

LIST NUMBERS SIXTY-FIVE IN LAWN CONTEST

Entries Closed Monday; Judging Will be on August 15.

When the clock struck five Monday afternoon, sixty-five entries had been made in Slaton's third annual "Pretty Lawn" contest, which is being conducted again this year by the Slaton Chamber of Commerce. The prizes total \$100, and all lawns will be judged on Aug. 15, according to George Green and H. S. Riggs, co-chairmen of the civic committee.

Four classes have entries fairly well divided in number. The various classes distinguish between lawns of different ages, except class four, which is for business firms. Seven entries were made in that class, while only three entries in the same class were made last year.

Out-of-town judges will inspect the lawns and award prizes in August, and sixteen prizes will be distributed to that many winners. First prize is \$10, second \$7, third \$5, and fourth \$3, in each of the four classes. All prizes are half cash and half in trees, shrubs, flowers or seeds.

Nurseries and seed houses that have thus far offered to donate to the prize list include: Ramsey's Austin Nursery, Austin, Texas; C. E. White Seed Co., Plainview, Texas; Dalmont Nursery, Plainview, Texas; and the Lubbock County Agricultural Experiment Station, of which D. L. Jones is superintendent.

W. C. Foster Buys Barber Shop Here

The Santa Fe barber shop, on Texas Avenue, was purchased late last week by W. C. Foster, who is now in charge of the business. Mr. Foster is well known here, especially among Santa Fe employees, as he has recently been employed as stenographer to the master mechanic.

J. D. Norris, the former owner of the Santa Fe barber shop, states he expects to move with his family to Borger, where he will be associated with his brother, Neil Norris, in the insurance business.

BALENTINE BABY IS BURIED HERE SUNDAY

Loye J. Balentine, aged 2 years, 1 month and 18 days, son of Mr. and Mrs. L. E. Balentine, of the Morgan Community, died in a Lubbock sanitarium early Saturday, May 18. Pneumonia was said to have been the cause of his death.

The body was brought to Slaton, and funeral services were conducted in the Foster Undertaking parlors at 10 o'clock Sunday morning, Rev. B. G. Holloway officiating. Interment followed in Englewood cemetery, with Foster Funeral Home in charge.

BLUE LODGE TO MEET:

A regular meeting of Slaton Lodge No. 1094, A. F. & A. M., will be held at the Masonic lodge hall here Thursday night, May 23, it was announced by Thos. R. Cobb, W. M. All members of the lodge are urged to attend if possible. Visiting Masons are welcome.

NEW PASTOR ARRIVES.

Rev. Z. B. Dally, recently of Weatherford, has arrived in Slaton, and assumed his duties as pastor of the First Christian Church. He was accompanied here by his wife. As the new pastor, the Rev. Dally preached his first sermon to his congregation Sunday morning.

Mrs. Minnie Hill, of Clovis, N. Mex., is visiting her sister-in-law, Mrs. Mollie Hill, this week.

Word received recently by J. H. Brewer, president of the First State Bank, from his brother, I. M. Brewer, who recently underwent a serious operation in a sanitarium at San Antonio, indicated the latter was improving rapidly. He had left the sanitarium, and was ready to assume his business duties, Mr. Brewer stated.

R. M. Nash Suffers Broken Arm in Fall

While hanging a picture on the wall of the high school auditorium last week, R. M. Nash, head of the commercial department of Slaton high school, suffered a break of his lower left arm when the ladder he was standing on fell to the floor. A local physician reset the broken member, and last reports indicated Mr. Nash's condition favorable.

Commencement is Held for Class Of 46 Graduates

In spite of the torrential rains which fell here last Friday, preventing the attendance of the commencement speaker and some of the members of the class, the commencement program for the 1929 graduating class of Slaton High School was held last Friday night at the high school auditorium.

Clark M. Mullican, of Lubbock, Judge of the 99th district court, had been secured to make the commencement address after Dr. H. T. Muselman, of Dallas, had written that he could not possibly be present. However, the rains prevented Judge Mullican from attending.

A part of the regular program was carried out, including delivery of addresses by Joyce Price, class valedictorian, and Inez Tunnell, salutatorian. The members of the class that were present were awarded diplomas. The list of graduates this year numbered forty-six.

WEDNESDAY STUDY CLUB ENJOYS GUEST DAY

The Wednesday Study Club entertained with Mrs. Robert Eechtel, Mrs. J. A. Gillies, Mrs. J. H. Brewer, Mrs. Jess Swint as hostesses, honoring its members and guests with a most delightful luncheon and program, Wednesday afternoon, May fifteenth, it being the close of the season's work, and Guest Day.

After the guests were seated two "News Boys" (Crystelle Scudder and Bettye Pack) herald the day's "Gossip" by passing The Slatonite to each guest and inside its pages were found choice bits of gossip and personal mentions made for laughter by the members to the guests. A "Take off" of some prominent member was next in order, and then the "feature" of the afternoon was called.

A parody on Christopher Columbus' "Discovery of America" was given and no small amount of talent was discovered by those present. The costumes were the handiwork of the members and the wigs and personnel did credit alone to the club, not to mention the acting, which was heartily applauded by those present.

Mrs. Peavy as "Father Time" read, in the past tense, the story and as each incident came to pass in the reading it was enacted by the cast, which was as follows:

Christopher Columbus—Mrs. K. L. Scudder.

Queen Isabelle—Mrs. Harry Green King Ferdinand—Mrs. Dick Ragsdale

Thurston, the Sorcerer—Mrs. Donald Badgley

The Royal Geographer—Mrs. Roy Cobb

After the "actors" had removed the traces of their makeup, a bounteous luncheon was served, consisting of chicken salad, potatoe chips, pickles, Parkerhouse rolls, tea, cake and cream.

