Police Force Has Been Kept Busy

Chief of Police Ernest Ward reports that he and our two night police officers, E. A. Lott and E. A. Gentry, have been kept busy for the past two weeks. Their activity included three arrests for drunkenness and one for bootlegging.

There was one car taken from in front of the Palace Theater last Saturday night. The thief has not been apprehended but the car was found Monday morning abandoned north of town.

The investment in Government Bonds was made because of the building material and labor situation. As soon as it appears that construction of better school buildings can be started the board will take up the question.

SLATON BUSINESS CHANGES AND NEW BUSINESS FIRMS REPORTED

The business life of Slaton is showing continued change with many new names and new lines of business now reported.

One of the newest firms to announce operations in Slaton is the Frenchway Rug Cleaners with Bill Lord and Martin Collins at the helm. Both men have had considerable experience in this line of work and know what they are doing. They have installed the best equipment available and they are in position to turn out excellent work. This is a line of business that has not been available here before. In fact, it is a line of service that is not available in many large towns. They have opened their shop in the Robertson building on Texas Avenue and will call for and pick up any rugs to be worked over. They offer a number of different kinds of services in connection with rugs.

Another concern that has undergone some changes in operation in the Motor Freight line serving Slaton. Kirby Dunlap, who recently received his discharge from the army has purchased the Motor Freight line from O. N. Alcorn and the business is now the Dunlap Motor Freight. Mr. Alcorn is still operating his local and long distance freight service. Mr. Dunlap is devoting his entire time to his new line of business and giving many services not available before.

Still another change that has been made is the moving of Juanita's Beauty Shop from the ground floor of the Citizens State Bank Building on 8th Street to be building diagonally across from the former location on 8th St.

This popular beauty shop is in more commodious quarters and its owner, Mrs. A. R. Kiesel, reports that she now has more room and a better arrangement to serve her patrons and that she expects to add much new equipment when it is available.

Fun Nite Tonight At High School

It's gonna be "Fun Nite" tonight for the spectators and Grudge Nite for those who take part in 15 three-round bouts that are scheduled to take place at the High School gym tonight beginning at 7:30 p. m.

Few of the boys who will take part ever had boxing experience, in fact, some of them have never had a pair of boxing gloves and probably many of them will never want to have on a pair again. Those who attend will have the opportunity of seeing some of the fastest, wildest fighting ever seen in an arena with few rules and no sportsmanship expected.

The contests are held each year to allow those boys who have not agreed with each other during the term to work it out in physical combat. It is an exciting and hilarious contest that would have gladdened the hearts of the Romans who staged gladiatorial fights and will give thrills to those who enjoy amusements that are rough and rugged.

The tickets will sell for 35 cents to adults; 25 cents to High School students and 15 cents to grade school students. The money taken in will go to the High School Annual fund.

CHENOWETH, KENDRICK, SANDERS, SWANNER ARE NEW R. M. A. DIRECTORS

Up to the Minute!

It took the radio to develop a new idiom in the English language.

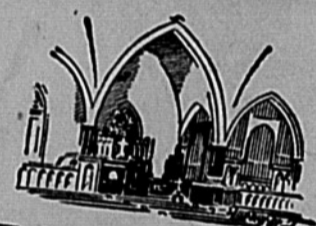

Up to the minute would have been a ridiculous expression forty years ago, for even with telegraphy and high-speed presses, it was many an hour before the latest news reached an eager and expectant world.

But, today, with the flick of a dial we can have our news *up to the minute*. And since that is our demand, books and fashions and advertising, and just about everything else that affects our lives, must also be *up to the minute*.

How odd, then, that the world's best seller is still a Book written centuries ago by inspired men! And strange, too, that the world's strongest institution is still the Church, founded two thousand years ago by One whom men crucified!

And yet, it's not surprising. For the Bible and the Church fulfill the needs that are common to men of all centuries. They reveal the truth that gives meaning to life, the hope that gives courage to struggling souls, the faith that gives light to darkened lives.

The Bible and the Church will always be *up to the minute*; for in a world of constant change they, alone, point men to life's single unchanging reality . . . GOD.

**THE CHURCH FOR ALL . . .
ALL FOR THE CHURCH**

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend and support the Church of his choice. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to Church on Sunday.

