

Stokes, Abel and Miller to Speak At Rotary Club

P. G. Stokes, Tom J. Abel and Dr. H. Frank Miller are the speakers for the luncheon meeting of the Slaton Rotary Club on Friday of this week. Claude F. Anderson, Walter E. Olive, Dr. George W. Shanks and C. Elbert Hicks are due to render a vocal quartet number.

The three speakers will make classification talks. Stokes will speak on "The Leading Inventions Since 1900"; Abel will talk on "What I Have Learned about Folks from My Experiences as a Peace Officer"; and Miller is to discuss "Immunity from the Standpoint of Medical Science."

Miss Guffin Honoree Handkerchief Shower

Miss Frances Guffin was honored with a handkerchief shower last Saturday afternoon by the members of the High School Orchestra, of which she is director.

The members of the orchestra met at the home of Mr. and Mrs. J. G. White and then went to Mrs. W. H. Proctor's home where Miss Guffin stays.

Miss Guffin received many beautiful handkerchiefs.

The orchestra members who enjoyed the occasion were Zona Florence, Odie Hood, Roy Foutz, Thurman Knox and Joseph Brewer.

MRS. E. L. BLUNDELL ENTERTAINS YOUNG PEOPLE

A group of young people met at the home of Mrs. E. L. Blundell on last Tuesday evening. Many games were played. An enjoyable time was reported by each and every one. Cake and punch were served to the following:

Misses Chloe Belle Calvert, Lizzie Mae Coleman, Claudia Anderson, Olive Mae Gaither, Ella Loyce Gentry, Herbert Gaither, Alva Jo Blundell, Marcel Gumm, Flora Self, Maurine Porterfield, Onita Berry, Irene Kost, Vee Jackson; Messrs. Clark Self, Roy Foutz, Carl Self, Dale Calvert, Hobson Hall, Jake Thomas, Travis Campbell, Raymond Maxwell, Wyatt Sturdivant, E. G. Reese, Burtis Berry, Junior Roberts, W. C. Foutz, Mr. and Mrs. Paul Foutz, and hostess, Mrs. E. L. Blundell.

Local Chevrolet Dealer Enjoys Trip Through Company's Factories

F. C. Jackson, owner of Jackson Chevrolet Co., here, returned early this week from Detroit, Michigan, where he spent several days as a guest of Chevrolet Motor Company, during which time he visited the entire manufacturing plant of the firm.

Mr. Jackson, who was in company with scores of other Chevrolet dealers of Texas, Louisiana, Oklahoma and Mississippi, states he enjoyed the visit to the factory immensely. Though he has made Chevrolet cars a close study for several years, he believes now, he says, that he is in better position than ever to explain to the autoing public the real qualities of the product he is selling.

It was a rare treat, Mr. Jackson stated, to be privileged to visit the factories of Chevrolet Motor Company.

A brief and interesting sketch of Jackson's recent trip was given to The Slatonite, upon request, as follows:

"Responding to an invitation extended me by Chevrolet Motor Co., I left Slaton Monday, May 13, at 4 p. m., for Amarillo. There I found a Rock Island train being held for Chevrolet dealers of this district who were bound for Oklahoma City.

"Upon reaching that city, we spent part of the day with officials of Chevrolet Motor Co., and General Motors Acceptance Corporation, and numerous of the dealers were served dinner and refreshments by Mr. Pete Knight, a member of the firm of Knight Supply Co., distributors for the Staughton Body & Cab Co., for Chevrolet.

"From Oklahoma City, we proceeded to St. Louis, Mo., over the Frisco lines, aboard a special train of 19

Big Crowd Hoped For on Good-Will Trip to McClung

Because Friday night of this week is the date for Slaton folks to make a good-will trip to McClung, seven miles north of Slaton, and on account of the fact that the people of that community are expecting a large attendance from Slaton at the meeting, officials of the Slaton Chamber of Commerce said Thursday that they were hoping a big crowd of local people will make their plans to go to McClung, leaving the city hall lawn at 7:45 p. m., Friday.

A program is being planned by local committees, and the meeting is expected to be quite interesting, aside from furnishing a splendid opportunity for getting better acquainted with Slaton's McClung neighbors and friends.

Slaton business men and their families are urged to make the trip to McClung, it was declared yesterday.

The trip will be the first of a series of several visits to be made in the next few weeks. McClung is one of the six communities that was not reached on last summer's good-will trip schedule.

Dallas Firm Buys Barrier Bros. Stocks

Perkins Dry Goods Company of Dallas purchased the stock and fixtures of the defunct Barrier Brothers, Inc., nine stores of the South Plains with a bid of \$83,880, the highest presented at public auction conducted by L. L. Pearson, United States Commissioner, and trustee of the bankruptcy sale, at the main store of the corporation in Lubbock Wednesday afternoon.

Auctioning the units of the chain separately, the bids totalled \$76,205, but Mr. Pearson called for collective bidding and the Perkins bid was high. The sale was conducted from 1 o'clock until 4 o'clock Wednesday afternoon.

BIRTHDAY PARTY

Little Lavern Martindale, daughter of Mr. and Mrs. E. C. Martindale, celebrated her ninth birthday at the home of her parents on Tenth St., Monday afternoon. Twenty-nine of her little friends were present, and a very enjoyable occasion was had. Following the entertainment, ice cream and cake were served.

Construction Work on New Sanitarium Makes Progress

Will Pour Concrete for First Floor Next Week; 25 Men are Employed on Job; To Finish On Time.

Work on Slaton's new \$125,000 hospital building, which began a month ago, is making splendid progress, according to officials of the Brennan company, of Amarillo, which firm has the general contract on the building.

The building permit on the structure, which was recently approved by the city, calls for a building costing \$125,000.00. This is \$55,000 higher than the original estimate made last summer when first plans for the hospital were being talked.

First floor columns for the building were being set Thursday, it was announced, and it was expected that concrete for the first floor would be poured by Thursday of next week. All preliminary foundation work has been completed.

A total of 25 men are now employed on the construction job at the hospital, the foreman said Thursday.

Unless weather conditions should cause unexpected delays, the building should be completed by the time originally announced for completion when the work was started. This date was announced as Oct. 1, or before.

When the structure has been completed and when all equipment has been installed, the entire cost will approximate \$200,000.00, it has been said by sanitarium officials. The institution will be owned and operated by the Sisters of Mercy, of Stanton, Texas, a Catholic charity organization. Slaton donated the site and a cash bonus of \$20,000.00 for the hospital.

GRADING STREETS.

Under supervision of W. P. (Bill) Layne, city water superintendent, the city's street grading and dragging machinery is being kept busy this week repairing streets in the residence sections of Slaton. Work on all streets that are not paved was made necessary by the recent heavy rains.

Miss Cora Peoples, of Ft. Worth, was a visitor in the J. J. Neihoff home during last week. She returned to Ft. Worth Saturday, accompanied by Miss Ethel Neihoff. Both Misses Peoples and Neihoff were of the Slaton high school graduating class of 1926.