The list, including both members and guests present, follows:

Mesdames J. H. Brewer, Fred England, Harry Green, S. A. Peavy, R. W. Ragsdale, Herbert Wall, L. L. Stone, Jess Swint, David Tudor, Robert Eechtel, J. A. Gillies, Roy Cobb, Claude Porter, Harvey Austin, R. A. Baldwin, M. A. Pember, J. A. Klansner, R. C. Darwin, A. L. Robertson, Tom Blair, K. J. Brown, G. W. Tower, C. L. Sone, Gus Miller, C. L. Pack, James Rayburn, L. A. Webb, S. H. Adams, Marion Stocks, R. P. Burks, Lee Green, J. A. Hightower, H. W. Ragsdale, W. H. Sewell, Nolan E. Whitlow, of Lubbock, J. W. Pierson, J. E. Humphrey, of Pueblo, Colo., Heatherby, Mrs. Bechtel's mother; Misses Elizabeth Smith, Betty Pack and Crystelle Scudder.

Burks Will Open Furniture and Undertaking Business

R. P. Burks, formerly manager of the Home Furniture Company's store here, has leased the Bushey building, on Texas Avenue, and will open, in the very near future, a furniture and undertaking establishment, it was announced Monday. The new establishment, Mr. Burks said, will be known as Burks Furniture & Undertaking Company.

A complete stock of new furniture is now in transit, Mr. Burks said, and he hopes to be in position, by the latter part of this week, to announce his opening date.

Mrs. A. Bushey, of San Antonio, owner of the building, is here this week seeing to alterations of the interior of the building, which includes the building of a large room for undertaking supplies.

Friday Night is Date for First Good-Will Trip

The first good-will trip of the season to be made by Slaton business men to communities around this city is set for Friday night of this week. McClung community is to be visited.

Arrangements have been made with McClung people for the meeting to be held at the McClung school building, and a program will be given, followed by the serving of ice cream which will be furnished by the Slaton visitors. It has been whispered that McClung intends to have something "mighty good" to go with the ice cream.

Officers of the Slaton Chamber of Commerce are anxious that a large delegation from Slaton will attend the McClung meeting, pointing out the enjoyment and benefit that will come to all who go and take advantage of the opportunity of getting better acquainted with the people of the McClung territory.

McClung has given a most cordial invitation to Slaton folks to visit them. The Slaton party will leave the city hall at 7:45 p. m. it is announced.

Endowment Policy is Payable to Church

KENT, Ohio.—The usual life insurance policy, in which a church is named as beneficiary, is payable only at the death of the insured.

The Disciple Church of Kent, however, is beneficiary of a policy by which it wins whether the insured lives or dies.

Martin L. Davey, President of the Davey Tree Expert Company, and candidate for governor of Ohio last year, has taken out a \$50,000.00 five year endowment policy in favor of this church.

If Davey should die tomorrow the face amount is payable immediately to the church. If he lives five years \$50,000.00 accumulates in cash and is payable then to the church. As he is only forty-five his life expectancy far outruns the policy.

The proceeds will be used to build a new church building. The rest of the congregation is to match the amount of the policy, and construction is to begin as soon as the cash value of the policy is big enough to permit a loan to be made against it.

The new plant will be called the John Davey Memorial Church of Christ, in honor of Mr. Davey's father, who was the founder of tree surgery.

A MISSIONARY WILL SPEAK HERE

The ladies of the Presbyterian church will have as their guest on Thursday, May 23, Miss Lena Boyd, formerly of Santa Anna, now of Kasur, India.

Miss Boyd has been a missionary of the Presbyterian church since 1912 and is now in the United States on a furlough. She will speak to the ladies of the Presbyterian church and any other interested friends on Thursday afternoon at 3:30 at the Manse.

Everyone is cordially invited to be present.

Generous Rains Over Slaton Area Fell Last Friday

One of the heaviest rains that has visited this section for several years, one man declaring it the heaviest in eight years, fell last Friday, covering the Slaton territory with a general as well as a generous supply of moisture. Every other section of the South Plains received rain, also, reports show, and most of West Texas was drenched by the downpour.

Local measurements of the fall varied, ranging from two and five-eighths to more than four inches. Probably it would be safe to say three inches of rain fell here. A strong wind accompanied the rain, but no important damage was reported locally.

Crop prospects, as a result of the liberal moisture supply, are believed the best here that have been felt in several years at this time of the crop season. Farmers are now anxious to have a chance to get into their fields to carry on with their farm work. At this writing, Tuesday morning, a slow rain is falling, with skies darkly overcast, indicating that Jupiter Pluvius is not through with this section yet.

Summer Term of Schools Here is Likely, Sone Says

The question of summer schools is and has always been a troublesome question to school authorities. It is so seldom that the work attempted in short summer sessions is satisfactorily done. This being true our pupils so very often report back for the fall term unprepared for the advanced work.

This may not be the fault of the teacher or the pupil. The trouble lies in the fact that they attempt to do within a few weeks what has been laid out to do in four and one-half months. These courses of study are planned by the state school authorities and local authorities are obligated to carry out these plans.

A summer school of eight weeks will be conducted for the grades, in West Ward building if a sufficient number of pupils report for the work. This will be taught by some member of the faculty for the coming year.

Mrs. Nash will conduct classes in Commercial work, if a sufficient number ask for it.

Pupils eligible for the work are those who have studied in the grades they are proposing to take but who failed to be promoted in some of the subjects. A tuition of \$10 will be charged, payable in advance. The work will begin June 3rd. The hours from 7:30 to 12 noon.

High School: Quoting from the state bulletin No. 225, "No pupil should be permitted to earn more than one unit credit (or two half credits) per term of eight weeks or one and one-half credits in twelve weeks." Following this regulation a school of eight weeks will be conducted by Misses Watson and Cone. Courses will be given in English, History and Math. The recitations will be 90 minutes long and sufficient time will be given to study to cover the work in a very thorough manner.

We shall organize an eighth grade at mid term this coming year and it will not be necessary for those finishing the seventh grade to continue longer than mid term in that work. That plan will call for the adoption of Mid-term Graduation in high school, for those who have finished their required 16 credits.

It is to be regretted that a summer school is necessary. It is to be hoped that another year we may find it unnecessary.

Many of the pupils did not secure their report cards last week. The high school cards may be had at the high school building this week. West Ward from the Holloway residence and East Ward from the several teachers of that school.

C. L. SONE.

Willie McLaughlin, of near Wilson, was in town Saturday shaking hands with friends. He says there is surely enough moisture in the ground now to bring up cotton and other seeds.

