The following is a reprint of Wes Izzard's column "From A to Izzard" published daily in the Amarillo Daily News. Thought it was so good I would pass it on to you...

TOLERANCE NOT ALWAYS GOOD

About 30 years ago tolerance became fashionable.

Up to that time we Americans had gone about tolerating the things that should reasonably be tolerated, without making a major project out of it. But in the early 30's we began to make tolerance a fetish; and in so doing we sowed the wind.

Tolerance was preached in the pulpits, taught in the schools, prescribed by the psychiatrists, and urged by the politicians. A lot of us decided that the thing to do was to tolerate everything and everybody. And we did. Tolerance, being the line of least resistance, became a habit.

Today we are reaping the whirlwind. The evils that we learned to tolerate threaten to engulf us.

-We tolerate violence.

Recently 37 New Yorkers witness various stages of the pursuit and assault on a helpless woman by a mugger, and not one turned a hand to help. We excuse a murderer because he had an unhappy childhood. We condone mass violence in behalf of minority rights.

-We tolerate immorality... public and private... Billie Sol Estes and Bobby Baker had lots of official help, but who cares? We shrug off relief rackets. We put up with vulgarity in the movies, filth on the newsstands, promiscuity on the campuses and orgies on the beaches.

-We tolerate drunkenness. Dr. Marvin Block, authority on alcoholism, says, "Increasingly people are accepting drunkenness without being shocked."

-We tolerate atheism. This is all right up to a point. But we go so far as to stand silently while the courts encourage a tiny Godless minority to decide how far the majority may go in publicly recognizing the Almighty.

-We tolerate invasion of our privacy. Stewart Alsop, political editor of the Saturday Evening Post, in discussing the use of the lie detector among government employees says: "Many people are almost as accustomed to having their emotions, private attitudes, and personal histories explored by psychologists and amateur snoopers as they are to having their teeth examined by the dentist."

Mr. Alsop says this will be halted "only when a lot of people get angry about it."

And that's the answer to it all. Sometimes it seems as though we Americans have lost the capacity to become indignant.

Evil must be destroyed, not tolerated.

He shall give his angels charge concerning thee, to guard thee.—(Luke 4:10).

If we but seek it through reverent prayer we can always have the protection of God, no matter where we go or what we do, provided our motives are good and sincere.

In England it was unlawful from 1666 to 1786 to bury a corpse in a shroud made of anything other than wool.

GEE, SWIMMING IS FUN, and the City swimming pool has been packed these past few hot days, with youngsters who have journeyed to the pool to get away from the heat.

Reserve Seats Go On Sale July 1

Clearing away the old football bleachers began last week to make way for the new \$6600, football stadium, that is to be built on the Wolverine field, with plans calling for construction to get underway around mid-July.

Revenue for the modernistic stadium will be derived from selling reserved seats, which will go on sale July 1, at the City Drug and Springlake Elevator, on a first come, first served basis.

Approximately 256 seats will be reserved in the center section of the stadium, selling for \$10 per year, or \$25 for a three year period.

On the bottom floor of the glassed in two story pressbox, around 25 reserved seats will be available. Price for these reserved seats will be \$25 per year, \$45 for two years, or \$60 for a three year period.

This press box enclosure will have individual chairs and will be heated throughout.

Those desiring to purchase reserved seating for all the home football games are urged not to hesitate, but be ready to purchase their seats the day they go on sale.

The Springlake School varsity football schedule has been completed. There will be five home games and five games played away the coming season.

FOOTBALL SCHEDULE

Sept. 4	Idalou	there
Sept. 11	Seagraves	here
Sept. 18	Bovina	here
Sept. 25	Roosevelt	there
Oct. 2	Open	
Oct. 9	Amherst	here
Oct. 16	Sudan	there
Oct. 23	Kress	here
Oct. 30	Hale Cent.	there
Nov. 6	Silverton	there
Nov. 13	Farwell	here

The first five games will start play at 8 p.m., with the last five, conference games, to be played at 7:30 p.m.

MRS. BILL STOCKARD
 Olton Bowling Center
 Woman Bowler of the Year

Texans Back Goldwater With 56 Delegate Votes

Texas Republicans gave Arizona Senator Barry Goldwater 56 delegate votes Tuesday in Dallas, raising his total to more than enough to win the GOP presidential nomination, if he can hold them.

The action boosted Goldwater's total in a nationwide survey of delegates to 674. This is 19 more than the 655 needed for the nomination.

The senator could maintain his delegate strength, lose some of it, or increase his margin between now and the GOP nominating convention starting July 13 in San Francisco.

Spirited disagreement among Lubbock area Republicans over who should represent them at the National convention, helped delay the state session for more than an hour.

A successful coalition between Lubbock County chairman Syd Moore and Wilburn England of Hale County, captured the two national delegation seats for them. They defeated Bill Klattenhoff, Stanton, and Mrs. Charles Gibson of Lubbock, the 28th Senatorial District Committeeman

and Committeewoman. Klattenhoff and Mrs. Gibson were elected alternates to the San Francisco convention. All of those in the running for delegate spots were solidly behind Goldwater for the nomination.

Both Klattenhoff and Mrs. Gibson went down in defeat after a heated discussion on the question of delegates to the national convention.

The district committeeman and committeewoman normally have been chosen and some delegates voted against the two because they have gone before.

Caucus in Dallas included Lamb, Hale, Bailey and other counties which are in the 19th Congressional district, but which are outside the state senatorial district.

Mrs. Gibson objected that 12 Lamb County delegates with 1/2 vote each had been counted as full votes, but a recount still gave England the election over Klattenhoff.

Delegates also defeated a motion to elect Klattenhoff and Mrs. Gibson alternates to the convention by acclamation. But Mrs. Gibson subsequently defeated John Anderson of Borden County for one alternate spot and Klattenhoff won the other spot over Bill Braden of Springlake.

Braden and Mrs. Gibson had been agreed on as alternates at a meeting of Moore and England supporters Monday.

Mrs. Stockard Wins Bowler Of The Year

Mrs. Bill Stockard won the Woman Bowler of the Year award at a tournament held recently at the Olton Bowling Center, between the Bowler of the Week participants. She received a beautiful trophy and a cash award.

Mrs. Stockard beat out Mrs. Maxine Struve, who placed second, Mrs. Nora Lee Martin was close behind in third place and Glenda Williams placed fourth.

Those eligible to participate in the tournament were the ones bowling the highest three game series for the week, with each week's winner eligible for play-off competition at the end of the fiscal year.

Mrs. Stockard, who has only been bowling for one year, holds an average of 151, is a member of the 200 and 500 clubs, at Olton Bowling Center with her highest score for a three game series standing at 595.

During the past year, Mrs. Stockard has been the recipient of 11 trophies in tournaments in which she has competed.