Slaton Girl in W. T. S. T. C., to get B. S. Degree Soon

CANYON, May 21.—Slaton is represented in the graduating class of the West Texas State Teachers College by Miss Bertha Hicks, who will receive her B. S. degree with intermediate Education as her major. The class is composed of 110 young men and women, representing 46 communities in Texas, and the states of Oklahoma, Kansas and New Mexico.

Miss Hicks is one of the most respected and esteemed members of the class. She has been a member of the Sesame Literary Society; vice-president of the Lloyd Green Allen Scholarship Society; and Secretary of Phi Alpha Tau, a sociological club. Besides keeping a very high standard of scholarship and carrying on a number of student activities, Miss Hicks has worked as stenographer part of the time during her college career.

The Baccalaureate sermon will be given by Bishop Irving Johnson of Denver, Colorado; and the commencement address will be delivered by President J. D. Sandifer of Simmons University.

Local Art Teachers Present Pupils

Miss Frances Jeannette Ramsey, head of the music department of the Slaton schools, and teacher of piano music, and Miss Frances Guffin, teacher of violin, presented their pupils in recitals Wednesday and Thursday nights of this week, at the high school auditorium.

Large crowds were reported at each of their recitals, and those attending expressed pleasure at the progress made during the past school year by the pupils.

Willie George, of the Slaton State Bank, returned late last week from Dallas, where he spent several days, visiting and making arrangements to enter school next fall at Southern Methodist University. While attending school there, young George will be employed at the Republican National Bank & Trust Co.

H. H. Edmondson was a business visitor in Lubbock Wednesday.

FIREMEN QUELL BLAZE AT SLATONITE PLANT

Quickly responding to a call from The Slatonite printing plant, members of Slaton Volunteer Fire Department extinguished a blaze in the rear of the building late Thursday afternoon. Only the chemical apparatus was used, and the fire was extinguished without damage to the building or equipment. The Slatonite management is appreciative of the quick service rendered by the department.

Thirty-One Slaton People at Baptist Meeting at Lubbock

Thirty-one Slaton people were in attendance Monday upon a Baptist Missionary training school at the First Baptist church of Lubbock. Slaton folks furnished a musical program at the noon meeting Thursday, and several local people took part in the programs held on Thursday morning and afternoon.

Included among those attending from here, as representatives of the First Baptist church of Slaton, were: Rev. and Mrs. E. G. Holloway, Mmes. E. C. Foster, L. A. Wilson, C. F. Anderson, Fred Stephens, J. P. Boyd, R. D. Shelton, W. D. Harris, M. Coltharp, H. L. Henderson, P. G. Stokes, L. Johnson, F. J. Darwin, Wylie Fowler, W. H. Weaver, Misses Clara Thomas, Mildred Boyd, Claudia Anderson, Oleta Russell, and others.

Mrs. Lanham to be Hostess to Club Sat.

The Civic and Culture Club will meet Saturday afternoon, May 25, at 3 o'clock with Mrs. J. S. Lanham as hostess at her home at 225 North 5th St.

All of the club members are requested to be present.

VISITS PARENTS HERE.

D. D. Roderick, publisher of The El Paso Herald and El Paso Times, was here Thursday, visiting with his parents, Mr. and Mrs. T. E. Roderick. While in this section, Mr. Roderick transacted business with newspapers in which he is interested.

Several Rotary Club Members to Make Dallas Trip

When the annual convention of Rotary International convenes in Dallas, May 27 to 31, which means that the convention will open next Monday morning and last until the following Friday, several members of the Slaton Rotary Club will likely be in attendance, it is expected by officers of the club.

President John W. Hood has been chosen as the club's official delegate, and W. H. (Bill) Smith, vice president of the club, is the alternate delegate. Both men are planning to attend the convention if possible. Claude F. Anderson said Thursday that he hopes to attend, and several other members of the club are likely to be in the Slaton party, it is believed.

A total of 48 nations of the world will be represented at the convention in Dallas, according to Rotarians here. There are now Rotary Clubs in that many different countries of the world.

The unusual opportunity offered by the convention's meeting in Dallas is emphasized when it is understood that such a "world-wide meeting" may not be held again in Texas within a score or more years.

Constitution is Amended to Give Pres., a 2nd Term

A President for whom the constitution of his country was amended to insure his re-election took his second oath of office on May 20. He is General Gerardo Machado, President of the Republic of Cuba for four years, whose inauguration brought to Havana Embassies and special missions from the twenty American Republics who regard with deep interest and sympathy the welfare and progress of one of their number.

The Cuban constitution is clear in limiting the term of Presidency to four years, but the Cuban Congress is determined that President Machado's regime shall not expire. Rather than change presidents they changed the constitution to permit re-election. The faith of his congress in his statesmanship may well be needed by General Machado, for the political and economic standing of Cuba is evidently in a peculiar position at present. Threatened by the high tariff politicians in the United States with an almost complete breaking off of the amiable relations that this step-child once had with our country a break that would spell poverty and real ruin for thousands of Cuban citizens, the Republic is indeed in need of a wise guiding hand and a leader that can rely on the backing of his electorate.

NOTABLE PLAYERS FOR CROOK DRAMA

Claudette Colbert one of the most popular young leading women on the Broadway stage, has been cast for the principal woman's role in the Paramount all-talking mystery film, "The Hole in the Wall," which comes to the Palace Theatre, beginning on Sunday for a three days run.

The cast of this gripping play of super-crooks and their methods of fake spiritualism includes the names of many others notable on Broadway. Among them are Edward G. Robinson, as the principal heavy, David Newell as leading man, Louise Closser Hale, Barry Macollum, Donald Meek, Alan Brooks, George McQuarrie, Katherine Emmet and Nelly Savage.

Robinson gave notable stage performances in the stage versions of "The Racket" and "The Man with Red Hair." Newell has appeared with Ethel Barrymore and other famous actresses.

"The Hole in the Wall" is an adaptation by Pierre Collings of a play presented on the Broadway stage about seven years ago. It centers around a gang of criminals who employ the aid of a medium and spiritualistic means to gain their own in a gigantic crime ring, and uncanny manifestations of spiritualism.

POULTRY TIPS

BY LEONARD L. BROWN

THE PROFIT LINE.

Everything that has been treated in this column for the past number of weeks is vital to the success of every person who raises any poultry, whether on a large or on a small scale. We are approaching the parting of the ways, however, when those whose primary interest is in broilers and market poultry will want to start to develop their chicks along different lines than those whose bread and butter is in egg production. Of course the first essentials are that the chicks should live and grow along healthful, normal lines. Poultry science in recent years, however, has taught us a great deal that can and should be done to bring the poultry enterprise to the point of maximum profit, along either the market, or the egg production, line.

Most poultry raisers are interested primarily in egg production. In raising birds for egg production, the government figures give us some interesting facts that in turn give each hen her quota, a kind of a "budget" idea applied to poultry profits.