Fred Stephens Buys Cleaning Plant Here

The sale of Evans' Cleaning Plant, on Garza St., by Carl Evans to Fred Stephens was announced Monday when the purchaser took charge of the business. Stephens was formerly a member of the firm of O. Z. Ball & Co., but sold his interest in that business last week to Mr. Ball, it was said.

In retiring from the tailoring business here, Mr. Evans stated his plans for the future have not yet been fully determined. He had been in the tailoring business in Slaton for a number of years, and said he has built up a valuable trade.

Principal of High School and Family Are Here Visiting

A. M. Sprinkle and family arrived here early this week from Hunt county, and are visiting in the homes of Supt. C. L. Sone and C. H. Wright. The latter are relatives of the Sprinkle family.

Mr. Sprinkle was elected recently as principal of the Slaton High School to succeed H. M. Pevehouse, who resigned. After visiting here for a few days, the new principal and his family expect to go to western Oklahoma for a few days' visit with relatives, then to Austin, where he will do work in the State University during the summer term.

Rotary Club Has Debate; Members Urged to Dallas

Featuring an international peace program at the luncheon meeting of the Slaton Rotary Club last Friday was a debate on the subject, "Has Civilization Profited More by its Wars Than it Has Lost Because of Them?" The program started with the club singing, "The Star Spangled Banner."

Lloyd A. Wilson was the affirmative speaker, and Ben G. Holloway defended the negative.

The affirmative contended that civilization has profited more by its wars than it has lost because of them, due to the fact that wars have resulted in the survival of the fittest races of people, giving world leadership to the most capable peoples, while the less capable ones, morally, mentally and spiritually, have been held in subjection. Several other reasons were advanced to support the affirmative stand on the question.

It was also contended that wars cannot be indefinitely or permanently prevented, because it is contrary to human nature, and that it would not be best for civilization to abolish all wars in the future.

"Many wars of the past have been unnecessary, and such wars should be avoided in the future, but on the contrary, many wars in the past have been essential to the best interests of the world, and such wars must of necessity recur in the future," was the contention of the affirmative speaker. He also declared that he is strongly in favor of working for world peace, but that it can only hope to be accomplished in a certain degree, merely abolishing unnecessary conflicts.

The negative speaker emphasized mainly the destructiveness of war, showing how the expenses of war have wasted a large portion of the world's wealth, besides using up the best man-power of the nations engaging in war. It was pointed out that war is barbaristic and exerts a bad influence on the morals and lives of the people. Several other strong points were advanced by the negative speaker in defending his side of the question.

President John W. Hood, in referring to the annual convention of Rotary International which will be held in Dallas, May 27 to 31, urged the members of the Slaton club to take advantage of the opportunity to attend an international convention where 48 nations of the world will be represented by delegates, and where many important world problems will be tackled.

"This convention gives you an opportunity of a lifetime, and all of us should attend who possibly can," Mr. Hood said.

SEEK FEDERAL BUILDING FOR SLATON'S USE

Chamber of Commerce Asks for \$65,000 Structure

Application for a \$65,000 Federal building for Slaton has been made to authorities at Washington by the Slaton Chamber of Commerce, according to L. A. Wilson, secretary of the local organization. The application was forwarded to Washington last Thursday, he said.

Briefs showing the enormous development of this city and surrounding territory were prepared by the Chamber of Commerce, and were filed with the chairman of the Joint Building Committee of the Post Office and Treasury Departments at Washington, with Congressman Marvin Jones, representing this Texas district, and with Senators Morris Sheppard and Tom Connally, the two U. S. Senators from Texas.

The briefs as prepared covered every phase of Slaton's growth, as well as that of the adjacent country. It was shown that the city's population is now double what it was when the building now occupied by the Post Office was secured, and that the need for a Federal building here is very urgent. Collection of data and compilation of the briefs has been in progress more than a month, officers of the Chamber of Commerce said.

It is not known how long a time will be required to get the building approved and authorized, but the opinion is held here that it will be granted and that the building will be erected at some future date, probably within one, two or three years.

Rayburn Will Get Bachelor's Degree

WAXAHACHIE. — Madison Rayburn, son of Rev. and Mrs. James Rayburn, of Slaton, is one of the sixty-seven students who is a candidate for his bachelor's degree at Trinity University in June, according to a list made public by Dean Edward P. Childs. In addition to these, eleven other students are candidates for degrees in August, making the largest graduating class in the history of the university.

One of the features of the commencement program will be a banquet to be given by the Ex-Students Association in honor of Dr. S. L. Hornbeak, president-emeritus and professor of economics and sociology at Trinity, who has been connected with the university for fifty years. During these fifty years he has served as professor, chairman of the faculty, dean, president, trustee, and director of endowment campaigns.

The members of the graduating class are to be inducted into the Ex-Students Association at a meeting to be held preceding the banquet.

BEAL FAMILY RETURNS.

C. B. Beal and family returned early last Friday from Austin, where they spent three weeks in the Pasteur Institute, taking anti-rabies treatment, following contact with a mad dog here. Charlie Whalen, brother of Mrs. Beal, drove to Austin and accompanied them home.

Mr. and Mrs. Beal are now back on their jobs at the Western Union Telegraph office.

ary Club have expressed their intention of going to the Dallas meeting. President Hood has been chosen as the club's official delegate, and W. H. (Bill) Smith is the alternative.

On account of the heavy rains which fell shortly before noon last Friday, the club's attendance was reduced to about two-thirds its normal figure. Mr. and Mrs. C. W. Taylor, of Slaton, were the only visitors.

The program for next Friday will be a series of classification talks by P. G. Stokes, Tom Abel and E. F. Miller. A vocal quartet is scheduled in which Claude F. Anderson, E. Olive, George W. ... Elbert Hie...

Entered as second class mail matter at the postoffice at Slaton, Texas.

BOOST FOR BASE BALL.

A local citizen asks, rhetorically, what a baseball team really means to a town. We are inclined to answer by asking: "What is a town without a baseball team?"

The season for America's favorite sport approaches—is here in fact. But there seems to be some indifference in this community to the prospect of having a good team represent the city. We feel that it is time for the community to shake off this lethargy. A ball team is of value to any community for the following reasons:

It provides good, wholesome amusement for a large portion of the town's citizenry. It brings to the community much advertising. There are those who will measure the character of a community quite largely by the support it gives to a baseball team.

