of oranges in the United States.

"Long rail hauls predominate," the study states, "in the transportation of oranges to consuming markets in this country. Out of the total number of oranges consumed at the principal markets in the United States, 58 per cent traveled distances ranging from 2,000 to 3,500 miles, while 34 per cent traveled from 1,000 to 2,000 miles; only eight per cent traveled less than 1,000 miles." These long rail hauls are cited as an indication of the relative unimportance of freight rates in the marketing of oranges.

Another indication of this same relative unimportance of freight rates appears, according to the study, in the variations in the market prices of oranges. At Chicago, in the season just ended, the price per box varied, in the case of Florida oranges, from 50 cents to \$10.00, a seasonal spread of \$9.50, and in the case of California oranges, from \$1.00 to \$11.25, a seasonal spread of \$10.25. Similar variations occurred at the other principal markets.

The seasonal spread in prices of Florida oranges per box at Chicago would have paid the entire freight charges on nine boxes of oranges from Florida to Chicago, while the seasonal spread in prices of California oranges per box at Chicago would have paid the entire freight charges on more than eight boxes of oranges from California. According to the study, "It seems evident that the level of freight rates plays no part in the variations in orange prices."

**GOOD FOR SOME, NOT SO FOR OTHERS.**

It is not the opinion of the A. & M. College that every farmer should use a tractor. But it is our opinion that tractors can be used to advantage and economically by many Texas farmers who are now using mules. On the other hand, doubtless there are farmers using tractors who ought to be using horses and mules. One important consideration is this: If you love and respect horse flesh and are not mechanically inclined, stay away from the tractor. However, if you are mechanically inclined and respect a piece of machinery, you will undoubtedly derive profit from its use, provided other conditions are suitable. The success of a tractor depends largely upon its

and 19; Columbia, Feb. 20; Charlotte, Feb. 21 and 22; Washington, Jan. 14 and 15; Indianapolis, Jan. 16 and 17; Knoxville, Jan. 18 and 19; Louisville, Jan. 20 and 21; Omaha, Feb. 4 and 5; Kansas City, Feb. 6 and 7; Wichita, Feb. 8 and 9; Oklahoma City, Feb. 11 and 12; Dallas, Feb. 13 and 14; El Paso, Feb. 16 and 17; Houston, Feb. 19 and 20; New Orleans, Feb. 21 and 22.

**Just Like An Ostrich**

A medical authority says that a person who tries to cover up skin blemishes and pimples with talcs, creams and powders is just as foolish as an ostrich that buries its head in the sand to avoid danger. Skin eruptions are nature's warning that constipation is throwing poisons into your blood stream and weakening your whole constitution. Remove the constipated condition and you will strengthen your system against disease and clear up your disfigured skin. The best way to do this is with a course of Herber's vegetable medicine that acts internally and easily, which you can get at City Drug Store.

care. The machines now being built are, in a majority of cases, well constructed of good materials. They are well inclosed and protected against dust and dirt and rapid wear. Most of the moving parts, such as engine parts, gears and shafts and bearings run in oil. Other parts are easily greased by means of a grease gun.

In the case of the large cotton grower operating say several hundred or a thousand acres or more, if the fields are large, level and free of obstructions so that all-purpose tractors can be used, unquestionably the best procedure would be for him to equip his farm with tractors entirely. Some ordinary laborers who have had truck or tractor driving experience and proved satisfactory, should be selected to handle the machines in the field. Then, a good, alert, young mechanic should have general supervision of the tractors at all times and go from one machine to the other while they are at work to see that everything is working properly. If a machine stops, the chances are it is a minor trouble which he can locate in a very few minutes and soon repair so that no time

will be lost. Where a number of machines are used in this way, a good workshop should be provided where the tractor can be quickly and conveniently overhauled and repaired.—F. R. Jones, in The Progressive Farmer.

**NEW DEVICE "CANS" SOUND AND THEN GIVES IT BACK**

London.—The Daily Express said recently a device had been perfected which recorded sound and reproduced it immediately in full volume and with clarity and accuracy.

A short test speech spoken into an ordinary telephone microphone came back with startling distinctness one minute after it was finished. It was recorded on a few inches of magnetized wire; no wax, chemicals or other fixing materials were needed.

The device can be attached to a telephone and the entire conversation reheard immediately after it is finished. The paper said the device was the simplest, cheapest and most practical system of sound reproduction ever invented. It is a development of an invention known to experimenters for thirty years.