State figures vary slightly, but in the state of Washington, the feeding cost per bird is the equivalent of the price of 130 eggs and this is a pretty representative figure. The United States government tells us that the average American hen lays a total of less than 100 eggs a year. From this we easily gather that there are a lot of poultry flocks operating at a net loss to the owner, and by totalling up the average yearly lay of all birds maintained, anyone can easily calculate, roughly, the number of eggs his average hen is either above, or below, the profit line of 130 eggs.

The problem of every egg farmer is to get his average yearly egg lay per hen, above and well above that 130 egg mark. As it costs as much to feed a poor producer as a high producer, we can calculate, roughly, that a 150 egg hen, laying 20 eggs above the profit line, is twice as profitable and twice as valuable, as the 140 egg hen, laying only 10 eggs above the profit line.

So it is frequently by narrow margins that victories are won even in the humdrum of everyday work. The breeding of course is of the primary importance in egg production because "like begets like", but a great deal can be done by scientific and conscientious care and it will be our purpose in this column for several weeks to point out some of the best principles of development of both market, and egg production, poultry.

Texas ranks second in value of exports.

FEWER HOURS FOR A BUSHEL OF CORN

An acre of corn can be grown up to harvest time, including plowing, fitting the seedbed, planting and cultivating with less than four man hours per acre, says the research department of the National Association of Farm Equipment Manufacturers. This feat has been accomplished by agricultural engineers at the University of Illinois and Iowa State College under actual farm conditions and has been duplicated by several farmers in the Cornbelt. General purpose tractors are used with planting and cultivating equipment to accomplish this result. Such tractors have equipment for planting and cultivating two, three or four rows at a time and enable one man to care for 150 to 250 acres or more. The tremendous saving made is seen when it is realized that the average number of hours for accomplishing the same result by horses is in excess of 10 or 12 man hours per acre.

KEEPING CHINCH BUGS OUT OF FEED CROPS

COLLEGE STATION.—With the approach of harvest, chinch bugs usually migrate from heavily infested small grain fields into adjacent corn and feed crops, and where these insects are seriously present farmers should take measures to prevent their migration. Although the chinch bug has wings, explains R. R. Reppert, entomologist of the Extension Service, it does not use them in flying but into new feeding territory. A furrow plowed in advance of their line of march is an effective barrier. By dragging a log back and forth in this furrow a fine dust is created on the sides and in the bottom and this serves as a trap where they may be regularly killed by use of a blow torch or otherwise. Some farmers plow out two furrows side by side as a double precaution.

Another good protective measure is to spread a thin line of coal tar across the line of march of the chinch bug, applying the tar from the sprout of a common watering pan. This may be run along a zone cleared of grass and weeds by scraping. The method may also be used effectively in combination with a double dust barrier. Two boards nailed together lengthwise and at right angles like a common hog watering trough, with a carpenter's quarter round nailed into the angle is inverted and dragged back and forth lengthwise over the ridge separating the two furrows. This reduces the cloping sides to a fine dust and at the same time forms a shallow depression at the apex of the ridge into which the coal tar is poured. By throwing the two furrows together the coal tar barrier may be used alone as well as in combination.

Mr. Reppert points out that there is no practical method for destroying chinch bugs over a wide area of growing crops after they have gained access, and that control must be effected before they enter.

ELECTRO-MAGNETIC FORCE NOW MILKS COWS

Electro-magnetic force, so commonly used in railroad signal systems, the telephone and telegraph, steel and ore cranes and for other intricate jobs in industry, has been adapted to the ordinary farm job of milking cows. According to the research department of the National Association of Farm Equipment Manufacturers, the milking machine is probably the first type of farm equipment to which the force of magnetism has been adapted.

Because the action of the magnetic milker is unusually regular and uniform, it is said to have a favorable effect on the cow. This type of milker is also economical to operate, a one-half horsepower motor being sufficient for a herd of 20 cows. An individual farm electric plant, "high line" or a gasoline engine can be used for power.

SELL PIGS EARLY AND STORE THE CORN

Limiting the amount of corn fed to growing pigs during the summer and finishing them on the new corn crop in the fall is a mistake nine times out of ten, according to the research department of the National Association of Farm Equipment Manufacturers. Since the hog market practically always reaches its seasonal peak in September or early October, pigs held back and fattened on new corn cannot be sold at the high time and consequently strike a poorer market.

Swine specialists at the University of Illinois have compiled figures which show that it has been profitable to store the new crop and feed it as old corn the following summer every year since the World War. Last year, for example, pigs fattened on old corn and sold in September made \$8.36 per head more profit than those finished on new corn and sold in December.

On farms where storage space is limited, sheet steel cribs and bins can be erected quickly and conveniently supplying a fire-proof, rat-proof and weather-proof shelter for corn and small grain.

ONE PUNCTURE IN 9,104 MILES.

F. H. Merritt, photographer of San Pedro, Calif., has made several trips by automobile from his home to Boston, Mass. This year he drove a Model A Ford Tudor Sedan and the entire trip cost him \$128.00. He traveled 9,104 miles and his only trouble was one punctured tire. His daily average was 325 miles.

The Texas public road system comprises about 180,000 miles of which nearly 20,000 miles are known as "improved". State and Federal improved highways total 9,645 miles and there are about 10,000 miles of gravel, sand-clay or other "improved roads."

Telephone Co. Will Spend Millions 1929

The Southwestern Bell Telephone Company, operating in Missouri, Arkansas, Kansas, Oklahoma, Texas, and a small part of Illinois adjacent to St. Louis, authorized gross additions to its plant, or telephone property and equipment, to the amount of \$3,300,958, during March, 1929.

These authorizations provide that \$528,586 worth of worn and obsolete equipment will be removed, leaving a net addition to the company's telephone property of \$2,772,372.

The total expenditures by the company for plant extensions during 1929 will total approximately \$42,000,000.

Time Enough.

"I don't intend to be married until I am thirty!"
"I don't intend to be thirty until I am married!"

THERE is nothing that has ever taken the place of Bayer Aspirin as an antidote for pain. Safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get real Bayer Aspirin (at any drugstore) with Bayer on the box, and the word genuine printed in red:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

DRIVES CAR 150,000 MILES.

Professor Floyd Field, mathematics teacher and dean of men at the George School of Technology, has bought a new Model A Ford automobile after the exceedingly serviceable career of his old Model T. He drove the old car, which he still owns, 150,000 miles, a distance equal to six trips around the world. He burned 10,000 gallons of gasoline and wore out 17 sets of tires.

POWER PRESS WEIGHS 250,000 POUNDS

The largest power press in the Ford industries, outside the frame presses for the Model A automobile, is used to shape fenders, wheel housings and radiator shells at the Lincoln automobile plant. It weighs 250,000 pounds and stands 24 feet 10 inches above the floor line. Three feet of the structure extend below the floor level and it has a foundation 11 feet and 9 inches.

