Utilities Co. Sets Cooking School Here Next Wednesday

All the housewives in Eldorado and the surrounding area are invited to be guests of the West Texas Utilities Company at a Live Better-Electrically Cooking School to be conducted here Wednesday, March 27th.

The demonstration, which will present the most recent and modern developments of cooking will be held at the Memorial building at 2:00 p. m. Mr. Chas. Hahn, West Texas Utilities Company's local manager, in announcing the school said, "As a result of numerous requests to repeat the cooking school, which we presented last year, this school was planned."

Mrs. Abbie Andrews, a senior home economist for Frigidaire Sales Corp., will present the newest developments and new recipes and ideas. She will be assisted by Miss Margaret Jones of West Texas Utilities Company's district staff. Mrs. Andrews is a graduate home economist with years of practical experience. She has had special training in food preparation, preservation and quick-freezing techniques at the nationally famous Frigidaire Home Economics Department at Dayton, Ohio.

Recipes will be given to homemakers who attend the demonstration. All the food used in demonstrating the modern electric way of food preparation will be presented to the women attending the school.

MRS. ABBIE ANDREWS

MISS MARGARET JONES

Eggs and Beef On April Plentiful Foods List

College Station.—April has always been known as the noisiest month of the year so far as nature is concerned. Spring induces birds to sing, insects to drone and hens to cackle.

This April there will be an egg to match almost every cackle. The Agricultural Marketing Service says that April egg production is heading for a new high.

So eggs along with beef have earned the top spot on the U. S. Department of Agriculture's April plentiful food list throughout the country.

Record numbers of cattle in feedlots with plenty of grain to fatten them have produced unusually heavy supplies of quality beef—U. S. Prime, Choice and Good. Two other meats—lamb and turkey—are also in heavier supply than they normally are in the spring.

Most plentiful vegetables in the area include Irish potatoes, canned sweet corn and canned beans.

Only fruits on the USDA plentiful list are canned purple plums and dried prunes.

Good Crowds Reported At Eastside Revival

Good crowds and enthusiastic response have been greeting the revival meetings going on at the Eastside Baptist Church this week.

The services are being conducted by Howard Payne College athletes with their "Jackets For Jesus" programs. Fifteen additions to the church were reported up to yesterday by the pastor, Joe Dossett.

Sunday's program will feature dinner at the Memorial building—both noon and evening.

Although advertised to close on Sunday night, the "Jackets" declare they never close out a meeting as long as interest is running high.

Sinclair Completes Gasser In Tillery Field, Schleicher Co.

Midland.—Sinclair Oil & Gas Company has opened a new gas pool 1 1/4 miles east of the Tillery field in Schleicher county, Texas.

The discovery well is Sinclair's No. 5 Powell, Tract A, in the R. Douglas survey 1504 1/2, 25 miles east of the town of Eldorado.

On completion test, the well flowed 7,000,000 cubic feet of gas

daily from upper Canyon perforations at 3,391-3,401 feet, and 4,550,000 cubic feet of gas daily from lower Canyon perforations at 3,872-3,882 feet. Total depth is 4,780 feet, with 5 1/2-inch casing set at 4,354 feet. Sinclair owns leases on substantial acreage surrounding the discovery well, plus several thousand acres in the area.

Sponsored Circus To Be Shown Here Tuesday

Dailey Bros. Circus will be in Eldorado next Tuesday, March 26, to give their afternoon and evening performances and show the Palace of Wonders.

Local merchants were lined up a while back to sponsor the circus, which will be located on a lot in or near the business district.

Lions Have Program On Explorer Scouting

Bruce Fisher, chairman of the Twin Mountain district of the Concho Valley Boy Scout council, showed slides at yesterday's Lions club meeting on the Canadian canoe trip which 29 Explorer Scouts from the council took last summer. Fisher was one of the adult leaders who accompanied the group and he showed many scenes of the Canadian wilderness.

A similar trip is being planned this summer and there is only one place left on the trip, it was stated. Explorer Scouts are those 14 and older.

Fisher also presented Charlie Trigg with a Scout emblem paper weight for his sponsorship of the recent fund drive in Eldorado for the council.

J. B. Morris, assistant Scout executive from San Angelo, accompanied Fisher, and spoke briefly to the club, thanking all who helped in any way with the fund drive.

The program next Wednesday will be presented by Ray Boyer. Speakers will be Morris Craig, superintendent of West Texas Boys Ranch at Mertzon, and four of his boys.

April Quotas Prepared For Local Draft Boards

Austin.—The state quota for Texas draft boards in April calls for 661 men, Colonel Morris S. Schwartz, state selective service director, said recently.

The state's April call of 661 compares with a quota of 715 for March and 695 for February. The April call is the state's share of a national call for 13,000 men. The national call for March was 14,000.

At the same time he announced the April quota for induction, Col. Schwartz also said that an April call would be issued for pre-induction examination of about 3,500 men. Almost all the local boards in the state will share in this quota. There are a few boards which do not need to have additional men examined at this time, Col. Schwartz said.

Observers Schedule Alert For This Sunday

Members of the Eldorado ground observer post will join other posts in the San Antonio filter center's area of responsibility in a special alert this Sunday from 2 to 6 p. m. All aircraft going over every post will be reported to the center.

Mrs. Nolan McDonald, supervisor of the local post, urged all observers who could to meet at the telephone booth at the courthouse at 1:30 Sunday for assigning of shifts.

Chest X-Ray Unit Coming April 8 and 9

Rev. James Spencer is general chairman of the chest x-ray unit which will be in Eldorado the 8th and 9th of April. All persons who wish, can get a free chest x-ray at that time.

Chest x-rays have been much used in recent years in the early detection of tuberculosis.

Clerical personnel will be furnished locally.

A meeting will be held this afternoon, Thursday, at 3:00 to organize and map further plans. The publicity committee and others will attend.

Fire Razes Tenant House On Truett Stanford Place

A tenant house occupied by a Mexican on the Truett Stanford place southwest of town was razed by a fire shortly after noon Monday.

Eldorado firemen answered the alarm but were unable to reach the house in time to save it, or its contents.

The Stanfords estimated their loss at about \$1300, which was not covered by insurance. Cause of the fire was not determined.

Gymnasium Bonds Approved By Voters In Tuesday Election

OTTO WILLIAMS RANCH IS LOCATION FOR NEW WILDCAT

Ashmun & Hilliard No. 2 Ltd. of Midland has filed application to drill a 5,500-foot rotary wildcat in Schleicher county, 2 3/8 miles east of the O'Harrow (Canyon) field and 16 miles northeast of Eldorado. It will be drilled as the No. 1-A E. Otto Williams.

Fortune Drilling Corp. of San Angelo, which has an undisclosed interest in the project, has the drilling contract.

Location, on a 320-acre lease, is 1,980 feet from the north and west lines of 38-1-GH&SA.

The prospector is 1/2-mile northwest of Fortune No. 1 Williams, a 5,412-foot failure, plugged and abandoned July 14, 1956. It is also 5/8-mile southeast of Fletcher No. 1 Robinson, a 6,216-foot failure, plugged and abandoned in 1951, which separates it from the O'Harrow field. The following tops were reported on elevation of 2,330 feet: Strawn, 5,210 feet; reef, 5,488 feet; Palo Pinto, 5,652 feet and Ellenburger, 5,709 feet.

Organizational Meeting Of Welfare Group Set

On April 11, 1957 at 3 p. m. at the Memorial Building, an organizational meeting will be held for the Schleicher County Welfare Council. At a previous meeting a constitution and by-laws was adopted by those representatives of various groups and organizations present. That set of rules will be the guide for perfecting the organization. At the April 11 meeting officers will be elected and the unit will be put into operation.

The voting constituency will be composed of two classes of persons: (1) individual persons who have paid \$5 membership fee and/or (2) representatives of organizations or institutions who have paid \$25 membership fee. Only those who have paid previous or on date April 11, 1957, will have privilege of voting.