**The Drug Store Where Your Needs Are Filled Efficiently, Promptly and at Very Reasonable Prices**

Service is our motto—our prescription department is run on that principle. Medicines are correctly compounded and delivered in the shortest possible time, at the lowest possible price.

**MODEL A FORD IS THIEF PROOF, IS CLAIM**

One of the features of the new Model A Ford car which is typical of the care that has been devoted to details of design, is the theft-proof ignition lock with which it is equipped.

Many automobile ignition locks, designed to lock the switch against theft of the car, have been little or no safeguard against the clever thief with some knowledge of automobile ignition systems. The thief could simply reach behind the instrument board, cut the wires back of the switch and make a new circuit on which the ignition system would operate perfectly.

This cannot be done on the new Ford, because the wires run direct from the switch into an armored conduit which is integral with the dash. In order to tamper with the switch the thief would either have to take the instrument board to pieces or cut the steel dash or armored conduit. Except under the most extraordinary circumstances, no thief would have the tools, the time or the freedom from possible interruption necessary to the completion of such a difficult and tedious task.

This new Ford lock performs two operation at once. It opens the ignition circuit and grounds the distributor at the same time. Another advantage is that, being concerned entirely with the ignition system, it provides protection against theft without in any manner interfering with the mechanical car controls, such as transmission or steering.

**DR. FRANK CRANE SAYS.**

**The Passing of the Horse.**

It seems as if the day of the horse is about over, at least in the city.

For centuries the horse has been the symbol of speed and power. He was transportation. The oldest sculptures represent rampant battle steeds, and heroes have generally been sculptured riding on horses.

But this age of motor cars is finding him too slow. We may love horses and delight in them, but apparently they are bound to go.

Agitation is now taking place in London to ban the slow-moving horse-drawn vehicle from the crowded streets.

One daily paper says: "Officialdom stands by idle while every day lumbering horse-drawn vans and carts cause long traffic blocks in congested thoroughfares. The loss and inconvenience caused by the traffic delays are incalculable, and yet nothing is done to ameliorate the nuisance."

In some congested regions of Paris, such as the Place de l'Opera and the Place Vendome, horse traffic is banished within certain prescribed hours.

The indictment against the horse seems to be that he is slow and that he is dirty.

There is strong support for the suggestion that London should follow the example of Paris.

Others would banish the horse if only for the sake of the animals. One cannot watch without pity horses struggling on the slippery streets.

They are often stationary in the traffic blocks with their noses just above the exhausts of motors giving out foul fumes which have been known to kill human beings.

Altogether it looks as if this age of rapid transit is going to do away with the horse, which has been called "the greatest friend of man".

**Radio Saves Cash For Many Farmers**

Radio is proving of immense practical value to farmers. The January 1 Oklahoma Farmer-Stockman reports that many comments received in response to a contest on the subject, "What the Radio Has Meant to Me," indicate that market reports alone have many times saved farmers more than the cost of a good receiving set. One farmer who entered the contest said:

"There is a man in my community who raises livestock. One day last spring, a buyer came to him and offered \$30 for a calf. One of the children happened to tune in on the radio while the buyer was there and the cattle market was being broadcast. They found that the calf was worth \$50. The buyer hesitated a while but finally paid \$50 for the calf. The radio saved that farmer \$20.

From another farmer came this comment:

"The hog markets alone are worth the price of a radio. We were selling some hogs and had arranged to deliver them a certain day with trucks to a certain market 150 miles distant. We were going to start at sundown and drive through during the night. We got the afternoon market over the radio, and the price of hogs was off several cents. The announcer said the market was due for a rise in a few days.

rise in the hog market which the announcer predicted did occur a few days later and we sold on the market for a profit of \$200.

**AT THE NAZARENE CHURCH.**

So very much sickness cut down the attendance last Sunday at the Nazarene church, however, good interest was shown by those present as quite a few knelt for special prayer on the invitation given at the close of the evening service.

On Christmas day some from the church here were in attendance at the Young People's Rally held at the Plainview church and a splendid time was reported. We hope to have the Rally here some time in the near future. The last Thursday of each month is designated as Rally Day, the next meeting will be at Olton.

The first Sunday of each month the pastor expects to speak to the children, especially. He thinks there should be more direct help offered and these special meetings are being arranged. Come and bring your children.