TAD IS DEAD. THE DEBENTURE PLAN. WANTED, ANOTHER EDISON. A "WANT AD".

"Tad" Dorgan is dead. Millions knew him. He analyzed human nature in pictures, as well as Dickens did in words.

Stricken by heart disease, knowing that he might die at any moment, he continued working cheerfully and died in his sleep.

He worked as a boy, in a mill, to support his mother and younger children. When his right hand was mutilated, in an accident, he drew pictures with his left hand.

A Hearst editor asked him to come from San Francisco to New York for double the salary he was paid. Tad replied, "I have my mother and six kid brothers and sisters. I wouldn't leave them."

Invited to bring them all East at Mr. Hearst's expense, he came and established a reputation throughout the whole country.

Prize fight enthusiasts, with half an inch of forehead, or Charles Dana Gibson, with a brow like the dome of St. Peter's will tell you "Tad was a great man."

The Senate may put through the "farm relief" debenture plan in spite of the President's protest. That is good news for middlemen. They would buy farm products, export them and get a bonus on experted products.

The farmer would get the bonus IF he could ship wheat or cotton direct to Liverpool. But he cannot do that.

It is "hoped that giving a bonus to exporting middlemen will 'automatically' increase prices paid the farmer."

Silly hope. Paying the middleman twenty cents a quart for milk does not increase the four or five cents a

quart paid the farmer. However, the debenture bonus would put more money in circulation, even if it did the farmer no direct good. Also it would add to the rich man's taxes and make that resourceful gentleman say to himself, "I must think up a way to solve that farm problem."

Expensive labor compels production of new machinery. Expensive farm cure-alls will make financial intelligence interest itself in the farmer.

Governors of various States are co-operating with Thomas A. Edison, seeking among boys of today, "Edison's successor." That boy, when he is found, will find himself.

To develop Edison, one among hundreds of millions, many ingredients, including poverty and necessity, were necessary.

The next Edison is somewhere, on a farm, or in the city.

There is no way to identify him now.

It pays to get a good job and attend to it. And it pays to advertise. Twenty-two years ago, D. A. Crawford, very young, answered a "want ad." and got a job as stenographer with Mr. Carry, late president of the

Pullman Company. Yesterday, the Pullman Company directors, intelligently promoting one of their own men, chose Mr. Crawford to succeed Mr. Carry, as president.

Don't stay in the wrong place. But don't be in a hurry to decide that you are right and the job is wrong.

MOTORISTS ARE QUICK TO RESPOND TO IMPROVEMENTS

Motorists are quick to respond to mechanical improvements employed by automobile manufacturers in their products which provide added conveniences, safety and comfort. This response is seen in the wide public acceptance of the new Superior Whippet fours and sixes which bring to the low priced field, in addition to outstanding beauty and design, mechanical improvements which set a new high standard of perfection in this price classification.

Notable among the features on these new Willys-Overland products is the "Finger-Tip Control," which is admitted to be the greatest single

driving convenience since the self starter.

The "Finger-Tip-Control" mechanism consists of a button in the center of the steering wheel, this making it possible for the driver to start the motor, operate the lights and sound the horn without changing the driving position.

With the introduction of these cars

the public immediately disclosed unusual interest in the "Finger-Tip Control," so marked was it a new convenience in driving. Then followed the demand for the cars which has resulted in a popularity for these models never rivaled before in the company's history.

This same interest is also disclosed by Willys-Knight buyers, the new

Knight engined six of the Toledo manufacturer also being equipped with the "Finger-Tip-Control".

Owners of the new Whippet fours and sixes and the new Willys-Knight sixes declare that the safety factor being able to operate the lights in night driving without having to fumble and search for a starter button in the toe-board.

Notes, News and Nonsense.

"Your suspicion is usually belief that another may do what you would do under similar circumstances."—E. W. Howe.

The class of A. R. Mills, English teacher of Tech, completed its course in "Shakespeare" Tuesday night, and the majority of the class members will go to the Tech Friday afternoon for the examination. The class consists of the following: Ben Holloway, Jr., C. L. Sone, Mr. and Mrs. J. B. Caldwell, Mesdames Harvey Austin, Harry Frye, Oscar Killian, B. G. Holloway, and Misses Jo Hestand, Josephine McHugh, Elizabeth Smith, and Mr. and Mrs. Summerall, Mr. and Miss Davies, of Southland.

Mrs. William Rust left Friday afternoon for Minnesota. She was accompanied by her parents.

Harold Abernathy, of Altus, Okla., a former Slaton resident, is visiting friends here.

Miss Linnie Mae Dowell, who has been teaching in White Deer, returned home Friday.

K. L. Scudder returned Thursday night from a business trip to Dallas. Bob Merrill is building a nine room brick veneer residence on his land in the Murray addition.

Conway Kuykendall is visiting his grandmother, Mrs. J. A. Kuykendall, in Royce City.

J. H. Phillips returned Monday from a business trip to Amarillo.

Mr. and Mrs. Frank Lawrence have moved into their new home on Thirtieth Street.

Zadie Caldwell, of Lubbock, spent the week here with Miss Lois McCelvey.

Rev. and Mrs. B. G. Holloway attended the Baptist Workers' meeting at Lorenzo Tuesday.

"Henry wanted to spend his vacation in the country and his wife wanted to go to the seashore."
"How did they settle it?"
"It is evident that you are not married."

J. D. Saunders, Jr., returned to his home in Pecos Monday night.

All members of the O. E. S. are requested to be present at the meeting next Tuesday night, as officers will be elected.

News Of Union

Union community has much to be thankful for, in the wonderful rains we have had. This will mean a busy time for the farmers, as they are ready to plant.

Mrs. C. W. Walters had an attack of acute indigestion Monday afternoon. At last reports she was easier.

The Women's Home Demonstration Club entertained Monday evening, with ice cream and cake, most all of the members and families were present.

Miss Inez McAnally, of the Morgan community, spent Monday night with Mr. and Mrs. B. T. Ussery.

The Sunday church services were well attended, there being an unusually large gathering.

Misses Elsie and Berniece Owens visited in the Peterson home Sunday.

The heavy rains caused great loss with the poultry industry, some losing all they had.

School Board has hired teacher for another year, Mr. B. A. Myrland, Mrs. B. A. Myers, and Scottie White.

RICHARD DIX SAYS RUTH ELDER'S CAREER ASSURED

Ruth Elder has a great motion picture future, in the opinion of those who have watched her and worked with her during her first experience as a screen player.

With no previous experience, the girl who was the first of her sex to conquer the Atlantic ocean by air, performs like a seasoned trouper, according to Frank Strayer, director; and Richard Dix, star of Paramount's "Moran of the Marines," the picture in which she makes her film debut, at the Palace theatre, Friday and Saturday.

"Ruth Elder isn't going to have to get by on her reputation," Dix said. "She has talent. She was very nervous before actual shooting of the picture started but when the cameras started grinding she forgot herself in her interest in the work and she has really surprised me by her acting ability. I knew that a girl who did what she did would succeed in anything she attempted but the extent to which she is going to succeed will astonish people."