She is the mother of three sons, Mike, 21 years old, Jim a sophomore student at WTSU and Wayne, Springlake high school student. She serves as vice president at the Citizens State Bank, here in Earth.

Offspring of sharks are ignored by the mother and left completely on their own from the moment of birth.

An unsuccessful attempt was made to grow cotton in France at the end of the 16th century.

Shrimp spawn offshore and the young ones must find their way into the sheltered, less salty bay waters or they perish.

"A new gown is like a new car—the base price may be less than the accessories."

20th Annual Earth Rodeo July 9-10-11

The 20th Annual Earth Rodeo is scheduled to be held July 9, 10 and 11 with performances starting at 8 o'clock each evening.

Rodeo stock will be furnished by Auffsils of Lubbock.

There will be plenty of thrills and spills in the calf roping bareback riding, saddle broc riding, girl's barrel race, bull dogging, bull riding plus many other events on the agenda for the crowds expected to attend the annual event.

The rodeo office will be located at the Earth Service and Supply Company, adjoining the rodeo grounds.

Trophy belt buckles will be given for first place winners in each event.

Make your plans now to attend all three performances and help make this the best rodeo Earth has ever staged.

Earth Lions Installation June 30

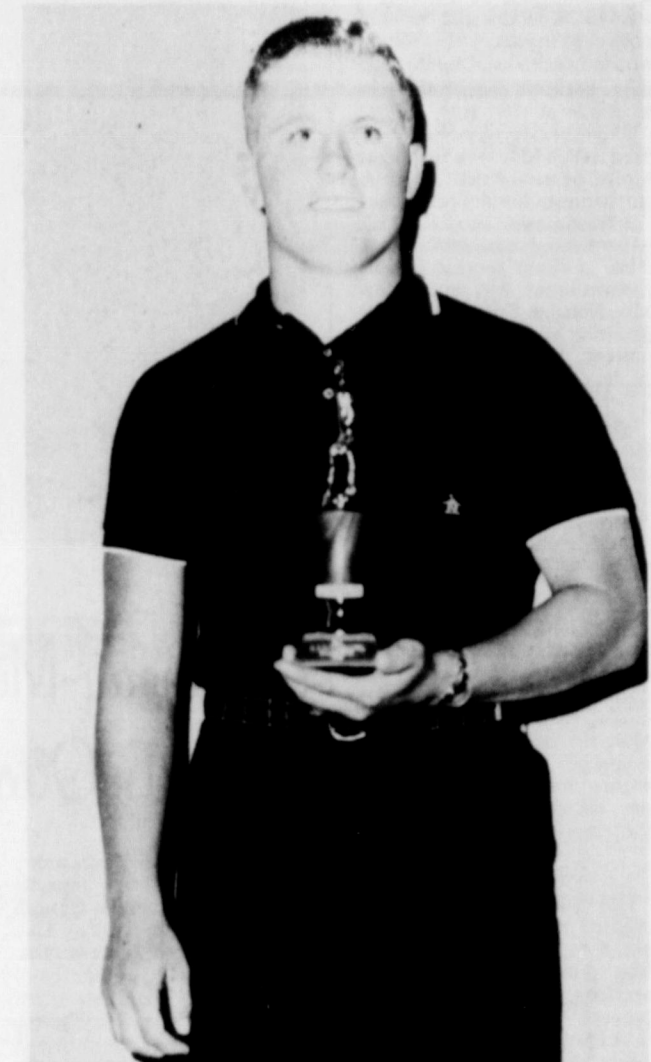

Ladies night and installation of officers in the Earth Lions Club will be held Tuesday, June 30.

New officers to be installed are president, Carroll McDonald, 1st vice president, Roger Haberer, 2nd vice president, Fred Clayton, 3rd vice president, Norman Hincliffe, secretary, Jarvis Angeley, treasurer, Edwin O'Hair, assistant treasurer and secretary, Paul Lee, tail twister, L. K. Anderson, and lion tamer, Phil Raught.

One year directors are Paul Lee and M. R. Phillips. Two year directors include George Laing and Rex Clayton.

Outgoing president is Phil Raught.

Members of the Lions Club are continuing their scrap iron drive, and urge everyone wishing to donate their scrap iron to contact Roger Haberer or Albert Lindley, Phil Raught or Carroll McDonald and they will gladly have it picked up.

BOYD CLAYTON

Clayton Wins Trophy In ACC Events

Boyd Clayton, who will be a sophomore student at Abilene Christian College this fall, was recently awarded a trophy for tying for second place in an annual gymnastics event held at the college.

The events consisted of parallel bars, horizontal bars rings, side horse, vaulting & free exercise.

Clayton competed in the gymnastics events, both sem-

esters at ACC, under the excellent coaching of Ben Zierkehouse.

He also entered the National events, held in Dallas, but was unable to compete, due to a leg injury. His team, the Flying Cats, had two members to place 9th in free exercise and one member won 14th in vaulting, competing with other gymnasts from all over the nation.

Clayton has been very active in gymnastics the past college year, and plans to enter these events and several others, next year.

He is a 1963 graduate of Springlake High School, and is the son of Mr. and Mrs. Fred Clayton.

Connally Receives Demo Support in Houston Meet

Governor John Connally has received overwhelming authority and approval to lead the Texas delegation to the National Democratic convention in August, with all 120 delegates pledging to support President Lyndon Johnson as a unit, at the State Convention held in Houston, June 16.

Connally forces were victorious by large majorities in test votes and in committee action as they beat down dwindling opposition for supporters of U.S. Senator Ralph Yarborough.

Connally's right hand man, in organizing the convention, in Houston, State Democratic Committee Chairman Frank Erwin of Austin, was named national Democratic committeeman. The new national committeewoman is Mrs. Eugene Locke of Dallas, wife of Connally's state campaign manager in his 1962 race for governor.

After the convention adjourned Connally appeared

momentarily to thank the delegates for making him head of the national delegation and for the cooperation in Houston.

Several county Democrats attending the meeting returned home Tuesday night, leaving behind them a typical Democratic convention complete with an inter-party squabble and total reversal of their meeting two years ago in El Paso.

Mrs. Wylie Bullock of Lubbock, State Democrat Executive Committeewoman from the 30th Senatorial District, which includes this area entertained delegates and guests of the district with a reception in her suite at the Shamrock Hilton. The reception was attended by delegates from over the county and also several guests from the 31st Senatorial District. Among the area groups attending was Mrs. Bonnie Groen, who accompanied Mrs. Bullock to the Houston convention.

Earth Will Be Forty Years Old

Our fair little city of Earth will observe its fortieth anniversary in August and many oldtimers, still living in the community, have voiced their desire for townfolks to get together and plan a big week-long celebration during that month.