JUST TALK
by
A.M.J.

Detor Payne has certainly changed. When I first came to Slaton the doctor was a director of the Chamber of Commerce and he was the most aggressive belly-acher I ever saw. He was a constant objector to most everything that came up and I feel sure he took the opposition just to be sure that all of the points to be considered would be brought out and discussed. In those days nothing was ever railroaded over the C. of C. Directors.

Now you can hardly get an argument out of the doctor. He came in and visited with me last week and I tried him out on several good subjects that would stand for a hot argument but got no rise out of him. A stab made about the sand storm failed to even get him to raise his voice. He said that he was very glad to have another old time dust storm so that the newcomers to this part of the country would stop complaining about not having experienced one. Doctor says that a good heavy duster is necessary for this country every once in a while so that

we can keep our reputation for being rusty, tough and full of sand.

The main object at most gatherings where there are women present is how many pairs of nylon stockings each one has been able to gather. My sister, who lives in Baltimore, Maryland, writes that she stood from 8 until 10:30 a. m. in line trying to get a pair of them and when she got to the stocking counter the stock was exhausted. She said she did not know whether women were silly, funny or pitiful. Her experience reminds me of a story I heard once about a man who wanted to buy a drink in a dry town. He was told that the only way he could secure one was to get snake bit. When he asked if anyone had a snake he was directed to the rear of a pool hall. He found a long line of men waiting to get to the snake and when his turn came the snake was so tired it would not bite him.

It seems that the directors of the Slaton Chamber of Commerce are having a rough time getting going. Nat Heaton was elected president when he was not present and week before last he did attend and resigned the office. From the last reports Pete Pearson, vice president, was sitting in the hot seat. We should have very active Chamber of Commerce if we expect to keep up with the changes that are in prospect and we need a top grade Chamber of Commerce

manager, but at present we have no manager and no presiding officer of the organization.

W. E. Kidd was in the office last week and he said that he has just completed three new homes on South 8th Street and that he will start five more immediately. Mr. Kidd is an experienced builder and it is his opinion that it will be much better if people do not rush into building new homes. Right now there is a real shortage of homes in Slaton but ten or fifteen houses will take care of a lot of folks and a few folks can make a lot of racket about needing homes. Mr. Kidd believes that it will not be long before more material and more good workmen will be available.

A close check of the back alleys shows that a lot of knock-kneed long handles will be placed in the moth balls before long. It is also evident that the trap door styles are far more popular than others. Most Slaton people have big knees and elbows and pouch out in the front and cave in at the back.

Am I more careless than other newspaper folks or am I just the ordinary run. It seems to me that I spend more time taking the things out of the trash buckets looking for information that I have written on the back of envelopes, on checks and on odd pieces of paper than I do on writing this important stuff and sometimes I get so interested in what I threw away that I forget what I started out to look for. Things I put away in very safe places in the drawers of my desk disappear ten minutes after I place them there and show up again months afterwards, and when I find them again I wonder why in the world I ever squirreled it away in the first place, then throw it away and the next day I think of the reason I saved whatever it was and go out and start digging in the trash barrel, forget what I strated out to look for when I find something interesting among the items in the trash barrel and start the vicious circle all over again. Is there anyone who wants to buy a lot of whirling machinery, a big trash barrel and some printing paper?

And it is very unusual the things that other folks put in the trash

barrels at the Slatonite. I have found full bottles of ink, a number of unopened letters, a big gob of glue, rotten oranges, a child's dress, an onion, a dead rat and two letters that were very spicy.

SOUTH PLAINS STOCK SHOW TO BE MAR. 25-27

Entries for the South Plains Junior Fat Stock Show to be presented at Lubbock on March 25, 26 and 27 this year, after discontinuance during the war years, are now being received by the Lubbock Chamber of Commerce. Hundreds of future ranchers, farmers and businessmen will be the guests of Lubbock during the three days of the show when they bring their calves, pigs and sheep to the Hub City to compete for prizes and honors.

Another feature to be revived this year is the annual 4-H-FFA Boys Parade, which will be held March 27 at 11 a. m. Invitations have been extended to all bands in the 15-county area adjacent to Lubbock, and in Roosevelt, Lea and Curry counties, New Mexico, to compete for prizes. The first entry is that of the Lamesa High School Band.