"Just watch her is all I have to say," Strayer commented. "She is one of the most conscientious workers I have ever known. She has a consuming desire to learn and what is more she can act. With that combination she can't fail to succeed in a big way."

Kessel and Son Will Leave Sun- day for Europe

ABE KESSEL.

Mr. and Mrs. A. Kessel and their son, Bertram, expect to leave Slaton Sunday for Dallas, where they will spend most of the week attending an annual meeting of Rotary International. Then Mr. Kessel and Bertram will leave for New York, from where, on June 15, they will sail, aboard the steamship, President Roosevelt, for Europe.

They expect to disembark at Cherbourg, France, and go by rail from there to Paris, where they will visit with a brother of Mrs. Kessel, who is a student in civil engineering at France College. Mr. Kessel said he expects his brother-in-law to return with him late in the summer, and complete his course at Texas Technological College, at Lubbock.

From Paris, Mr. Kessel and son will go to Lithuania, a small province bordering Germany on the southeast, and there they will spend several weeks, visiting with his parents and other relatives.

It has been twenty years since Kessel was with his parents, and he and Bertram are looking forward to a very enjoyable visit. They expect to be away for about two months.

A Chance.

Do you think your father would consent to our marriage?"

"He might. Father's so eccentric."

"Buffalo" Bill's Pal

James Beitel, of Sandusky, O., Civil War veteran, 86 years old, is a countryman and one-time pal of Buffalo Bill Cody, for whom he says he substituted many a time when Col. Cody was in the show business.

Topics of the Town and News of its People.

Mrs. Sam H. Johnson and son left Tuesday for Phoenix, Ariz., to visit Mrs. Johnson's parents.

Mrs. C. E. McReynolds, of Sweetwater, is here visiting friends and relatives.

Mrs. Percy Minor and daughter, Doris, left Tuesday for Wellington, Kansas, Oklahoma City and other points, to visit friends and relatives.

C. C. Hoffman, T. E. Roderick and R. N. Smith attended Rotary meeting and luncheon at Lubbock Wednesday.

Misses Thelma Dowell, of Idalou, Madge Sandell, of Plainview, and Donna Lee Allison, of Lubbock, are spending the week-end here, visiting with their friend, Miss Ruby Sanders.

Mrs. Perry Moss underwent a serious operation at the Lubbock Sanitarium Wednesday morning.

E. H. Ward and family spent Sunday in the home of his brother, G. C. Ward, of the McClung community.

Chas. Marriott has just returned from a Frigidaire School of Instruction at Plainview. He reports a very interesting and helpful trip.

George Green and Hermon Shelton were business visitors in Lubbock Wednesday.

A concrete crossing along Division St., across Twelfth, has just been completed by the city.

Mrs. M. M. Pounds returned to her home here last week, after visiting with her daughter, Mrs. Gross, at Big Spring. She spent a week with her aunt, Mrs. W. R. Minor, at Snyder. Mrs. Minor accompanied her home.

Slatonite Want Ads bring results. Second Sheets at this office. Cheap.

Courageous Child.

Nellie, aged four, was gazing intently at the visitor's new bonnet. "Well, dear," asked the lady at last, "what do you think of it?" "Oh," replied the small observer. "I think it's all right. Aunt Mary told mamma it was a perfect fright, but it doesn't frighten me any."

Smokes and Lives Long

Mrs. Katherine Hiatt of Seattle calls her pipe her best friend. She is 91 years of age and believes smoking and drinking strong coffee in moderation prolong her life.

A Good Alibi.

Onlooker: "Surely, Mose you don't expect to catch fish in that stream."

Mose: "No, sah, I don't expect to. I've just showin' my old woman I had not time to turn de wanger."

A Public Benefactor.

Valet: "What shall I do with this old clothing, sir?"

Philanthropist: "Give it to the Near East Relief."

Valet: "And these old books and magazines?"

Philanthropist: "The Salvation Army."

Valet: "And shall I throw away these old pen points?"

Philanthropist: "No. Give them to the Post-office Department."

Solved.

"Now, Johnny," said the teacher, "suppose you wanted to build a \$1,000 house and had only \$700, what would you do?"

"I 'spose I'd have to marry a girl worth \$300," answered the young financier.

Patron: "I say, waitah, is this peach or apple pie?"

Garcon: "Can't you tell by the taste?"

"No."

"Then what difference does it make?"

Tobacco is the chief industry of the Turks.

Acre originally meant a field of any size.

PAINS In Side and Back

"I HAD BEEN miserable for a long time. My health was poor, and I suffered a lot from weakness. At times, my strength was so little that I could not stand on my feet. I would have to give up and go to bed. My sides and back hurt dreadfully.

"I grow discouraged, for I could do so little. I worried about myself, and almost gave up hope of ever being strong and well. I could scarcely lift a bucket of water. My house work went undone, for I was not strong enough to do it.

"After I had taken Cardui for a little while, I began to feel better. I grew stronger, soon found that I could do my work with less effort, and the pains in my back and sides left me. I think Cardui is a wonderful medicine. My health has been excellent since then."—Mrs. D.L. Beckner, W. Main St., Salem, Va.

STOCK NOW GO TO MARKET BY TRUCK

High-speed trucks have cut down the distances from farm to livestock market and each year a few more animals from the farms of Oklahoma, Arkansas and Texas are being sent to market by truck, the Oklahoma Farmer-Stockman reports in its May 15 issue.

Last year 71,801 truckloads of livestock came into the Oklahoma City market by truck. The year before there were 46,576 truckloads of livestock received. That is an increase of around 60 percent in the number of livestock received in a single year.

Last year at Fort Worth, the other livestock market which receives a large percentage of southwestern livestock, 68,543 head of cattle, 71,746 calves, 159,541 hogs and 28,627 sheep reached the yards by truck. The number of truckloads was 57,757 compared to 41,667 in 1927.

This change in methods of transporting livestock to market is going on in all parts of the country. In sections where roads are well improved much larger percentages of livestock received came in by truck. Last year at Sioux City, Iowa, for example, more than 2,000,000 head of hogs alone were received over the hard-surfaced roads.

The interesting thing about the receipts of livestock at Oklahoma City by truck is that around 75 percent of them come in farmer-owned trucks. Custom truckers do only a small part of the hauling. Farmers who have only a few head of hogs, sheep or cattle, and a truck, do their own hauling.

FOODS TASTE BETTER IN UNUSUAL DISHES

Even our most common foods taste better when served in a little different way. For example, here are three unusual recipes for common foods taken from the May 15 Oklahoma Farmer-Stockman:

Creamed Beets.—Thoroughly wash beets and boil until tender. The tops of the beets make very good greens and may be saved for another meal. They may be all cooked together to have fuel. Then the greens may be set aside and the roots used for creamed beets.