Citizens are urged to start gathering ideas, and get the ball rolling and have a bang-up celebration in observance of our town's anniversary.

Someone is needed to take the reins and call a town meeting immediately, to get all interested persons with ideas together, to be transformed into action, committees need to be appointed as barely a month remains before August arrives.

Along with the establishment of Earth back in 1924, is the first performance of Earth's rodeo in 1944, twenty years ago, plus many other organizations and businesses established during the past forty years.

So residents, let's get our heads together and come up with some sort of celebration, in observance of our town's birthday.

The Earth News-Sun plans to print a special edition, for this occasion, and everyone who has a story to tell on past history, or has old pictures of early day Earth is urged to compile them together in order that the News office may use them.

Harold Grant, Rails, spent the weekend with Mr. and Mrs. Carl Sanderson.

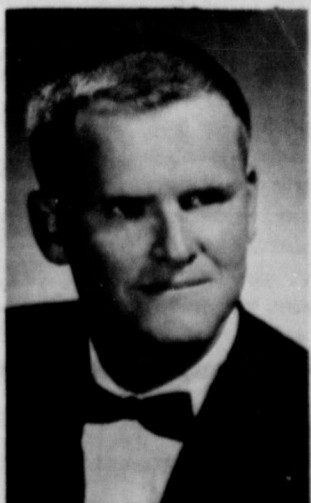

Ralph Wisian Listed On Dean's Honor Roll

Ralph Wisian, son of Mr. and Mrs. Hilbert Wisian, of Springlake, has been named to the Dean's honor roll for the spring semester at McMurry College, in Abilene.

Wisian, who will be a senior student at the college this fall, is majoring in accounting. He is presently attending the first session of summer classes.

He is a member of the Kappa Kappa Fraternity at the college, and during the first two years he was a member of the McMurry Band, and made several band tours with the group.

Wisian is a 1961 graduate of Springlake High School where he was an active member of the Wolverine Band, serving as drum major for two years.

RALPH WISIAN

Coffee Held In Lindley Home, June 15

A coffee, sponsored by the Woman's Society of Christian Service, was held Monday, June 15 at 10 a. m. in the Methodist Church parsonage. Purpose of the coffee was to begin a new training circle for the society. Temporary officers were elected and included Mrs. Ted Herring, chairman, and Mrs. Ray Axtell resource.

The group voted to attend the next general meeting of the WSCS, which will be held today (Thursday) at 10 a. m. at the Methodist Church. Further plans of organizing will be made at this time.

The serving table was covered with a lovely white linen cloth, centered with a beautiful arrangement of pink roses.

Refreshments of coffee and banana nut bread were served from a silver service to Mrs. Dwane Jones, Mrs. Bob Belew, Mrs. Norman Sulser, Mrs. Jane Beavers, Mrs. Herring and the hostess, Mrs. Albert Lindley.

When salt is withheld from the diets of animals their growth is impaired. Salt is used in the synthesis of protein of the animal's body and thus should be provided free choice to all animals daily.

Nearly 10,000 soil conservation district cooperatives set up one or more income-producing enterprises in the year ending June 20, says the USDA. More than nine thousand others revealed plans of the same nature and one-thousand co-ops switched to recreation as their major source of income.

The use of mulches on vegetables has long been recognized as beneficial in preventing moisture losses and soil crusting. Mulches also help prevent weed growth, results in cleaner vegetables, and holds down soil temperature. Such materials as leaves, rotted hay, straw, paper and plastic may be used.

Texas farmers report intentions to farrow 95,000 sows this fall which is 14 percent below farrowings in 1962. This would indicate a crop of 665,000 pigs, if the farrowing rate remains constant, to be marketed in the spring of 1964.

MRS. RONALD MILLER (Nee Janice Kay Galloway)

Galloway-Miller Vows Read In Olton Ceremony

In a double ring ceremony at 10 a. m. Saturday, June 13 in the First Methodist Church, in Olton, Miss Janice Kay Galloway, Olton, became the bride of Ronald Lee Miller of Springlake. Wedding vows were read by Rev. Cecil Hardaway, pastor of the church. Traditional wedding music was played at the organ by Janice Hardaway.

Parents of the couple are Mr. and Mrs. Cecil Galloway, Olton, and Mr. and Mrs. G. H. Miller of Springlake.

Given in marriage by her father, the bride wore a mauve silk suit, with matching hat and gloves. She carried a bouquet of white carnations, encircling a cymbidium orchid atop her Rainbow Bible.

Matron of honor was Mrs. Kenneth Heard, of Littlefield sister of the groom. She wore a white silk dress, enhanced with a scoop neckline and full skirt with matching accessories. She carried a long stemmed white carnation.

Kenneth Heard served his brother in law as best man.

Following the ceremony, the bride's parents were hosts to a reception in their home.

The bride is a 1962 graduate of Olton High School, and graduated from Jessie Lee's Hair Design Institute in Lubbock. She is presently employed at the Olton Beauty Salon. The groom is a 1960 graduate of Springlake High School, and served three years in the U. S. Army.

During hot summer weather shade and water may mean more in the performance of animals than the feed they eat. Place feed and water near shade and try to keep the water temperature around 65 degrees. If natural shade is not available, inexpensive ones can be constructed. By making the animals more comfortable, they will make you more profit.

During 1962, 41.1 percent of the nation's total dairy cows and heifers two years old and older were bred artificially. Eight states reported 50 per

Following a honeymoon to points in New Mexico, the couple will be at home in Littlefield, where the groom is employed with the Texas Highway Department.

Psi Nu Pledge Training Continues

Thursday June 11 was the second pledge training meeting of the Psi Nu Chapter of Beta Sigma Phi. Training is being conducted by Mrs. Robert Taylor, Vice President of the chapter. It is her duty to teach the new pledges the

full extent of the meaning of Beta Sigma Phi and the significant purpose behind this cultural and social sorority.

There is a deep meaning and valuable purpose behind Beta Sigma Phi, and the ladies are learning this as they continue to get better acquainted with their sisters in the sorority.

Understanding and learning about their fellow man are two of the great assets of the chapter.

Those attending the meeting were Meses Richard Bills, Clay Gabel, Terry Green, John Laing, Jr. and Robert Taylor.

cent or more of their cows bred artificially while Texas bred only about 12 percent of its dairy cows by this means.

About half of the most seriously destructive pests now found in this country are recent immigrants from Europe, Asia, South and Central America. Modern, rapid transportation has enabled these insects to hitch-hike to all parts of the world.

When cooking cheese, keep the heat low, cautions Mrs. Gwen Clyatt, Extension Service consumer marketing spec-

Twenty Two Attend Church Of Christ Bible Class

Twenty-two women were present for the Bible Class Tuesday morning June 16, at the Earth Church of Christ. Guest speaker was Mrs. Willie Waddeil of Lubbock.