It sets up an athletic standard before the youth of the community. We hear much about the modern boy and girl that is not highly complimentary. If what the alarmists say is true, it is time that we devote much effort to diverting their attentions and interests to wholesome sports.

There are many other good reasons for advocating a base ball club in Slaton, but we feel that these advanced are sufficient to kindle a little more base ball enthusiasm in the community.

ED AND STRAW HAT HAY.

The great day is at hand. It's off with the old, on with the new. The straw hat will make way for the new straw hats that have been made in the shop windows.

Somehow there is always something cheerful about putting on a new straw hat for the first time. Just watch the bright heads in the panamas and leghorns. Spring was never really here before these straw hats came.

The well-dressed man, nowadays, does not cling to his felt hat of derby. He gets his straw hat right at the outset of the straw hat season. He has come to see the attractiveness and many advantages of the straw hat.

It is lighter and brighter than other hats. It is a sensible hat to wear in warm weather. And the many models and styles of straw hats now available make it possible for every man to choose a hat suiting his personality.

COTTON KING AGAIN.

This is going to be the biggest cotton season since before the war. Every indication confirms this statement. Cotton will be King again, and rule over the entire world of fashion this summer; even Paris is showing cottons in preference to other fabrics now.

For everything from hats to shoes, cotton is now being advocated and used, and most summer wardrobes now bearing the sanction of Dame Fashion utilize cotton to some extent. It is even said that cottons are being used more than silks in the latest styles.

The story of the cotton come-back proves that you can't down a good thing. Experience has proven the wonderful qualities of cotton as material for wearing apparel. It will always be popular, even though it may now and then suffer a temporary eclipse.

Hail King Cotton!

ANOTHER EDISON?

Governors of many states are co-operating with Thomas A. Edison to help him find his successor. The great inventor, after half a century of work in which he revolutionized modern life, is seeking a youth of unusual capabilities who may perhaps be able to continue the work he has so well started.

To the high school boy who gives the best answers to one of his colleagues, Edison offers a \$1000 scholarship. One boy from the state, the one considered the possessor of the highest ability in scientific subjects, will be given a \$10,000 award to Mr. Edison's office. No one knows where the question will be presented to him, and he will be selected by Edison himself.

They've Been Up Before, But He is Still Game - By Albert T. Reid

phonograph. We doubt that another Edison will be found. This miracle worker is unique. Yet we have no doubt much more talent will be discovered in the search, and several promising youths will be given an impetus that may result in new benefits to humanity. Therefore, this enterprise is more than commendable; it is a particularly lovely gesture of a man much beloved, revered and admired—"another" of whom, however, we fear cannot be found again.

UNIFORMITY OF FREE TRADE

The sad case of a child disowned by his parents seems likely to be duplicated by the present plight of Free Trade in this country. There was a time, not so long ago either, when the word "democrat" in itself stood for sturdy resistance to the constant onslaught of the tariff hogs who won their favors by pitiful appeals to Congress against that destructive monster "foreign competition".

Circumstances leading up to the strained relationship are somewhat obscure, but in general they follow this line of logic: the electorate must be pleased; industry, the Republicans say, has prospered enormously under the G. O. P. regime; the G. O. P. is a protectionist party. Democrats began to weaken in view of this rather generally accepted idea, and a gesture in deference to protection was made during the last campaign. Now, we find Speaker Longworth welcoming all Democrats into the fold of the high-tariff system. Mr. Garner takes opportunity to broadcast by radio the news that his party is not a low tariff one. Senator Ransdell congratulates his colleagues on at last "seeing the error of their ways." But to make a puzzling situation worse, the Democratic party has by no means gone the whole hog. There are still an influential number of them who can be trusted to fight local-minded politics and disregard for internationalism, and they have not lacked courage to vociferate their own opinions. Between these two attitudes of cold rejection and ardent welcome the bewildered Free Trade is caught. Is it any wonder that he is puzzled over his parentage?

Livestock Feeding Raises Acre Income

COLLEGE STATION.—Acre income from feedstuff can often be doubled and sometimes tripled by using livestock to market farm-grown feed. According to G. W. Barnes, beef specialist in the Extension Service, farmers are fast realizing the fact that in the 15 years, exclusive of club boys, 5,000 farmers have demonstrated the feeding of beef cattle; 10,000 the feeding of hogs; and 20,000 the feeding of dairy cattle. Based on a spread of influence of five neighbors

working out in their own ways an idea they have seen demonstrated, there are now probably 100,000 farms in Texas where crop and livestock production are fitted together to raise the farm income.

"What can be accomplished may be judged by the story of W. D. Williams in Dawson county. He owns a square mile of farm land half in cultivation, of which half is in cotton and half in feed. The 400 acres of grass land support 35 head Hereford cows. He has recently completed a demonstration in cooperation with his county agent, W. W. Evans, in feeding out a car of farm-produced calves on farm-grown feed.

"At eleven months of age they were eating 17 1/2 pounds of ground milo and 2 1/2 pounds of cottonseed meal per day apiece, together with seven bundles of sorghum. When sold in Ft. Worth at 12 cents per pound they weighed 800 pounds each. After deducting \$50 per head as the worth of the calves at the beginning of the feeding period, Mr. Williams found that he had netted \$48 per ton on his milo maize instead of the \$17 the market offered."

Skim Milk is Important By-Product

COLLEGE STATION.—"Your section may not have a condensery, milk plant, creamery or cheese factory and yet a fairly satisfactory market for dairy products," declares J. L. Thomas, dairy specialist in the Extension Service of A. and M. College.

"Average Texas milk runs about 4.8 percent butterfat and is worth at current prices, counting the feeding value of the skim milk, \$2.26 per hundred pounds sold as sour cream. Data compiled by the Bureau of Dairy Industry, United States Department of Agriculture, for 1922-27, show that the same milk sold as Grade B market milk would be worth about \$3.17; as whole milk to condenseries, \$2.49; as sweet cream sold to cream creameries, \$2.70; and as milk to cheese factories, counting the feeding value of the whey, \$2.58. These figures are for the United States as a whole and may vary from local prices.