When the beets are tender, skin and cut in dice. Make a sauce of 1 tablespoonful of butter to which 1 tablespoonful of flour is added and blended over the fire, then salt, pepper and 1 cupful milk are added and the whole cooked until smooth. Add the beets to the hot sauce and serve hot.

Rhubarb Strudel.—Line a buttered baking dish with corn flakes. Add a layer of stewed rhubarb, dot with butter, sweeten with sugar. Continue using alternate layers of corn flakes and rhubarb until the dish is full, ending with corn flakes on top. Bake in a moderate oven. The strudel is delicious if flavored with orange juice and grated orange rind.

Sienna Eggs.—Slice 6 hard-boiled eggs, put a layer of the slices in a buttered dish and sprinkle with grated cheese. Add another layer of eggs, then more cheese, and so on until all are covered. Turn enough white sauce over the dish to moisten well, dust with buttered crumbs, and bake 10 minutes. The white sauce is made by blending together 1 tablespoonful of butter and 1 of flour, then adding 1 pint of milk and cooking until thick.

SILAGE FED CATTLE PROVE MOST PROFITABLE

A cattle feeding experiment recently concluded at the Kansas experiment station and reported by the research department of the National Association of Farm Equipment Manufacturers, illustrates the comparative value of dry fodder, chopped fodder and silage.

In tests with 100 head of stock cattle carried through the winter, ground kafir fodder was found to be worth \$11.68 more per acre than whole kafir fodder. Since the cost of grinding amounted to \$1.68 per acre, the net profit from grinding was \$10.00 per acre.

When kafir fodder was put in the silo and fed as silage, the returns per acre were \$29.83 greater than from whole, dry fodder. The cost of cutting the ensilage was 40 cents per acre (after the feed was delivered to the cutter) which left a profit of \$29.43 per acre in favor of silage over whole fodder.

These results indicate that feeding farm roughage to beef cattle in the form of silage is a highly profitable practice and that where it is impossible to use a silo, grinding the dry roughage increases the returns per acre. Kafir silage is similar to corn feeding value.

...atively a new crop, third in citrus...

HINTS FOR THE HOME.

By Nancy Hart.
DID YOU KNOW—that most luxurious slip covers for formal rooms are made from rayon damasks and brocaded satins, both of which are washable and of a sturdy wearing quality that brings them within the first requirement for the purpose?

We all love the chintzes and figured linens. Yet there are certain rooms wherein they do not fit, and times when a silky fabric is needed to give a touch of richness.

When this is the requirement the brocaded covers add a great deal of importance to the setting and—being washable—can be used from season to season just as you would linen.

For Sunday Breakfast.
Sliced fresh pineapple
Fried rice Creamed chipped beef
Toast—Plum butter
Coffee

Chicken Creole
Cook chicken until tender as for fricasse, remove liquor and keep hot over steam. Into the liquor put rice, shredded pimientos, small stuffed olives, diced celery, diced Spanish onion and diced green pepper; cook until rice is fluffy and tender and arrange around chicken placed in center of platter.

A Novel Salad Dressing
Mix a cube of cream cheese with French dressing to bring it to a creamy consistency; add 1 tbl. chopped pickle and 1 tbl. of finely ground tongue. Serve over iced hearts of lettuce or a salad of hardcooked eggs on shredded lettuce.

You'll Like Carrots This Way.
Cook 1 qt. carrots and use and use 2 cups carrot puree to 1-4 cup bread crumbs, 2 eggs, 1-4 cup milk, 1 ts. chopped parsley and seasoning. Mix carrots, crumbs and seasoning with beaten eggs, add milk, blend and fill buttered pudding cups with the mixture. Set cups in pan of hot water and bake in moderate oven until firm. Unmold and serve with cream sauce.

"How masculine Sadie has become in the last few years!"
"Yes. You know she has turned feminist."

If you have any of the following symptoms, I have the remedy no matter what your trouble has been diagnosed: Nervousness, stomach trouble, loss of weight, loss of sleep, sore mouth, pains in the back and shoulders, peculiar swimming in the head, frothy like phlegm in throat, passing mucous from the bowels, especially after taking purgative, burning feet, brown, rough or yellow skin, burning or itching skin, rash on the hands, face and arms resembling sunburn, habitual constipation, (sometimes alternating with diarrhoea) copper or metallic taste, skin sensitive to sunbeats, forgetfulness, despondency and thoughts that you might lose your mind, gums a fiery red and falling away from the teeth, general weakness with loss of energy.

If you have these symptoms and have taken all kinds of medicine and still sick, I especially want you to write for my booklet.

Mrs. J. B. Massey of Odessa, Texas, Box 112, whose picture appears here writes: I wish to thank you very much for restoring my health from one of the most dreadful, miserable diseases that anyone can have. I was in bad health for several years, under care of Doctors for three years. I do not think I could have lived much longer. I am in better health today than for several years; weigh more than I ever did in my life. I believe I am rid of an awful disease that the other Doctors failed to cure.

MRS. J. B. MASSEY

FUEL, NOT WATER, TO FURNISH POWER OF FUTURE — EDISON

"Every so often some one tells us that water power is to take the place of fuel as the dominant force in generating electricity. Visions of great hydroelectric plants, all over the nation, are conjured up, based on the theory that the coal supply, in the not distant future, will be exhausted, or that coal will be abandoned as an economic expediency for water power," says Thomas A. Edison in Nation's Business.

"Now the fact is that this country has merely scratched the surface of its coal deposits. The coal supply will last indefinitely. It is nothing to bother about.

"Another fact is that hydroelectric power will never supplant fuel as a generator, since water power, in order to be utilized to its greatest efficiency, is generally dependent upon operating in a network system, linked with fuel-burning plants.

"Developed water power today is but a small fraction of the power required in the country, the balance being essentially generated from fuel-burning plants. Approximately 80 per cent of the undeveloped water power of the country lies in the Rocky Mountains and in the Pacific Coast region. The large market for power unfortunately, is east of the Mississippi. Great as have been the advances in transmission of electricity, the art has not yet reached a stage that makes it probable, or even possible, for electrical energy to be transmitted from the Pacific to the Atlantic.

"The charge has been made that when coal has been exhausted the country will be dependent upon water power alone. The coal mined to date is less than one per cent of the available supply. On the other hand, the efficiency of coal utilization is low and has steadily increased with the development of the art to about 20 per cent, with the possibility of this going still higher. Water power now operates at over 90 per cent and has about reached perfection in its utilization.

"With the continued improvements in the burning of fuels yet to come to offset the increased power demands, the coal supply will carry us indefinitely into the future. Water power, then as now, will be quite inadequate to meet the demands for

electrical power, and posterity will have to develop other substitutes. But that is so far in the future that it is a matter of small concern today."

HELPING TO BUILD TEXAS.

The Censorship Committee of the Gainesville Retail Merchants Association last year saved Gainesville merchants \$5,500 by "turning down" worthless or fraudulent advertising schemes. A \$5 fine is levied against members patronizing schemes not sanctioned by the censors. Of 31 advertising "schemes" submitted, only three were recommended to members.