Topic of her speech was "How to be Spiritually Beautiful."

The group meets every Tuesday morning at 10 o'clock at the church.

Officers Of Methodist Men Installed

The Tenth Annual Installation Banquet for the Methodist Men of the Earth Methodist Church was held on Tuesday night, June 16.

Lynn Glasscock, past president of the Club, presided over the affair as Master of Ceremonies.

The food was prepared by the Woman's Society of Christian Service and the Wesleyan Service Guild. It was served by the Junior High MYF.

The Invocation was given

by Buzzy Jones and the recognition and welcome of guests by Lynn Glasscock, who noted that the wives of the Methodist Men were the honored guests.

The speaker was then introduced and delivered a very fine address on "Doing The Most With Your Best". The speaker was the Rev. Cecil Hardaway, pastor of the Olton Methodist Church.

The presentation of the outgoing officers and the installation of the 1964-65 officers was made by the pastor, Albert Lindley.

Remarks by the incoming president, Doug Parish, were followed by the singing of the hymn, "Lead On O King Eternal" and the benediction by Ray Axtell.

Officers installed were Doug Parish, president; Jack Angeley, vice president; Skeeter Brock, program chairman; Lynn Glasscock, projects chairman; and Bob Belew, membership and attendance chairman.

Rutherford & Co. Earth, Texas

"We bought a dryer instead of a clothes line!"

says Mrs. William A. Conley, 2723 68th ST. LUBBOCK, TEXAS

Working as an interior decorator and caring for her one year old son, Mark Wayne, are two reasons why Mrs. Conley enjoys the convenience and economy of an electric clothes dryer. Night or day, rain or shine, it's always perfect weather for drying the family wash with a modern, electric clothes dryer.

WATCH AND WIN

Visit your electric appliance dealer this week and ask for a demonstration of a modern electric clothes dryer. If you're 21 or married and live in the area served by Southwestern Public Service Company, you may win the dryer you've seen demonstrated.

Extension Service Names Civil Defense Specialist

W. J. Lyle on July 1 will become a civil defense specialist on the headquarters staff of the Texas Agricultural Extension Service.

In making the announcement, Extension Director John E. Hutchison said, this is a new position and the specialist's responsibilities will be primarily in the field of agricultural engineering as applied to civil defense.

The director added that Lyle

would provide engineering assistance to livestock and crop specialists including educational materials on shelter facilities design and construction, protection of water and feed supplies, decontamination procedures, stand-by power equipment and maintenance and rehabilitation procedures.

He will also establish guidelines for a shelter survey service for rural counties and

work with other groups including county civil defense directors as well as Extension personnel on the county, district and state levels. He is one of six in the nation named under a pilot program and the only one in the southwest, the director said.

Lyle is a native of Lubbock but grew up on a Crosby county farm. He is a graduate of Falls High School and attended Ranger Junior College and Arlington State College before receiving a BS degree in agricultural engineering from Texas Tech. He was awarded an MS degree at Texas A&M University in January 1964 in the same field with minors in civil engineering and math.

MISS PRUDA SANDERS

Pruda Sanders Appointed Grand Love at Assembly

Miss Pruda Kay Sanders was appointed the station of Grand Love at the Grand Assembly of Rainbow for Girls in San Antonio.

Miss Sanders received this distinct honor with 12 other floor officers who will serve as State Officers for one year. The group was installed at 8 p.m. Wednesday, June 17 in the municipal auditorium in San Antonio.

This is a very lovely honor for Miss Sanders and also the Earth assembly.

Miss Sanders was awarded this honor for the thoroughness and efficiency in her work in Rainbow. Only Past Worthy Advisors can receive this honor, and they are required to still be in high school. Her honor was made possible through the full cooperation of her parents, the advisory board and the local assembly. Pruda will be required to make two or three visits to surrounding towns each month and report to the Supreme Inspector, Mrs. Victor Whitfield, of Dallas.

Miss Sanders will be a senior at the beginning of the 64-65 school term, and is the daughter of Mr. and Mrs. Marvin Sanders.

The new specialist had conducted research work for the City-County Health Department at Lubbock; Water Resource Institute at A&M and has done survey work in Dallas. Director Hutchison added that Lyle would work closely with W. S. Allen, Extension agricultural engineer and on July 20 would go to University of Colorado for special five weeks training covering the responsibilities he has been given under the pilot program.

There are about 30 different cuts of pork available. Fresh pork cuts include loins, from which chops and roasts are cut, shoulders, spareribs, sausage meat and fresh hams, to mention a few. Cured cuts include hams, bacon and smoked picnic shoulder. Hams, chops, and bacon are the most popular cuts.

Food and Drug Administration officials last week announced plans to crack down on fats and oils labeling that suggests to the lay public that fats and oils are helpful in medical treatments. The FDA "cannot tolerate promotional material which encourages the public to engage in do-it-yourself medical treatment of potentially fatal ailments" officials said.

Whole-meal sandwiches are quickies for lunches. Cheese is a sandwich favorite that combines with so many foods for interesting combinations. Try this triple-decker open-face: Toast one side of bread, spread untoasted side with butter. Add a spoonful of baked beans, cover with a slice of Cheddar cheese and top with Bermuda or sweet onion sliced thin. Place the sandwich under the broiler until the cheese melts.

SP/4 Mike Burgess will leave today, (Thursday) enroute to Fort Mead, Maryland, following a three week leave, when he visited his parents, Mr. and Mrs. Floyd Burgess and other relatives.

Cathy Dent Attends Encament at Sheffield

With camping at peak season, we thought you would be interested in a very unique camp-out enjoyed recently by an Earthite. Cathy Dent, eighth grade student at Springlake School, and daughter of Mr. and Mrs. Mike Dent, was among approximately 300 persons who attended the Pecos River Encampment near Sheffield.

The June 7-13 session marked the 23rd year that people from many counties in Texas have met for a concentrated week of Bible study, gospel preaching and fellowship. Similar to the old time camp meeting, the Pecos River Encampment, directed by elders of the Sheffield Church of Christ, features outdoor services, plenty of recreation and lots of good food. With its

setting on the banks of the Pecos River, and in the West Texas wool belt, the camp through the years has served thousands of tons of barbecued goat meat, donated by nearby ranchers. Cooking is done mostly by hired workers so campers are free to participate in all activities.