"Skim milk for feeding purposes is worth 40 cents per hundred," Mr. Thomas says, "and whey is worth about 20 cents per hundred. The dairy by-products of skim milk, whey and manure are an important part of the dairy business, often representing the difference between a profit and a loss."

Gunny Sack Moves Up in Society

COLLEGE STATION.—The gunny sack has moved up into society. Long regarded only as a useful container for produce or junk, as a handy thing around the barn, or at best a door mat in muddy weather, the towly burlap sack has worked itself into the home. And it has come in by the front door.

It happened this way: The home demonstration agents have launched the rural womanhood of Texas into a crusade for home beautification. It pays, they say, not only in comfort and satisfaction—but in dollars and cents. They began with the kitchen and after getting a good start in

making it an efficient farm home work-shop, they turned to the living room. Now rugs cost lots of money, but the need for them is great. The home agents have bridged the gap by showing how gunny sacks and all kinds of old rags and garments may be woven or hooked into rugs, beautiful in pattern and design and durable withal. Reminiscent of colonial days, these rugs are adding a touch of homey comfort to hundreds of farm homes as well as to those in town, for some home demonstration club women are making rugs to fill the market demand.

Last year home agents gave 229 lessons to women in the making of such rugs and 3,175 of them were completed. About two thirds of this number were braided and the remainder hooked. The cost is only nominal and some women are finding a market for them at \$5 to \$15 apiece. The rug making program of the Extension Service is gaining momentum this year and indications point to a great increase in this activity. One county alone, Kaufman, is said to have finished 273 rugs in March.

Mr. and Mrs. M. O. Napps spent Monday in Littlefield. Contractor Napps was there on business, while Mrs. Napps visited with friends.

Five Sets of Twins in One Farm Family

Five sets of twins make up the family of Mr. and Mrs. Frank Golda, farmers, living near Omaha, Nebraska. Besides the twins there is another child, a girl. The twins are, from their mother and father on the extreme right: Miles and Frank, 19; Mildred and Mary, 17; John and Helen, 13; Jerry and Edward, 10, and Martha and Valsta, 7.

INVESTIGATION PROPOSED OF ALIEN PROPAGANDA

WASHINGTON, D. C.—Congressional investigation of propaganda alleged to have been circulated to influence against restrictive immigration legislation is proposed in a resolution introduced by Representative John L. Cable, of Ohio. In explaining the purpose of the resolution Representative Cable said that the main issue at the present time is the enactment of more restrictive legislation, including reductions of admissions under the present quota system and restriction on the present unlimited flow of immigrants across the Mexican and Canadian borders, and from other countries of the western hemisphere. He said that the resolution was aimed at the agitators who would divide the restriction forces using the National Origins provision as a screen for their attempts. It was said that such a division would inevitably result in the breaking down of the overwhelming public sentiment, as expressed in the Restriction Act, that America can and should choose those who may come here.

"Let us not forget the main issue," he repeated in concluding, "which is the enactment of additional necessary restrictive legislation, reducing the quotas and making them applicable to Mexico and other countries of the Western Hemisphere."

SCHOOL PHYSICIANS FORM ASSOCIATION

WASHINGTON, D. C.—The American Association of School Physicians has been organized as a result of the recent growth in school work, according to a statement issued by the United States Bureau of Education. This organization came as an outgrowth of two conferences, the first of which was held at Buffalo, N. Y., in October, 1926; and the second in Cincinnati, Ohio, October, 1927. The first annual meeting of the American Association of School Physicians was held in Chicago, Ill., October 17, 1928, and was largely attended by school physicians from 27 states, the District of Columbia and Canada. The membership numbered 324 in November, 1928.

Among the subjects discussed were: educational qualifications for school physicians; a study of medical inspection and health service in normal schools and teacher-training colleges; correction of remediable health defects; the teacher's health condition and attitude a factor in her professional rating; health examinations; a standard group Snellen test for school children; and the present status of student health service, its extent and scope.

The Association advocates very strongly the employment of a school nurse, and the provision of a room designated as a health room, where the nurse reports at an appointed time, and where the children, parents and teachers come to talk over with her their many problems and difficulties.

FUEL ECONOMY IS FEATURE OF NEW WHIPPET 6 MODELS

Although notable advancements have been made in the past few years in the development of four cylinder power plants which market economy in fuel consumption without sacrificing power, speed or all-around performance, the higher compression engine employed in the Whippet Six strikes a new note of lower gasoline consumption for light sizes.

Throughout the past year while the new Whippet Six power plant was in the hands of Willys-Overland engineers undergoing strenuous tests in various sections of the country to bring it to its present point of engineering perfection, careful check was kept on its fuel consumption. In fact

many of the tests were made to accurately determine this.

The tests disclosed that, compared with its predecessor, the engine in the Superior Whippet Six showed a notably reduced consumption of fuel despite a materially improved speed and power development.

This decisive factor is attributed by Willys-Overland engineers to improvements incorporated in the Whippet Six engine, although the fundamental principles of its predecessor have in the main been retained.

It is pointed out that the improved Whippet Six engine has an increased compression ratio, this factor resulting in eleven percent increased horsepower and torque on a smaller amount of fuel than was formerly used.

It has been one of the chief aims of manufacturers of six cylinder cars to materially reduce fuel consumption, but it remained for Willys-Overland engineers to be the first to produce a six that compared favorably with the fuel consumption of the more efficient present day four cylinder car.

GIRLS AT T. C. U. TAUGHT COOKING ART

FORT WORTH.—If the old adage that "The best way to a man's heart is through his stomach," is true, Texas Christian University co-eds should have no trouble finding The Man.

In a course in food composition and principles of cookery the girls start out by cooking such simple dishes as fruits, vegetables, eggs and meats. Before the course is completed the girls are cooking full meals, being required to prepare and serve a family style breakfast of three courses, an informal company luncheon of three courses, and formal dinner of five courses, with seven faculty guests.

NEW GOOD LUCK FORMULA.

FORT WORTH.—Girls in Texas Christian University have developed a new good luck formula. They cut off the end of a piece of pie, make a wish while this end lasts, and then leave the school cafeteria without saying a word to anyone until safely out of the building. The wish is supposed to come true.

