

Business Men Are Optimistic Over Slaton's Prospects For 1949

Fast Moving Mayors Race Ends; Wootton Is Winner By 52 Votes

In one of the hottest contests staged in Slaton in many years in a city election, Lee Wootton was re-elected Mayor over M. B. Tudor by a vote of 326 to 326. Coming in a year that is considered an off year for elections this represents probably the most votes that have ever been cast in a city election.

L. B. Wootton received 378 votes and M. B. Tudor 326. In the contest for Commissioners there were contestants for Wards 2 and 3. There were three places to fill but J. B. Huckabay had no contestant in Ward 1. In Ward 2, Otis Neill received 120 votes and R. W. Ragsdale, Jr., 82, in Ward 3, J. E. Eckert received 60 and W. T. Brown 22. O. N. Alcorn has one more year to serve as Commissioner of Ward 4.

In the vote on the \$40,000 paving bond issue the voters were authorized by the bonds 381 to 111.

The contest for Mayor was the spotlight of the election with both sides creating a brisk rivalry that gave the contest something of the old time zest that elections used to have. The outcome was in doubt in most voters' minds until the final vote was counted. Such vigorous efforts on the part of the candidates and the interest that it created is considered by many business men as a sign that the people have become much more interested in the business operations of the town and in local and national politics and that it points to a more vivid future along these lines.

Soft Ball To Be Here This Summer

Lewis Hollingsworth and Billy Ball, as representatives of the Slaton Chamber of Commerce, and representatives of several softball teams in the surrounding communities, met with the Lions Club last Tuesday night and discussed the organization of a softball league. It was tentatively decided that such a league would be formed with games to be held Monday, Tuesday and Friday nights at the new Lions Club Athletic Field, that is almost ready for operation. The Lions Club as sponsors have employed a workman for \$100.00 to give the field its finishing touches.

It is planned to have eight or ten teams as members of the softball league and the Chamber of Commerce has agreed to help finance the league for equipment that will be needed and the City officials will be requested to have the City stand the expense of the lights.

It was reported that the flood lights for the park have been ordered and should be here in a short while and that the poles, on which the lights will be installed, are enroute. There is some doubt as to whether the lights can be installed by the time the first game will be played on the 10th of May, but there will be night ball games this summer, both for hardball and softball, and it is expected that the field will be the most popular place in the area. A small charge is planned for the softball games but it will not be more than most of the fans donated when they attended the games that were played in the Club House grounds.

Two Businesses Are Burglarized

The City and County officers are still investigating clues on two burglaries that were committed Friday night, April 1st. One of the places entered was the Snack Shack on North 9th street and the other the Drive-In Cafe on South 9th street.

Cigarettes and some other merchandise were taken, and in both places Juke Boxes were broken open and robbed. The amount of money taken could not be estimated.

Chief of Police Ernest Ward said that both jobs have some of the ear marks of local thieves, but that his force and the County officers are investigating all clues and hope to catch the law breakers.

Better Seeds for Better Crops

To ensure bigger crops for a hungry world, the United Nations Food and Agriculture Organization (FAO) is now sending hybrid seed corn to 19 countries in Europe and the Near East. In Italy, for example, hybrid corn gives up to 50 percent better yields than older types. Here members of FAO's agricultural division pack hybrid seed for other countries suffering from food shortages.

Baseball - Track Feature H. S. Spring Athletics

In the high school baseball game played here last Thursday afternoon, Slaton defeated Ralls by a score of 17 to 1. Coach Tillery's boys looked very good, with Ed Willis doing an excellent job on the mound. Ralls used two pitchers, but neither was able to stop the hitting of the home boys. The following was the Slaton line-up: Biggs, 1b; Lewis, cf; Layne, 1b; Williams, 2b; Macker, 3b; Willis, p; Bybee, ss; Huckabay, c; Morgan, rf; Voigt, lb; Corley, 3b; Smith, cf. Coach Barnett umpired behind the plate and one of the Ralls coaches watched the bases. The teams are scheduled to play in Ralls today.