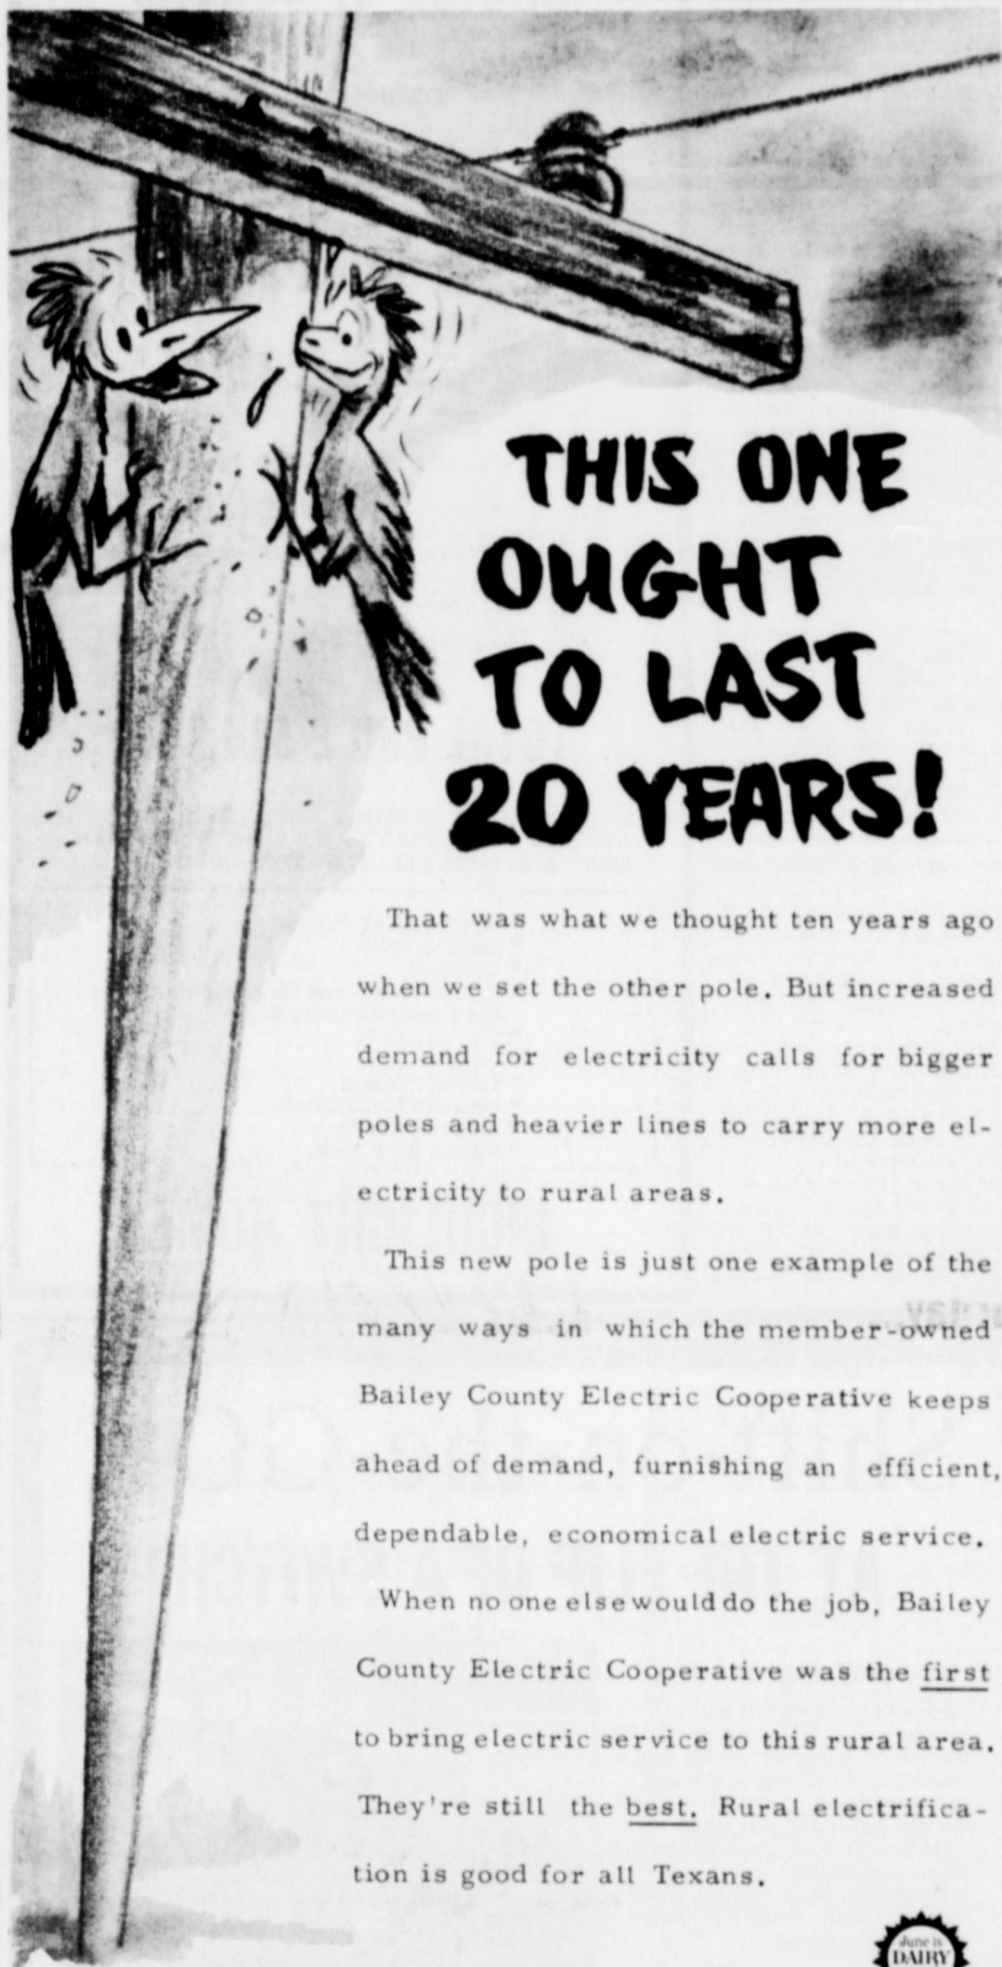

According to Miss Dent, this is a full time job. Wake-up bell rings at 6 a.m. with lights out at 11 p.m. Sandwiched between, campers will have attended a 6:30 a.m. devotional, 9 and 11 a.m. and 8 p.m. preaching services, special song services at 3 p.m. and 7 p.m. and a camp fire or cottage devotional at 10:30 p.m. Though it sounds impossible, they also have had time for swimming, baseball,

mountain climbing, three meals, rest period and lots of visiting.

Unlike many camps, the Pecos River Encampment is not for one age group, only. Whole families bring their bedding and enjoy the week. While housing is provided at the campsite, tents and trailers are also seen in the circle surrounding the big worship arbor. No fees are charged. Donations by those who are able support the work.