Committees, superintendents and judges have been lined up for several weeks, and all advance work is being accomplished on schedule. The Panhandle South Plains Fair Association, on whose grounds the show is being given, has begun an extensive renovation of the buildings and arenas, and Superintendent Jason Gordon has arranged to have barracks available where exhibitors can pitch their bed rolls.

JEWEL BOX

By Bernie Nichols

Under the heading of decorative jewelry in the modern manner is Gracie Allen's massive bracelet of palladium and diamonds (pictured below) . . . gracefully clustered on a concave disc, the sparkling jewels are repeated with palladium in semi-circles to form the band. This fabulous piece was an anniversary gift to Gracie from her husband, George Burns. The same sleek smartness is repeated in the palladium caterpillar choker around her neck.

POST WAR FURNITURE IS BETTER STYLED

There is more good furniture on the market today than there has been since the war started. Of course a number of shortages still exist and probably will continue to exist but the really substantial kind is back and if you want to put your money into something that will give lasting satisfaction you can do no better than to buy good furniture.

The Groce Furniture Company in Lubbock specializes in the better quality, the kind of furniture that you will value for its inbuilt good style and sturdiness as long as you live.

Many new trends have developed in the postwar furniture and those who are contemplating new homes or remodeling their present homes can find worthwhile suggestions on what is modern at the Groce Furniture store in Lubbock.

They not only specialize on good furniture at the Groce Furniture but they have prices and terms that make it easy for almost anyone to buy the kind of furniture that they want and need. A visit to the Groce Furniture Company is always a pleasure.

FEED SEED SHOULD BE TESTED THIS YEAR

Sorghum seeds should be tested this year because of their low germination percentage due to immaturity caused by drouthy conditions last summer, according to Dr. A. W. Young, head of the plant industry department at Texas Technological College.

Almost all seeds are lower in germination this year, reports Miss Barbara Bedford, assistant seed analyst for the State Department of Agriculture, who is in charge of the seed testing laboratory on the Tech campus.

Farmers wishing to have their seeds tested should send samples, from one pint to one quart representative of the entire lot, to the seed testing laboratory at Tech.

The New Music Is Better Than Ever

Even if you have only a mild interest in music you will enjoy the new pieces that are so tuneful today. The postwar gaiety, soft tones and trend toward what is known as "sweet music" will give you a life that is really worth while.

The Adair Music Company in Lubbock not only has all the very latest and sweetest sheet music but has recordings that have been produced by the most popular orchestras and vocalists in the nation. They keep right up with the times on all of their recordings and if you want to spend a few minutes or an hour under the soft influence of good music you can do so by visiting the Adair Music Company in Lubbock.

Not only do they have all of the latest sheet music but they have a nice selection of rebuilt pianos and other musical instruments that are priced right. All of these instruments have been put in perfect tune and condition and if you are considering the purchase of any item in music from teachers supplies to an instrument in your home you should visit the Adair Music Co.

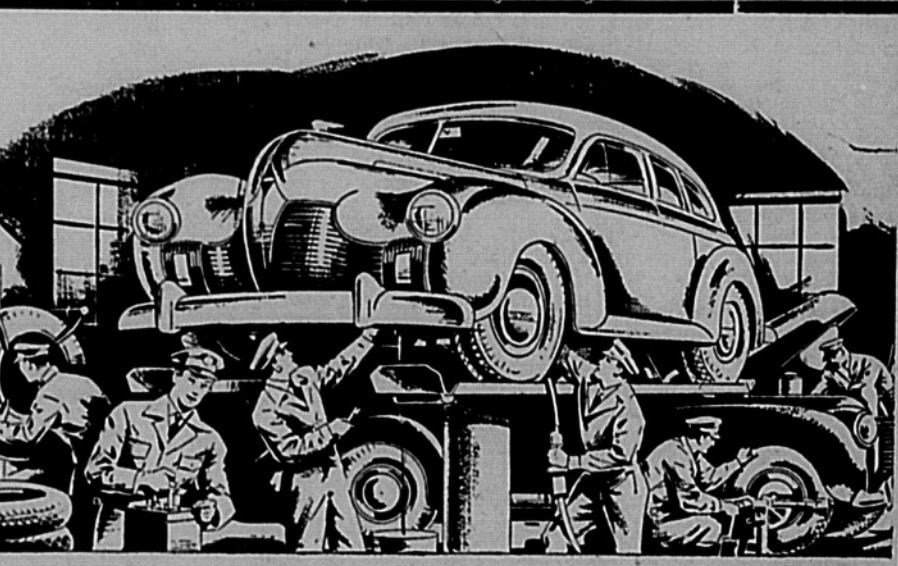

THE OLD JUDGE SAYS...