The Area Track Meet for all Class A schools of this area will be held at Texas Tech Saturday. Slaton will have approximately twelve representatives in this meet, and those who place will be entered in the regional meet which is to be held in Lubbock two weeks later. On Friday and Saturday, April 15 and 16, the South Plains Relays will be held in Lubbock.

Next week the district conference games in baseball are to begin. Slaton will play Post and Tahoka some time during the week, definite dates depending on weather conditions.

S. S. Forrest Pioneer And Builder Is Buried Here Last Tuesday

Funeral rites were held last Tuesday afternoon from the Methodist Church for S. S. Forrest, sr., 82, who passed away Monday, April 18th. He had been in ill health for some time but he became critically ill only a short time before his death. Services were under the direction of the Williams Funeral Home and burial was in Englewood Cemetery.

Mr. Forrest was one of the most aggressive and progressive men of this entire section as well as of Slaton.

He pioneered to Greer county, Oklahoma, in 1887 when that land was opened to settlement. He moved to Texico in 1906 where he entered the lumber business for the first time. He erected the first lumber yard in Clovis, N. M.

Entered Hardware Business He moved to Slaton in 1911 where he entered the hardware business, erecting the first school here and the first residence not placed by the railroad.

Forrest established the Plains Lumber company here in 1920, later acquiring lumber interests in Post and Lamesa. He purchased the Slaton ranch north of Slaton in 1938.

Four children were born to Forrest and his first wife, all of whom have since died. S. Lamar Forrest, Lubbock lumber man and widely known civic and church leader was the last to die, on Feb. 28, 1948. The first Mrs. Forrest passed away in January, 1942.

Active In Church Work He married Miss Florence Robinson of Athens in January, 1943, and she is one of his survivors.

Forrest was active in church work during his lifetime, having become a member of the Presbyterian church at the age of 18 in Midway. He was a charter member of the Slaton Methodist church.

He also claimed the distinction of being a direct descendant of General Mirabeau B. Lamar, second president of the Republic of Texas and known as the father of the public school system of Texas. His maternal grandmother, Mary Anne Lamar, was a sister of General Lamar.

Pallbearers were George Gabel, Sug Robertson, Joe Walker, H. L. Moore, Linton Pruitt, T. H. Appling and J. T. Brooks, all of Slaton, and W. T. Barnett of Post.

Survivors in addition to Mrs. Florence Forrest, include a brother, Will M. Forrest, of Midway; three grandchildren, S. S. Forrest, Jr., of Lubbock, Edwin L. Forrest of Slaton route 2, and Mary Joe Copenhaver, also of Lubbock; and eight great grandchildren.

Moisture Of Past Weeks Points To Good Crop Year

Conditions in this section of the country are very good, according to H. T. Swanner, active vice president of the Citizens State Bank. Although deposits are some less than at this time last year, they are holding up wonderfully well considering the short crop of the past season. Very few people are cashing their bonds to buy cars or other wanted items at this time, said Mr. Swanner. Prices have started to go down and it is natural for people to hold off buying until they believe the prices are as low as they are going to get. Deposits on April 4, 1949 amounted to \$3,936,503.37, as compared with \$3,237,122.73 on April 4, 1948. A large majority of the income tax checks had already been taken out when this statement was made.

Mr. Swanner also said that farmers are feeling very encouraged, with the good deep season now in the ground being almost a guarantee of a good crop year. Farmers are able now to get almost anything they need with which to do their work, tractor parts and machinery of all kinds being available. He believes the only thing our farmers need to worry about is planting too large an acreage of cotton this year, so that the government will be forced to cut next year's acreage to keep prices up, because of too large a carry-over. Mr. Swanner believes the government made a mistake in lowering the parity on grain, whereas not much change was made on cotton. This will make cotton the big money crop this year and farmers will be inclined to plant a large acreage to cotton and cut their grain acreage, which he thinks will be a mistake in the long run.

Mr. Allan Payne says the dry goods and ready-to-wear business has increased over this time last year. "People in general are in excellent spirits," said Mr. Payne. "Easter trade has been very good, in fact, March business was ahead of last year and so far, April has shown an increase. Everything points to a good fall, with the fine deep season we have to start on." He says he never saw prospects any brighter for a good year.