Included in the group of workers, preachers and counselors at this year's session were Ruel Lemmons of Austin who preached at the three daily services, E. Joe Lee, band director at Lubbock Christian College, and Byri Brockman, Lubbock, who conducts a weekly Bible class in Earth.

Present for weekend activities were Mr. and Mrs. Mike Dent and family, also Mr. and Mrs. Frank Bozeman, Eagle Pass, formerly of Springlake and Lazbuddie.

THIS ONE OUGHT TO LAST 20 YEARS!

That was what we thought ten years ago when we set the other pole. But increased demand for electricity calls for bigger poles and heavier lines to carry more electricity to rural areas.

This new pole is just one example of the many ways in which the member-owned Bailey County Electric Cooperative keeps ahead of demand, furnishing an efficient, dependable, economical electric service.

When no one else would do the job, Bailey County Electric Cooperative was the first to bring electric service to this rural area. They're still the best. Rural electrification is good for all Texans.

Lazbuddie News...

Lesia Greaf from Stratford is visiting this week with Mr. and Mrs. C. C. Greaf.

Mr. and Mrs. Wesley Barnes and children were in Roswell for the weekend to attend church and other activities. Mr. and Mrs. J. W. Gammon and Marianna are in Wilcox, Arizona this week attending to some business and visiting Maggie Colstrom, San Diego, California visited last week with her sister and family. Mr. and Mrs. Don Schumann. Also visiting last week with the Schumanns was Mrs. Schumann's mother, Mrs. J. J. Haun from Astes.

A twister made its way to Lazbuddie Saturday night, June 13 and destroyed the frame quarters that was used for gin hands at the North Lazbuddie Gin. No one occupied the building at the time. Severe winds and hail have done quite a bit of damage to the crops in and around Lazbuddie recently. Many farmers will have to replant while others are trying to get in the fields to save their crops. Several fields of wheat were destroyed.

Don, Benny and Leon Watson attended the Bass reunion at Mackenzie Park at Lubbock Sunday. About 100 people attended.

Mr. and Mrs. Orbie Chandler and children from El Paso visited her parents, Mr. and Mrs. C. A. Watson during the weekend.

Mrs. Gordon Duncan was the first customer to make a de-

posit Saturday at the Grand Opening at the Muleshoe State Bank. Mrs. Duncan was on TV making the deposit, at one of the new additions to the bank's drive in window. Glenda Dale, formerly of Lazbuddie took her deposit.

Birthday greetings to Jeanne Mc Gehee, Jane Williams, Christene Espinosa, Dama Putman, Antonio Yrugas, Kim White.

Supper guests in the Duane Darling home Sunday evening were Minister and Mrs. Bud Hamens, just recently returning from Japan. Also Minister Gaitner Vandiver and family of Lazbuddie and Mr. and Mrs. Darrel Thomas, Friona were supper guests in the Darling home.

Mr. and Mrs. Don McDonald and children visited the P. E. Cargiles in Lariat Sunday afternoon.

Jerry and Louise Engelling returned Friday from their trip to Colorado Springs. They also toured parts of Nebraska.

Word has been received here from the Fred Wilbank's that they are enjoying their vacation in Arkansas, and stated that so far, it hasn't been so very hot in and around Marshall where they are spending some time at present.

Mr. and Mrs. Gene Phillips and children, Clovis, visited Sunday with the Gene Welch family.

Mr. and Mrs. Clayton Greaf and children, Stratford, visited Sunday with the C. C. Greafs.

SUMMER TIME AND THE LIVIN' IS EASY... interesting, too, to this family of Beagle hounds, who were seen strolling along in a bar ditch, near Lazbuddie, seemingly looking over the crops. The threesome were quite friendly and seemed eager to pose for the News photographer.

STRANGE BEDFELLOWS... these two, a huge bird dog and a Persian cat belonging to the Homer Starkey's are the best of friends. Early in the morning, these two can be found sleeping warmly in a huddle "two deep."

New Process Found To Be Profitable To Cotton Farmers

Research results from mechanical topping of semi-open boll varieties of cotton indicate that the practice can be profitable to cotton producers in the High Plains of Texas, according to James Vaillant, Water Engineer at the High Plains Research Foundation. Increases in net returns have approached 50 dollars per acre when compared to standard grown stormproof varieties of cotton.

The staple length was increased by topping, which may help expand the cotton market of the High Plains. Fertilizer response was increased when the cotton was topped. Other benefits obtained from mechanical topping are the elimination of the top foliage and small immature bolls which furnished food and shelter for insects. There is also uniform crop height for harvest.

Research tests indicate that topping of stormproof cotton

is not considered profitable, Vaillant said. Details of the cotton topping results on Gregg, Lockett 88-A, and Paymaster 88-90 for 1963 are available in the 1963 Foundation Research Report #112 on the "Comparison of Yield and Quality of Mechanically Topped Cotton with Untopped Cotton." Cotton Topping research has been underway at the Foundation for the past three years.

"Farm Centered Research" on cotton topping is underway on a small acreage basis at the following farms, according to Vaillant: Terry Green, Earth; Charles Frye, the Easter Community south of Hereford; and James Stair, Providence Community northeast of Plainview. The following farmers are testing this practice in the immediate vicinity of the Foundation farm at Halfway: James McDaniel, Don Graham, and Claude Fargason.

At the Foundation, Vaillant has enlarged the cotton topping research program to include seven varieties for the year 1964. Five semi-open boll varieties in the research work at the Foundation are as follows: Paymaster 88-90, Paymaster II, Austin, DeKalb 108, and Lockett 47-89. The longstaple cottons in the cotton topping experiment include: Acala 442 and Acala 1517-BR2. These two varieties are popular in New Mexico and California.

New Soil Fertility Quacks Pop Up With Every Season

Every new crop season will usually bring in some new "miracle" product designed to increase crop production. Too often, such "miracle" products have little or no value and are sold by "soil fertility quacks."

Have you been offered such a "miracle" product this year? Usually the salesman is a persuasive talker who makes great claim for his product. Here are some ways to spot the "fertility quack."

spinning school in the 17th century gave each student a spinning wheel as a graduation present.

1. He claims mysterious benefits by unlocking the nutrients in your soil. The material often comes from some unusual natural deposit or may be a "new strain" of bacteria.
2. He makes no guarantee for nitrogen, phosphorus or potassium and thus does not come under the fertilizer law.

An analysis will often show a large number of elements - most of which are not even necessary for plant growth.