TED: "Clem and I were wonderin' what you thought of that new movie about the chronic alcoholic, Judge. Understand you saw it before we did."
OLD JUDGE: "Well... it's true most of us never see a case as extreme as that in real life because they are so few and far between. But it does point out one thing... chronic alcoholics are abnormal people and we've got to change our ideas about how to help them."
CLEM: "In what way, Judge?"
OLD JUDGE: "We've got to realize that excessive drinkers are suffering from more than a craving for alcohol. According to

psychiatrists and medical men at one of our great universities, the alcoholic is a sick person. The study of hundreds of cases shows he is suffering from some physical, social or emotional condition... just as in the case of that poor chap in the picture. Fortunately, they represent only a very small percentage of those who drink."
TED: "Is anything being done to really help these folks, Judge?"
OLD JUDGE: "Yes... a great deal in clinics throughout the country. And with the cooperation of the beverage distillers who sincerely want their product used only in moderation."

SOCIAL SECURITY MAN TO VISIT HERE WEEKLY

John Palmer, Social Security Board representative, will be in Slaton at the U. S. Post Office at 4 p. m. on Wednesday, March 20, 1946. He is in Slaton one day each month for the purpose of answering any questions people may have on Social Security; discussing possible benefits and taking claims from persons who may be entitled to benefits, and of taking applications for Social Security account number cards.

Have you got more than one social security card? And do you sometimes show one card to your employers and sometimes another? If you are doing that, you may take a loss when you file a claim for benefits. Or your family may take a loss when they file a claim.

Why? Because your social security card is the key to your insurance account with Uncle Sam. If you have more than one card, it means that you have more than one account. It means that the wages reported by your employers are sometimes credited to one account and sometimes to another. And that may mean trouble when time to draw benefits comes around.

So if you have more than one

social security card, let the nearest Social Security Board office know about it. They will straighten out your account and tell you which number to use.

And now suppose you lose your card. What then?

The thing to do is to apply at the nearest Social Security Board office for a duplicate card. Don't ask for a new card. Ask for a duplicate card with the same number on it. Then you can be sure that you will have just one account and that all your wages will be credited in the same place. Then when you or your family apply for benefits, there will be no trouble getting everything that's due.

So remember — one card, one number—for a lifetime.

He is now under exclusive contract to do his "peekle in the meedle with the mustard on top" routine on NEC's "Jack Benny Show." He was once a New York press photographer.

You aren't getting machinery, Mr. Farmer, because...

PICKET LINES
 have taken the place of
PRODUCTION LINES!
 ...so don't blame your Implement Dealer!

YOUR implement dealer had planned and expected to have his display floor filled with new implements and tractors weeks ago. And we had planned to make them—had told our dealers and our farmer customers they would have new equipment and plenty of service parts for the 1946 spring work. And we had hoped to sell these machines at no advance in price.

Real Production Had Started

When the war ended, our organization bent every effort to increase production, with the result that in the last months of 1945 machinery was being built in very substantial quantities. Here are a few figures:

ITEM	PRODUCTION	
	NOV. 1945	DEC. 1945
Tractors.....	7,271	7,432
Combines.....	2,345	2,526
Cultivators.....	3,482	3,308
Hay Leaders.....	209	982
Plows.....	6,185	6,702*

*Plows are made in our Canton and Chattanooga Works, which are not on strike. January production was 7,747 plows.

Both your dealer and we were encouraged by this production picture at the turn of the year. But the strike changed all that. As you know, the CIO United Farm Equipment & Metal Workers of America called a strike in ten of our plants, on January 21, 1946.

What Is The Strike About?