Several organizations and individuals have already indicated that they will be present or represented on this important date. Every organization and each individual is urged to consider sincerely their becoming a contributing member

—J. Clifton Hancock
President, Ministerial Alliance

By a vote of 176 to 112, Schleicher county voters approved a \$150,000 bond issue Tuesday for construction of a new high school gymnasium, which will be the first major addition to the school plant since it was built in 1950. Dick Preston was judge of Tuesday's election and the totals were announced shortly after the polls closed at 7:00.

Tentative plans call for the gym to be patterned after the one at Minters which seats 1,000. The bonds are to be retired in 10 years at the rate of \$150,000 a year.

Incidentally, with seating capacity of 1,000, the new gym will accommodate a considerably larger crowd than will the present high school auditorium, which holds 789. Up until yesterday noon the school trustees had not decided a definite location for the gym.

The Schleicher County Rural High School district takes in all of the county and has an evaluation of \$16,775,000, while the indebtedness is \$335,000, not including the bond issue approved Tuesday. The tax rate is \$1.50 but the present levied rate is only \$1.25. School officials have stated that approving the bond issue for the gym would not raise taxes.

Moore and Gerald Hartgraves. Friends have been trying to persuade at least one of these three to file for re-election, but so far none of them have consented. Next Tuesday, March 26, is the final day for filing for a place on the ballot. Candidates' names must be filed at the office of County Judge Bearce.

The election takes place on the first Saturday in April.

No New Names In Trustee Campaign

A call to the county judge's office at noon yesterday revealed that no new names had been filed in the school trustee campaign during the past week.

The list of candidates remains the same as it was last Thursday when these three were reported:

Ralph W. Waldron
L. D. Mund
Jim Martin

The incumbents whose terms expire are Kenneth Cheek, Henry

POLO CLUB MEMBERS PARTS OF COUNTY IN FLORIDA FOR CHAMPIONSHIP MEET

According to advance reports the entire Polo Club delegation were being entertained with opening festivities in New Smyrna Beach, Florida, today, as they prepare to enter the championship polo contests there tomorrow.

The schedule called for polo contests on Friday, Saturday, and Sunday, with fish fries, dancing and parades included in the three days' celebration.

Those from Eldorado in Florida are: Mr. and Mrs. Lewis Whitten, Mr. and Mrs. Hal Whitten, Horace Linthicum, Mr. and Mrs. Arch Ory, Mr. and Mrs. A. G. Clark, Mr. and Mrs. Ollie Phillips, Mr. and Mrs. Tucker Clark, Mr. and Mrs. Howard Westfall, Mr. and Mrs. Bing Crosby, Mr. and Mrs. Sam H. Henderson, Rance McDonald, Curtis Short, and Sam A. Whitten.

RECEIVE HEAVY RAIN YESTERDAY

Rain squalls and unsettled weather were in existence over a large section of West Texas, including this county, yesterday.

Wednesday morning saw heavy dust storms boiling up on a strong south wind, which brought on rain showers about noon. The precipitation was light in Eldorado, but some heavy downpours were reported in the west part of the county.

Some scattered totals were reported as follows:

City Eldorado 2.0
Victor Sauer 2.50
Case Ranch 1.70
W. V. Lux 1.30
D. C. O. Wilson74
Thad Thomson50
Jimmy West 1.70
J. F. Runge 1.00

Claude Meador is still hospitalized in San Angelo.

Lots of Country--But Little Grass

By WILLIAM M. ROUNTREE
SCS Work Unit Conservationist

Two of the most pressing range management problems in the Eldorado-Divide Soil Conservation district from a soil, water and plant conservation standpoint are how to get water into the ground and good native grasses established on our deep rangeland which at the present time are completely bare.

Ranges examined recently by William M. Rountree, Work Unit Conservationist, and other Soil Conservation personnel, brought about an estimate of approximately 250,000 acres in the district which will need some kind of mechanical treatment and reseeding work if it gets back into high forage production in the near future.

Talking with Aaron Steward and Ross McAngus, farmers west of Eldorado, Rountree found that they were all of this opinion—the land needs pitting and reseeding with native grasses. Aaron Steward said, "If something isn't done to this land, I don't think any of us will live long enough to see grass growing on it to amount to anything." Ross McAngus was of the same opinion.

Some landowners are speaking of root-plowing and reseeding areas like this which are so thickly infested with mesquite. This might be worth a trial to check the results. Research tells us that trees are heavy users of moisture, taking some 2300 pounds of water to produce one pound of wood, leaves, or beans; whereas, it takes only 700

pounds of water to produce one pound of good grass. What do you want the water you receive on this kind of land to produce, grass or mesquite?

Where do we get the seed to reseed these acres which need it so badly? To do the job right, we need good high quality seed grown either locally or within a radius of some 200 miles. To do this job and do it correctly now and in the fu-

ture, it would take around 700,000 pounds of locally adapted grass seed. Where will we get these seeds? This amount of seed can not be bought on the market today. The demand for grass seed is great and has a good chance of becoming greater in the years ahead.

Landowners and operators, have you ever thought of planting a grass seed plot for growing grass seed for your reseeding work?

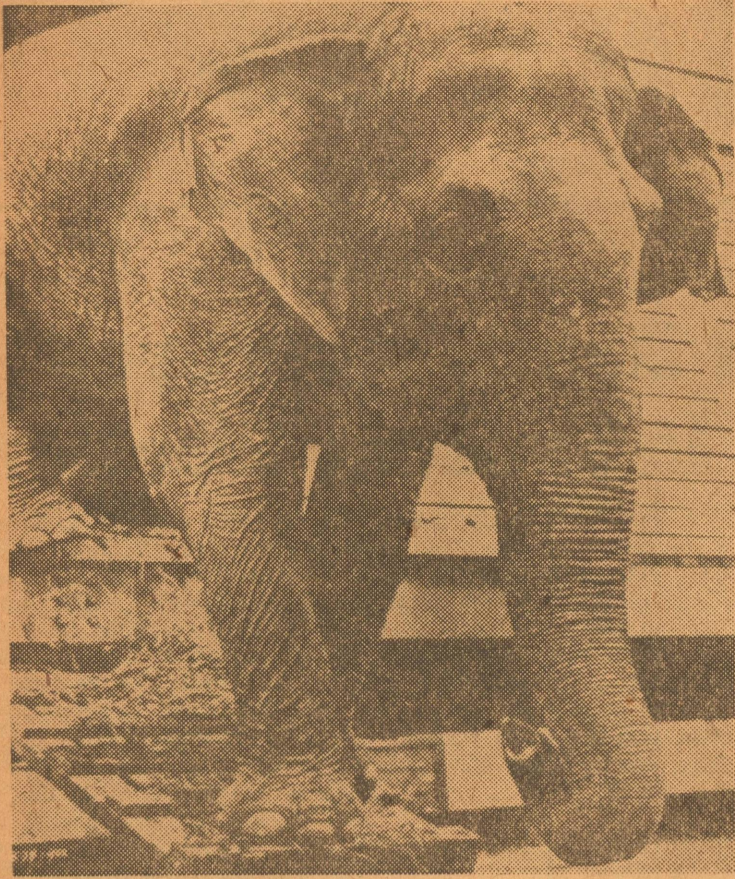

Irrigation farmers, what are your plans for those extra acres of land? There's a great possibility that in the years to come there will be a local market for all the native grass seed you can produce.

If you have questions about the production of grass seed as to the kinds, seed production, method of planting, etc., contact your local Soil Conservation Service personnel in the county courthouse.

DISCUSSING the pitting and re-seeding of rangelands in the district that have gone through seven years of drought, SCS Work Unit Conservationist Bill Rountree talks with Aaron Steward and Ross McAngus on the

McAngus place southwest of town. Another problem facing many ranchmen is the control of mesquite, which uses up much of the water that falls before it can be utilized by desirable grasses.