Sunday School at 10 a. m. Morning service at 11; Nazarene Young People's Service at 6:30 p. m. Evening service at 7:30. Mid-week prayer meeting, Wednesday, at 7:30 p. m. Mr. C. L. Ward will be leader at this service. On Friday night there will be a cottage prayer service at Mr. Ward's home, 130 N. 4th Street, at 7:30 p. m.

You are welcome to the "Lives Church in the City."

Reporter.

**OF INTEREST TO WOMEN.**

Sinton, Texas.—String beans worth \$37.30 on store shelves were canned in tin by two San Patricio county women at a cost of \$10.43, including the growing of the beans, cost of cans and fuel and labor. The work was supervised by Miss Sarah A. Walker, home demonstration agent, who also reports the canning in tin of three hogs weighing 766 pounds on foot. Besides the hams and bacon there were 66 two-pound cans of roast and chili worth \$39.00. The owner of one hog figured his saving at \$19.50 which is the most he ever saved in one day before, he says.

Tyler, Texas.—Henry Ford is one of the buyers of home made pear honey put up by Mrs. Anna Chambless, a Smith county home demonstration club woman living near Swan. She recently sent him one dozen half pints by request. Mrs. Chambless has developed a growing business in putting up and selling fruit preserves and canned fruits and vegetables by methods learned from Miss Ora Huffhines, local home demonstration agent. Her cash returns this season amount to \$86.09.

Canton, Texas.—Wash pots, tubs, barrels and rubbish disappeared from view to be supplanted by grass, shrubbery and trees in the yard beautification contest recently ended at Edgewood in Van Zandt county. "Thirty five women entered the contest in two classes, and eighteen finished and had their yards scored according to the rules of the contest," says the home demonstration agent, Mrs. Mary E. Brandon. "The improvement spread to other communities and a total of 32 yards were made more beautiful at a cost of \$358.44 of which most was spent for 576 shrubs and trees and 1480 evergreen hedge plants. Ten new lawns were made, 12 houses given underpinning, 7 walks built, 2 old wells fixed and cleaned out, 2 fences built and painted and many other changes made such as repairing gates, hauling off rubbish, hanging garage doors properly and remodeling door steps."

Waco, Texas.—Club dresses of cotton suitable to wear at club meetings and simple enough to serve also as house dresses, have been made at a cost of 78 cents to \$1.25 by 102 McLennan county farm women in five home demonstration clubs there. "These dresses," states the home demonstration agent, Mrs. Lemma Perry Boles, "are of good color and design, excellently constructed and will launder easily." The making of them is part of the comprehensive home making program conducted there, the importance of which is best judged by the fact that the entire membership of 203 women report making or saving \$88,465 last year on four projects: poultry raising, food preservation, home improvement and clothing.

**Simple Walls Make Charming Backgrounds.**

College Station, Texas.—"If you are first conscious of the walls on entering a room, something is wrong with the room. Probably it's due to bright colors or large figured wall paper which deprive the walls of that simplicity so necessary in making them the inconspicuous backgrounds they should be," says Mrs. Bernice Claytor, Home Improvement Specialist in the M. College Extension Service. She is directing the activities of more than 90 county home demonstration agents in hundreds of rural living rooms.

**WILL DISPLAY 1929 PONTIAC AT NEW YORK SHOW**

Pontiac, Mich.—First public showing of the new Pontiac Six for 1929 is scheduled to take place at the opening of the New York Automobile Show on Saturday, January 5, the Oakland Motor Car Company has announced.

Following the New York Show this newest General Motors car, widely heralded as offering "big car features within the price range of the small six," will be placed on exhibition at dealer showrooms throughout the country as fast as dealers can be supplied with display models, it was stated.

The new Pontiac will share fourth place at the New York show with its companion car, the new Oakland All-American Six, thus indicating the rapid rise of the Oakland Motor Car Company to the volume field.

Exhibitors at the Show are allotted display space in the order of their rating based upon the dollar value of their car sales as compiled by the National Automobile Chamber of Commerce for a twelve-month period.

From twelfth place in 1927 and eighth place last year, the Oakland Motor Car company has passed eight competitors in only two years to take fourth place at the 1929 show, its aggregate sales for the year ending last June having been exceeded by only three other manufacturers.