However, one girl confesses: "I've been making the same wish for two months, and it hasn't come true yet. But, I'm not going to give up this soon!"

Whereupon a heartless friend inquired: "What's his name?"

Students Earned \$120,000 During Year at T. C. U.

FORT WORTH.—Five hundred and sixty students in Texas Christian University earned, in round numbers, a total of \$120,000 during the current school year, according to a report just made by the schools' student employment bureau, Prof. John W. Ballard chairman.

Four hundred of the students were employed in all sorts of activities in Fort Worth, while 160 are used for work in the school and on the campus of T. C. U.

"We are trying to fit the students' school work to his employment, so that he may do justice to both," Prof. Ballard says. "Some of the best students in T. C. U. are working students. Some, however, try to carry heavy courses and work also. The result is that the student will not do justice to his studies, his employer, or himself."

"There is scarcely any kind of work that T. C. U. students do not do. We have gardeners, filling station attendants, ushers, bookkeepers, cashiers, tutors, salesmen, stenographers, and many other types of employment represented."

Farmers Find Cash Value in Balanced Feed

Fifty-seven Monroe county farmers find that scientific feeding pays. Cooperating with the Illinois State Agricultural College through the Monroe County Farm Bureau, 57 Monroe county farmers kept a record of feed costs in raising pig litters and balanced this cost against the selling price the pork produced. In this contest any ration the farmer wanted could be used. The cheapest, fastest gains, it was found were made by those farmers feeding scientifically.

In general the feeding methods of the farmers could be divided into three groups; those feeding heavy protein rations, those feeding medium protein rations and those feeding low protein rations of two pounds of protein supplement or under, which is the average practice in Monroe county. The records favor the heavy protein and the medium protein groups and the winning ration consisted of tankage and linseed meal mixed to a 2 to 1 ratio, three to five pounds of this mixture being fed per bushel of corn. Pork fed on this ration made the cheapest gains and was \$1.05 per hundred pounds cheaper than pork fed on the low protein rations.

Calculating the results from the dollars and cents point of view and using prevailing prices the costs were as follows:

During the period of the contest corn was around 90 cents, tankage \$75 and linseed meal \$60. The tankage-linseed combination of 2 to 1 costs \$3.50 per hundredweight. Where this feed was used in the second group 427 pounds of feed or feeding 3.2 pounds of tankage-linseed mixture the feed cost was \$7.30 per hundred weight pork. Feed is usually 85 percent of the cost of pork which would make pork cost \$8.59 to produce by this method.

Using the above method, the following is the cost of 11 pounds pork produced when varying amounts of protein feed are given:

Pound Protein feed per bushels corn	Cost per 100 pounds pork
5 lbs. or over	\$8.26
3 to 4.9 lbs.	8.05
2 to 2.9 lbs.	8.81
Under 2 lbs.	9.10

HAD TO DISMANTLE TRUCK TO DELIVER TO CUSTOMER

It became necessary a few weeks ago, for the first time in the history of Chevrolet Motor Company, to dismantle a truck in order to deliver it to its purchaser. This interesting incident occurred in Acheen, northern Sumatra, an outpost typical of numerous forsaken corners which Chevrolet has been pioneering for years.

One of the last provinces of the Dutch East Indies to submit to Dutch rule, Acheen has never been totally free from recurring outbursts of trouble. As a result, progress has lagged. Because it is rich in oil and endowed with fertile soil, steps have been taken by the government to penetrate it with roads.

Not long ago, the Chevrolet dealer at Langsa received an order from the Department of Public Works for a Chevrolet truck to be delivered to a point where the authorities were busy with a road which is to run from Sigli on the north coast of Sumatra to Meulaboh on the west coast, a distance of about 220 miles. From Meulaboh a road already existed up to a point about 60 miles inland. It was from here that the road was to be cut through the jungle to link up with a similarly short road running inland from Sigli.

Ships do not call at Meulaboh so that it was impossible to transport the Chevrolet truck by this means. There was only one solution—the truck had to be dismantled and carried overland by coolies to the scene of operation. The work of dismantling was carried out by the dealer and the weary task of transporting the parts was started.

Without doubt it was the strangest caravan ever to move across this section of jungle land. A coolie, lugging a wheel, marched a little in advance. The cylinder block was in the custody of a particularly husky pair. And so on. The heavier parts were carried in shifts to divide the work equally.

The route led through almost impenetrable jungle, along narrow mountain paths and over ravines and rivers. On one occasion in the trek, a stream, spanned only by a cable line, blocked the route. Nothing daunted, the expedition chiefs dispatched the coolies with the parts for which they were responsible across the stream "on the wire."

Nearly a month was required to complete the jaunt. The day the last of the parts arrived the truck was assembled by the dealer's mechanic. The next day it was doing Trojan duty as Chevrolet trucks have done many times before in pioneering enterprises.

Observations of a Night Watchman

Thoughts on the Scandalmonger.

We all know that the scandalmongers exist. We see and feel the effects of their calling; but the average persons do not realize the how and why of their existence. When we become more observing, and analyze our thoughts and actions, then we will discover the source, and thereby prepare the end of the scandal mongers.

We are creatures of habit, and habits grow with exercise. We are also social creatures; but take cogni-

WHAT DO THE NEIGHBORS THINK OF THIS?

Our manner of living determines our stations in life, and we notice and criticize the conduct of those in our station. Those above or below are immune from our class of scandal-mongers until the result of their actions bring them up or down to our station.

And here is how the creature originates:

Some man or woman is exposed in some misdeed. We have committed the same in mind, and only failed of the actual commission from a lack of opportunity. We feel a sense of guilt in our actions. So we criticize the culprit to salve our conscience, and deflect the public eye from our trembling ego.

Some, less moral than the average, feel the need of bolstering up their ego more often.

These form the habit and become the scandal-mongers.

—A Watchman.

Aim to Develop Better Rural News

COLLEGE STATION.—As an aid to county and home demonstration agents in gathering and writing constructive news of farm and home demonstrations for their local newspapers, an Extension News Writing Contest is announced by W. H. Darrow, editor of the Extension Service. The contest is to begin August 1st and last one year, during which time the contestants will be given various aids from headquarters designed to sharpen the nose for news. Exhibits of printed material in the six classes of competition will be made at A. and M. College in the summer of 1930 and judged by a group of editors.