Home Demonstration Agent's Column

Mrs. Joe Kreklow

Co. Home Demonstration Agent

March seems the ideal month to have house cleaning demonstrations. Some of the short cuts that have worked best for me and other house cleaners have been such as these:

An equal mixture of vinegar and kerosene makes a good wood work cleaner. Rub over the dirty spots and wipe off with a dry cloth. When cleaning woodwork start at the bottom and work up. The clean streaks caused by the cleaning agent dripping down when starting at the top are never removed and the other wood work never looks as bleached as the first streaks. This mixture isn't too hard on painted woodwork either.

4 tablespoons kerosene to 1 qt. of water cleans windows and mirrors like magic. This even cuts the stubborn combination of shows and dust storms on glass. I knew one woman who had a window which had been covered for years by a vine on a trellis. When this was taken down the window panes were so covered that somebody had already gone in the house for a razor blade to scrape with (a dangerous thing) when the kerosene

and water mixture was tried. The glass wiped clean as a whistle. A little polishing with a paper or dry cloth finished the job without the scraping and scrubbing that everybody was all set for.

If some careless somebody has set a wet glass or dish on your good walnut, mahogany or any dark colored furniture and caused a white spot or circle, try this method for removing it. Dip a finger in salad oil, then in salt and rub the spot. Repeat until the spot disappears.

From a museum in Brussels comes this easy to make but very fine furniture polish. Use one part olive oil, one part lemon juice, one part turpentine and one part denatured alcohol. Mix and shake. This feeds wood and replaces some of the oils which aging removes. Denatured alcohol is poison; remember and respect that fact.

The 4-H girls learned how to make a simple one-dish meal at their meetings on Friday. It is called Hamburger Corn Pone Pie, and is made like this—

- 1 lb. ground beef
- 1/3 cup chopped onion.
- 1 tablespoon shortening.
- 3/4 teasp salt & pepper to taste
- 1 teasp Worcestershire sauce.

(It was mentioned that the way

to pronounce this type of sauce is "woostershire.")

- 2 cups canned tomatoes
- 1 tablesp chili powder
- 1 c drained kidney beans or same amount of cooked pinto beans
- 1 cup corn bread batter (might be 1/2 package corn bread mix or 1/2 standard corn bread recipe.

Cook chopped onion in melted fat until golden. Add ground meat and cook until it looses bright red color. Add seasoning and tomatoes. Cover and simmer over low heat for 15 or 20 minutes, then add beans. Pour meat in greased baking dish, top with corn bread batter, spreading with a wet knife blade. Bake for 20 minutes in a 425 degree oven. Serves 4 or 5.

The girls made several suggestions as to other dishes which might be served so as to complete a meal. This menu seemed to suit most of them best—

- Hamburger Corn Pone Pie
- Lettuce, Apple and Celery Salad
- Gingerbread squares; Lemon Sauce
- Milk or Tea

The next 4-H club meeting will be next Friday, March 22 at 4:15 at Patricia Enochs house. The age for 4-H girls is from 10 to 18. Any girl between these ages may join, and is invited to come to this meeting.

It is the time of the year when eggs are cheap enough to use lavishly. Try this very good pound cake and freeze some of it. Freezing actually seems to help the flavor and texture of this cake. Bake and then freeze.

Pound Cake

- 1 1/2 cups butter or margarine
- 2 cups sugar
- 1 teaspoon vanilla
- 1/2 teaspoon almond extract
- 8 eggs
- 4 1/2 cups sifted cake flour
- 1 teaspoon baking powder
- 1/2 cup sweet milk
- 2 teaspoons grated lemon rind.

Cream shortening, add sugar gradually and continue creaming until fluffy. Blend in flavoring. Add eggs one at a time; beat well after each addition. Sift flour and baking powder together. Add to creamed mixture alternately with milk. Mix until smooth. Stir in lemon peel. Pour into two well greased wax paper lined loaf pans. Bake in slow oven (325) 35 to 45 minutes, or until done. Makes two loaves.

Land Leveling Pays Off For Dryland Farmers

Spur.—Dryland cotton lint yields have been stepped up 59% by land leveling clay loam soils on terraced land having less than 1% slope and receiving supplemental runoff water, says C. E. Fisher, Spur substation superintendent.

It's an economical investment, too, according to Fisher who says land at Spur was leveled for \$17.88 an acre and will be effective for several more years. He says annual gross return per acre was increased \$23.76 on leveled land with supplemental runoff water and \$8.10 an leveled land without supplemental runoff.

Fisher believes a more uniform distribution of moisture increases uniformity of yields on leveled lands. He says land leveling increased the average yield of cotton 30 pounds per acre in Spur tests without supplemental runoff. Greatest benefits, however, occur from leveling the land between terraces on relatively flat areas of fine textured soils receiving supplemental runoff, he adds.

Work on the Spur tests was done with a 4-plow tractor and a combination hydraulic scraper and land leveler.

Fisher urges farmers to use special precautions in land leveling since it has a tendency to pulverize topsoil and can result in a serious wind erosion hazard if done incorrectly. Technical assistance from Texas Agricultural Extension Service and Soil Conservation Service personnel is available, and should be sought says Fisher, especially if water spreading is to be undertaken.

Best Repellent For Ticks and Mosquitoes

College Station.—Latest thing in all-purpose insect repellents is diethyl toluamide. Test repellents containing this chemical display twice as much resistance to normal "wear-off action" as do other types. It will probably be available in several commercial products this spring.

The new repellent can be safely applied to the skin or clothing and will successfully protect the wearer against mosquitoes, chiggers, ticks, fleas, and biting flies, according to the USDA. It offers better pro-

tection against mosquitoes generally than any other single chemical or combination of chemicals.

Its high resistance to rubbing means longer-lasting protection for farmers and all outdoorsmen. The new repellent outperforms all others against the stable fly and is a good repellent for deer flies or sand flies. It is the best repellent so far developed for ticks. In addition, a pleasant lotion "feel" makes it ideal for picnickers and backyard gardeners.

Clothing and other fabrics can be readily treated with diethyl toluamide by saturating them with emulsions or dry-cleaning preparations containing the chemical.

Texas Almanacs — Success Office

ELDORADO STUDENT PLEDGES SOCIAL CLUB AT McMURRY

Abilene, (Spl).—Miss Betty Sedberry, daughter of Mr. and Mrs. J. S. Sedberry of Eldorado has been invited to pledge a social club at McMurry college.

Miss Sedberry is pledging Kappa Phi, women's social club at the Methodist college. She is among the more than 100 McMurry students who received invitations to pledge the nine clubs for men and women during the current spring semester.

Purpose of these clubs, according to Dean Joe C. Humphrey, is to boost school spirit among McMurry students.

Miss Sedberry is a 1956 graduate of Colorado High school.

GAINELL BELK BECOMES BRIDE OF MIDLAND MAN

In a quiet home ceremony in the home of the bride's parents, Mr. and Mrs. H. A. Belk, March 15 at 6:00 p.m., Miss Gainell Belk became the bride of Jodie Minnick of Midland, son of Mr. and Mrs. G. G. Minnick of Sonora. The officiating pastor was Rev. W. H. Marshall, Methodist pastor of Sonora, who used the double ring ceremony.
 The bride was attended by her sister, Mrs. James Alexander, and Willis Dean Minnick of Sonora was best man. The bride entered on the arm of her brother-in-law, James Alexander, Miss Charleen Logan playing the wedding music.
 Miss Logan also served the punch at the reception which followed, and Florria Mae Minnick of Sonora served the cake.
 For the ceremony the bride wore a white wedding gown of satin and lace, with seed pearl trim, and her white veil fell from a half crown of net and satin. Her bouquet was a white orchid on a white Bible.
 The couple plighted their troth before an altar trimmed with greenery and white glads.
 The bride graduated from EHS with the Class of '56 and has been attending business college in San Angelo. The groom, a graduate of Sonora High and a student at John Tarleton a year, has been working for National Supply Co. out of Midkiff.
 Immediately after the ceremony the couple went to their home at Midland, then returned here and went on a fishing trip of a few days' duration.
 Among those from out of town attending the wedding were the groom's family of Sonora, and the bride's grand parents, Mr. and Mrs. J. B. Belk of Miles.

