## Black Norther Hits Eldorado

Schleicher housewives are busy cleaning house today, in the wake of the season's worst duster which struck about 6:10 yesterday. The black norther rolled in and brought midnight darkness and howling winds to this still drouth ridden area.

Clouds of swirling dust penetrated the tightest buildings, and made driving a hazardous job.

As far as can be learned early this morning damage was slight in this locality. Several T-V antennas toppled, some roofs were damaged a little, tree branches snapped, the

West Texas Utilities reports a couple of lines down.

The midnight darkness followed rolling in of the clouds of dust by a period of half a minute. Many Eldoradoans sought refuge in their own or neighbors' storm cellars. "I've never seen anything like it in my life," was the average man's reaction.

About 2 inches of rain fell in the wake of the dust clouds.

The storm covered much of Texas, as far south as Waco, and reached into Oklahoma. Dust and darkness was reported everywhere the freak storm struck.

The construction of approximately six miles of level terraces, recently completed on William L. (Bill) McWhorter's farmland, completed all terraces needed on his farmland.

A well rounded soil and water conservation plan on all land operated by Bill was developed in 1948. Soil Conservation Service technicians, assisting Eldorado-Divide Soil Conservation District, assisted Bill in preparing his plan.

Soil and water conservation practices included in his plan, such as contour farming and stubble mulching, were easy to apply as compared to terrace construction. Realizing the need of good level wide base terraces, to hold all water possible where it falls and to help prevent erosion, Bill wanted to construct all his terraces as soon

as possible. The first terraces on Bill's place were built in 1949, with his farm tractor and disc plow. Dirt used in building the terraces was moved in from several feet on both sides, leaving very little barrow ditch above and below the terraces. The width of the terraces exceeded 26 feet and the unsettled height was 18 inches or more above natural ground. Approximately half of the 15 miles of terraces on Bill's farmland was constructed with his farm tractor and disc plow.

Bill considers good maintenance of terraces equally as important as the construction of terraces. He improves the terraces each year by plowing to them. By doing this, the height of the terraces is maintained, more base is added and the barrow ditches are eventually completely filled in.

Howard Faulk and his family have moved to Abilene where Mr. Faulk is doing carpenter work. Dorothy and Johnnie remained here with relatives until school closed, and have joined their parents there.

All Chevrolet's competitors and most of the high-priced cars tried it recently in official NASCAR\* trials—and took a licking!

**M**eat the champ! The new Chevrolet "Turbo-Fire V8"—the most modern V8 on the road today. Here's what happened—

**Daytona Beach.** NASCAR Acceleration Tests Over Measured Mile From Standing Start. Chevrolet captured the 4 top positions in its class! 8 of the first 11! And on a time basis Chevrolet beat every high-priced car, too—but one! But wait!—this is just the beginning!

**Daytona Beach.** NASCAR Straightaway Running. Open to cars delivered in Florida for \$2,500 or less. Chevrolet captured the first two places, 7 out of the first 11 places!

**Daytona Beach.** NASCAR 2-Way Straightaway Running Over Measured Mile. Open to cars from 250 to 299 cu. in. displacement. Chevrolet captured 3 of the first 5 places!

**Columbia, S. C.** NASCAR 100-Mile Race on half-mile track. Very tight turns. Chevrolet finished first!

**Fayetteville, N. C.** NASCAR Late Model Event. Chevrolet again finished first. Because of even tighter turns the driver chose to run the entire 150 laps in second gear! Yet no overheating or pit stops!

These facts you can't laugh off. Sales leader. Road leader. A crowning achievement of Chevrolet and General Motors. Try a Chevrolet... and live in a land of going-away where you win all the arguments! Soon, maybe?

Presbyterians believe in the Holy Catholic or Universal Church. In God's sight there is one Church and the various denominations are families of the Church. We do not believe that your name on the Church roll means that you are a member of the Church. You may be a member of the Congregation or family and still not be a member of the Holy Universay. We sometimes speak of it as the Invisible Church, meaning that man cannot be the judge as to who the real members are, only God can. We do say that all true believers belong to the body of Christ, the Church. Christ is the true Head of the Church and the name we give to the various families makes no difference. The mission of the church is to the believing Church the Power of God for its great task. Can any thinking person fail to carry his share of the responsibility for the success of the Church?