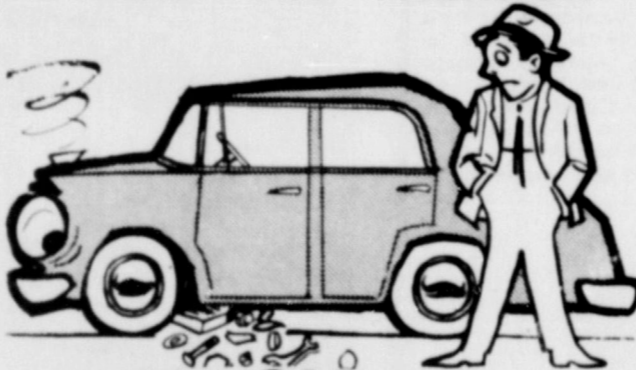

3. He cannot back up his claims with research from an unbiased source such as the University experiment stations or independent research foundations. He usually has testimonials from farmers in other states.

4. When asked what the County Agent thinks about the product, the quack says, "Don't ask him, he probably wouldn't know the value of our product or recommend it." The quack has the same atti-

TAES Developed Wheat Varieties Aid Income

Important contributions are being made to stabilize wheat production and farm income by the outstanding test weight of new varieties of wheat. These varieties have been developed by the Small Grain Section of the Texas Agricultural Experiment Station.

Crockett, Tascosa and Caddo wheat varieties have produced an average test weight ranging from 2 to 4 pounds per bushel greater than varieties grown 10 to 20 years ago. This has resulted in the grower receiving No. 1 wheat prices most seasons. Normally No. 1 wheat sells from 3 to 10 cents more than No. 2 wheat which means an additional return of \$3 on each 100 bushels.

Comparative tests in Texas over an 8-year period gave an average test weight of 61.5 for Caddo, Tascosa and Crockett, while Comanche, Tenmarq and Turkey averaged 58.5 pounds per bushel in the same tests.

The Tascosa and Caddo varieties have also proved desirable due to their non-shattering characteristics. Tascosa has repeatedly withstood severe hailstorms with less damage than other commercial varieties. Thus it has been widely adopted in the Southern High Plains where some counties seed more than 75% of their acreage to this variety.

Tascosa was developed by L. M. Atkins and K. B. Porter, TAES researchers, and released as recently as 1958. It was grown on more than 300,000 acres in 1963.

Mr. and Mrs. Clarence Hazlett and Vaughn left Monday

tude toward experiment stations.

With need for phosphate increasing and as more attention is given to secondary and minor elements, the quack will surely be around in larger numbers.

Don't hesitate to try new products on a small scale. There have been many advances in fertilizer use and there will be more. But don't invest a lot of money in a new product until you know it will pay or until it has been proven by research either by the experiment stations or reliable, reputable manufacturing concerns.

Shift-on-the-GO... AT THE FLIP OF A SWITCH

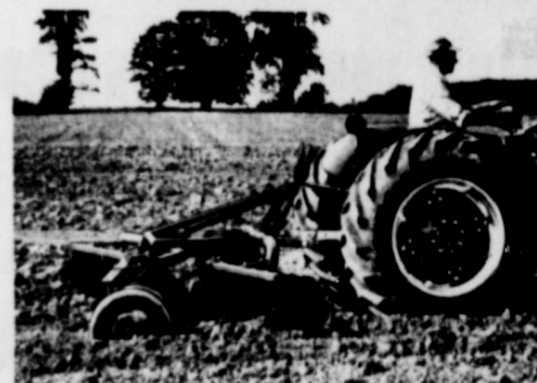

TWO-STAGE CLUTCH

This is the feature that makes it easy to handle PTO implements like the MF 52 mower. Push the foot clutch pedal half-way down and you stop forward travel. Push it all the way down and you stop PTO too. There's a built-in feel that shows you the half-way point. If the mower clogs you can stop forward motion while PTO keeps the mower running.

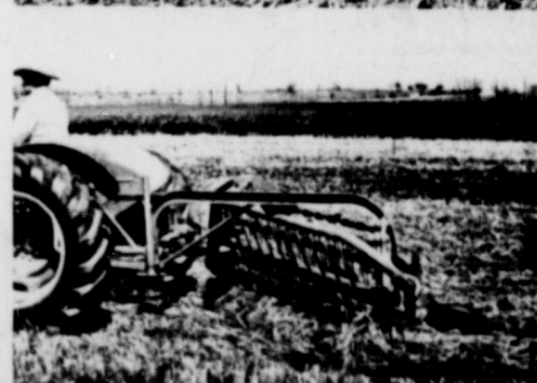

FULL RANGE OF SPEEDS

You can select the speed that is exactly right for the job, anywhere from a crawl for transplanting up to the higher speeds for jobs like discing with the MF 25 disc harrow. Transmission has six speeds forward and two in reverse. With Multi-Power, forward speeds are doubled to make a total of 12.

VARIABLE DRIVE PTO

You can match the PTO to ground speed for jobs such as raking with the MF 25 mounted rake. Or you can shift PTO to work with the engine speed for baling, forage chopping or combining. Just shift the lever to select the type of live PTO you need.

TIPS for OUTDOORSMEN

by Vern Sanford

Protecting Rod Handles
To prevent cork handles on fishing rods from drying out and splitting, coat the cork with glycerine before putting your rods in lay-away for any length of time. The liquid easily will wash away and your rod handle will be good as new.

Chain As Sinkers
A piece of chain of several links makes a practically no-sag sinker for rock fishing. Use as many links as are needed for the correct weight.

Magnet Hook Holder
A small magnet in your tackle box makes a neat holder for fishing hooks. It prevents them from rattling or spilling and keeps them right handy.

Keep Worms Alive
Worms can be kept crawling and lively until it's time to put them to work if you keep them in a container filled with peat moss instead of dirt.

Plastic Protector
A 9x12 piece of plastic makes a vital contribution to your camping gear. It can be used as a lean-to shelter, put underneath sleeping bags, or used to cover food left on the table.

Fast Draw Aid
A mixture of graphite powder and vaseline rubbed inside a pistol holster makes it much easier to remove your handgun. Should be a big help to the fast-draw artist, too.

Use Safety Tape
If you use the same jacket for hunting both deer and ducks, you've got a problem. Wear a red or yellow jacket and you'll spook ducks two miles away. Wear an olive-drab one and you're apt to get blasted by a cross-eyed deer hunter.

Here's the solution: Buy the olive-drab jacket for duck hunting, then when you go after deer, mark the back and sleeves with industrial adhesive tape.

These stripes of bright yellow will distinguish you from the deer.

Casting Practice
Got an old hula hoop lying around the house? It makes a perfect casting target, floating in a swimming pool.

Wrap Pork Rinds in Foil
Here's a way to carry pork rind without having any bottles to break. Simply place some pork rinds in petroleum jelly and wrap in aluminum foil. There's nothing to spill and a lot less weight to lug around.