While its comparative standing in the industry was rapidly climbing, the annual output of the Oakland-Pontiac plant was showing a corresponding gain. In 1926 the total volume was 134,000 cars; in 1927, 193,000, and this year it is estimated at 260,000 Oakland and Pontiac Sixes.

The 1929 will show still further increase is indicated by the warm public reception of the new Oakland line, and the many refinements promised in the new Pontiac, which Oakland officials are confident will make it more than ever a public favorite.

The first of the new Pontiac models rolled off the end of the assembly line here the latter part of December, with others following in quick succession so that all of the 5,000 dealers in the domestic organization of the company may be able to exhibit the new line in their territories within the next few weeks.

**COW TESTING ONLY RELIABLE WAY TO TELL SCRUB BULL**

San Antonio, Texas.—You can't always tell a scrub bull by looking at him. For confirmation T. H. Royder, cow tester of the Bexar County Herd Improvement Association points to Lula, a high grade Jersey cow belonging to Vol Peterson of Atascosa. Lula topped the production records of the 519 cows on test in the Association last year with 11,374 pounds of milk. Her dam, Nellie, produced only 7676 pounds of milk in the same time. Her sire, who was responsible for the increase, was sold several years ago as a scrub! This illustrious daughter with her 523 pounds of betterfat returned Mr. Peterson \$86.72 more in net profit than her dam, and made a profit of \$223.23. She consumed 1933 pounds of cane hay, 1800 pounds burned pear (cactus), 2847 pounds corn, 990 pounds cottonseed meal, and 1028 pounds wheat bran, all costing \$85.25.

"It's a fine thing," Mr. Royder says, "to get rid of scrub bulls but the only sure way to know a dairy scrub is by cow testing."

In the state-wide Improved Living Room Contest this year.

"For a quiet, restful place avoid intense colors and choose softer ones such as ivory, buff, tan, putty, sand or the various shades of light gray. For naturally cold and gloomy rooms try the warm shades of light yellow, but for brighter rooms the cooler light greens and blues may do.

"Large figures in the wall paper make the average small living room seem more crowded and smaller than it really is, and destroy the wall as a background for pictures. Such designs are tiresome and should be replaced with small figured paper or some of the narrow striped ones. Plain papers are in good taste and if in doubt choose such a one. In buying wall paper take plenty of time and if possible carry home a roll to hang up experimentally."

**Doctors Disagree**

When children are irritable and peevish, grind their teeth and sleep restlessly, have digestive pains and disturbances, lack of appetite, and have itching eyes, nose and fingers, doctors will not always agree that they are suffering from worms. Many mothers, too, will not believe that their carefully brought up children can have worms. The fact remains that these symptoms will yield, in a great majority of cases, to a few doses of White's Cream Vermifuge, the sure expeller of round and pin worms. If you have any of these symptoms, buy a box of White's Cream Vermifuge today. It is the only safe and reliable worm expeller. Price, 25c. Sold everywhere.

# Now on Display in our Showroom!

Today you can see the most sensational automobile ever introduced—The Outstanding Chevrolet of Chevrolet History, a Six in the price range of the four!

This amazing new automobile is now on display in our showrooms and we cordially invite you to come in for a personal inspection!

Judging by the tremendous interest which it has excited wherever shown—

—judging by the unqualified approval it has won from everybody, everywhere—

—the Outstanding Chevrolet will instantly impress you as the greatest dollar-for-dollar value ever offered in any automobile!

### New 6-Cylinder Valve-in-Head Engine

When you lift the hood and see the new six-cylinder valve-in-head engine you will realize that a new era has dawned for the buyers of low-priced automobiles. Representing four years' development and testing by Chevrolet and General Motors engineers, embodying the discoveries of General Motors Research Staff, this new power plant is a marvel of advanced design. At every speed it operates with that delightful smoothness which everyone demands today in a modern automobile. It develops approximately 32% more power than any previous Chevrolet engine. It displays sensationally greater speed and faster acceleration. And yet, despite this brilliantly improved performance, it maintains Chevrolet's worldwide reputation for economical transportation by delivering better than an average of twenty miles to the gallon of gasoline!

### Great Array of New Features

Matching this spectacular advance in performance is the greatest array of new features Chevrolet has ever announced—and the most outstanding appearance ever achieved in any car of comparable price!