### Drouth: Its Effect On W T Ranch Resources

COLLEGE STATION — A 50% reduction in livestock numbers has been noted in the Edwards Plateau and Trans-Pecos areas of Texas since drouth began in 1943. Many ranchmen who prior to 1950 did little supplemental feeding were averaging \$25 annually for feed expenditures for each animal unit at the end of 1953.

These findings have grown out of a study by two agricultural economists at Texas A. & M. College on the economic effects of drouth on the resources of West Texas ranches. Most of the 162 ranch operations studied by C. A. Bonnen and J. M. Ward were within 100 miles of San Angelo, the area hardest hit by the drouth. At San Angelo, a 60-inch rainfall deficiency accumulated in the 11-year period, 1943-53.

Grass clipping studies at the Sonora Ranch Experiment Station yielded only 20 pounds an acre of air-dry forage in 1951 and none in '52 and '53.

Between 1950 and 1953 the economists found a 37.5 percent decline in net worth among one group of 45 ranches. At the end of this period, short-term debts of the same ranches amounted to 103 per cent of the value of their livestock. They had reduced their livestock numbers 20 per cent, cash 50 per cent, and total assets were down 20 per cent, while liabilities, including a 10 per cent rise in land mortgages, were up 38 per cent and life insurance, 42 per cent.

Another group of 92 ranches which received special livestock loans from the Farmers Home Administration owed in short-term debts 206 per cent of the value of their livestock. This group represented the more extreme financial conditions among ranchmen.

Sharp changes in prices of livestock during the period complicated the drouth problems for both the ranchmen and credit agencies, Bonnen and Ward reported. As prices rose, ranchmen were reluctant to reduce stocking rates, probably speculating on a break in the drouth. This led to heavy use of high-priced feed in expectation of continued high prices, and expanded borrowing when the expected prices did not come about.

### LIVESTOCK NEEDS IN SUMMER

COLLEGE STATION — Protein supplements, minerals and plenty of roughage form the necessary combination for keeping livestock healthy and growing during the dry summer months when green grazing is short.

Too many producers overlook the protein supplement and mineral part of this combination, according to U. D. Thompson, extension animal nutritionist. Livestock need more than dry grass—often the only feed available in mid-summer.

Thompson suggests supplementing the roughage, whenever it be dry pasture, oiled hay or oonides, with two pounds of cottonseed meal or cake for each animal daily. Research has shown that 41 per cent protein supplements are the most economical to feed.

Granulated salt and steamed bone meal supply the necessary minerals, Thompson says. These may be fed free-choice separately or in combination.

By creep feeding, producers can lighten the load on mother cows and market heavier calves. Start the calves on oats, Thompson suggests, slowly reducing the oats and adding corn. When all green grazing is exhausted, the addition of 10 pounds of cottonseed meal to each 100 pounds of grain mix is recommended.

### NEW EMPLOYEE

A new employee at Humphrey Motors is Larry Fisher who has moved here from Angelo and gone to work as mechanic. His wife will follow this week end. The couple have no children.

Mr. and Mrs. F. A. Sanders returned home this week from Louisiana where they have been since March 24. Mr. Sanders, pipe line inspector, has been in Louisiana with Shell Oil Co., who have just completed a new line in that area. After completing the work in Louisiana the Sanders family went on vacation and visited relatives in Beaumont, Austin, and Abilene before returning to Eldorado.

Mr. and Mrs. Bob Currie and son of North Hollywood, California, arrived Monday for a visit with his mother, Mrs. Lynn Alexander. The Currie family and Mrs. Alexander will leave today for Austin where they will visit relatives.

Mr. and Mrs. Luther Terry of Canyon spent the weekend with Mr. and Mrs. W. R. McCravey.