Methodist News

At the Official Board meeting Monday night some important decisions were made. One decision was to change the dates of our revival meeting. The services will be held on Monday, Tuesday, Wednesday, Thursday, and Friday, from the first to the fifth of April, at 7:30 p.m. No morning services will be held at all. The pastor, the Rev. R. Russell Heaner, will preach the revival. Everyone is cordially invited to attend.
 The picture in the show window of the Eldorado Drug is an actual still from the religious motion picture about Christ, "I Beheld His Glory." The picture will be shown in color at the high school auditorium on Wednesday, April 17. There will be two showings—one during the daytime for all of the students of all grades, and another showing at night for the general public. Rev. Heaner has been designated to have charge of the showing of this picture during Holy Week, which is being sponsored by the Ministerial Alliance.
 Mrs. J. E. Hill and Mrs. W. F. Meador, Sr., are in Corpus Christi attending the annual conference of the Woman's Society of Christian Service.
 The Commission on Membership and Evangelism met last night with vice-chairman W. G. Godwin in charge in the absence of Mrs. Jud Brannan.
 The church membership class for juniors and intermediates will have its first session Saturday morning at 10 o'clock in the pastor's study. There is absolutely no obligation. Any junior or intermediate who is interested in learning more about church membership, the Bible, and the Christian life is urged to be present.
 Monday evening at 7:30 the Methodist Men will meet in the Educational Building. The committee this month is composed of Charlie Trigg and Lawrence Newport.
 The Every Member Canvass Institute will be held next Thursday at 7:30 p.m. at First Methodist church in San Angelo. Lawrence Steen, chairman of the Commission on Stewardship and Finance, is trying to get every member of the commission and every member of the Official Board to attend this important meeting. This is a matter of vital importance to the future of our church.
 Word has been received from Lucknow, India, that our packages of books which we sent last Christmas have arrived safely. These books were a part of our White Gift offering.
 Our Fourth Quarterly Conference will be held on Sunday morn-

ing, April 7, with Dr. L. Eugene Harris preaching. There will be a covered dish dinner at the Educational Building immediately following.

MERRY MAKERS MEET

The Merry Makers "42" club met Thursday of last week in the club room of the Memorial Building, with Mrs. O. E. Conner as hostess. Mrs. Jack Griffin was a guest.

INJURIES

Mrs. Bill Parrent fell in the backyard of her home here Tuesday and broke both wrists. She is recovering at home following treatment.

SHELL EMPLOYEE HONORED WITH BARBECUE

Shell employees and their families gave a barbecue recently for the J. P. Wallaces, at Eldorado terminal. J. P. retired March 1 after 27 years' service with Shell Pipe Line Corporation.
 The Wallaces will make their home in Menard where their chief interest after retirement will be ranching and just taking it easy.

The Mikeskas, who are on the former McDonald place 18 miles west of town, report that two medium-sized dogs have strayed onto their place. They describe one of the dogs as being black with a short tail, and the other as being black and brown with a long tail; and would like for the owner to pick them up.

Success in Schleicher County, \$2 year—elsewhere \$3 year.

ATTENDS CONVENTION IN ABILENE

Mr. and Mrs. Edwin Jackson drove to Abilene last Thursday, where Mrs. Jackson attended the 6th District Convention of the Texas Federation of Women's clubs as a delegate from the Eldorado club. Sessions were from 9:00 a.m. to 5:00 p.m. There were about 175 in attendance.

Following this meeting the Jacksons went on to Austin where they spent the weekend with relatives and friends.

John Ochsner, with Lone Star Producing Co., has been transferred by the company from Athens to Dallas. His brother, George, has taken a job with Tidewater Oil Co., and will be a drafting engineer in the Midland office.

Lutheran Services To Be Held In Sonora

Lutherans will hold their first worship service in the Sonora-Ozona-Eldorado area in Sonora, Sunday, March 24, at 4:00 p. m. The services will be held at St. John's Episcopal Church in Sonora, located just east of the courthouse. The services will be under the leadership of the Rev. Luther Roehrs, pastor of Trinity Lutheran Church, Eden, Texas, a member congregation of the Lutheran Church that sponsors the Lutheran Hour and "This Is The Life."

A canvass was made of this area by the Lutheran Churches in San Angelo and Eden approximately

eighteen months ago. This canvass showed the advisability of holding services in this area. However, the pastor of Trinity Lutheran Church, Eden, who was the one to serve this mission field, accepted a call to Austin. The congregation at Eden was vacant from November 1955 until August 1956, when Pastor Roehrs began serving the Eden church. He has made several trips into this area to make contacts and lay the necessary plans.

At present the tentative schedule of worship services has been set. They will be held on the second and fourth Sundays of each month.

Special services will be held on festive days such as Easter and Christmas.

"We would like to take this opportunity to invite all the Lutherans of this area to this first worship service," said Pastor Roehrs, "and we extend a special welcome to those who do not have a church home and would like to learn about the way to heaven through faith in Jesus Christ, the Savior of the world."

For further information regarding either Pastor Roehrs, Box 245, Eden, Texas, or Mr. Robert Pfluger, Box 5784, Sonora, Texas.

PARTIAL VIEW OF COSDEN'S MULTI-MILLION DOLLAR REFORMING UNIT

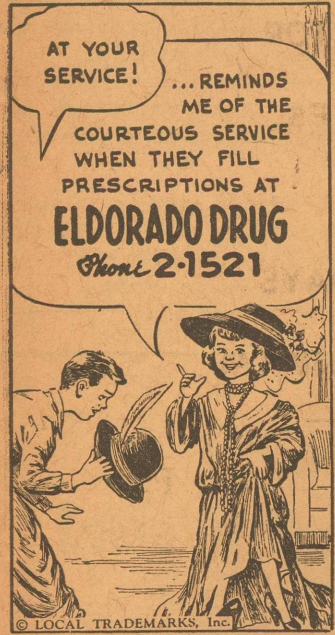

PRINCE of PREMIUM GASOLINES!

Cosden recently spent millions, building the world's first fully-integrated Rexformer for just one purpose . . . to give you the Prince of Premiums! Now, thanks to the completely-new Rex-Forming process, you can have a truly modern fuel . . . more than matching the ever-increasing demands for higher octanes to power today's high-compression engines. ♦ If you drive a late-model car, insist on a modern fuel . . . fill up with Cosden Ethyl Gasoline . . . the Prince of Premiums . . . Rex-Formed to give you tomorrow's performance today!

Both Cosden Higher Octane Regular and Cosden Premium Ethyl Gasolines combine the dual advantages of the most ultra-modern equipment and the latest refining techniques . . . both refined in the Southwest to meet Southwestern driving conditions.

Gift Tea Held Saturday For Mrs. Stockton

A gift tea was given Saturday, March 16, from 3:00 to 5:00 p.m. at the home of Mrs. Joe Wagley honoring Mr. and Mrs. Curtis Stockton, Jr. Mrs. Stockton is the former Miss Dale West.

Hostesses were Meses. N. G. Hodges, Robert Sproul, L. D. Mund, Joe Wagley, Ben Biggs, Grover Lee Johnson, Jack Wade, Edwin M. Jackson, Sr., James Williams, W. T. Parker, John Williams, Eldon Calk, Richard Jones, and S. D. Harper.