O. D. Kenney of the Kenney Auto Supply, says business in his line is about the same as last year. January of this year was much better than the same month in 1948, but February and March made the average for the first three months about the same. He says the frame of mind of his customers in general is very good, everyone being happy over the fine moisture we have had and the bright prospects of a good year ahead.

Mrs. Clay Oates, who purchased Kessel's Dept. Store just a year ago this week and changed the name of the business to the Clay Oates Dept. Store, says that business is much better than it was at this time last year. He says the Easter trade of the last week or ten days has been very good. "We do not expect any decrease in business," said Mr. Oates, "but neither do we expect any considerable increase before fall. People are not buying as expensive things lately, indicating that they have a little less money to spend."

Lewis Hollingsworth, of the Southwestern Public Service Co., is very optimistic as to the outlook for Slaton this year. He reports 1500 customers for March, 1949 as compared to 1400 for March of last year, which is indicative of a considerable increase in Slaton's population.

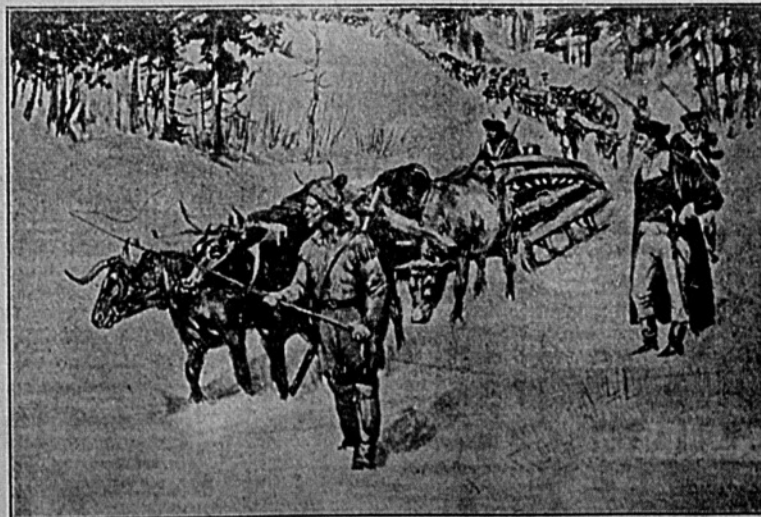

LAUGHS ARE PROMISED AT HIGH SCHOOL TONIGHT

If you enjoy laughing, you will not want to miss the program at the high school auditorium tonight, beginning at eight o'clock.

MUNITIONS FOR CONTINENTAL ARMY—After Ethan Allen captured Fort Ticonderoga the heavy cannon were dismantled and with powder and shot were transported in ox-drawn sleds over the Berkshires to Boston. There the patriots mounted the guns on Dorchester Heights overlooking the British occupation troops and on March 17, 1776, the British evacuated the city. The reproduction above of a notable painting of the winter journey across New England will be seen in the Army Day historical exhibit in leading American cities.

Fifty-eight persons were in attendance, including representatives from Morton, Sundown and Whiteface. —Hockley Co. Herald.

Mayor W. E. Dameron Tuesday announced the sale of \$131,000 in bonds to William N. Edwards and Company, bonds that were voted last fall for sewerage and water extensions in Hereford.

The city commission accepted the bids Tuesday and the city engineer was immediately put to work to begin a survey of sewer and water lines in the enlarged city limits area. He will draw up plans and specifications for the new area. Mr. Dameron said. —Hereford Brand.

The pavement on U. S. Highway 87 running south through Tahoka and on U. S. Highway 380 running east through Tahoka is to be widened by the State Highway Commission of Texas at an early date according to an order passed by that body on Tuesday of this week. The job is to cost \$76,000, and the City of Tahoka is to furnish the right of way. —Lynn Co. News.

Despite the housing shortage and a possible small increase in the number of school-age children here Post's population is estimated to be several hundred persons less than it was a year ago, when the General American and O'Neal Drilling and other oil companies had crews living here. —Post Dispatch.