The contest is a recognition of the local newspaper as an important medium for extending the results of demonstrations to the entire rural public. The Extension Service is encouraging the closest cooperation between its agents and newspapers, not for the sake of self-seeking publicity, but to make demonstration work effective on more farms and in more homes.

"You'd Think I Never Wore It"

NO MATTER how delicate the material, we take the greatest of care in cleaning.

GREEN'S TAILOR SHOP CALL 58

COMING SOON "THE DESERT SONG"

Topics of the Town and News of its People.

Mr. and Mrs. W. P. Florence expect to leave Thursday for Toler, Texas, to accompany their daughter, Miss Eunice, who is teaching school in the city, back to Slaton.

Cornelius Sieg, of Newton, Kansas, is visiting Mr. and Mrs. M. G. Grochovsky, of Slaton, for a few days.

Miss Lucile Davis returned to her home at Nevada, Texas, Saturday night. She came to Slaton for the graduation exercise for her cousin, Miss Tommie Kirby.

Miss Marie McDonald, of Lamesa, was in Slaton Wednesday. While here, she was the guest of Misses Nora and Cora Sealey.

Mrs. A. B. Robertson returned Thursday from Abilene where she visited her son, Poole.

Mr. and Mrs. Gebbard Tudor are the proud parents of a baby girl, who arrived at their home Friday.

Walter Hord and Luke Shelby spent Sunday in Abilene.

G. J. Catching, owner of Catching's Drug Store, is in Waco this week on business.

O. L. Head, manager of the Farmers Produce here, spent Saturday night and Sunday with home folks at Muleshoe.

Samuel Bramlett spent the last week end at the home of D. R. Peyton, in the Union community.

Mrs. D. W. Liles and son, Wayne, are visiting in the home of J. A. Liles, at Meadow. Mr. Liles accompanied them there Sunday.

Bradford Ussery, of Union, was a guest in the home of C. R. Mullinex Sunday.

E. Denny, of Lubbock, visited here Sunday with his daughters, Mesdames Bert McDonald and Virgil Woolever.

A. C. McRae, proprietor of the Union store, motored to Slaton last Thursday and transacted business.

James Killian was the guest of friends in Southland Sunday.

Mr. and Mrs. A. P. Tims and son, N. C., of the New Hope community, were the guests of friends here Sunday.

John D. Smith made a business trip to Crosbyton Tuesday.

Mrs. R. T. Bohannon, of 320 S. Ninth St., is reported to be improving after several days' illness.

Mrs. H. E. Newman has returned from Fort Worth, where she spent several weeks, visiting.

Mrs. Albert Hoffman and children are visiting this week with relatives at Wilson.

Mr. and Mrs. W. R. Steckman, of Falls, visited here Sunday with their daughter, Mrs. Carl A. Lewis.

Mrs. Ola Sande's and daughter, Ruby, visited with Eshman Sanders, of Amarillo, Sunday.

Clarence Holt and Miss Ruby Sanders were Lubbock visitors Monday evening.

Mrs. Elizabeth Bushey, of San Antonio, is attending to business here this week.

Mrs. C. V. Young spent the past week in Plainview with her mother.

Mr. and Mrs. O. D. McClintock, Lorene McClintock and Pauline Sanders spent Sunday afternoon in Post with Dr. and Mrs. V. A. Hartman.

MRS. R. A. BALDWIN ENTERTAINS TRES MESA

The Tres Mesa Bridge Club was entertained last Thursday by Mrs. R. A. Baldwin at her home at 905 West Garza St.

The club members present were Mesdames McAtee, Rogers, Staggs, Miller, Peavy, Bechtel, Brannon, Fogerson, and Wolfskill. The guests were Mesdames Hightower, Scudder, Lokey, Kirkpatrick, Everline, Rector and Tomlinson.

The rooms were beautifully decorated with cut flowers, while a color scheme of pink, green and white was carried out in a lovely two-course luncheon.

How to Raise Poultry
By Dr. L. D. LeGear, V. S.
St. Louis, Mo.

Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Noted author and lecturer.

**ARTICLE X
LET A LITTLE SUNSHINE IN**

Ordinary Sunlight a Vital Factor in the Development of Chickens—What the Ancients Worshipped Blindly as a Deity, Science Proves To be Truly Deserving of Reverence.

Editor's Note—This is another story in a series of 52 stories on poultry raising written by the well known national poultry authority, Dr. L. D. LeGear, V. S., of St. Louis. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

The ancients of many races worshipped the sun as a god. For centuries it has been used as a symbol of purification, and even in Christian churches today we find our children singing, "Let a Little Sunshine In." Until comparatively recently, however, it was not suspected that there was a real basis, in fact, for all this symbolistic reverence for the sun.

Now, science tells us that the ultra-violet rays of the sun perform at least two very important services for humanity and for animal life generally. Certain harmful germ life cannot survive in the presence of these rays and certain chemical processes necessary for proper physical development cannot proceed without them. Perhaps the most important service rendered in this way is the aid given to the growth of bony structures inside the body. This is particularly important to poultry raisers.

We hear a lot about vitamins these days. No one seems to know just what they are, but quite a lot is known about what they do and that is the important thing. Of the four known vitamins, Vitamin D is the one needed to transform certain mineral elements of food into bone and eggshell. This important vitamin is manufactured right in the bodies of fowls by the direct action of the violet rays in sunshine.

This is one reason why I am always insisting on open front poultry houses and plenty of range space for fowls. Every possible means should be employed to expose their bodies to the helpful action of sunlight. Of course, this does not mean that they may not seek shade on extremely hot days. Too much of anything is not good. Even in the shade, in some cases, the ultra-violet rays can reach the fowls in sufficient measure to continue their good work. Chicks that get plenty of sunlight will not develop "leg disease" or rickets, and soft shell eggs will be rare among hens of whom the same thing is true.

Not the least of my reasons for so ardently sponsoring the open front type of house previously mentioned in this article is the antagonism of sun-

light to unwelcome bacteria. Here again we find the ultra-violet rays responsible. They can penetrate many substances which will not admit other light rays, but they cannot go through ordinary window glass, consequently, if it should become necessary to close up any part of the front wall space ordinarily intended to be left open, use a glass substitute over a portion, and thin white muslin or cheesecloth over the balance. This will admit the ultra-violet rays and considerable fresh air.