Cuts Line With Staples
To snip off your monofilament line simply take out your cigarette lighter, insert the line toward the hinge, close the case cover and give the line a short tug toward the hinge. Works better than a knife.

Solid Tent Anchor
To anchor your tent on soft ground, get a log about the length of the tent, fasten the ropes to it and bury the log about a foot in the ground. It will hold even in a stiff breeze.

Night Fishing Hint
When night fishing from a boat, put an extra light in the opposite end of the boat, away from the light you're using. The extra light will attract bugs and keep them from buzzing around your face.

Poker Chips Call Squirrels
A couple of poker chips rubbed together makes a dandy squirrel call. The strange noise will cause the curious bushytail to take a minute to look around, giving you time to shoot.

Mr. and Mrs. M. R. Phillips and Helen and Beth Dent returned home recently from a trip to Spicewood to visit relatives. They also visited in Austin with Mr. and Mrs. Tuffy Dent and children.

In-Storage Grain Storage Practical

Grain harvesting time is here and some checking up on farm storage facilities may be in order, especially if you plan to install grain-drying equipment, says W. D. Allen Extension agricultural engineer at Texas A&M University. Mechanical grain drying is often a logical answer when harvested grain is too wet for safe storage. Grain Dryers do their job by forcing air through the grain to take out excess moisture. Grain can be stored safely after its water content has been reduced to about 12 to 13 percent, says Allen.

In-storage drying, found on most farms, takes place in the storage bin. It isn't necessary to move the grain after it's dried. This method can be used for milo, rice, peanuts and soybeans, explains the engineer.

An in-storage drying system

dent of the Confederacy, was charged with treason at the end of the Civil War and detained for two years, but never brought to trial.

has three components; one or more storage bins, air distribution systems, and a source of forced air. Round metal bins are quite popular for on-farm drying facilities and are available with air distribution systems. A common method of distributing the air is to force it under a crop-drying floor having small openings through which the air can move upward.

This type of drying may use natural air or supplemental heat. In a natural air system, unheated air is forced through with a motor-fan unit. Supplemental heat may be utilized where humidity is high. This will raise the air temperature, lower the relative humidity, and increase drying speed.

Allen warns of overdrying grain by using air that's too

Even wine and brewer's yeast cannot stand more than a certain amount of alcohol, so straight fermented drinks do not have more than 14% alcohol.

Leonardo da Vinci designed the first power loom in 1490, although it never was built.

The hill of Monte Testaccio near Rome consists of the fragments of an estimated forty million wine and olive oil jars.

A 17th century law in Silesia forbade marriage to a farm worker who couldn't spin.

warm. Heaters should not raise the air temperature more than about 10 to 12 degrees.

DANCING TOES!! Phil Bearden has his trouble, as all young people do, but lately it seems Phil's toes on his right foot have been doing the toe dance, giving him more added woes than usual. The news photographer caught Phil just as he emerged from the City pool, with his toes doing their usual dancing routine.

Irrigation Research on Grain Sorghum To Be Conducted

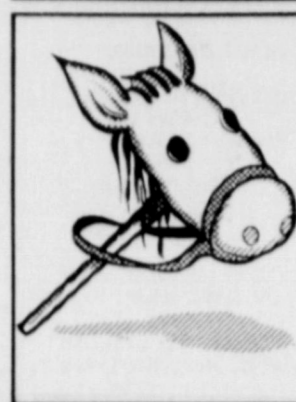

Irrigation research on grain sorghum will be conducted on the Jack Little farm in northwestern Bailey County by the High Plains Research Foundation this year. James Vaillant Water Engineer for the Foundation will supervise the test in cooperation with Jack Little, a member of the Foundation's Board of Trustees.

A comparison of the water efficiency on grain sorghum production will include three systems of water application. These systems will be irrigation at the following rates: preplant, flowering, pre-boot, and milkstage of the grain. In one test another system includes the above four plus an irrigation at the hard dough stage in the plant cycle. These will be compared with the usual irrigation method employed by Mr. Little.

This is part of the water efficiency research by the High Plains Research Foundation to determine the most efficient and profitable method of the various irrigation systems. The Foundation had its origin in Bailey County under the direction of Jesse Osborn, the late Clyde Bray, and others in the Bailey County area interested in promoting agricultural research needed on the High

Plains of Texas.

BAG TRICKS

SACKO THE BRONCO — Cut two oval pieces of fabric about 20" by 10" and sew together for head, leaving one end open. Stuff tightly with cotton down to the last 8". Tie this extra material into ears, leaving a 2" opening. Push broom handle into stuffed head and tack open edges to handle. Embroider red mouth. Sew on button eyes and nostrils. Add a mane of old yarn or string and make reins and bridle of 1" strips of bag prints.

LEGAL NOTICE

NOTICE TO BIDDERS

Sealed proposals for the construction of certain water system addition, consisting of one 200,000 gallon ground storage reservoir and retaining wall will be received by the Honorable Mayor and City Council of the City of Earth, Texas at the office of the City Secretary, City Hall, Earth Texas, until 7:30 p.m. July 6th, 1964, at which time and place the proposals will be publicly opened and read aloud and considered by the City Council. Any bid received after closing time will be returned unopened. No bid submitted may be withdrawn before thirty (30) days have elapsed after date of submission.

Copies of the plans, specifications and contract documents are on file at the office of the City Secretary at Earth Texas, and are open for public inspection. A set of such documents may be obtained from Douglas Engineering Company, 108 East Fourth Street, Littlefield, Texas, upon payment of \$10.00 for each set of plans and specifications obtained. This deposit will be returned to each Bidder who submits a bona fide bid on the job.

A cashier's check or certified check payable without recourse to M. E. Kelley, Mayor, City of Earth, Texas or an acceptable Bidder's Bond in amount of at least 5% of the total amount bid must accompany each bid as a guaranty that, if awarded the contract the bidder will promptly execute a performance bond and enter into contract on the forms provided. Checks must be issued by a Texas Bank satisfactory to the City and Bidder's Bond by a reliable Surety Company licensed to do business in the State of Texas.

A performance bond in an amount not less than the amount of the award conditioned upon the faithful performance of the Contract and the payment of all persons supplying labor or furnishing materials or other services will be required from a Surety Company holding a permit from the State of Texas to act as a Surety on bonds of principal.

The city reserves the right to reject any and/or all bids and to waive formalities except that no bid received after closing hour will be considered.

The Contractor will be paid in cash and bids are to be made on a cash basis.

The attention of bidders is called to the special provisions concerning minimum wage rates and hours of employment included in the Specifications and Proposals to insure compliance with House Bill No. 84 of the 43rd Legislature and the House Bill No. 115 of the 44th Legislature of the State of Texas, and all Federal Wages and Hours Legislation if such is applicable.

Marshal E. Kelley, Mayor
City of Earth, Texas