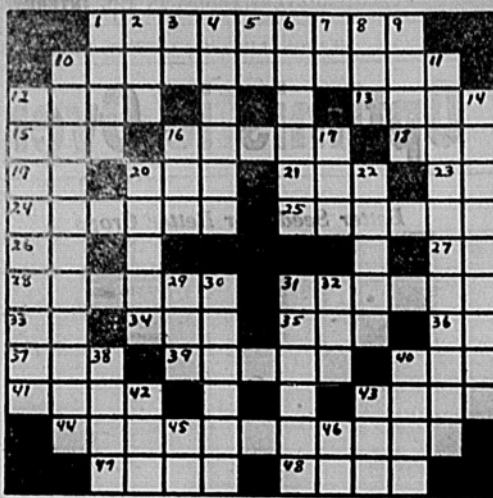

A housing shortage in Post is a sign that the town is teeming with newcomers. This usually means that oil activities are picking up. The Post Dispatch this week made an attempt to find out who some of these newcomers are and where they are living. Although the information is incomplete, it gives an idea of the scope of the activities which brings newcomers to Post at this time. —Post Dispatch.

NOT THE SAME—That fellow at the next desk says "Opportunity doesn't knock these days; it rings the phone and asks a silly question." —The Hockley Co. Herald.

Actual construction work on the big fuel burning power plant of the Texas Electric Service Company started Tuesday. Contractors moved equipment on the site of the plant's water intake, across the creek from Thompson Colored School. —Colorado Record.

Directors of Colorado City's Frontier Roundup and Rodeo Association were in session Friday of last week to perfect plans to stage the 14th annual show. Dates selected were the nights of August 24, 25, 26 and 27, 1949 and

Howdy Folks; There's a vast difference between a horse race and a political race. In the horse race the whole horse runs.

You can't fool all the people all the time, but a politician is contented with a sizeable majority.

A politician is one who talks himself red, white and blue in the face.

That little boy who was sent to the store and forgot what he was sent for grew up to be a politician.

You know we're only kidding. As a matter of fact, the writer came from a long line of politicians. His grandfather ran for the border, once.

We make no bones of the fact that we are running after your business.

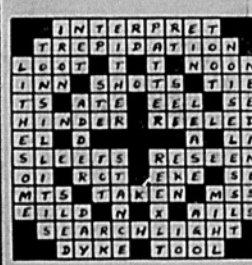

And, if we get your trade, we'll try hard enough to hold you by fair methods, too.

What They Write

Mr. A. M. Jackson
Slaton Slatonite

Dear Sir:

I have been reading with interest the views of "humane" persons who are alarmed at their pets being poisoned. While I have never poisoned, shot or maimed any animal, nor have I ever brought a pet home to be half starved, beat by my children, and let loose to inflict property damage, such as, ruined precious shrubbery, garbage strowed all over the lawns, incessant howling, barking and in general disturbing the peace, much worse than people who are thrown in jail. I wish in short, pet owners would keep their big mouths shut and their "precious" pets in their own back yard. Why drive everybody nuts, have respect for your neighbors property.

An interested Reader.
P. S.: Print this and you can belong to the N.F.N.P. (Nuts from neighbors pets).

CARD OF THANKS

We wish to express our thanks and gratitude to our many friends for the beautiful flowers and cards and the visits while at home and in the hospital.

Home Talks

Our floor covering department has been spreading good will and making home keeping easier for a lot of housewives during the last few weeks.

Mr. and Mrs. Don Bourn have a new ivory and green marbled pattern on their bath.

Geo. Brassell, Jr., got his renter out of his (receding) hair by covering their apartment in a beautiful, easily kept, floral pattern linoleum.

Mrs. Dudley Berry has a new cabinet top in the new Good-year vinyl plastic which is practically indestructible, and a new covering in the bath in a black marbled inlaid.

Key Ely has a new counter top we installed for him in a vinylite plastic with chrome edging.

Rouie White is covering her living room in a beautiful floral pattern.

Mrs. Ed Lamb has a new yellow plastic top on her kitchen work table. I'll bet she's proud of it too.

Mr. and Mrs. Alton Russell should be proud of the new inlaid on their bath, service porch, kitchen and cabinet top.

Melton Hancock have a new standard inlaid which should give them years of service.

Mrs. J. Ed Crooks has a couple of new rugs that will brighten up the house and ease the house work too.