All ex-students and their families are urged to attend and the public is invited to help to make this the Home coming which will be remembered by many for a long time.

### HOME MAKING PROJECTS

The Summer Homemaking class, under direction of the Home Ec teacher, Mrs. Joe Kreklow, has an enrollment of 15 girls who are meeting in the homes and at the school house as they carry out their work.

The projects vary from making of dresses and curtains, painting of rooms, re-finishing of bedroom furniture, and making a china closet to improving of lighting facilities by making of lamp shades, and re-finishing and re-wiring of old lamps.

Some of the work is being carried out as group projects, and other work, such as the sewing, is being done at the school. Hours for the sessions are from 8:00 to 12:00 each morning.

### HOT CHECKS GIVEN BY TWO LOCAL PEOPLE

Judy Dixon Felton, negro, who gives her age as 18, is out on bond after spending a night in jail where she was placed on a charge of forgery, a local business house making the complaint. She is awaiting action of the grand jury.

Billy Bible, age about 29, is also out on bond on his third offense for hot check passing.

Betty and Carol Sue Bates of Sonora spent the weekend in the Calcote home.

### Summer Livestock Feeding Rest Pastures After Rain

COLLEGE STATION—Rest after a rain is the best prescription for drouthy, overgrazed pastures.

Since many ranches are carrying reduced numbers of livestock, producers should be able to defer one-fourth of their grazing lands without damaging the remainder, A. H. Walker, extension range specialist, says. This way many pastures can gain full advantage of recent soaking rains.

Pastures with most native grasses and vegetation cover will make the most recovery in a shorter period of time and should be deferred first, says Walker. Poorer pastures can be rested later since they may require several years to recover. It's better to remove all livestock from a pasture than to leave it lightly stocked, he adds.

Defer for three to six months, or until frost. But if the grazing is needed sooner, wait at least until the growing grasses mature and drop a seed crop. Deferring promotes seed and plant reproduction in addition to increasing the vigor of existing plants.

The specialist recommends moderately grazing the pasture during the winter. This method provides some forage for livestock and helps distribute plant seed.

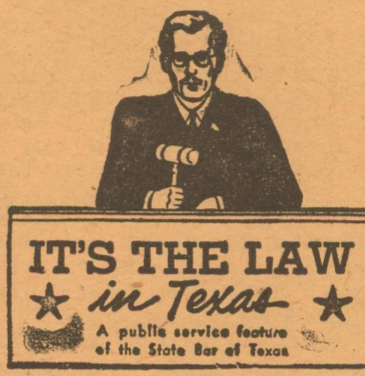

Many ranchmen looking over their bare ranges are considering reseeding. In some instances reseeding may be warranted but deferment more often does the job cheaper. If as much as 15 per cent of the "key" grasses are left, rest rather than reseed, the specialist suggests.

IT'S THE LAW in Texas

A public service feature of the State Bar of Texas

With All My Worldly Goods

June is traditionally the month for weddings, and many couples will be taking marriage vows within the next few weeks. But, while a certain symbolic transfer of "worldly goods" is often associated with the wedding ceremony, under Texas law, the act of marrying another does not give you the authorization to take control of his property.

Generally speaking, each spouse has the right to control and dispose of his or her own separate property. The separate property of a husband or wife includes property owned by either before marriage, and that which is acquired by either after marriage by gift or inheritance. Any other property acquired after marriage is presumed by law to be community property until the contrary is clearly proved.

Aside from the ordinary community estate, there is a class of property known as the wife's "special community," which includes all the income from her separate real property, and probably the interest on bonds and notes, and dividends on stocks owned in her separate right. While the husband may have similar assets, the law accords them no particular distinction from ordinary community property.

Although the history of the matter is somewhat confusing, it appears that under present day law the husband has control of ordinary community property; but control of the wife's special community property is reserved to her.