Before going very far with inclosing hen houses, however, it is well to remember that the less hens are pampered, the better off they will be. Pity for fowls merely because they are cold is pity misplaced. Cold, fresh air that has been purified by sunlight is always preferable to the warm, stagnant air usually found in a closed house. Besides, it must never be forgotten that the closer a house comes to being inclosed on all sides, the more it is excluding the indispensable elements that only sunshine can provide in full measure. It should also be remembered that there is less sunshine in winter than at any other time, so all the more reason for taking the fullest possible advantage of what is available.

fact that, without sunshine, all of the food products so necessary for bodily development and egg production would be valueless if not non-existent. It is quite plain, therefore, that the value of plain, everyday sunshine is something we cannot afford to take for granted. It is a big, important subject and for that reason I shall be glad to go further into it with any poultry raiser sufficiently interested to write me in care of this newspaper.

Notes, News and Nonsense.

Sportsman—Is the hunting good here?
Native—Excellent! But the find-in's awful poor.

J. C. Matthews left Sunday for Galveston where he will attend the State K. C. Convention.

Gertrude Legge is visiting her grandparents at Trenton.

S. E. Staggs and R. C. Ayres returned Saturday from a business trip to Coleman, San Angelo and Abilene.

Mr. and Mrs. J. A. Elliott and daughter, Mr. and Mrs. J. T. Lokey, Miss Pauline Lokey and C. T. Lokey spent Sunday at Buffalo Springs, fishing and picnicking.

Mr. and Mrs. Truman Campbell, of Lamesa, spent Saturday night and Sunday with Mr. and Mrs. R. L. Tate.

Mrs. E. R. Legge left Monday for Trenton, where she will join a party of friends and relatives for a two weeks trip to Kentucky.

Miss Katherine Toliver, of Abilene, is visiting friends here.

Miss Lueje McCanne left Saturday for her home in Memphis. She will attend T. C. U. at Ft. Worth this summer and will teach in Lubbock high school this fall.

Miss Eda Watson left Friday night for her home at Barry, Texas.

Miss Virginia McKirahan, of Amarillo, is visiting friends here.

Mrs. L. C. Odom, Miss Iva Cary, Mr. and Mrs. Carl George attended the Tech Pageant at Lubbock Saturday night.

Mr. and Mrs. J. G. Wilhite and son left Sunday for Ft. Worth, where they will join relatives for a trip to Virginia, Mrs. Wilhite's former home.

Book Agent—Can I sell you a treatise on organization efficiency?
Business Man—Come back Thursday.

Book Agent—Sorry, but I'll be out of town Thursday.

Business Man—So will I.—Collier's.

Mr. and Mrs. Sam B. King returned Friday from a visit with relatives in Brenham and Belleville. Mrs. King's two sisters, Misses Ruth and Esther Meyer, returned with them.

Mr. and Mrs. Murrey Hargraves, of Falls, visited Dr. and Mrs. W. A. Tucker Sunday afternoon.

Mr. and Mrs. T. L. Able will leave Tuesday for the Shrine Hospital at Dallas with their daughter, Miss Bonnie, who will continue to receive treatment.

Maxine Odom is spending the week with her aunt, Mrs. J. P. Posey, at Lubbock.

Mrs. C. T. Lokey and son, Billie, Mr. and Mrs. W. T. Brown and Mrs. Wiley motored to Mineral Wells Sunday, where they expect to remain for some time for Mrs. Lokey's health.

W. P. Moore, Mrs. Jewel Dr. and Mrs. W. A. Lubbock because of

the serious operation of a friend, Miss Evelyn Glossup.

Bonita Nail, of Amarillo, is spending the week with her aunts, Mrs. J. W. Wallace, Mrs. Ed Tonn and Mrs. E. L. Blundell.

E. M. Adkins, of Trenton, who has been visiting Mr. and Mrs. L. L. Felton, returned home Monday.

Miss Marcell Gumm, Junior Roberts, Floy Roberts and Doc Castleberry spent Sunday at Silver Falls.

Reese Donald, who is in the employ of the Lubbock Avalanche, spent Sunday here with his mother, Mrs. W. Donald.

Floyd Wortman, of Ft. Worth, visited his sister, Mrs. Frank Evans, over the week end.

First Doctor—Before an operation I always take every possible precaution.

Second Doctor—So do I. I get paid in advance.

Miss Audrey Wortman, who has been visiting in Ft. Worth, has returned home.

Mrs. F. J. Berry and family are leaving Wednesday for their new home at Spur.

Miss Maurine Porterfield, who graduated from the high school here this year, is leaving Wednesday for her home at Banquete.

Mildred Redwine is spending the week with friends in Wilson.

Mrs. N. F. Young, who has been staying with her mother, Mrs. Alta Freeman, in Amarillo for some time, has returned home.

Mr. and Mrs. E. A. Gale returned Sunday from a visit to their children in Colorado and Snyder.

Wife: "Where were you all of last night?"
Husband: "I was sitting up with a sick friend—and, if you want to know the whole truth, I was as sick as he was."

Mr. and Mrs. A. C. Harrison and children, who have been in California for some time, have returned home. Roy Harrison stopped in New Mexico on the return trip and is employed on a ranch near Mountain Air.

E. E. Phillips is attending a Ford Mechanical School in Dallas this week.

Miss Lois Stallings is visiting relatives in Nevada.

Jerry Leverett, who has been visiting his brother who has been seriously ill in the Baylor Hospital, has returned home.

A CORRESPONDENT.

MRS. FERREL ENTERTAINS.

Mrs. Allen Ferrel entertained Thursday evening, May 17th, at her apartment at 617 South 9th St. After a series of games a sweet course was passed to Misses Tera Baughman, Clarice Smith, Mildred Smith, of Abilene, Jo Hestand, Elizabeth Smith, Cora and Nora Sealy, Edith Marrs, Lois Stallings, Mmes. Harvey Austin, Roy Cobb, and Stocks of Wichita Falls.