Receiving guests were Mrs. Wagley and Mrs. Jackson.

In the receiving line with Mrs. Stockton were her mother, Mrs. Palmer West; Mrs. Curtis Stockton Sr., mother of the groom; and alternating were Mrs. Cashes W. Taylor, aunt of the honoree, Sonora; Mrs. Royce Regeon, cousin of the honoree, Austin; Mrs. C. T. Womack, aunt of the honoree, San Angelo; and Mrs. W. T. Parker, godmother of the bride.

Miss Ann Ballew registered the guests. Serving decorated cake squares and coffee and tea from silver service were Misses Jeannie Mund and Thomasyne Jones, the first hour, and Misses Yvonne Logan and Jimmie Dell Williams the second hour.

The tea table was laid with a white floor length net cover over pink satin and was centered with a styrofoam design in the bride's chosen colors of pink and white and placed on a revolving turntable. Three pink cupids holding hearts formed the center of the design with pink and white carnations, pearlized leather leaf fern and puffs of net placed at the feet of the cupids. Arrangements of carnations and wax flowers were used on the buffet and register table.

Playing background music during the tea hours were Miss Nancy Jo Jackson and Miss Judy Hext.

The High School Sextette, directed by Mrs. Irene Teele, sang Let the Rest of the World Go By, Band of Gold, and Pledging My Love.

Members of the Sextette were Yvonne Logan, Monetta Bradshaw, Becky Mund, Sandra Hall, Louethel Dawkins, and Linda Bess Love.

Guests were from Sonora, Austin, and San Angelo. Approximately 100 called.

New Babies

A son was born Thursday, March 14, at 6:58 p.m. to Mr. and Mrs. James Alderman, and was given the name of James Culver Alderman, Jr. He weighed 8 lbs. 13 oz.

James Jr. is the first grandchild for Mr. and Mrs. Ed Hicks. Other grandparents are Mr. and Mrs. Ed Alderman of San Angelo, and Mrs. H. A. Vogel is a great grandmother.

Mrs. Jimmy Stone of Denver, Colorado, was a visitor to Eldorado early this week. Mrs. Stone is the former Mrs. Ebba Finley.

Edwin Jackson is in Houston this week attending sessions of the Cattle Growers Association convention.

FINISH HIGH SCHOOL or grade school at home in spare time. Books furnished. Diploma awarded. Start where you left school. Write Columbia School, Box 342, San Angelo. (Oct 18/52t)

CARD OF THANKS

We want to thank the friends who have sent cards and flowers to W. E. Jeffrey Sr. in Dallas during his sickness.

The Jeffrey family 1*

COUNTY AGENT'S COLUMN

by Tiny Godwin

Schleicher County Agricultural Agent

The drouth emergency program was extended for Schleicher County. The county ASC office being notified Thursday, too late for the Eldorado Success edition.

The last day producers may sign up for grain and hay is April 1, 1957. This supply will last through April 15, 1957. Make your applications at the county ASC office. Mr. Wilson Smith is office manager.

Another important date for producers to remember is April 15, 1957. April 15 is the last day for signing your conservation reserve contract at your local ACS office.

Evaporation from farm and ranch ponds used for stock water or irrigation represents a large loss of valuable water. This evaporation varies from 4 vertical feet per year in East Texas to 11 vertical feet in West Texas for a 1 acre pond. This represents from 1,300,000 gallons to 3,500,000 gallons lost annually.

Water evaporation losses may be retarded in many ways, namely: elimination of shallow areas and monomolecular films on the surface. Certain waxy, solid organic chemicals when played on surface water will spread rapidly with a continuous film. 50 per cent reduction in evaporation was obtained. The cost of using stearyl alcohol and cetyl alcohol, which are inert and harmless, made from beef tallow is 6 cents for 1000 gallons of water used.

The method is now ready for general application for ponds up to 2 acres in area, the method is practical and economical. The material should be distributed by filled floats which are being made commercially.

Land which has been placed in

the Soil Bank, either the acreage reserve or conservation reserve, is still eligible for Federal cost-sharing in carrying out practices under the agricultural conservation program (ACP). The county ASC committee can supply information on the practices available in the county.

A community is a collection of people and the character of the community reflects generally the composite character of the people who live there. For this reason people who may be prone to criticize their county are really criticizing themselves although they would never admit it.

If you want to enjoy county prosperity and progress you have to do something about it first. You want to share the good things which the county offers so you should be equally eager and ready to share in the work, responsibilities and possible self sacrifices which are necessary on the part of all of us if we are to have county progress.

Let us remember the old proverb, "If you want to catch rain water, you must put out a barrel."

Older 4-H youth are responding to training Junior 4-H boys for contests this spring. Jimmie Whitten will assist in plant identification and range judging. Junior 4-H teams from the county will compete in district competition April 27 at San Angelo Junior College.

Words of Wisdom:
You're never too old to learn but you do get more selective about what's worth learning.
Man has an estimated 12 million brain cells just to give you an idea of the unemployment situation.

Presbyterian Notes

Calendar For The Week

Sunday
10:00..... Sunday School
11:00..... Morning Worship
5:30..... Youth Fellowship
7:30..... Evening Worship

Monday
1:00..... Christian Education Committee in Midland
3:15..... Women of the Church General Meeting

Wednesday
4:00..... Crusaders
4:00..... Choir Rehearsal

The PYF of the Mid-Texas Presbyterian meets in the First Presbyterian church of Fort Worth tomorrow. About 10 of our Senior High young people will leave some time in the morning and catch the chartered bus in San Angelo. They will begin their meeting about 5:30 and will adjourn about 1:30 Saturday. This will be the last meeting of the Spring Rally as all of this section will be in Southwest Presbyterian before another spring.

We will have our week of meetings beginning April 7th. The evangelist is to be the Rev. George S. Heyer, Jr., assistant pastor of the First Presbyterian church in San Angelo. Mr. Heyer will speak at the chapel period in high school on April 3rd, and all of the young people will get acquainted with him there. He plans to return to his graduate study next fall.

The Presbyterian Youth Fellowship have taken as one of their projects, the beautifying of the lawn of the Page Sunday School annex. Some seeds have already been planted and the group is organized in seeing after the watering and cultivating of the flowers.

To Reduce Taxes

With \$53,324.68 on hand in cash in various funds and in investments, the City Council voted unanimously to buy \$8,000 in short term swimming pool bonds held by the local banks and so effect a saving of \$514.26 over the period they are to run.

This savings will reduce the bonded indebtedness sufficiently to enable the Council to reduce the city tax rate on 1958 taxes this July by ten cents on the \$100 valuation with no increase in valuation except customary equalization. The motion to reduce taxes was passed unanimously and has the approval of the auditor. —Junction Eagle.

Methodists To Close Nelson Attendance Plan

The Sunday School of the First Methodist church has been on the Nelson Attendance plan the first quarter of the 1957 year, beginning Sunday, January 6. It will end the fourth Sunday in March with the teachers reporting to the Superintendent for Membership Cultivation and Attendance, the number having a complete record of attendance for this period.

For each Sunday present a stamp was placed in individual attendance books by the members, after which Rev. R. R. Heaner, pastor, based his sermon subject on the stamp.

The sermon subjects were:

1. His Holy Word. "Thy Word is a Lamp." Ps. 115:195.
2. God Our Father. "Thou art our Father. We are the clay." Ps. 64:80.
3. The Living Christ. "I am with you always." Matt. 28:20.
4. The Way of the Cross. "If I be lifted up, I will draw all men unto me." John 12:32.
5. Prayer is Power. "Lord, Teach us to pray." Luke 11:1.
6. The Church Militant. "I will build my church." Matt. 16:18.
7. Living Sacrifices. "Present your bodies." Rom. 12:1.
8. Being Friends. "Ye are my friends. If ye do these things which I command you." John 15:14.
9. Faithful Stewards. "Faithful in a few things." Luke 19:17.
10. Forgive us our Trespases. "If we confess our sins He is faithful." I John 1:9.
11. Thy Kingdom come. "A Kingdom which can not be moved." Heb. 12:28.
12. The Other Room. "If a man die shall he live again?" Job 14:14.