The new four-wheel brakes not only assure positive safety, but are exceedingly quiet in operation. The new heavier, finer quality transmission and rear axle gears contribute to longer life and greater stamina. The new two-beam headlamps with foot control dimming device were never before available in Chevrolet's price class. The new AC gasoline pump with filter assures constant fuel supply no matter how steep the hill. And so on throughout the entire chassis, you will find feature after feature previously demanded in the finest of automobiles and now offered on the Outstanding Chevrolet in keeping with Chevrolet's policy of constant progress!

### Distinctive New Beauty

But, however impressed you may be by the mechanical superiority of the Outstanding Chevrolet, your admiration will reach even greater heights when you study the car's distinctive beauty.

Here the whole effect is one of ultra-smartness, luxury and style. Introducing modish, concave front pillars and divided moulding, embodying the comfort advantages of greater width and length, finished in smart new lustrous colors—the marvelous new Fisher bodies represent a masterful example of artistic coachwork. Never in Fisher's long and illustrious service to the automotive industry has Fisher style supremacy been more clearly revealed! Never have beauty, comfort, convenience and staunch construction been more skillfully combined in the bodies of any automobile!

### Come In and See For Yourself

So we urge you to come in today and inspect the Outstanding Chevrolet! See for yourself what distinctive beauty and thrilling performance are now available at prices so amazingly low! Learn how Chevrolet has again established an entirely new standard of motor car value!

### A Complete Array of Outstanding Features

**Pigs Fed for Market Before They are Born**

Start feeding pig properly before it is born, is the advice of Dr. John M. Evvard, Iowa agricultural Experiment Station, to farmers who want an early market with spring pigs.

The "Trinity" mixture consisting of 50 parts tankage, 25 parts linseed meal, 25 parts alfalfa meal, he suggests, is an excellent ration to be fed to brood sows a month or two before the pigs are born, when 90% of the dry weight of the little pigs is being produced.

Close to one half a pound per head of this mixture may be fed daily, no allowance being made for age. The supplementary requirements of sows of different ages being about the same it is pointed out. The amount of corn should be carried according to the requirements of the pig.

Feeding oats, Dr. Evvard continues, does not lessen the difficulties of farrowing time, as a great many farmers believe. Oats, alone, are not sufficient to supply the deficiencies of corn; and some protein supplement like linseed meal is needed at this time to balance a corn ration.

**KNOW TEXAS.**

Immigration from the United States to Texas began to trickle in following the Louisiana purchase in 1803.

Stephen F. Austin started his great colony on the banks of the Brazos at old Washington in 1821.

On March 2, 1836 the Texans in convention at Washington declared an independent republic and David G. Burnett was named president.

**A Great Discovery**

When Pasteur discovered, in 1852, that the infection of wounds was caused by malignant bacteria, he performed a service of inestimable value to mankind. Since then medical science has been producing better and better antiseptics, to kill those germs that may enter the smallest cut and give us diseases such as typhoid, tuberculosis and lockjaw. Now, all you have to do to be sure that these dreadful germs will not infect a wound, is to wash that wound, however small, thoroughly with Liquid Borzone, the modern antiseptic. You can get Liquid Borzone, in a size to fit your needs and purse, from City Drug Store.

**REMARKABLE RECEPTION ACCORDED NEWLY DESIGNED CARS**

The opening of the annual National Automobile Show in Grand Central Palace in New York City less than a week away finds the Willys-Overland Company of Toledo occupying the most strategical position in the long history of the company, according to automotive experts who have witnessed the remarkable reception and sales volume that have been accorded the newly designed Whippet Four and Six models which were presented about three weeks ago.

Introduction of the new Willys-Overland products vividly recall the presentation of the original Whippet models, June 26, 1926, which completely revolutionized the low priced field because of their outstanding mechanical advancements over the engineering practices of that date.

The presentation of the newly designed Whippet Fours and Sixes offers a situation at least parallel with that of two and a half years ago, in that the new Whippet Fours and Sixes admittedly set a precedent of outstanding style, beauty, and mechanical improvement entirely new to the low priced four and six field.

Since their presentation, the new Whippet models have been viewed by millions of motor car enthusiasts in all sections of the nation, resulting in a wave of commendation for the new models that places the Willys-Overland company in the position of quality leader in the low priced field.

Both the Whippet Four and Six bring to the low priced field high priced car beauty and value—a distinct aim of the designers of the new models. This has been accomplished through the concentration of the vast manufacturing facilities of the Toledo manufacturer, the low prices being the result of manufacturing economies effected during the past twelve months.