Certain restrictions are imposed upon both husband and wife in exercising such control. For in-

stance, the husband cannot legally dispose of community property in such a way as to defraud the wife, nor can he sell the homestead without her signature and acknowledgment. And the wife's sale or mortgage of her separate real estate, stocks or bonds is not valid unless her husband joins with her in the transaction—he must sign and execute the necessary legal papers along with her.

There are laws exempting the wife's separate and special community property from liability for debts incurred by the husband. Such liability is restricted to his separate property and the ordinary community property.

On the other hand, debts incurred by the wife in obtaining necessities for herself or the children bind all property belonging to either party, including the husband's separate property. For other debts which she has power to incur, only her separate and special community property are liable.

All of these distinctions emphasize the advisability of keeping proper records. By doing so the various classes of community and separate property owned by a married couple will always be easily distinguishable. Each category will then receive the special protection afforded to it by our laws.

(This column, based on Texas law, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts, because the facts may change the application of the law.)

**U. S. Not Alone In Eating Better**  
While the domestic production of meat is at high levels and the per capita consumption in the United States is reaching all time highs, it is interesting to note this situation prevails in most of the world.

Figures just released by USDA indicate that last year (1954) meat production of the world was three percent greater than the record year 1953. Forty-two countries produced an estimated 83 BILLION pounds. This is believed to represent 93% of the total world output.

**Meat-Type Lamb?**

This year at Fort Worth the medium to good lambs have been selling at prices very near the extreme top for fancy choice kinds. In fact, feeder buyers have been getting fewer of these just "meaty" lambs than ever before, because packers have been so eager for them.

We have been hearing a lot about "meat-type hogs" but it looks like the country is going for meat-type lambs in a big way too.

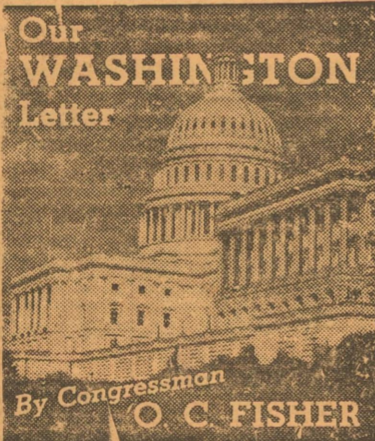

Many half-fat lambs selling in the \$19 to \$21 bracket at Fort Worth Monday look a full two grades below the choice \$22 and \$23 kinds. Shorn old crop lambs Monday sold up to \$18, the highest since around Easter for the class. The trade credits cool weather in many parts of the country, and a late start on the Southeastern states lamb crop for the good market at Fort Worth.

Monday Spring lambs were 50 cents to \$1 higher and old crops were 50 cents to \$1.50 higher. Other sheep steady, breeding ewes in very active demand in view of the improved pasture outlook.

**Cattle Steady**  
Cattle prices at Fort Worth Monday are almost identical with those in effect a year ago at this time. Fed steers and yearlings are about \$2 per hundred lower than a year ago, but cows, bulls, slaughter calves and stockers are all selling just about like last year at the same time.

So we can quote you prices for this year and last at these levels, with the above mentioned exception.

Prices Monday: Good and choice grainfed steers and yearlings \$19 to \$22.50; common and medium grassers \$12-\$18. Stocker steer yearlings \$21 down. Fat cows \$11-\$14; canners and cutters \$7-\$11. Stocker cows \$7-\$12.50. Bulls from \$10-\$14.50. Good and choice fat calves \$16-\$20.50, few higher. Lower grade calves \$10-\$15. Stocker calves \$23 down.

WITHIN a short time the Salk polio vaccine will be just as safe as other vaccines, according to Dr. Leonard A. Scheele, Surgeon General of the U. S. Public Health Service.

This well-known authority spoke to the Texas delegation at the weekly luncheon at the Capitol last week and described in some detail the laboratory processes now taking place by scientists to perfect the new discovery, at least as nearly as it is possible to do so.

Dr. Scheele pointed out that the post-vaccination cases have totaled 125 out of nearly six million vaccinations administered. He blamed the vaccine-caused-cases on inadequate mixing of the material or on other unknown factors which, he thinks, can be eliminated or reduced to a minimum.