The total Sunday School enrollment is 164 and a record is kept on an attendance chart each Sunday, where everyone can view it. An over all check reveals the attendance up each Sunday and no Sunday except one has dropped below last year's figure and this was by a figure of three.

The fifth Sunday has been designated as 100% Sunday and an all-out effort will be made to attain this goal. The peak attendance for the year was 160.

On Saturday, March 30, at 9:45 the church bell will be rung by the pastor setting off a chain of phone calls. Bill Gunstead, Sunday School superintendent, will make the first call at that time calling three members and asking them in turn to call three other members, reminding them, thereby contacting each member of the Sunday School.

News From Our Neighbors

New County Stalled

The Trans-Pecos Development Association in Iraan apparently has been defeated in its effort to have a new county created from the eastern end of Pecos County and the western end of Crockett county.

The deadline for introducing bills in the Texas legislature passed last Saturday without a bill in the hopper that would bring the matter to a vote.

The Iraan people said they desired to organize a new county with Iraan as the county seat because of unfair treatment from Pecos county and Crockett county. —Ft. Stockton Pioneer.

Rabies

Lee Dudley, who ranches north of Sanderson, gave a report last week-end to The Times that his hands had seen a fox thought to be rabid. The story was revealed so that other ranchmen and citizens may be on the look-out for such animals in the future.

Dudley stated that his braceros came upon the animal "poor as a snake" and tried to kill it with rocks but were unsuccessful. They were afraid to approach too closely to the animal for fear of being bitten. —Sanderson Times.

Water Problems

City of Alpine this week purchased the Collie pipeline and equipment for \$31,500 in cash to insure future water deliveries from the Sunny Glen area.

While the City has taken full possession of the pipeline, the water purchase contract with M. W. Collie of Midland will remain in effect until June 30, 1958. —Alpine Avalanche.

Repair Work

The Mason County Fair Association is having the gates and entrance to the Fair Grounds rebuilt and repainted. Plans also are being made to remodel the pens in preparation for the annual FFA rodeo in May. —Mason Co. News.

School Census Down

The results of a seven-year drought have brought the Edem school census to the lowest scholastic count in a number of years, some 275 under the all-time high following the consolidation of Live-Oak, Brady Valley and other rural systems.

The 1957 census count reported by H. J. Sanders, superintendent, Wednesday was 424. This is 48 under last year's tally and 79 under the previous year. The 1951 census was 577. —Eden Echo.

Teacher Elections

All teachers were re-elected at a Thursday night meeting of trustees of the Robert Lee School district. There were no salary changes. Contracts were also extended one year on the two-year contracts held by Supt. Frank D. Coalson, H. S. Prin. M. E. Petross and Grade Prin. P. E. Webb. —Robert Lee Observer.

Tank Truck Loss

Loss was estimated at \$1,500 when the liquid line from the connection on a York Transport truck loaded with anhydrous ammonia broke while unloading at the Bakersfield Valley Co-op storage tanks near the cotton gin. It was stated that the transport was about one-half unloaded at the time the line broke, resulting in the loss of the transport load as well as the ammonia in the three storage tanks. No one was injured. —McCahey News.

District Meet

Thirteen counties will be represented at the Sixth District Conference of Parent Teacher Associations to be held in Menard April 3, according to Mrs. Harris Mohler, general chairman of the conference. —Menard News.

No City Delivery

Mrs. H. B. Edens, Big Lake postmaster, is in receipt of the following letter from the district office in Amarillo:

"The appropriated funds of the Post Office Department for the balance of the fiscal year are such that the usual service extensions and service improvements must be deferred. This lack of funds makes it impossible to establish city delivery at this time. When funds are available, action will immediately be taken to inaugurate city delivery service at Big Lake." —Big Lake Wildcat.

Texas Poultry Should Be A Specialized Business

College Station—Many of today's poultry marketing and distribution problems can be traced to a definite need for concentration of the industry's production in limited areas, according to extension poultry marketing specialist Kermit Schlamb. He says this would result in a superior product for the consumer with more of it available at lower costs.

Per-man-output in all phases of the poultry industry is increasing rapidly, he adds, but even greater specialization and more concentration is needed for more efficient production. For instance, Schlamb points out that the average broiler farm in Texas turned out about 25,000 birds last year or enough to feed 3,000 people, all the broilers they would normally consume in a year. Two 3,000 bird houses filled four times a year—enough for a half-time operation—can just about produce that 25,000 broilers. Texas' 103 million broilers last year were produced on less than 4,000 farms and amounted to 40% of the state's total poultry income, the specialist says.

Problems and costs of assembling and marketing eggs under scattered population conditions must be remedied if the Texas egg industry is to keep pace with that of other areas, Schlamb warns. Not one Texas county has a sufficient concentration of layers to rank in the nation's top 100 counties, and production per hen is about 19 eggs a year lower in Texas than the national average, continues the specialist. This situation, he adds, results in the production of only 65% of the state's shell egg needs.

More concentration is also needed in the turkey industry of the state. Texas production is small from the standpoint of average flock size although the state ranks sixth in total production, Schlamb declares. He says the average flock in 1954 was about 119 birds as compared with 2100 for Iowa and adds that Texas has only one county ranking in the nation's top 100 turkey-producing counties. Texas does export a large number of turkey hatching eggs to other states, however, and last year this business brought over two million dollars to producers, Schlamb says.

FILE FOLDERS: Letter size and legal size; third-cut. — Eldorado

CIRCLE 1 MEETS

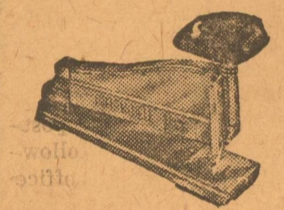

Circle 1 met in the home of Mrs. T. W. Johnson. Mrs. Luedeck read the scripture from Matthew. After the reading the Lord's Prayer was quoted in unison.
Mrs. A. J. Stevens brought our Bible study, "The Prayer of our Lord, taught his disciples," by Mrs. J. M. Dauson.
Mrs. J. L. Ratliff dismissed with prayer. Refreshments were served to 15 members. —Reporter.

School News

The district one-act play contest is to be held in the high school auditorium on March 22nd beginning at 4:00 p.m. No admission is charged and the public is cordially invited to attend. The first three plays will be given that afternoon, then the remaining two will be presented that night beginning at 7:00.

Kenneth Hicks with a total of 15¼ points led the Jr. High track team to a victory over Menard, Sonora and Ozona at the local high school track, Thursday afternoon. To get the meet off to a good start Hicks opened with a first place in the pull up (chinning) contest with 20 pull ups. Martinez of Ozona got second with 17 and Sikes of Ozona and Gomez tied for third and for fourth with 15 each. In the second event of the meet, the 100 yard dash, Hicks was second behind Doran of Ozona who legged the 100 in 11.6 seconds. Kenneth's time was 12 seconds. Carl Parker of Eldorado was third with 12.1 and Fields and Ramor of Sonora tied for 4th place with times of 12.3.

After the 100 yard dash, action was moved to the broad jump pit where Hicks again was the best boy for Eldorado. On the first jump Kenneth made a leap of 15 feet 6¼ in. This jump held up all the way to the last jump when Ybarra of Ozona topped it with a jump of 16 feet 1 inch and Leija of Sonora with a 15 ft. 8 in. leap, leaving Kenneth with a third place and two points.

Following the broad jump, Hicks, with 10 points in three events, was not satisfied. In the 75 yard dash, he raced to a third place behind Doran of Ozona and Parker of Eldorado to pick up two more points while Parker was picking up 3 for Eldorado. Ybarra of Ozona was 4th in the 75 with a total of 9.3.