Wages are a basic issue. At the time of the strike, Harvester employees were among the highest paid workers in American industry. When the strike began, the average hourly

earnings in the ten plants, not including overtime, were \$1.15½. If present wage proposals are adopted, this figure will become \$1.33½ per hour.

When the strike began, negotiations were broken off by the Union on the issue of compulsory union membership. The Company has no desire to weaken the Union. It recognizes certain reasonable needs of the Union. But the Company does oppose compulsory unionism. It feels strongly that an employe's membership should be a matter of his own choice.

Material Costs and Price Relief

Wages and materials are the great costs of operating our business—together they consume all but a few cents of every dollar the Company takes in. Wages are obviously going to be high—and nobody knows just how high material costs will go.

In the face of rising costs of materials, the Company does not see how it can pay the wage increases recommended by a Government fact finding board until it has definite and satisfactory assurance from the Government that reasonable price relief will be granted to the Company within a reasonable period of time. This matter is of such importance that it will not be discussed here, but will be covered by future advertisements devoted to both prices and profits.

Speaking for our dealers and ourselves, we can assure you that no customer is more eager than we are to resume production. We are doing and shall continue to do everything in our power to bring about a fair settlement as soon as possible.

RECOMMENDS FERTILIZER FOR IRISH POTATOES

The Texas Agricultural Experiment Station recommends that commercial fertilizers for Irish potatoes in the high plains area of Texas be applied at the rate of 600 pounds of 8-12-4 or 800 pounds of 6-8-4 fertilizer per acre.

A tremendous increase in the number of irrigation wells dug recently, and the newness of pump irrigation are taken by D. L. Jones, superintendent of the Lubbock substation, to indicate an eventual increase in High Plains

Mrs. Swafford of Slaton spent Saturday night with the J. L. Whites.

acreage devoted to some intensive crop with potentially high returns.

Irish potato production is a comparatively new crop in the High Plains, and an active demand and high prices received during the war period preclude any forecast as to the future economic importance of its production in that

area. Some of the factors met in Irish potato production in that part of the state are analyzed in a report just released by the Station entitled, "Fertilizers for White Potatoes in the High Plains of Texas." Data shown are based on a three-year study ending in 1945.

Doctors are on The Job

DOCTORS certainly are not contributors to a "philosophy of idleness," nor have they figured out a way to regiment illness. In hospitals, homes, offices and laboratories, Doctors are on the job day and night, taking care of patients — or seeking better methods of making and keeping them well.

Rare, indeed, is the Doctor whose working time is confined within certain hours.

What with free clinics, hospital staff service, operation hours, emergency calls — the average Doctor's working day is long and arduous. It is difficult to find "vacation" time.

Even the physician with a highly specialized practice is not immune to broken hours of sleep and rest, when emergencies arise.

Don't allow Federal "paper work" and red tape to be added to the load of your family Doctor.

We are always at your Doctor's and at Your Service to fill your prescriptions promptly and with extreme care.

THIS WEEK'S LESSON

"Substance" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, March 17.
The Golden Text is: "By humility and the fear of the Lord are riches, and honour, and life" (Proverbs 22:4).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "For with thee is the fountain of life: in thy light shall we see light" (Psalms 36:9).
The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Sci-

ence and Health with Key to the Scriptures" by Mary Baker Eddy: "To grasp the reality and order of being in its Science, you must begin by reckoning God as the divine Principle of all that really is" (page 275).

In Washington

By **GEORGE MAHON**
This column is being written on Saturday afternoon, March 9, and will be air-mailed to Texas before 6 p. m. During the war, mail service between West Texas points and Washington, D. C., was quite erratic and undependable. The service is now improving. Regular mail requires about three days, sometimes four, and airmail deliveries are usually made in two days.

Recently I made some tests on air-mail service between Washington and the two towns in our District that have commercial air-line service—Lubbock and Big Spring. All of the letters were delivered within two days; a few of them were delivered overnight.

The eight-cent air-mail postage rate is too high and, in my opinion, it will be only a matter of months before the rate will be reduced and the service improved.

There has been a serious breakdown in the delivery of mail to and from the far Pacific on account of the reduction of Air Force activities. I presented a number of complaints which I had received to the Adjutant General some time ago, urging that immediate steps be taken to provide adequate air-mail facilities to our men in Japan and China and other Pacific areas. Nothing short of good mail service to these areas can be tolerated.