Don't Make a Toy Out of Baby - Babies Have Neryes
By RUTH BRITAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

ORDINANCE NO. 61

An ordinance to prevent dogs running at large on streets until vaccinated for rabies and until license tax on such dogs has been paid for current year; providing that no dog shall be allowed to run at large without dog tax receipt tag fastened to harness; providing that license shall not be issued for dogs that have not been vaccinated for rabies within two months; preventing proud bitches running at large; providing that dogs running at large in violation of this ordinance be placed in City Pound; providing for redemption fees; and providing for appointment of Dog Catcher and for his compensation.

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF SLATON, TEXAS:

SECTION 1. Hereafter no dog shall be permitted to run at large in the streets and alleys of the City of Slaton, Texas, until such dog shall have first been vaccinated for rabies, nor until the license tag of One Dollar on such dog shall have been paid to the City of Slaton, Texas, for the current year.

SECTION 2. No dog shall be permitted to run at large in the streets and alleys of the City of Slaton, unless such dog has fastened to his collar or other harness a dog tax receipt tag issued for such dog for the current year by the City Tax Collector of the City of Slaton, Texas.

SECTION 3. The City Tax Collector for the City of Slaton shall not issue any license or dog tax receipt for any dog until the owner or person in charge of such dog shall have obtained and presented to such tax collector a certificate from a Veterinarian, licensed to practice veterinary medicine in the State of Texas, that such dog has been vaccinated for rabies within a period of two months, prior to the date such dog license is applied for, or such dog tax is paid.

SECTION 4. No bitch which is 'proud' shall be allowed to run at large upon the streets or alleys of the City of Slaton, Texas.

SECTION 5. All dogs found upon the streets or in the alleys of the City of Slaton, and not under leash, in violation of the foregoing provisions of this ordinance, shall be taken by the Dog Catcher and placed in the City Pound. Dogs placed in the City Pound shall be kept for a period of Three Days, and at the end of that time they shall be killed, unless redeemed by the owner or other person by the payment of a pound fee of \$1.00 and \$1.00 per day for each day such dog shall have remained in said pound. The person or persons in charge of such pound shall not allow any dog in the pound to be redeemed until the owner or other person applying for the redemption of such dog shall have presented satisfactory proof that such dog has been vaccinated for rabies within a period of twelve months prior to the time application for the release of such dog from the pound is made, nor until the City license tax shall have been paid on such dog for the current year.

SECTION 6. The Mayor and City Commission shall appoint some competent person to act as City Dog Catcher and as compensation for his services, he shall receive all pound fees, and for dogs not claimed and which are killed, he shall receive a fee of One Dollar for each dog, to be paid by the City.

SECTION 7. All ordinances or parts of ordinances in conflict herewith are hereby repealed.

SECTION 8. Whereas, public safety and necessity demands that such ordinance regulating the keeping of dogs within the city limits, especially concerning the vaccination of dogs for rabies and that the City does not now have an adequate ordinance covering same, creating an emergency and an imperative public necessity that this ordinance shall take effect as soon as possible. It is hereby enacted that this ordinance shall be in full force and effect after its passage.

Passed and approved by the unanimous vote of all members of the City Commission of the City of Slaton, Texas, in regular meeting held this the 20 day of May, A. D. 1929.

(SEAL) W. G. REESE, Mayor.
HARVEY AUSTIN, Attest,
City Secretary.

**"TO BE BETTER LOOKING"
CLUB GIRLS' SLOGAN**

COLLEGE STATION.—A peck of garden stuff and a quart of milk is the recipe for becoming beautiful given to Texas 4-H club girls by Mrs. Dora R. Barnes, clothing specialist in the Extension Service. Asked what this has to do with clothing work, Mrs. Barnes replied, "You must have a good looking clothes rack if you want clothes to look well. The slogan in club work this year is 'to be better looking' but we can't make

clothes 'do their stuff' for girls with bad complexion and poor posture.

"Complexion and posture come with health, and that comes from right diet, hence the recipe. To be an all-around good looking girl she must develop physically, mentally and spiritually. It may sound funny but there is the foundation for good dress, and that is one reason why home demonstration agents are getting the girls to grow garden plots; to properly can and cook the products; and to learn the essentials of a healthful diet."

More than 15,000 club girls are making part or all of their own clothes this year in Texas, and hundreds of them are doing the family sewing beside. The appropriateness of dress to the wearer is emphasized in this work and girls are learning that simplicity of design and choice of color and line have much to do with good looking clothes.

The cost of the clothes made by club girls is only nominal, for home agents everywhere stress the point that taste and workmanship count more than money. Last year the average cost of school dresses made by girl contestants in the 4-H Appropriate Dress Contest was only \$1.90 and the complete school costumes only \$3.48. The more elaborate party gowns averaged \$2.85 and the entire costume \$5.31.

This year nearly 2000 girls are entered in the contest in about 100 counties. Local winners will bring their costumes to A. and M. College this summer to enter the state-wide contest directed by Mrs. Barnes.

WILLYS TO INSPECT COMPANY'S PLANTS IN EUROPE.

NEW YORK, May 15.—John N. Willys, president of the Willys-Overland Company and Chairman of the Foreign Trade Committee of the National Automobile Chamber of Commerce, sailed tonight on the Berengaria for a two weeks' inspection tour of the company's factories in Manchester, England, and Berlin, Germany. The primary objective of the trip is to consult with the company's European executives on plans for handling the greatly increased Willys-Overland overseas business.

"In the first four months of 1929," said Mr. Willys, "we exported 17,003 Willys-Knights and Whippets. This is a new high record. April exports totalled 4,325 cars and indications are that May exports will show better than a 50 percent gain over May of last year."

"Increases in foreign business are widespread. Not only Europe but South America, Australia, New Zealand and the Far East are giving us large volume of orders. Numerous foreign distributing points are ordering from 50 to 250 percent more cars than last year. Immediate plans include the export of a large volume of the new 1 1/2 ton Whippet Six commercial units besides the line of passenger cars in which six cylinder sales show a marked increase."

KNOW TEXAS.

Petroleum and natural gas represent the most important mineral resources of Texas, but granite, marble, graphite, gold, silver, copper, iron, iethyol, lead, zinc, tin, quicksilver (mercury), sulphur, borax, gypsum and mica are found in either the Central Mineral or the Trans-Pecos region, while coal and lignite are produced in many parts of the state. Potash and other valuable minerals are known to exist in Texas, but have not been developed. Asphalt, carbon black, celestite, cement, clays, including several deposits of kaolin, Fuller's earth, gas, natural gasoline, guano, limestone and lime, manganese—all are produced in Texas.

One-third of the commercial spinach crop of the United States is grown in Texas, most of it in the Rio Grande Valley.

DID YOU EVER STOP TO THINK?