In the next event, the shot put, Hicks was not entered but two other Eldorado boys gained six points in the event. Jerry Don Johnson, on his last attempt, heaved the 8-pound ball 36 ft. 1½ in. to nail down first place and five points for the team. Second place went to Gonzales of Sonora, third to Fletch of Menard and fourth to Carl Parker of Eldorado.

Following the shot put was the 50-yard dash, where Eldorado picked up 5 more points with a second place by Parker with a time of 6.2 and Hicks with a third place timed in 6.3 seconds. The winner of the event was Doran of Ozona with a time of 6:1.05 seconds. The fourth place was a tie between Castillo and Fields of Sonora with times of 6.5 seconds.

In the high jump, Eldorado could muster only 1/3 of a point when Jerry Don Johnson tied with Gibson of Menard and Doran of Ozona for fourth place. Leija of Sonora won the event with Castillo of Sonora taking second place.

The final event of the day was the 440-yard relay in which a team consisting of Hicks, Dacy, Runge and Parker of Eldorado rounded the oval in 52.2 seconds to win the event and the meet.

Final standings in the meet were Eldorado — 30 1/3 points
Ozona — 25 2/3 points
Sonora — 14½
Menard — 4 1/3

MRS. THOMSON NOTIFIED OF STEPMOTHER'S DEATH

Mrs. Thad A. Thomson was notified this week of the death Tuesday night of her stepmother, Mrs. Richard Newton, who had visited Capt. and Mrs. Thomson a number of times on their ranch here.

Under the professional name of Edna Woolman Chase, Mrs. Newton was editor of Vogue magazine until her retirement in 1954. She observed her 80th birthday last week at which time a writer for the New York Times described her many accomplishments in the field of fashion, and pointed out how she had shaped publishing and design in America.

VISITS OVER WEEK END

Truman Biggs visited here over the weekend with his parents, Mr. and Mrs. Ben Biggs. Truman, who was outstanding on the Eldorado Eagles football team up to his graduation from EHS in '52, has been playing on the Hardin-Simmons team and has had some inquiries from pro football scouts.

He expects to finish college next spring. He served two years in the Army before entering Hardin-Simmons.

Bill McGilvery of San Angelo is a new meat cutter at Parker Foods. His wife, who is a member of the San Angelo school faculty, will not be able to move here until the close of the present term.

GOOD WELL ASSURED

A water well 421 feet deep on Claude Meador's farm 2½ miles southwest of Eldorado was being tested this week. For a while yesterday it was pumping 950 gallons per minute, after being treated with acid. Surface pipe was being set. Observers regard the well as one of the best potential producers in the county.

P-TA Has Program Tuesday On Girl Scouts

Mrs. Edwin Jackson presided at the meeting Tuesday night of the Parent - Teacher Association. A program on the Girl Scouts was presented, the Brownies and Girl Scouts being under the direction of Mrs. Roy Phelps.

The visiting speaker was Miss Genee Stanberry of San Angelo, the executive director of the Frontier Girl Scout council for this district. She discussed Girl Scouting and the need for qualified Girl Scout leaders. She also discussed camping and the need for a camp site in Schleicher county.

Russell Beach gave a report on the teachers pay raise bill. Mr. Beach encouraged all to write to Senator Dorsey B. Hardeman of San Angelo or Rep. Joe Burkett of Kerrville to encourage the passing of the bill.

Mrs. Wyatt reported that 65 polio shots had been given and that the third shot would be due in September.

The new officers for 1957-58 school year are: Mrs. Ed Meador, president; Mrs. L. E. McCalla, vice president; Mrs. Orval Edmiston, secretary; Mrs. Joe Andrews, treas. Committees: Wesley Hayhurst, audit for treasurer; Willie Belle Gosh and Mrs. Clifford Schooley, to approve the minutes of last meeting; Joe Andrews, W. A. Algood and Mrs. Edwin Jackson, scholarship.

Important dates to remember: District conference will be in Menard April 3. Tri-County Council in Sonora on April 11. Summer Roundup April 25th. Final P-TA meeting will be April 16.

The room awards were given to Mrs. Miller's 1st grade; Mrs. Robinson's 4th grade; Junior Hi 7th grade and Senior Hi 10th grade.

The date for the final discussion group will be Monday at 7:30. Everyone is urged to attend this meeting, as it will be a summation of all the meetings and plans for next year's work will be discussed.

GIRLS 4-H CLUB MEETS

The 4-H club met Friday, March 15, at the Memorial Building, at 10:00. The project for that meeting was to make a hamburger cornpone pie.

The members present were Martha Topliffe, Myrta Topliffe, Ruth Parker, Judy Hext, Donna Taylor, Tissy Enochs, Pam Calk, Genelle McCalla. They elected officers and fixed the year books.

The officers were: president, Genelle McCalla; vice president, Judy Hext; secretary-treasurer, Myrta Topliffe; reporter, Pam Calk; song leader, Ruth Parker.

The next meeting will be at Tissy Enochs' house Friday, the 22nd, at 4:00. —Reporter.

Style Show Luncheon To Be Sponsored By Junior Woman's Club

"Previews of Spring '57" is the theme of the style show luncheon which will be presented Saturday, March 23. The show will be held at the Memorial building and will start at 12:02 P. M. Members of the Junior Woman's Club are making the final preparations.

Clothes to be shown are through the courtesy of the Eldorado Style Shop, the Ratliff Store and Coulter's. Stiglers will present new spring jewelry. Mrs. Joe Kreklow will be the narrator.

Admission will be \$1.25, and tickets can be purchased from any member of the club and at the Style Shop and the Eldorado Beauty Shop. Tickets will also be on sale at the door Saturday morning. The Junior Woman's Club is looking forward to a very pretty and entertaining style show.

ELDORADO GIRL IN TEXAS U. NEWS

Austin—Donna Beth McCormick, University of Texas student from Eldorado, is a new member of the Beta Gamma Chapter of Tau Beta Sigma, national honorary band sorority.

Miss McCormick, sophomore elementary education student, is the daughter of Mr. and Mrs. Don McCormick. She is a member of the University chorus, Women's Glee club, and Women's Independent Campus organization.

Installation of the 12 charter members of the chapter was held in the Queen Anne room of the University Commons.

Women were officially admitted to membership in the Longhorn band last fall.

Kappa Kappa Psi, national honorary band fraternity, has long been active at the University and is expected to work in conjunction with Tau Beta Sigma to encourage technical achievement and greater appreciation of music.

H. D. COUNCIL MEETS

The Home Demonstration Council met March 11 and \$119.19 was reported in the treasury. Mrs. Arch Edmiston was named THDA chairman.

H. D. meetings in Abilene April 3 and in Houston July 31 were discussed and plans made to be represented at both.

The Council voted to sponsor a market day in July.

The Council will send a girl to Kerrville 4H club activities and the clubs will send four, and one leader.

Paying of \$15 for painting and repairing of the kitchen in the Memorial building was approved.

Mrs. Weldon Davis was named demonstrator for foods and nutrition. Next meeting will be held April 16.

WORKING IN ABILENE

Glenn Biggs was recently made assistant manager of the Abilene chamber of commerce, where he has been working since October. He also teaches public relations Mondays, Wednesdays, and Fridays at Hardin Simmons university.

J. FORREST RUNGE — CHAIRMAN, CHRISTOVAL
E. E. FOSTER — SECRETARY, KNICKERBOCKER
B. E. MOORE — MEMBER, ELDORADO
FORN BOULWARE — MEMBER, CHRISTOVAL
BEN HEXT — MEMBER, ELDORADO

Do you ever have trouble with soil blowing from your field? When driving down your fence rows, do you find that the fence posts and wire are practically covered with soil that has blown out of your field? Is this just something that must happen and nothing can be done to remedy the situation? As this is just about planting time it might be well that we consider a practice which if applied this spring will go a long way toward stopping our soil from blowing in the spring of 1958. The practice we are speaking of is "strip cropping."