Mr. J. H. Ford has just put in a new rug.

Mr. and Mrs. T. C. Barnes have covered the front of their new house in a heavy duty print linoleum.

George Williamson has new floor covering that will make living at home nicer.

Mrs. McClanahan has a new cabinet top and washing the dishes won't be such a drudge now.

It is time to start thinking about lawn chairs and evaporative coolers and we sure want to show you our line of both and save you money in the process.

You know it has always been a mystery to me as to why a person will spend a sizeable sum for heating equipment to keep them warm, but balk at spending the same amount on cooling equipment to keep comfortable in hot weather.

We have a special price on lawn chairs for the people who want to buy early and save the difference.

This quick-maturing, high-yielding, better-staple-producing planting seed answers the demand for a variety that is tested and proved for West Texas growers. It is the result of scientific selection and painstaking experiments to develop a seed that will produce more money per acre planted.

Here's why the NEW Paymaster "54" is a money-making Cotton...

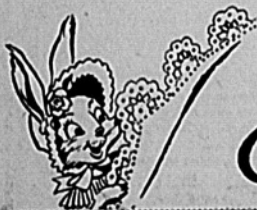

- **EARLY MATURITY**
Of 25 varieties tested recently... "54" was first in percentage of crop harvested in a four-month period.
- **HIGH YIELD**
In this same test, "54" was third among all varieties in yield per acre.
- **BETTER STAPLE**
"54" ran 15/16" to 1 inch throughout West Texas, assuring a better price.
- **TESTED FOR DRY LAND**
"54" has been proved successful for dry land farming as well as for irrigated Plains areas.

Be among those profit-minded farmers who demand a money-making Cotton planting seed—the NEW "54"; order your supply of the improved, state-registered "54" NOW.

JUST TALK

by
A.M.J.

While Doctors have no qualms about putting someone else on a diet of two crackers and a glass of weak tea they certainly are not afraid to charge right in and eat their own way through a ton of food.

Every time I have been at a dinner or a so called banquet, the bravest eaters have been the doctors. They will take on onions, chili, tamales, pickles and ground glass, they advise most everyone to stop smoking, drinking coffee and having any fun at the table and say that when one sits down and fires up the boiler with anything that is seasoned just right that you might blow up like an atom bomb and I am making it a point to get as far away from the preachers and doctors at a banquet table as I can for they get all of the choice food before I have a chance to stick my fork into the contest and I'm faster than average myself, and I don't want to be too near a doctor or a preacher when he explodes.

Folks who have been in the East report that there are a great many people out of work in the big manufacturing centers with conditions all mixed up. Prices are dropping some but they are still too high for most people to keep up when they are out of work for any length of time. Local merchants report more people asking for credit and monthly payments on merchandise than they have since before the war and there are not as many twenty dollar bills floating around as formerly.

It seems to me that Slaton has grown steadily and that most of the business men have been conservative during the time that a lot of them could have gone haywire and spent money when prices were at their peak. It seems to me that when building materials get somewhere near a reasonable price that the Government will start encouraging a lot of construction in order to take up the slack in employment if too many folks get out of work. The rearming of all of the nations in the Atlantic pact will probably drain off a lot of the products that the big trusts in this country are controlling and I cannot see how a depression can come but a lot of folks think that such a condition is not far distant while there are many people who think that the world will be embroiled in another war before the year ends.

There always has been and likely always will be a lot of propoganda put out about turning everything over to the young folks and it seems to be the assumption that the young folks have the know how and more energy than the older folks and that the old fogies have lost their marbles but I'd like to know why all of the military leaders and most all of the other big shots during the last war were

hand full of notes get up and tell you how to do things and how to get rich, the politicians will be there too, as well as the fast talking salesmen and the concerns that try to get you so drunk that you have no idea what you have bought or contracted to take. There is gonna be things stirring in the lobbies of most all of the hotels in every town from 60,000 up and what will happen in them would be a shame to tell.

So far this year the rains have come just right and most all of the vegetation looks fine but the real rains are going to start before long and you can get ready to hear the farmers howling their heads off.