By Edson R. Waite,
Shawnee, Oklahoma

John C. Phillips, Governor of Arizona, says:

THAT the big thing which the world needs today is APPRECIATION. Nothing so inspires us to greater endeavor than the knowledge that our efforts are appreciated. We may think we do not need applause; that those who do need it are weak, but I believe if the truth were known, none of us are immune to the stimulation which comes from that feeling that our fellow men, our friends and our families, believe in and appreciate us.

We need to show a greater appreciation of our great men while they are with us. They have given or are giving their best to their communities and the world, and yet we wait until they are gone and tell others of their worth, instead of bestowing upon them while they are in our midst the priceless gift of our appreciation.

We need a greater appreciation of public service. Many great men are giving the best years of their lives to the service of the commonwealth and the nation, and there is a tendency to depreciate their sacrifices. A little tribute now and then, given in sincerity, would spur them on to endeavors from which every commonwealth would benefit, and would give them that sense of work well done which "earns a night's repose."

Appreciation of the beauties of nature would bring us greater happiness. Our eyes are closed much of the time to the beautiful as expressed in flowers, in trees, sunshine, the ocean, blue skies, and the thousands of cheering sights which fill the

CHEVROLET COMPANY HAS EXECUTIVE PROMOTIONS

Executive promotions recently announced by W. S. Knudsen, President and General Manager of the Chevrolet Motor Company, bring into front line positions in the Chevrolet organization an able group of officials who have played prominent parts in the successful direction of Chevrolet affairs for several years.

The appointments come about as a result of the recent election of R. H. Grant and O. E. Hunt to Vice Presidencies of General Motors and at the same time are in recognition of proved ability. Mr. Knudsen explained. Mr. Grant was formerly Vice President in Charge of Sales and Mr. Hunt was Chief Engineer.

Succeeding Mr. Grant is H. J. Klingler, who becomes Vice President and General Sales Manager. This promotion places at the helm of the Chevrolet selling organization of more than 35,000 people a merchandising leader of demonstrated ability. In addition to his long association with Mr. Grant in the sale of more than a million automobiles annually, Mr. Klingler has had the advantage of broad experience in selling and advertising.

Charles F. Barth, for many years Vice President in charge of Manu-

facturing becomes Vice President and General Manufacturing Manager. Mr. Barth is one of the outstanding veterans of the automobile business and is regarded as an expert particularly on production methods and factory management.

M. E. Coyle, for years closely associated with Mr. Knudsen in the direction of the company's financial affairs, has been elected Vice President and General Auditor. He is also a veteran in the automobile business and has been identified with General Motors for more than seventeen years.

J. M. Crawford, formerly assistant chief engineer, becomes chief engineer and brings to his new post thirteen years experience in the automobile business, the last three of which were with Chevrolet. While associ-

ated with Mr. Hunt, much of the experimental and development work on the new Chevrolet six, was done under his direction.

Working with Mr. Crawford and assisting him in the direction of the extensive engineering department which Chevrolet maintains will be Leroy Cram, formerly engineer at the Chevrolet factory in Flint and now assistant chief engineer with headquarters in Detroit.

Benton Harbor, Mich.—Mrs. Wilhelmna Schultz, 102, created excitement at the dedication of the new municipal airport here by making an airplane flight.

When Pain Comes

Two hours after eating

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and symptoms disappear at once. You

will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 25c and 50c a bottle—any drugstore.

"Milk of Magnesia" has been the U. S. Registered Trade Mark of Charles H. Phillips Co. and its predecessor Charles H. Phillips since 1876.

Will Celebrate 1st Birthday Saturday

The Texas Market, located on Ninth Street, and of which Luster Gentry is owner and manager, will celebrate its first birthday anniversary Saturday of this week, according to the management.

Immediately after leaving high school here, and the graduating class of 1928, young Gentry bought the Texas Market, and since that time has given the business his undivided attention. To begin with, he was an experienced meat cutter, and a likeable young fellow, and many Slaton people were glad to know of him entering business for himself.

Since purchasing the market, Luster has been gradually increasing his customers in numbers, and, likewise,

has added to his stocks of merchandise and to his service, and he feels now that his appreciation of his valued customers must be shown them. Hence, he is staging a big party, to be held Saturday.

On that day, Gentry will serve lunches, free of charge, and he also will give away premiums, including a huge birthday cake, he states.

When Luster first bought the Texas Market here, someone, in joking him stated, he said, that he would give Gentry two weeks in which to operate. Now, the business has been operated for 52 weeks, and has gradually increased in volume, according to the management, and is one of the most attractive and most commodious meat markets in the city.

In a large advertisement, appearing on page three of this issue of The Slatonite, the Texas Market announces its anniversary event, and readers of this paper are invited to read this announcement carefully, and take advantage of the birthday occasion.

LOCAL CHEVROLET DEALER ENJOYS TRIP
(Continued From Page 1.)

largest of its type in the United States, was purchased and improved by General Motors five years ago at a cost of two and a half millions of dollars. There we saw makes of foreign cars which were very interesting. This included the Opel, a General Motors car for foreign countries. This car is very unique, due to its construction. It was built especially, for hill climbing and gasoline economy, and is equipped with several transmissions. It has only two cylinders; the Talbot Special, the Daimler, and the Vanthall, all English cars, and products of General Motors, were also on exhibition there, and they were very interesting pieces of mechanism, and different, entirely, from our modern type of cars. Other cars seen at the General Motors proving grounds were the Alfa-Romeo, Morris Cowley, Fiat and the Citroen. These are all foreign cars, and it was a pleasure, indeed, to see these cars and notice the difference in them and America's modern automobiles.

"From the proving grounds at Flint, we were escorted via General Motors busses, operated by individual companies, to Detroit, Michigan, where we were served a very enjoyable luncheon at the Stadler Hoetl, after which we listened to a very interesting lecture by Mr. Klingler, general sales manager for Chevrolet Motor Company, and others.

"Following this program, which concluded our very enjoyable visit, we began to scatter, some of the dealers

RUNNING WATER CHEAPER ON FARMS THAN IN CITY

Farm and small town homes can be supplied with running water under pressure at less cost than homes located in some of the larger cities. A home water system adapted for farm and small town use will provide running water at an average cost of 1 cent per 100 gallons, says the research department of the National Association of Farm Equipment Manufacturers, while residents of New York City, for example, pay 2 cents for 141 gallons of water.

Since a good home water system lasts for many years and operates at small cost, the expense per day or per week of use amounts to very little. This low cost of running water in the farm home exists in spite of the fact that the water system is one piece of equipment which is used many times a day throughout the year, and which probably does more than any other modern convenience to lighten the work of the housewife and to eliminate the drudgery of homemaking.

"Congratulate me, Freddy. Last night your sister promised to marry me."

"Oh, she promised mother she'd marry you long ago."

coming to Chicago on their way home, while others went in various other directions.

"We all had a wonderful and an educational trip, that sold each and every dealer more on the product we sell than ever before."