Strip cropping is the growing of crops in a systematic arrangement of strips or bands which serve as vegetative barriers to wind erosion.

This practice should appear on the land annually in conformity with a definite cropping system.

Each year, in a never ending cycle we find ourselves in a period of dust storms. Most people feel dust storms are caused by drought, which is true only in the respect that the chances of having a severe dust storm are greatest during a critical dry period. It is at this time of year that we have winds of great enough intensity and duration to create these storms. Also falling at this time of year is the period when protection for soil is at its lowest ebb.

It's true that more rainfall would help hold the soil down; but this is West Texas and it isn't very

Dr. Charles E. Courtion

CHIROPRACTOR

ANNOUNCES

OFFICE HOURS IN ELDORADO

(In E. W. Brooks Residence)

21701

likely that we will have sufficient moisture in the soil at all times to keep it from blowing.

It is with the above considerations that strip cropping for these conditions could meet a real need. Especially in this time where low residue producing, clean tilled crops are grown on land susceptible to wind erosion. The general pattern of strip cropping is crosswise to prevailing winds. The crops are of the taller growing sorghum varieties that furnish much needed residues for soil stabilization. The greatest advantage of this practice is not only the protection, it also treats the soil itself. The organic material from old stubble to keep it from becoming powdery, to hold the soil particles together and keep the soil open and porous.

If your strips consist of perennial grasses, summer legumes (except peanuts), or sorghums in rows or solid-seeded, or other solid seeded crops alternating with strips of other row crops or fallow you can receive financial assistance from your local agricultural conservation program. To receive this

financial assistance the strips must be not less than four normal rows wide and not more than 200 feet wide. The above mentioned crops must occupy not less than 20 per cent nor more than 50 per cent of the field. The crop stubble or crop residue must be left standing over the winter, or a winter cover crop established.

Landowner and operator, what are your plans for your cotton acreage which you have placed in the soil bank? Do you plan to let it lie idle all year long? Wouldn't it be wise to plant a cover crop on it and return some residue back to the soil some time during the year? Looks like this is a good opportunity to give that land a shot in the arm that it has been needing for a long, long time.

"From our farms and grasslands alone, man-made erosion is moving over three million tons of soil every year down into our rivers and reservoirs and out to sea. This is the rich topsoil that contains, in minerals and humus, the great reserves of plantfood standing between man and famine."— Ward Shepard, "Food or Famine."

How to plant a "Money Bush"!

Money can grow, you know!

In fact, it can grow to surprisingly large amounts as anyone who has saved regularly with U. S. Savings Bonds can tell you.

There are millions of people to ask. Over 40,000,000 working Americans own U. S. Savings Bonds—more than 41 billion dollars worth. Most of them have done it by saving small amounts regularly through the Payroll Savings Plan. It's the easiest, surest way to save—a good way for you.

And here's another thing to remember. Savings Bonds are one of the world's soundest savings plans. The U. S. Government, most powerful in the world, guarantees your principal in Bonds *safe* up to any amount—guarantees *sure* the rate of interest you receive.

So why not start growing your own money today — the Savings Bond way? Join the Payroll Savings Plan where you work or buy Bonds regularly where you bank. You'll help strengthen your own family's security plus the security of your town and your country.

U. S. SAVINGS BONDS STRENGTHEN THE SECURITY
OF YOUR FAMILY, YOUR COMMUNITY, YOUR COUNTRY.

PART OF EVERY AMERICAN'S SAVINGS BELONGS IN U. S. SAVINGS BONDS

Diabetes

Austin.—Various educated guesses as to the number of "undiscovered" diabetics in the United States place the figure somewhere between one and two million. Undoubtedly a fair proportion of them are Texans.

Diabetes is a general systemic disease in which the body loses its ability to burn and store sugar normally. All starches in foods are converted in the stomach, and intestines into sugar. As sugar they are absorbed into the blood and pass through the liver and into general circulation to all parts of the body.

Normally the gland called the

pancreas produces a secretion called insulin which is also poured into the blood. In the presence of insulin, the sugar of the blood is burned, especially by muscular activity. Any excess of sugar in the presence of a normal amount of insulin is temporarily stored, mostly in the liver, and released as needed into the blood.

This is the normal pattern. But in a person suffering with diabetes the pancreas fails to produce sufficient insulin. And when starches are eaten and absorbed as sugar, the body is unable to control the sugar normally by storing it in the liver or to burn it efficiently in muscle exercise. Result: the sugar content of the blood increases to abnormal levels.

Because the diabetic is unable

to burn the sugar efficiently for energy, he becomes weak and tired. His body needs nourishment and he therefore develops great hunger. But because he cannot utilize the starches, he uses up his own tissues and continues to lose weight.

When the blood sugar gets too high, the kidneys, in an effort to lower it, removes some of the sugar by excreting it in urine. This, in turn, makes the body dry and creates a thirst.

Proof of the hereditary nature of diabetes is the fact that surveys of diabetic children show that 80 percent of families in which there is or has been diabetes.

Overeating and lack of muscular exercise are conditions which tend to promote obesity which in turn

creates a tendency toward diabetes. It has been shown that 20 fat persons develop the disease for every thin one who does. The obvious moral is do not overeat, do not remain overweight, and get plenty of muscular exercise.

You can judge your own tendency toward diabetes in the light of what has been said: Are you overweight? Do you over-eat? Is there diabetes in your family? Also, do you have any of the symptoms: great hunger, loss of strength, loss of weight, persistent thirst, or excessive urination? If so, you're likely candidate for a urinalysis or blood sugar test by your family physician.

Lawn Brown Patch Can Be Controlled

College Station.—Brown patch is a rather common lawn disease in Texas. Most lawn grasses are susceptible but San Augustine lawns are most often attacked, says Extension Plant Pathologist Harlan Smith.

He says the disease starts as small spots in the lawn, but the circular brown areas spread rapidly and the grass soon takes on a dead appearance. Infected areas often regain their green coloring following changes in the weather, says Smith. Brown patch is most prevalent during humid weather on lawns with a dense turf when night temperatures remain 70 degrees F. and above.

To prevent the disease, Smith says to avoid overwatering at all times. If serious outbreaks of the disease occur, avoid watering during the late evening or at night and apply fungicides. The specialist recommends the use of Tersan, Semesan, Special Semesan, Kromad, Calo-chlor or Actidione. These chemicals, he adds, should be used in strict accordance with the manufacturer's recommendations, including precautions in handling them.

Brown patch disease is caused by the same fungus which causes serious diseases in cotton, Irish potatoes and many other crops. It lives in most soils regardless of the plants being grown and when conditions become favorable causes the disease outbreaks.

TUNA BISCUIT PIE

1 can oven-ready biscuits
4 slices process American cheese, 5x4x1/8-inch thick
7-oz. can tuna, drained and flaked

1/4 cup Pet Evaporated Milk
1 can tomato soup
1/3 cup Pet Evaporated Milk

Separate biscuits. With fingers, press 6 biscuits completely over bottom of a greased 9-inch pie pan. Cut rest of biscuits in two pieces to form half rounds. Stand pieces, cut side down, around edge of pan. Press the pieces against side of pan so there are no holes between them. Cover bottom of biscuit shell with cheese slices. Mix in a 1-quart bowl the tuna and 1/4 cup milk. Spread tuna mixture over cheese. Bake near center of 475 oven (extremely hot) for 10 minutes, or until biscuit shell is golden brown. Meanwhile, mix in a 1-quart saucepan the soup and 1/3 cup milk. Heat until steaming hot, but do not boil. Cut pie into 4 wedges and serve with the hot tomato sauce.