To me there is nothing as depressing as wet, soggy weather and I get particularly discouraged when the water stacks up into a miniature Mississippi river on the West side of the square. It would probably be an expensive proposition to work the streets over so that a good drainage could be arranged for that side of the square but it is one thing that is a big draw back to our business section of town.

We have started a new feature in the Slatonite. It is a welcome to Slaton to families who have moved here to make their home. If you are in business in Slaton it might be a good idea to write each family and invite them to visit your store, most folks appreciate such personal attentions. This new service is being made possible by the co-operation of the Public Service Company. They give us the names and addresses of the folks who order electric services.

Like most new ministers who come to town Reverend J. T. Bolding has been making the rounds and visiting with the business folks in the stores. Last week he went into Moyer Bros. Gift and Athletic Goods store. He first met John Berkley and asked what church he

attended and John told him the Church of Christ, then he tried the other man in the store who was Clark Self. He too turned out to be a member of the Church of Christ and in desperation the new preacher tried the operator of the establishment who is the Pastor of the Church of Christ, proving that you never can tell what you are going to get into when you go out to get new members for the Baptist Church.

Do you know what the number on your automobile license plate is? Every year I try to get one that should be easy to remember but I forget it as soon as it gets on the car and get it mixed up with our telephone number, the street address of our home and the number on the Post Office box but my wife can rattle it off after glancing at it one time regardless of how complicated it may be and she usually remembers telephone numbers too. What's the use.

It is a little late I believe to have a plant exchange, but if it is not I'd like to see some wamans club sponsor one. There are a good many flower gardens where the perennials are too crowded and should be separated and there are a lot of folks who would like to get the shrubs and flowering plants that would be thrown away. Slaton needs to be beautified as much as possible and it is not too late to start.

A lot of men tell me that they do not even own an overcoat, while

others say that they have one that is five or six years old but that they never wear it. Could it be that I am the only remaining man in Slaton who is sticking to this form of torture.

Posies to party-line telephone users

OUR THANKS to you and the thousands of others whose willingness to "share the line" has made it possible for so many of your friends and neighbors to enjoy the protection and convenience of a telephone.

Three of every four home telephones today are party lines.

Yes, party lines have "stretched" hard-to-get telephone equipment in a time of shortages and a big demand for service.

Our goal, of course, is service for everyone—the kind he wants, when and where he wants it. For the time being, though, in many neighborhoods we must continue to say:

"We can offer only party-line service to new customers. It's the fair way for everybody while we're still working to get telephones to hundreds of people who are waiting."

How To Grow Big Better Tomatoes

Tomatoes grown on stakes have many advantages. The yield is much greater per square yard of ground than when grown any other way. The fruit is smoother and larger. It matures earlier and none of it rots from lying on the ground.

When frost danger is past, set the plants 18 inches apart in the row. I plant mine in double rows about 2 1/2 feet apart, leaving a wider space, say about 3 feet, between the double rows.

When the first branches appear, select the tallest, most vigorous branch to train up the stake. Pinch off all other branches when they first appear. Pull off all suckers. These are branches that grow out just above the leaf stem. While they are sometimes called suckers, they are really branches which will produce blooms and fruit if left alone. A quick sideways pull will usually snap these suckers off clean.

When the chosen branch is about a foot high, it is time to stake the plant. Any kind of a slender pole will do. It should be at least 6 feet long, but 7 or 8 feet long is better. I used 10-foot stakes last year and had to pinch back to keep the vines from growing a great deal taller. Push the stakes into the ground deep enough to give them good resistance to wind and the weight of the fruit. Set them straight up and down, not slanting. To further brace them, wire a series of poles along the top, fastening each stake to them so that the whole line of stakes are tied together. Tie with a soft string. I use strips of old cloth, tying a single branch loosely to its stake, being sure to allow room for growth of the stem. Keep all suckers pinched. That is all there is to it except the cultivation, which is no different from that used for tomatoes grown the usual way.

My tomato plants grew more than 10 feet tall last year, and averaged five large fruits to the stem, which were spaced about a foot apart along the main branch.

Try this method and you will not abandon it. It is a beautiful sight that unfolds as you walk down aisles of tomatoes higher than your head, with green and crimson fruit hanging in large bunches against the wall of green.