The Doctor emphasized that those who have received one shot of the vaccine will have strong resistance to the disease for some time even though the second and third shots may be delayed for a while.

DEPARTMENT of agriculture has announced that mohair production is making a come-back after declining 45% between 1945 and 1952. Last year growers clipped 13.7 million pounds, which was 1.1 million over 1953—or a 9% increase. Total goat population: 2.2 million, from which 96% of the mohair is produced in Texas.

"With about 8% more goats in Texas early this year than at the beginning of 1954," the report concludes, "some further increase in mohair production appears likely."

It's the new kind of hardtop—  
The 4-Door Riviera!

THERE seems to be some confusion about what a hardtop really is, and we'd like to set the matter straight.

A hardtop is a car that looks like a Convertible with the top up—but has a solid steel roof overhead—and no center posts in the side window areas.

Up until just recently, it could be built in volume only with two doors—not more—because it would take wholly new structural principles to hinge another set of doors without floor-to-roof center posts.

But Buick came up with those new structural principles and is now building—in volume—hardtops with four doors.

You see one pictured here. It's the 4-Door Riviera. And it's taking the country by storm...

Because here, at long last, is an automobile with the sleek and sporty styling of a true hardtop—but with separate doors for rear-seat passengers, plus the added room of a full-size Buick Sedan.

On top of that, this beauty is all Buick—with the buoyant ride of Buick's all-coil springing—the walloping might of Buick's record-high V8 power—the whip-quick

getaway and sizable gas savings of Buick's spectacular Variable Pitch Dynaflo.\*

And it's available in Buick's two lowest-priced Series—the budget-tagged 188-hp SPECIAL, and the high-performance 236-hp CENTURY, illustrated here.

Come visit us for a first-hand meeting with the 4-Door Riviera—and see how quickly and how easily the last word in automobiles can be yours.

\*Dynaflo Drive is standard on Roadmaster, optional at extra cost on all.

**PRESBYTERIAN S S PLANS TO OCCUPY ANNEX ON SUNDAY**

The Presbyterian Sunday School Annex is the official name of the new educational building, which is the former home of the Bert Page family. Mr. Page presented the large two-story house and a 100 by 150 foot lot to the church recently. Re-organization of the entire Sunday School has been under way in preparation for moving into the Annex Sunday. The first major event scheduled there was the Vacation Bible School which closed Friday.

Crowding in the children's classes will be eliminated with providing of more room in the basement of the church building. The rooms have been too small for the enrollment, especially in the nursery class. Now there will be three rooms available for the young children, one of which will be furnished with beds for the youngest, and better accommodations for nursery, kindergarten and primary age children will be provided.

The only other class meeting in the church will be the adult class.

Classes in the Annex will be the Juniors, the Pioneers and Seniors, and P.Y.F. will meet there each Sunday evening. There will be an assembly room in the former living room, and Juniors and Seniors will occupy other rooms on the ground floor. Pioneers will occupy two upstairs rooms.

Classes will redecorate and arrange their own classrooms as they desire.

Plans are under way to make a combined tennis and volley ball court in the Annex yard.

From where I sit... by Joe Marsh

**Sad Note From The Bugle**

All of us on the *Clarion* were alarmed to learn that our principal rival in the newspaper field—the *Balesville Bugle*—might have to shut down.

Crops were bad in Balesville last year and one of their factories moved out of town. Just temporary hard times, of course—but the *Bugle* needs help now if it's to survive.

So, this paper is going to scrape up a little money to help tide them over, and we hope other local concerns will do the same. We've seldom agreed with them editorially over the years—but

we want their competition to keep us on our toes.

From where I sit, this country needs papers with different points of view—just as it needs people with different ideas and tastes. You may prefer iced tea as a hot-weather cooler... I generally choose a cold glass of beer. But if either of us couldn't express his opinion, and act on it, that would be "bad news" for the whole community.