Speaking of the new Willys-Overland products, John N. Willys said: "It has always been the aim of our company to go a step further in meeting the demands of the buying public. In the presentation of the newly designed Whippet Fours and Sixes I believe that we have met the demand to an extent far beyond the expectations of the public.

"Not only have we embraced beauty of lines and design that were formerly found only in the higher priced cars

we have incorporated mechanical features that are not found, even in the highest priced cars. I refer especially to the "Finger-Tip Control".

"If we had produced our new Whippet Fours and Sixes with this feature alone, it would have stamped them as an outstanding example of what can be accomplished in the light car field. But we went further by introducing a type of beauty that challenges the entire low priced field to duplicate."

**SENDS LOCK OF HAIR TO PROTECT LEGACY**

Washington.—A lock of "brown hair with a reddish tint" was inclosed in a letter, signed with the name of Mrs. M. J. LaMay and postmarked Redlands, Calif., which was received by Theodore Cogswell, district register of wills. The writer warned that a "blonde woman" would impersonate her in an attempt to gain a legacy.

The letter informed Cogswell that the "blonde woman" has discovered where property of the writer is located and "will claim to be me and fool you if she can". However, with all the description and novel identification, Cogswell is still in a quandary, for the identity of the deceased from whom the legacy is expected. She declared that she would later forward Cogswell an address where an answer could locate her.

**BOYS RAISE CORN AT 15 CENTS PER BUSHEL**

Madisonville, Texas.—The yield of 154 bushels of corn on one acre, made this year by Paul Robinson, a 4-1 club boy of Madison county, has been almost equalled by that of a fellow club member, J. H. Horter, who reports 152 bushels from a single acre. "These yields are phenomenal in Texas or anywhere else and are examples of what can be done to boost farm profits by the use of fertilizers and good cultural methods," declares E. A. Miller, Agronomist in the A. and M. College Extension Service.

According to the county agent who supervised the work of these boys, W. H. DuPay, the cost of producing this corn amounted to only 15 cents per bushel. Young Robinson planted on creek bottom land, prepared the land early by plowing under dead organic matter, used good seed (Prolific), and applied 500 pounds of soda. Horter, on the other hand, planted a yellow dent corn and applied 500 pounds of a 12-4-4 commercial fertilizer to make his big yield.

On March 6, four days after the Texas declaration of independence, the Alamo at San Antonio fell and the new born republic lost such able leaders as Travis, Bowie and Crockett.

A. C. Hanna was called to Dallas the first of the week due the illness of his daughter, Miss Florence, who lives in that city.

Vinita Bowen left the first of the week for Abilene to complete her business course at a school in that city.

Misses Frances Adams and Virginia Montague returned to State University, Jan. 2nd. Misses Adams and Montague expect to receive their degrees in June.

Mrs. Ben Masker and children have returned after spending the holidays in Big Spring and San Angelo with friends and relatives.

**UPSET**

**With Stomach Spells**

"I have taken Black-Draught ever since I was a child, and can recommend it as a splendid medicine for family use," says Mrs. Cora Maberry, of Sagecay, Okla. "My mother used it, in bringing up her family, and after I had a home of my own, I continued to use it, as I thought it was good to give the children.

"My children did not mind taking Black-Draught, and so when they got upset with stomach spells, or were constipated, I gave them Black-Draught tea.

"They are all grown now and have homes of their own, but I still keep Black-Draught in the house and use it myself when I wake up in the morning feeling dull and 'headachey', and have a bad taste in my mouth."

In use over 87 years. Price 25c.

Miss Lorene McClintock was the guest of Miss Snooky Maddox at Tahoka last week-end.

Dan Corley and family, of Lamesa, spent Christmas here with Mrs. Corley's sister, Mrs. C. A. Porter.

Mrs. C. E. Adams and little daughter, Velma Louise, of Amarillo, spent the week-end here with Mrs. Adams' sister, Mrs. Milton Thomas.

Miss Stella Porter, of Tulla, visited here during Christmas with her brothers, T. O. and C. A. Porter.

Dr. and Mrs. J. L. Rice returned early this week from Big Spring, where they visited with their sons.

Clifton Henry left Tuesday for Abilene to re-enter McMurry College, where he has been a student for the past two years.
