**Methodist To Hear Visiting Pastor**

The Rev. J. C. Oglesby, pastor of the First Methodist Church of Georgetown, will preach at the 11 o'clock service, Sunday, August 12, at the Methodist Church, according to an announcement made this week by the local pastor, Rev. F. B. Faust.

Rev. Oglesby, son of Mr. and Mrs. S. M. Oglesby, Sr., of Mertzon, one son, and a brother of Sam and J. F. Oglesby of this place, is well known here, having been reared in West Texas. A graduate of Yale University, the young pastor is considered a very able speaker, and one whom it will be a privilege to the public to hear. He has held several pastorates throughout various parts of Texas since entering the ministry.

Everyone is invited to attend this service.

**BAPTIST ANNOUNCEMENT**

By the kindness of our new editor may I use this means again as I have done before, to remind our people of our church activities.

We urge all of our church family to be faithful to every church service; and through your faithfulness our church work will go forward in the same proportion. For every act of loyalty and Christian quite often I feel we need to be reminded of our responsibility. This matter of church support is something that should be continuous and it is intended that such a support should be a joyous privilege.

I hope we will remember that August 19th is set as a special day to have our offering for the Mexican Church building. I feel that we will do our best for our Latin American neighbors who are so in need and have been neglected by us so long. Let every member decide for himself how much he should give and come on the date mentioned above and make his contribution, for such a cause is worthy of our best.

Our services Sunday: Sunday School and preaching at 10 and 11 a. m. Evening services: Training Union and preaching at 8 and 9 p. m. Our mid-week services each Wednesday evening at 8:30. Our Woman's Missionary Union meets each Monday afternoon at 4:00.

## AGAINST RISING COSTS

The last generation has been the most important in the history of electricity and worth ringing the bell for, because it's during this last era that the use of electricity in America has become so popular, so widespread, so useful, and so cheap.

It's during this last historic generation that most of our electric appliances have come into common use—electric refrigerators around 1925; radios around 1930; electric washing machines and vacuum cleaners in the early twenties; electric roasters and clocks around 1932; and so forth. Their economical use has been made possible through the lowered price you pay for electricity. For it's been during these same years that the price of your electricity has been coming down and has stayed down, even in wartime. For example, if you're the average user of electricity, you are now getting about twice the electricity you got fifteen years ago for the same money.

This taxpaying, business-managed company is proud to have brought you these benefits at a lower and lower cost. Only by hard work and farsighted planning have we been able to accomplish these results.