Yesterday I had a talk with Claude Wickard, head of the Rural Electrification Administration, about something which I regard

as very important to all rural America. That is the question of rural telephone service. There is hardly a rural area in the United States where the telephone service is adequate to meet the need. Instead of increased coverage with the development of science, there are less rural telephones today than there were 20 years ago. More rural homes have electricity than have telephones.

We have some legislation pending which would encourage the development of rural telephone service through the REA set-up. Other methods have also been proposed. There is no good reason why rural areas should be denied the advantages of telephone service. I have joined with others here who are seeking a way to help meet this important need.

This morning I joined a group of 15 other members of Congress in a meeting with Clint Anderson, Secretary of Agriculture. We met to discuss the cotton situation. The secretary reported on the progress of our export program. It is moving along well. Government-owned cotton is rapidly being sold. By August, the government-owned stock, instead of totaling millions of bales, will probably have been reduced to one-half million bales.

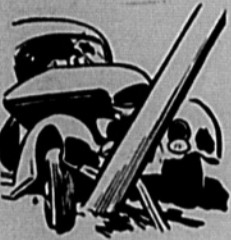

We renewed our urgent request, originally made in January, when the proposal was first made, that the threat of ceilings on raw cotton be entirely removed. Again we pointed out that such ceilings

would be unworkable, unjust and unnecessary, because there is no shortage of raw cotton. Since no final assurance has been given, we will continue our efforts against the proposed ceilings. We plan a further discussion of this subject with OPA officials.

Lee Ozburn, head of the Farm Security Administration in Texas, told me this week that funds for Farm Security loans to veterans and others who need assistance through the FSA for farming purposes have been exhausted. This has been confirmed in communications from a number of counties of our District. Mr. Lasseter, national head of the Farm Security Administration, came to my office this week to discuss plans. We are going to try to get some quick action in Congress in order to provide an additional loan authorization so that the more urgent demands can be met. Action must be taken within the next few days or else it will be too late. Chances for an additional FSA loan authorization are good.

OLD SALE BILL INCLUDED WHISKY, STILL, SLAVES

In few history books is the passing of time more clearly visualized than in the interesting story revealed by an old sale bill, printed in old Kentucky in 1849.

Several years ago, the Mt. Vernon Herald published an article concerning the contents of the old bill, and this clipping was found recently and sent in for publication. The clipping follows:

"Having sold my farm, and am leaving for Oregon Territory by ox team, will offer, on March 1, 1849, all of my personal property, to-wit:

"All ox teams, except two teams, Buck and Ben and Tom and Jerry; 2 milk cows, 1 gray mare and colt; 1 pair oxen and yoke; 1 baby yoke; 2 ox carts, 1 iron plow with wood mile board; 800 feet of poplar weather boards.

"1,000 3-ft. clapboards, 1,500 ft. fence rails; 1 60-gallon soap kettle, 85 sugar troughs made of white ash timber; 10 gallons maple syrup; 2 spinning wheels; 30 pounds mutton tallow.

"20 pounds of beef tallow; 1 large loom made by Jerry Wilson; 300 poles, 100 split hoops, 100 empty barrels, 1 32-gallon barrel of Johnson Miller whisky, 7 years old, 20 gallons apple brandy.

"One 40-gallon copper still, 4 sides of oak-tanned leather; 1 dozen reel hooks; 2 handle hooks, 3 scythes and cradles; 1 dozen wooden pitchforks; one-half interest in tan-yard; 7 32-caliber rifles.

"Bullet molds and powder horn, rifle made by Ben Miller, 50 gal-

Be Quick To Treat Bronchitis

Chronic bronchitis may develop if your cough, chest cold, or acute bronchitis is not treated and you cannot afford to take a chance with any medicine less potent than Creomulsion which goes right to the seat of the trouble to help loosen and expel germ laden phlegm and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes.

Creomulsion blends beechwood creosote by special process with other time tested medicines for coughs. It contains no narcotics.

No matter how many medicines you have tried, tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough, permitting rest and sleep, or you are to have your money back. (Adv.)
